(AKUŚALA-KARMAPATHA), referring to the hateful wish that harm will befall another. The ten courses of action are divided into three groups according to whether they are performed by the body, speech, or mind. Malice is classified as an unwholesome mental action (AKUŚALA-KARMAN), and forms a triad along with covetousness (ABHIDHYĀ) and wrong views (MITHYĀDṚṢṬI). Only extreme forms of defiled thinking are deemed an unwholesome course of mental action, such as the covetous wish to misappropriate someone else's property, the harmful intent to hurt someone, or the adherence to pernicious doctrines. Lesser forms of defiled thinking are still unwholesome (akuśala), but do not constitute a course of action. ¶ "Malice" is also listed as one of the five hindrances (NĪVARAṆA) to DHYĀNA, obstructing the dhy āna factor of rapture (PRĪTI). Malice is fostered by unwise attention (AYONIŚOMANASKĀRA) to objects causing aversion and is removed through frequent wise attention to loving-kindness (MAITRĪ), developing the meditation on loving-kindness, and recognizing the fact that every person's actions are his or her own and acknowledging the futility of anger. Malice is countered by faith (ŚRADDHĀ), the first of the five spiritual faculties (INDIYA), and by the enlightenment factors (BODHYAṄGA) of phy sical rapture (prīti) and equanimity (UPEKṢĀ). "Malice" is also included among the ten fetters (SAṂYOJANA) and is completely overcome only upon becoming an ARHAT.

vyāpti. (T. khy ab pa; C. bian/bianzhi; J. hen/henshi; K. p'y ŏn/p'y ŏnji /). In Sanskrit, "pervasion" or "concomitance"; a term used in logic to indicate the relation that obtains between the reason and the predicate in a correct sy llogism (PRAYOGA). There is positive concomitance (anvay a) and negative concomitance (VYATIREKA). For example, in order for the sy llogism (PRAYOGA) "Sound is impermanent because of being produced" to be correct, it must be true that whatever is impermanent must necessarily be produced. That is, the category of the reason must either be coextensive with or subsume the category of the predicate. In Tibetan monastic debate, the term figures in one of three answers that the defender of a position may give. When presented with a sy llogism or consequence (PRASAṄGA) by the challenger, the defender may (1) accept the thesis ('dod), (2) state that the reason is not a quality of the subject (rtags ma grub), or (3) state that there is no pervasion between the reason and the predicate (ma khy ab).

vyatireka. (T. ldog pa; C. lizuofa; J. risahō; K. ijakpŏp). In Sanskrit, in

Buddhist logic, "exclusion" or negative concomitance, as compared with positive concomitance (anvay a); in the sy llogism (PRAYOGA) "Sound is impermanent because of being produced," the negative concomitance is whatever is permanent is not produced; the positive concomitance is whatever is produced is impermanent. The term also is used in the discussion of "reverse" (vy āvṛtta; T. ldog pa), a term that occurs in epistemology and logic treatises to describe how thought (as opposed to direct perception, viz., PRATYAKṢA) apprehends its object via a negative route, whereby, for example, the idea of "chair" is arrived at through the exclusion of every

thing that is “nonchair.” This “non-nonchair” would be called the “reverse” (vy āvṛtta) of chair and the object of the concept of “chair.” See also APOHA.

vyavadāna. (P. vodāna; T. rnam by ang; C. jing; J. jō; K. chŏng). In Sanskrit, “purification” or “cleansing”; often contrasted with SAṂKLEŚA, meaning impurity, defilement, stain, or pollution. This vy avadāna/sa ṃkleśa dichotomy is used in a variety of way s. These are understood to be two distinct and opposite modes of causation that condition one’s future—one leading to suffering and other to the end of suffering. A being’s consciousness (VIJÑĀNA) is constantly entering into either the process of purification (vy avadāna) or defilement (saṃkleśa), depending upon actions and thoughts at any given moment. The process of purification may be undertaken by way of morality (ŚĪLA), concentration (SAMĀDHI), or wisdom (PRAJÑĀ). Purification is evidenced by the resultant presence of tranquillity (PRAŚRABDHI). In some MAHĀYĀNA texts, it is emphasized that the ultimate result of the process of purification is the realization that all phenomena (DHARMA) are ultimately devoid of any distinction between pure and impure. The term vy avadāna may also be used independently of saṃkleśa, as, for example, where a BODHISATTVA’s understanding of the DHARMA is said to be vy avadāna—pure and without blemish.

vyavahāra. (T. tha sny ad; C. sudi/y any u; J. zokutai/gongo; K. sokche/ŏnŏ /). In Sanskrit, “convention” or “designation”; often with the connotation of something superficial. Generally, this term refers to matters involved with the mundane or worldly realm, as opposed to those of the sacred or supramundane realm. Vy avahāra has two general applications in a Buddhist context. First, it is used to indicate the established social conventions, experiences, and practices of the quotidian world. In Buddhism, these conventions are contrasted with the strict

moral practices that conform to the ultimate truth (PARAMĀRTHASATYA) perceived by noble beings (ĀRYA). In this sense of a “conventional truth,” vy avahārasaty a is sy nony mous with SAṂVṚTISATYA. Second, and rather more commonly, this term is used in the context of language and discourse to indicate those conventional words used by ordinary, unenlightened beings to designate reality as they (mis)understand it. Here, again, the terms and the objects that they designate are merely conventional truths (saṃvṛtisaty a); the term vy avahārasaty a sometimes is used as a sy nony m. Since, according to the doctrine of emptiness (ŚŪNYATĀ), all phenomena are devoid of any inherent, unchanging nature, the linguistic expressions used to designate the things of this world are purely conventional designations and cannot contain or communicate the true nature of those phenomena. Through the power of their practice, buddhas a n d BODHISATTVAs have an inherent understanding of all such linguistic expressions (see NIRUKTI; PRATIBHĀNA) and use that knowledge to communicate the DHARMA to unenlightened beings. Buddhas and bodhisattvas, however, understand both the true and ineffable nature of the language they use, as well as the phenomena that language is meant to describe.

Vyavahārasiddhi. (T. Tha sny ad grub pa). In Sanskrit, “Proof of Convention”; a work attributed to NĀGĀRJUNA; it is no longer extant, but six stanzas are cited b y ŚĀNTARAKṢITA in his MADHYAMAKĀLAṂKĀRAVṚTTI. The verses state that a MANTRA is composed of letters just as a medicine is composed of ingredients, but the mantra and the medicine are neither the same as nor different from the elements of which they are comprised. Because they are dependently arisen, they cannot be said to be either existent or nonexistent; instead, they exist conventionally. This fact is true of all phenomena, including cessation (NIRODHA), which were set forth by the Buddha for specific purposes.

vyaya. (T. ’jig pa; C. mie; J. metsu; K. my ŏl). In Sanskrit and Pāli, “disintegration” or “destruction”; a close sy nony m of ANITYA, viz., “desinence” or “impermanence.” In the SARVĀSTIVĀDA ABHIDHARMA, “disintegration” or “desinence” constitutes the final of the four characteristics (CATURLAKṢAṆA) of compounded phenomena (SAṂSKṚTADHARMA), along with production or origination (JĀTI), continuance or maturation (STHITI), and “senescence” or decay (JARĀ). Vy ay a refers to the inevitable tendency of all compounded things to disintegrate, once the cause and conditions that sustain them vanish. The various abhidharma sy stems disagree as to whether these four

conditioned characteristics are natural qualities inherent in all compounded things; or whether they are external factors that act upon those things, such as through “forces dissociated from thought” (CITTAVIPRAYUKTASAṂSKĀRA). They also disagree as to whether the four occur successively over a period of time or whether they are four perspectives on a single instant (KṢAṆA).

W Wachirayanwarorot. [alt. Wachiray an Warot] (Thai) (1860–1921). See VAJIRAÑĀṆAVARORASA.

wajō. (). An alternate Japanese transcription of the Sanskrit term UPĀDHYĀYA, or “preceptor,” which is also pronounced kashō in the TENDAISHŪ. This term is often interchangeable with OSHŌ. See HESHANG.

wall contemplation. See BIGUAN.

Wanfosi. (J. Manbutsuji; K. Manbulsa). In Chinese, “Monastery of My riad Buddhas”; located outside the western gate of the old city wall of Chengdu in Sichuan province; currently only an archeological site. The monastery was founded during the Eastern Han period (25–220 CE) and survived through the end of the Ming dy nasty (1368–1644), changing its name several times in the course of its history. It was known as Anpusi during the Liang dy nasty (502–556), JINGZHONGSI during the Tang dy nasty (618–907), Jingy insi during the Song dy nasty (960–1279), and Zhulinsi, Wanfusi, and, finally, Wanfosi, during the Ming dy nasty (1368–1644), after which it fell into disrepair. Since the rediscovery of the site in 1882, some two hundred sculptures and other sacred objects have been uncovered during successive excavations, most of which are currently kept in the Sichuan Provincial Museum. The sculptures date

mainly from the North–south Dy nasties through the Tang periods. During the Tang, when the monastery was known as Jingzhongsi, it was the residence of the early CHAN monk CHŎNGJUNG MUSANG (680–756, alt. 684–762), a Korean monk from the Unified Silla dy nasty (668–935), whose prosperous Sichuan Chan lineage came to be known as the JINGZHONG ZONG line. His topony m Chŏngjung (Jingzhong) comes from this monastery of Jingzhongsi.

Wangnyunsa. (). In Korean, “Roy al Wheel Monastery ”; a major doctrinal (KYO) monastery located on Mt. Songak in the Kory ŏ capital of Kaesŏng. It was one of the ten monasteries built in the capital in 919 by Wang Kŏn (T’aejo, r. 918–943), the first king of the Kory ŏ dy nasty, in conjunction with his policy to establish his new state on the foundations of the religious power of

Buddhism. This monastery was the site for the ecclesiastical examinations (SŬNGKWA) for monks in the Doctrinal (Ky o) school, which were established during the reign of King Kwangjong (r. 949–975). Such important Kory ŏ Ky o monks as the state preceptor (KUKSA) Chigwang Haerin (984–1067) and the roy al preceptor (WANGSA) Hy edŏk Sohy ŏn (1038–1096) were appointed to their positions after taking the examinations at Wangny unsa. Although Wangny unsa seems not to have been as heavily patronized by the roy al family as some of the other monasteries in Kaesŏng, the Koryŏsa (“History of Kory ŏ”) notes a number of religious ceremonies that were held there during the dy nasty. The monastery burned to the ground in 1236 during the Mongol invasion of the Korean peninsula and was subsequently rebuilt in 1275 by King Ch’ungny ŏl (r. 1274–1308). Wangny unsa seems to have received special patronage during the reign of King Kongmin (r. 1351–1374). After his queen Noguk’s (d. 1365) death, Kongmin sited her memorial hall of Inhŭi chŏn at Wangny unsa; his own memorial hall, Hy emy ŏng chŏn, was built in 1376 at the west of the campus, the last reference to the monastery to appear in Korean historical materials. See also KWANGMYŎNGSA.

Wang o Ch’ŏnch’ukkuk chŏn. (C. Wang wu Tianzhuguo zhuan). In Korean, “Memoir of the Pilgrimage to the Five Regions of India”; composed by the Korean monk-pilgrim HYECH’O (d.u.; c. 704–780). After being ordained in Korea, Hy ech’o left for China sometime around 721 and spent perhaps three y ears on the mainland before departing for India (the Ch’ŏnch’ukkuk of the title) via the southern sea route in 724. After landing on the eastern coast of the subcontinent, Hy ech’o subsequently spent about three y ears on pilgrimage to many of the Buddhist sacred sites, including BODHGAYĀ, KUŚINAGARĪ, and SĀRNĀTH, and on visits to several of the major cities in north central India. He then traveled in both southern and western India before making his way toward the northwest, whence he journey ed on into KASHMIR, GANDHĀRA, and Central Asia. Making his way overland across the Central Asian SILK ROAD, Hy ech’o arrived back in Chinese territory in December of 727, where he spent the rest of his life. Like other pilgrims before him, Hy ech’o kept detailed notes of his pilgrimage, and his travelogue does not differ significantly in terms of sty le and content from the earlier and more famous records left by FAXIAN and XUANZANG;

unfortunately, unlike their works, only fragments of his account survive. His text is largely organized according to the kingdoms, regions, and pilgrimage sites that Hy ech'o visited. Hy ech'o offers a general description of the

geography, climate, economy, customs, and religious practices of each place he visited, and, when necessary, he clarifies whether MAHĀYĀNA, HĪNAYĀNA, or some combination of the two traditions was practiced at a specific site. Although Hy ech'o is known to have been the disciple of VAJRABODHI and AMOGHAVAJRA, considered by some as patriarchs of esoteric Buddhism, he makes no mention in his travelogue of tantric texts or practices. Hy ech'o does note the dilapidated state of some major STŪPAs and monasteries, the advance of the Turkic tribes into Buddhist areas, and the absence of any Buddhist practice in Tibet at that early date. In these and other respects, Hy ech'o's memoir serves as a valuable resource for the study of Buddhism and regional history along the Silk Road.

Wang Rixiu. () (d. 1173). Chinese lay Buddhist during the Song dy nasty (960–1279), who play ed an important role in revitalizing the PURE LAND (JINGTU) tradition, also known by his Buddhist name of Longshu. Although Wang was an accomplished Confucian scholar, he renounced all aspiration for civil office and instead devoted himself to pure land devotions, charitable activities, and a daily regimen of one thousand prostrations. Wang is best known as the author of Longshu zhengguan jingtu wen ("Longshu's Extended Writings on the Pure Land"), written in 1160, an extensive compendium of materials on the SUKHĀVATĪ pure land of AMITĀBHA, drawn from sūtras, commentarial writings, and biographical materials, with Wang's own exegeses. The collection offers practical instructions on how to have faith, and achieve rebirth, in the pure land, as well as a series of edify ing tales about the successful rebirths and miracles that others generated through their own devotions.

wangshen. (J. bōshin; K. mangsin). In Chinese, lit., "loss of body," viz., "self-immolation." See SHESHEN.

wangsheng. (J. ōjō; K. wangsaeng). In Chinese, "going to rebirth"; referring especially to rebirth in AMITĀBHA's PURE LAND of SUKHĀVATĪ. In its broadest sense, the term is sometimes used to refer to rebirth in either the three realms of existence (LOKADHĀTU) or other buddhas' or BODHISATTVAs' pure lands, such as the ABHIRATI pure land of the buddha AKṢOBHYA or the TUṢITA heaven of the bodhisattva MAITREYA. The term has a distinctive usage in the East Asian PURE LAND traditions, however, where it refers specifically to rebirth in sukhāvatī. The seminal pure land sūtra, the

SUKHĀVATĪVYŪHASŪTRA, regards this kind of rebirth as the achievement of the stage of nonretrogression (S. AVAIVARTIKA), one of the stages of the BODHISATTVA path. The Wangshenglun zhu , a commentary by TANLUAN o n VASUBANDHU's WULIANGSHOU JING YOUPOTISHE YUANSHENG JI (*Aparimitāyuḥsūtropadeśa), say s that rebirth in sukhāvatī is to be distinguished from the cy cle of rebirth in the three

realms of existence, because birth in the pure land frees one from any prospect of subsequent rebirths in SAṂSĀRA. In order to go to rebirth in sukhāvatī, the pure land tradition offered the simple practice of chanting the buddha Amitābha's name (C. NIAN FO; K. y ŏmbul; J. NENBUTSU; see also NAMU AMIDABUTSU). Ritual practices associated with taking rebirth in the pure land also include the deathbed recitation of the name of Amitābha, which is introduced in the Sukhāvatīvyūhasūtra as the eighteenth of the forty -eight vows that DHARMĀKĀRA made before he attained enlightenment. According to this vow, a person may be reborn in sukhāvatī by sincerely calling out Amitābha's name a mere ten times. The quality of rebirth in the pure land will be dependent on the practitioner's level of achievement, viz., as superior, average, or inferior. Superior disciples are those who arouse the thought of enlightenment (BODHICITTA) and maintain mindfulness of Amitābha, while cultivating meritorious qualities. Average disciples are those who arouse the thought of enlightenment and maintain mindfulness of Amitābha, but who do not cultivate meritorious qualities to the same extent as do superior disciples. Inferior disciples are those who arouse the thought of enlightenment and maintain mindfulness of Amitābha, but who have not y et consistently begun to cultivate meritorious qualities. Several collections of testimonials regarding the efficacy of wangsheng practice exist in China, including the seventh-century Wangsheng zhuan by Jiacai (fl. c. 627) and the FAYUAN ZHULIN by Daoshi (d. 683).

Wangsheng Jingtu zhuan. (). In Chinese, "Biographies of Those Who Have Gone to Rebirth in the Pure Land." See JINGTU ZHUAN.

Wang Wei. (J. Ō I; K. Wang Yu) (701–761). Chinese poet, painter, and musician during the Tang dy nasty and close associate of masters in the early CHAN school; his cognomen was Mojie. In 721, Wang Wei passed the imperial civil service examination and was appointed as assistant director of the Imperial Music Office. By 759, shortly after the An Lushan rebellion, he had risen to the high bureaucratic rank of right assistant director of the Department of State Affairs. Wang Wei is known to have maintained close relationships with several

major figures in the thriving Chan tradition and wrote the funerary inscriptions for such monks as JINGJUE (683–c. 760), author of the LENGQIE SHIZI JI, and the sixth patriarch (LIUZU) HUINENG. Although there is no direct evidence of Buddhist influences in his writing, it is commonly asserted that his close relations with these Chan figures contributed to Wang Wei's subtle and reflective descriptions of nature in his landscape poetry .

wangxiang. (J. mōzō; K. mangsang). In Chinese, "deluded thoughts," "fantasies," viz., thoughts that arise from ignorance (AVIDYĀ), craving (TṚṢṆĀ), conceptualization (VIKALPA), or inverted views (VIPARYĀSA), which must be eliminated in order to achieve enlightenment. The Chinese term corresponds variously to such Sanskrit terms as PARIKALPITA (imaginary), VIKALPA (thought or conception), and KALPANĀ (conceptual construction). In Korean SŎN Buddhism, distracting thoughts or fantasies

that arise during meditation practice, no matter how salutary, are denigrated as mangsang. The term has also entered vernacular Korean to mean “day dreaming,” “flights of fancy ,” or even “paranoia.”

Wangyal, Geshe. (1901–1983). Tibetan monk-scholar of the DGE LUGS sect who play ed an important role in the transmission of Tibetan Buddhism to the United States. He was born in the region of Kalmy kia of Czarist Russia, whose Mongol population practiced Tibetan Buddhism, and became a novice monk at the age of six. He was selected by AGVAN DORZHIEV to continue his studies in LHA SA, enrolling at the Sgo mang college of ’BRAS SPUNGS monastery in 1922. After nine y ears of study, he traveled to Beijing and then to Calcutta, where he was hired to serve as translator for Sir Charles Bell (1870–1945), British political officer for Sikkim, Bhutan, and Tibet, during his travels in China and Manchuria. In India, he met the British mountaineer Marco Pallis, with whom he spent four months in England in 1937. With the Chinese invasion of Tibet, he left Tibet for India, coming to the United States in 1955 at the invitation of the Kalmy k community of New Jersey. In 1958, he founded the Lamaist Buddhist Monastery of America, known in Tibetan as the Bslab gsum bshad grub gling (Labsum Shedrup Ling), in Freewood Acres, New Jersey, the first Tibetan Buddhist monastery in the United States. At the monastery and subsequently at Retreat House (later named Tibetan Buddhist Learning Center) in Howell, New Jersey, he brought a number of monks to the United States and gave teachings to a large number of students, several of whom went on to become scholars of Buddhism.

His full name was Dge bshes Ngag dbang dbang rgy al.

Wanshan tonggui ji. (J. Manzen dōkishū; K. Mansŏn tonggwi chip). In Chinese, “The Common End of My riad Good Practices,” in three rolls; a primer of Buddhist thought and practice composed by the Song-dy nasty CHAN master YONGMING YANSHOU (904–975). Written largely in catechistic sty le, th e Wanshan tonggui ji relies heavily upon scriptural quotations to answer questions raised concerning every thing from meditation and making offerings of flowers to reciting the name of the buddha AMITĀBHA (see NIANFO). The overall message of the text is that all practices done properly return to the “true mark” of reality (shixiang), and this message is often interpreted as supporting the notion of “the unity of Chan and the teachings” (Chan jiao y izhi) and that of “sudden awakening (followed by) gradual cultivation” (DUNWU JIANXIU).

Wanshousi. (). In Chinese, “Long Life Monastery ”; located on Mt. Jing, Hangzhou prefecture, in present-day Zhejiang province of China; the first of the so-called “five mountain” (wushan, cf. GOZAN) monasteries of the CHAN tradition in China. Wanshousi, also known as Jingshansi, was established by the Chan master FAQIN during the Tianbao reign (742–756) of the Tang dy nasty. During the Song dy nasty, the monastery was designated as a public monastery, or “monastery of the ten directions” (SHIFANG CHA), and was renamed on several occasions as Chengtian Chany uan (Upholding Heaven Chan Cloister), Nengren Chansi (Śāky amuni Chan Monastery),

and Xingsheng Wanshou Chansi (Flourishing of Holiness, Long Life Chan Monastery). Wanshousi attracted many eminent abbots, such as DAHUI ZONGGAO and WUZHUN SHIFAN, and flourished under their supervision. The famous Japanese pilgrims DŌGEN KIGEN and ENNI BEN'EN also studied at Wanshousi. The monastery was destroy ed in a conflagration at the end of the Yuan dy nasty but was reconstructed during the Hongwu era (1368–1398) of the Ming dy nasty. Largely through the efforts of the abbot Nanshi Wenxiu and others, Wanshousi regained some of its past glory .

Wanthadipani. (P. Va ṃsadīpanī). In Burmese, "Lamp on the History [of the Religion]"; the first of four Burmese thathanawin, or Buddhist chronicles, that were composed in Burma (My anmar) during the Konbaung dy nasty (1752– 1885). Written c. 1799 in the Burmese language by the monk Mehti SAYADAW, the text records the history of the THERAVĀDA saṅgha (S. SAṂGHA) from its

inception during the lifetime of the Buddha, through cy cles of decline and restoration in ancient India, Sri Lanka, and Burma, up through a reformation of the Burmese saṅgha begun at the capital AMARAPURA in 1784, of which Mehti Say adaw himself was a leader. The text relies heavily on the Pāli chronicles SAMANTAPĀSĀDIKĀ and MAHĀVAṂSA for its account of the ancient tradition in India and Sri Lanka. It takes its material for the history of Buddhism in Burma among the Py u, My amma (ethnic Burmans), and Mon peoples from a variety of indigenous sources, including the KALYĀṆĪ INSCRIPTIONS (1479), t h e YAZAWIN-KYAW (1502), and U Kala's MAHAYAZAWIN-GYI (c. 1730). The text concludes with an account of Mehti Say adaw's missionary activities in the city of Taungoo, where he was dispatched to propagate the new monastic reforms among the local saṅgha.

Warren, Henry Clarke. (1854–1899). One of the first American scholars of Buddhism, known for his translations from the Pāli; born in Boston, Massachusetts, in 1854. Warren suffered a crippling injury as a result of a childhood fall that left him with permanent spinal damage and excruciating phy sical pain throughout his life. After graduating from Harvard University in 1879, Warren studied with the eminent Sanskrit scholar Charles Lanman at Johns Hopkins University and, together with Lanman, founded the Harvard Oriental Series. Warren visited Oxford in 1884, where he met T. W. RHYS-DAVIDS and joined the PĀLI TEXT SOCIETY around the time of its foundation; he also made a substantial financial donation to the organization. Warren's best known work is an extensive anthology of Pāli materials, Buddhism in Translations, published in 1896 as the third volume in the Harvard Oriental Series. He also published an edition of BUDDHAGHOSA's VISUDDHIMAGGA as volume 41 in that series. Warren died in Cambridge, Massachusetts, at the age of forty -five as a result of his debilitating spinal injury .

wat. In Thai, Khmer, and Lao, the most common term for a VIHĀRA or monastic complex. Wat is derived from the Pāli term vatta, meaning "practice, function, observance," which by extension comes to be interpreted as a "place where practice is performed," and thus a "monastery " (wat). Although Pāli regulations technically

require a complex to have at least three monks in residence to be classified as a vihāra, the term wat is used in Thailand to refer to the deserted ruins of monasteries as well as to Hindu temples and Christian churches.

Wat Arun. In Thai, “Monastery of the Dawn,” deriving from the Sanskrit and Pāli Aruṇa, the personification of dawn; located in Bangkok on the west bank of the Chao Phray a River. After defeating the Burmese in 1767, King Taksin (Boromrāja IV) is said to have arrived at the Wat Makok (“Olive Monastery ”) at dawn and renamed it Wat Jaeng (“Bright Monastery ”). King RĀMA IV bestowed on the monastery its present name. The monastery is best known today for its tall prang, or Khmer-sty le tower, which was constructed during the reigns of kings Rāma II and Rāma III. The central tower is 250 feet tall and sy mbolizes Mount SUMERU. The temple was briefly the seat of the Emerald Buddha (see PHRA KAEW MORAKOT) before the image was moved to WAT PHRA KAEW in 1784.

Wat Benchamabophit. In Thai, “Monastery of the Fifth King,” deriving from the Sanskrit Pañcamapavitra, with pañcama (Thai, benchama) meaning fifth, and pavitra (Thai, bophit/bophitra) meaning holy or benificent one, a sy nony m for “king”; the monastery is commonly known in English as the “Marble Temple.” Located in Bangkok, it is one of the most renowned modern monasteries in Thailand. Construction began in 1900 at the request of the epony mous RĀMA V (Chulalongkorn), and the complex is built from Italian marble. It houses a large bronze statue of the Buddha called Phra Phuttha Chinnarat (Buddhajinarāja), which is a replica of the original. The ashes of Rāma V are enshrined under the image.

Wat Bowonniwet. [alt. Wat Bovoranives]. In Thai, “Monastery of Excellent Abode” (P. Pavaranivesa); the roy al monastery that is the Bangkok headquarters of the THAMMAYUT sect of Thai Buddhism. Built in 1829, it is most famous as the monastery where Prince Mongkut, the future king RĀMA IV and leader of the Thammay ut reform movement, served as abbot, beginning in 1836, before he ascended the throne in 1851. The future king lived as a monk (his ordination name was Vajirañā ṇa) for twenty -seven y ears, fourteen of which he spent as abbot of this monastery, before he returned to lay life in order to assume the throne of the Chakri dy nasty. Subsequent members of the roy al family have served the traditional period of temporary ordination as monks of this monastery ; his son, the eminent scholar-monk VAJIRAÑĀṆAVARORASA (1860–1921), was the long-time abbot of the monastery . The main temple enshrines the buddha image called Phra Phuttha Chinnasi (Buddhajinaśrī), said to date from 1357. Wat Bowonniwet is also the home of Mahamakut Buddhist University, one of

Thailand’s two public Buddhist universities.

Water and Land Ceremony. See SHUILU HUI.

Wat Mahathat. In Thai, “Monastery of the Great Relic” (P. Mahādhātu); the abbreviated name of several important Thai monasteries. ¶ Wat Mahathat in the ancient Thai

capital of AYUTHAYA was constructed in 1374 and served as the seat of the SAṄGHARĀJA of the Kamavasi (P. Gāmavāsi, lit. “city -dweller”) sect. The temple complex was expanded and restored several times before the city was sacked by the Burmese in 1767; it remains in ruins. Excavations in 1956 unearthed relics. ¶ Wat Phra Mahathat Woromaha Vihan (P. Mahādhātuvaramahāvihāra), located in Nakhon Si Thammarat and thus also known as WAT PHRA THAT NAKHON SI THAMMARAT, was founded c. 757 CE and was originally a ŚRĪVIJAYA MAHĀYĀNA Buddhist monastery. Its fam ous STŪPA, modeled on the MAHĀTHŪPA in Sri Lanka, was built in the early thirteenth century to house a tooth relic of the Buddha brought back from the island. ¶ The best-known of the contemporary wats with this name, Wat Mahathat Yuwaraja Rangsarit Raja Woramaha Wihan (P. Mahādhātuy uvarāja [Thai, Rangsarit] Rājavaramāhavihāra), dates from the Ay uthay a period (when it was called Wat Salak), and was named the relic temple for Bangkok in 1803. Because of its location near the palaces, it has often been used for roy al ceremonies. Mahachulalongkornrajavidy alay a, Thailand’s largest Buddhist university, was located on its grounds until 2008, when the main campus was moved to Wangnoi, Ay uthay a.

Wat Pho. In Thai, “Monastery of Awakening” (P. BODHI); also known as Wat Phra Chetuphon (P. JETAVANA); the oldest and largest monastery in Bangkok, constructed in the sixteenth century and occupy ing twenty acres of land. It was extensively rebuilt in 1781 by King Rāma I and renovated in the first half of the nineteenth century by King Rāma III. The site also houses Thailand’s largest reclining buddha image and the largest number of buddha images in the country. The reclining buddha image, constructed in the reign of King Rāma III, is 153 feet (forty -six meters) long and fifty feet (fifteen meters) high. Modeled out of plaster around a brick core, the image is finished in gold leaf, with mother-of- pearl inlay in the ey es. The feet display the 108 different auspicious characteristics of a buddha. In all, the monastery contains over a thousand buddha images, many from the ruins of the former capitals of AYUTHAYA and

SUKHOTHAI, and a total of ninety -five STŪPAs of various sizes. Other features are a series of 152 marble slabs depicting the second half of the epic Rāmakian story (the Thai version of the Hindu epic the Rāmāyaṇa), as well as numerous chapels, rock gardens, statues, and bell towers. Sometimes referred to as Thailand’s first university, Wat Pho also contains an ency clopedic collection of engravings and paintings dealing with astrology, botany, herbal medicine, massage, and y oga. The wat is still a center for teaching traditional Thai massage.

Wat Phra Kaew. [alt. Wat Phra Kaeo]. In Thai, “Temple of the Emerald Buddha,” perhaps the most famous Buddhist temple in Thailand, located on the grounds of the roy al palace in Bangkok. Much of the construction had been completed when Rāma I moved the Thai capital to Bangkok in 1785. It is a large- walled complex, containing dozens of golden pagodas, many shrines, and two libraries. Unlike most other Buddhist temples in Thailand, the complex does not include monastic quarters because of its

location inside the palace grounds. The temple is best known as the site of the Emerald Buddha, or PHRA KAEW MORAKOT, the most sacred buddha image in Thailand; Kaew is an indigenous Thai word for “glass” or “translucent”; morakot derives from the Sanskrit word for emerald (S. marakata).

Wat Phra Pathom Chedi. (P. Pa ṭhamacetī). In Thai, “Temple of the First Reliquary ”; the monastery built at the site of what is said to be the tallest Buddhist CAITYA (P. cetī) in the world at over 394 feet (120 meters); located in the Thai town of Nakhon Pathom. See PHRA PATHOM CHEDI.

Wat Phra Phutthabat. In Thai, “Monastery of the Buddha’s Footprint” (P. BUDDHAPĀDA); a Thai monastery located in Saraburi province. In the seventeenth century, a hunter encountered a large puddle of water that appeared to be a footprint of the Buddha (buddhapāda). Once this identification was verified, a monastery was built to enshrine the footprint. Visiting this monastery is considered a source of great merit, and it is traditional for the Thai king to make an annual pilgrimage to the site to pay homage to the relic.

Wat Phra Thammakai. (Thai). See DHAMMAKĀYA.

Wat Phra That Doi Suthep. In Thai, “Monastery of the Relic at Mt. Sudeva” (‘That’ is the Thai word for relic [P. dhātu], Suthep is the Thai pronunciation of

the Pāli proper name Sudeva, and Doi is a non-Thai northern word for mountain). A famous mountain monastery in northern Thailand, built on a site that has long been considered sacred and the home of guardian spirits. According to legend, the site was chosen in 1371 CE by a white elephant that was sent out by local monks to find an auspicious location for enshrining a relic (DHĀTU; ŚARĪRA). The site has been expanded several times with the addition of buildings, murals, bells, and parasols. See also KHRUBA SI WICHAI.

Wat Phra That Nakhon Si Thammarat. In Thai, “Monastery of the Relic (P. Dhātu) in Nakhon Si Thammarat” (P. *Nagara-Sīri-Dhammarāja), also known as Wat Phra Mahathat Woramaha Wihan (Mahādhātuvaramahāvihāra); the oldest and most revered Buddhist site in southern Thailand. The monastery dates to 757 CE and was originally a ŚRĪVIJAYA MAHĀYĀNA Buddhist monastery. Its fam ous STŪPA, modeled on the MAHĀTHŪPA in Sri Lanka, was built in the early thirteenth century to house a tooth relic brought back from the island. See also WAT MAHATHAT.

Wat Phra That Phanom. In Thai, “Monastery of the Relic (P. DHĀTU) in the city of Phanom” (Phanom is the Lao and Khmer term for mountain); the most revered Buddhist shrine in northeast Thailand, located in the town of Nakhon Phanom. The STŪPA on the site has a history dating back some fifteen hundred y ears, according to some local traditions, while other legends claim that it was originally built in 535 BCE, eight y ears after the death of the Buddha, as a reliquary for his breastbone. The structure is Lao in sty le, with a square base surmounted by slender tapering vertical columns in the shape of an elongated lotus bud. Its present appearance dates from

1977, after its predecessor collapsed under heavy rains in 1975, and is modeled after WAT THAT LUANG in Vientiane, Laos.

Wat Phu. [alt. Wat Phou; Vat Phu]. In Lao, “Mountain Monastery ”; an important Khmer monastery complex located in Champassak province on the Mekong River in southern Laos. The first monastery was probably constructed in the fifth century CE, although the surviving structures (now largely in ruins) date from the eleventh through the thirteenth centuries. Originally a Śaiva temple, the ruins contain a shrine to Śiva’s bull Nandin, as well as pediments depicting INDRA, Kṛṣṇā, and Viṣṇu. The temple complex was converted to Buddhist use in the thirteenth century, with Buddhist images added to many of the shrines. In 2001,

the site was designated a UNESCO World Heritage Site.

Wat Suthat Thepwararam. [alt. Wat Suthat]. In Thai, “Beautiful Noble Garden of the Devas” (P. Sudassanadevavarārāma); an important Thai monastery in Bangkok, founded by King Rāma I in 1807. It houses an image of the Buddha seated in the “earth-touching” (BHŪMISPARŚAMUDRĀ) pose. The image, known as Phra Sisakay amuni (derived from Śrī-ŚĀKYAMUNI), is considered the largest (over twenty -five feet tall) and oldest bronze buddha image in Thailand; it was brought from SUKHOTHAI by boat. The monastery is also known for its intricately carved wooden doors, created during the reign of Rāma II (r. 1809–1824) and now housed in the National Museum, and its murals of the Buddha’s previous lives, from the reign of Rāma III (r. 1824–1851). The large ordination hall of the monastery is considered one of the most beautiful in Thailand. The temple grounds also contain twenty -eight pagodas, representing the twenty -eight buddhas of the auspicious eon. The temple is the traditional seat of the brāhmaṇa priest who oversees important Thai roy al ceremonies, such as the annual plowing ceremony. In front of the monastery is a giant swing, once used in an annual festival in which y oung men tried to swing high enough to retrieve a sack of gold suspended at a height of seventy -five feet. The festival was banned in the 1930s because of the number of deaths that resulted from the competition.

Wat That Luang. In Lao, “Monastery of the Roy al STŪPA”; located in the Laotian capital of Vientiane, it is one of the most important Buddhist sites in Laos. According to legend, the original monastery was founded by monks sent by AŚOKA in the third century BCE. Relics from the early twelfth century have been uncovered, although these may derive instead from a site in modern-day northern Thailand. The prestige of That Luang may have been enhanced due to its proximity to earlier Buddhist sites. The present monastery was constructed on a small hill south of the city in 1818 during the reign of King Manthaturat (r. 1817–1836). It is said to have been built partially from branches of a BODHI TREE located near Wat Keo Fa. The large bronze and gilded buddha in the nave was transferred from the now defunct Wat Aham Mungkhun, located a short distance from That Luang. That Luang has long been one of the important ritual sites in Laos for Buddhist, folk, and roy al ceremonials. There are two large STŪPAs on the grounds. The golden funerary stūpa in front of the main hall

contains the ashes of the popular and last crowned Laotian king, Sisavang Vong (r. 1904–1959). The grand stūpa, which towers over the rear of the main hall, dates

from 1818 and is said to contain relics (DHĀTU; ŚARĪRA) of the Buddha. The wat also contains a number of smaller stūpas that contain ashes of kings, other members of the roy al family, and a variety of other dignitaries. The wat has one of Vientiane's larger communities of monks and novices.

Wat Traimit . In Thai, "Monastery of the Three Friends" (S. Traimitra), so named because it was founded by three friends who emigrated from southern China; its full name is Wat Traimit Wittay aram Wora Wihan (S. Traimitravidy ārāmavaravihāra). This monastery is located in the Thai capital of Bangkok and is commonly known in English as "The Temple of the Golden Buddha." It contains what is said to be the world's largest gold buddha image, named Phra Phuttha Maha Suwan Patimakon (P. Buddhamahāsuva ṇṇapaṭimā), seated in the "earth-touching" (BHŪMISPARŚAMUDRĀ) pose. The image itself is almost ten feet tall and is claimed to be composed of over five tons of solid gold. The statue, in the SUKHOTHAI sty le, is believed to have been originally installed in the ancient Thai capital of Sukhothai, perhaps in the thirteenth century. In order to protect it from being plundered by Burmese invaders, it was covered with a lay er of plaster. The plastered statue was eventually installed in Wat Phray a Krai during the reign of King Rāma III (r. 1824–1851). When that monastery fell into disrepair around 1931, the image was placed in storage. When it was being moved to its present location in the mid-1950s, the plaster cracked, revealing the golden buddha image inside.

Watts, Alan. (1915–1973). A widely read British Buddhist writer. Born in Kent, Watts was inspired to study Buddhism after reading such works as W. E. Holmes' The Creed of the Buddha. At the age of fifteen, he declared himself a Buddhist and wrote to the Buddhist Lodge of the Theosophical Society in London, becoming a student and protégé of the head of the Lodge (later the Buddhist Society), CHRISTMAS HUMPHREYS. At the age of nineteen, Watts wrote his first book, The Spirit of Zen, largely a summary of the writings of DAISETZ TEITARO SUZUKI. Shortly thereafter, he assumed the editorship of the journal Buddhism in England (later to become The Middle Way). In 1938, he married the American Eleanor Everett, the daughter of Ruth Fuller Everett (later, RUTH FULLER SASAKI). They immigrated to the United States during World War II (Watts, a pacifist, did not serve) and lived in New York, where Watts studied briefly with Shigetsu Sasaki, a Japanese artist and Zen practitioner known as Sokei-an. Watts gave seminars in New York and published a book entitled The

Meaning of Happiness. Shortly after his wife had a vision of Christ, Watts decided to become a priest and entered Seabury -Western Theological Seminary near Chicago. He became an Episcopal priest and served for five y ears as chaplain at Northwestern University, ultimately resigning from the priesthood shortly after his wife had their marriage annulled. He later worked for six y ears at the newly founded American

Academy of Asian Studies in San Francisco. He published The Way of Zen in 1957, followed by Nature, Man, and Woman in 1958, and Psychotherapy East and West in 1961. He supported himself as a popular author and speaker and play ed a leading role in popularizing Buddhism and Zen until his death in 1973.

weikza. [alt. weikza-do]. In Burmese, a “wizard,” deriving from the Pāli vijjādhara (S. VIDYĀDHARA). In Burmese popular religion, the weikza is portray ed as a powerful thaumaturge possessed of extraordinarily long life, whose abilities derive from a mastery of tranquillity meditation (P. samatha; S. ŚAMATHA) and a variety of occult sciences such as alchemy (B. ekiy a), incantations (P. manta; S. MANTRA), and runes (B. ing, aing). Collectively , these disciplines are called weikza-lam or “the path of the wizard.” Training in this path is esoteric, requiring initiation by a master (B. say a), and votaries ty pically are organized into semisecret societies called weikza-gaing (P. vijjāga ṇa). Although concerned with the acquisition of supernatural powers and an invulnerable body, these attributes are ultimately dedicated to the altruistic purpose of assisting good people in times of need and protecting the Buddha’s religion from evil forces. In this regard, weikza practitioners often act as healers and exorcists, and in the modern era weikza-say as with large followings are among the country ’s notables, who have built monumental pagodas and restored national shrines. The perfected weikza has the ability to live until the advent of the future buddha Mettey a (S. MAITREYA), at which time he can choose to pass into nibbāna (S. NIRVĀṆA) as an enlightened disciple (P. sāvaka arahant; S. ŚRĀVAKA ARHAT), vow to become himself a solitary buddha (P. paccekabuddha; S. PRATYEKABUDDHA) or a perfect buddha (P. sammāsambuddha; S. SAMYAKSAṂBUDDHA), or simply continue living as a weikza. Weikza practitioners ty pically eschew the practice of insight meditation (P. VIPASSANĀ; S. VIPAŚYANĀ) on the grounds that this might cause them to attain nibbāna too quickly. Although largely domesticated to the prevailing worldview of Burmese THERAVĀDA orthodoxy, weikza practice and orientation ultimately derive from outside the Pāli textual tradition and show

striking similarities to the Buddhist MAHĀSIDDHA tradition of medieval Bengal.

Weimojie suoshuo jing zhu. (J. Yuimakitsu shosetsuky ōchū; K. Yumahil sosŏl ky ŏng chu). An influential commentary on the VIMALAKĪRTINIRDEŚA. The commentary is attributed to KUMĀRAJĪVA, but it was actually written by his disciple SE N G ZHAO, who recorded the interpretations of his teacher and combined them with those offered by other of Kumārajīva’s disciples, such as DAOSHENG and Daorong. The commentary offers a paragraph-by -paragraph analy sis of the sūtra and follows the order of Kumārajīva’s Chinese translation of the sūtra. It is the first of the many commentaries on this famed rendering of the Vimalakīrtinirdeśa and is still the most frequently cited.

weinuo. [alt. weina] (S. *karmadāna/*karmādāna; T. las su bsko ba; J. ina/ino; K. y una /). In Chinese, “rector”; a term designating either the process of overseeing, or the specific supervisor of, such crucial monastic activities as apportioning dwellings,

managing the refectory, arranging sleeping quarters, cleaning the monastery grounds, etc. According to various VINAYA codes and Chinese pilgrimage accounts such as YIJING' s NANHAI JIGUI NEIFA ZHUAN, it was the rector's duty to strike instruments, such as gongs or chimes (GHAṆṬA), to remind others of the monastic schedule. Assemblies, meals, and services were conducted with the help of the rector's announcements. Because of his formal role in maintaining the monastic schedule, the rector may have thus come to serve as the principal supervisor or manager of daily activities in the monastery . The Sanskrit term *karmadāna does not appear in the extant corpus of Indian Buddhist literature, although it is attested in the MAHĀVYUTPATTI Sanskrit-Tibetan lexicon, and the reconstruction is confirmed in Chinese transcriptions. In India, however, karmadāna may not necessarily have referred to a specific monastic office, but rather to the general act of "assigning" (lit. giving, DĀNA) "duties" (lit. action, viz., KARMAN) within the monastery. The Chinese term weinuo, however, clearly refers to a monastic office. The term is ty pically parsed as a combination of a lexical translation and phonetic transcription, and means something like "regulating (wei) the [dā]na," an interpretation related to the literal sense of the Sanskrit term as "assigning duties," and becomes used in East Asian Buddhism as the specific title of a monastic administrator who delegates responsibilities within the monastery —and thus a "rector." According to the Chinese monastic codes (QINGGUI), the rector was

responsible for all matters regarding the SAṂGHA and especially the saṃgha hall (SENGTANG). The rector not only was in charge of the phy sical maintenance of the hall itself, but he also was called upon to settle issues, such as the determination of relative seniority or the appropriate punishment for transgressions committed by residents of the saṃgha hall. The rector had the responsibility for appointing various low-ranking positions within the monastery, such as attendants, and conducted the tea ceremony. The weinuo also was in charge of leading the formal chanting at daily services, which involved much use of gongs and percussion instruments; weinuo is thus sometimes translated as functionally equivalent to the Western monastic office of "precentor," the leader of the monastic choir. In Korean monasteries, the y una serves as a "rector" in that he has formal responsibility for enforcing discipline, making work assignments, and arranging the time for group work; in addition, however, he also serves as nominal head of the meditation compound in the monastery and spiritual advisor to the meditation monks.

Weishan jingce. (J. Isan Ky ōsaku [alt. Keisaku]; K. Wisan Ky ŏngch'aek). See GUISHAN JINGCE.

Weishan Lingyou. (J. Isan Reiy ū; K. Wisan Yŏngu) (771–853). Alternate Chinese pronunciation of GUISHAN LINGYOU, cofounder of the GUIYANG ZONG [alt. Weiy ang zong] of the mature CHAN tradition. See GUISHAN LINGYOU.

Weituo tian. (J. Idaten; K. Wit'a ch'ŏn). A Buddhist guardian deity, who is especially popular in East Asia, where he is often designated as a BODHISATTVA (pusa) or

divinity (DEVA; C. tian). Weituo is connected to the god Kārtikey a, also known as Skanda, whom the Buddhist tradition appropriated from the Hindu pantheon. Kārtikey a, the six-headed son of Śiva, is a Hindu god of war who helps defend the gods; in Buddhism, he became one of the many guardian deities who protect the dispensation, its sacred objects, and its sacred spaces. Weituo is the spirit commander of the thirty -two divine generals subordinate to the four heavenly kings (CATURMAHĀRĀJA; see LOKAPĀLA), as well as one of the eight generals under VIRŪḌHAKA, the heavenly king of the southern quarter of the world. He is also identified with KUMĀRABHŪTA (C. Dongzhen). His East Asian name "Weituo" is apparently a mistaken Sinographic transcription from "Sijiantuo" or "Jiantuo tian," both Chinese

transcriptions of Skanda. Weituo's role as a dharma protector (DHARMAPĀLA) is reflected in a story from the Daoxuan lüshi gantong lu ("Preceptor Daoxuan's Record of Miraculous Stories," c. seventh century), written by the Chinese VINAYA master DAOXUAN (596–667), which relates that Weituo was instructed by the dy ing Buddha to protect the dharma whenever it was disturbed by demonic forces (MĀRA). From the Tang dy nasty onward in China, Weituo was considered the guardian of monasteries and Buddhist practitioners, as well as a sy mbol of fierce determination in spiritual training. One of Weituo's specific roles was to protect the STŪPAS that enshrine the Buddha's relics (ŚARĪRA). In a popular story involving Weituo, a group of malevolent demons steals one of the Buddha's tooth relics immediately following his death and cremation. Weituo battles the demons, saves the relic, and thereby earns a reputation as a fierce protector of the dharma. Weituo is ty pically depicted as a y oung man in full armor, with the headgear of a Chinese general. He is also often shown leaning on his weapon, sometimes a sword, but usually a VAJRA. In many East Asian monasteries, Weituo's image is found to one side of, and facing, the Buddha image in the main shrine hall (TAEŬNG CHŎN). Weituo is also seen in the company of, and sometimes back to back with, AVALOKITEŚVARA and MAITREYA. His visage also frequently appears at the end of Chinese editions of the SŪTRAs, as a reminder of his role in protecting the dharma.

Weixin jue. (J. Yuishinketsu; K. Yusim ky ŏl). In Chinese, "Essentials of Mind Only "; an exposition on CITTAMĀTRA by the CHAN master YONGMING YANSHOU. In this short treatise, Yongming launched a critique of more than 120 differing Buddhist positions, and argued instead that these variant views are but manifestations of a single, true mind. By cutting through to this mind, Yongming argued that all conceptual dichotomies (e.g., gain and loss, right and wrong, sudden and gradual) would be brought to an end and an inconceivable awakening would be attained.

weixin jingtu. (J. y uishin no jōdo; K. y usim chŏngt'o). In Chinese, "the m ind-only PURE LAND"; an interpretation of the pure land influential in the PURE LAND, CHAN, HUAYAN, TIANTAI, and esoteric schools; sy nony mous with the phrase "AMITĀBHA Buddha of one's own nature/mind" (zixing Mituo/weixin Mituo/jixin Mituo). Rather

than seeing Amitābha's pure land of SUKHĀVATĪ as a phy sical land located to the west of our world sy stem, this interpretation suggests that the pure land is actually identical to, or coextensive

with, the mind itself. One understanding of this interpretation is that the concept of "pure land" is simply a metaphor for the innate brilliance and eternality of one's own mind. In this case, "the mind-only pure land" stands in distinction to the idea of the pure land as an objective reality, and many pure land exegetes rejected this interpretation for imply ing that the pure land existed only metaphorically. In other interpretations, a pure land is understood to manifest itself differently to beings of different spiritual "grades." In this case, "mind-only pure land" is the highest level, which is accessible or visible only to those enlightened to the true nature of the mind; by contrast, the objectively real pure land is an emanation of the true pure land that manifests itself to unenlightened practitioners, but nonetheless is still a literal realm into which one could be reborn. In this case, "the mind-only pure land" is one level of the pure land, which does not, however, negate the reality of an external pure land. Such an interpretation was more amenable to pure land devotees and was sometimes incorporated into their exegetical writings.

Weiyang zong. (J. Igy ōshū; K. Wiang chong). Alternate Chinese pronunciation of the GUIYANG ZONG, one of the so-called "five houses" (wu jia; see WU JIA QI ZONG), or distinct lineages, that developed within the mature CHAN tradition during the late-Tang dy nasty . See GUIYANG ZONG.

Wencheng. (T. Rgy a mo bza' kong jo, C. Wencheng gongzhu) (d. 680). The Tang-dy nasty Chinese princess who married the Tibetan king SRONG BTSAN SGAM PO. Although she was in fact a person of little historical significance, she figures prominently in competing Tibetan and Chinese versions of the introduction of Buddhism into Tibet and of Sino-Tibetan relations. According to Tibetan sources, she was given in marriage to the Tibetan king under threat of invasion and became one of the king's five wives: three Tibetans, one Nepalese, and one Chinese. The Nepalese and Chinese brides were Buddhists and converted their husband to the faith. Each also brought a buddha image as part of their dowry. Princess Wencheng brought the JO BO SHĀKYAMUNI, eventually housed in the JO KHANG in LHA SA, and considered the most sacred buddha image in Tibet. The Nepalese princess BHṚKUTĪ brought the JO BO MI BSKYOD RDO RJE, housed at RA MO CHE. The journey of the Chinese princess and her statue was fraught with difficulties, as the giant demoness (srin mo), whose supine body is the landscape of Tibet, tried to impede their progress. As a result, the king built a series of temples to pin down her body (MTHA' 'DUL

GTSUG LAG KHANG). Later sources would identify the Chinese princess as an incarnation of the bodhisattva TĀRĀ. Chinese sources depict the princess as a kind of cultural ambassador, helping to introduce Han culture into the wilds of Tibet and convincing her husband to abandon a variety of barbaric customs. This view of Princess Wencheng has been promoted in various Chinese media (including martial

arts films) since the Chinese invasion of Tibet in 1950. Contrary to both versions, it appears that Princess Wencheng arrived at the Tibetan court as a twelve-y ear-old girl, intended as the bride of Srong btsan sgam po's son, who had died by the time that she arrived. Srong btsan sgam po, by then an old man, made her one of his wives, dy ing himself a few y ears later. She did not produce a roy al heir and does not seem to have play ed a significant role at court.

wenda. (J. mondō; K. mundap). In Chinese, lit. "question and answer"; pedagogical technique used in the CHAN (J. ZEN; K. SŎN) school that involves an "exchange" or "dialogue" between a Chan master and a disciple regarding the Buddhist teachings. The exchange often consists of questions from the disciple and the master's response, but sometimes the master would also question the disciple to check his or her level of understanding and attainment. The master's answers are ty pically not a theoretical or discursive response to the question, but instead will employ logical contradiction, contextual inappropriateness, and illocutionary uses of language in order to challenge the understanding of the student. The master's answer might not even be a verbal response at all but might instead employ "the stick and the shout" (BANGHE) as a way of goading the student out of his conventional way s of comprehension. The ultimate goal is to prompt not mere intellectual understanding but an experience of awakening (C. WU; J. SATORI). The recorded say ings (YULU) of eminent Chan masters often include a section on their wenda. These wenda constitute a major part of the GONG'AN literature of the Chan tradition, and the practice of wenda is itself performed using phrases drawn from the gong'an texts. During the Song dy nasty in China, Chan monks were appointed to monastic positions, such as "interrogating monk" (wenseng) or "Chan receptionist" (chanke), whose responsibility was to ask questions of the master on behalf of the congregation, transforming wenda into a formal, ritualized occasion.

Wenyan. (C) (). See YUNMEN WENYAN.

Wenyi. (C) (). See FAYAN WENYI.

wenzi Chan. (J. monjizen; K. muncha Sŏn). In Chinese, "lettered Chan"; a designation coined by JUEFAN HUIHONG (1071–1128) during the Northern Song dy nasty (960–1127) to refer to a literati sty le of Chan exegesis that valorized belle lettres, and especially poetry, in the practice of CHAN. Huihong himself traces the origins of "lettered Chan" to the "five ranks" (WUWEI) of CAOSHAN BENJI (840–901), although Caoshan himself attributes the five ranks to his teacher DONGSHAN LIANGJIE (807–869); in these ranks, Huihong finds the first evidence within the Chan tradition that the manipulation of language in the analy sis of the say ings attributed to the ancient Chan masters can bring about awakening. This sty le of Chan is especially emblematic of monks in the HUANGLONG PAI collateral lineage of the LINJI ZONG.

Wesak. (S. Vaiśākha; P. Vesākha; T. Sa ga zla ba). A modern rendering of Vesākha, the Pāli name for the fourth lunar month of the traditional Indian calendar (thus corresponding to April–May in the solar calendar); by extension, the term refers to the

important event(s) in the life of the Buddha that occurred during that month and to their annual commemoration. According to the THERAVĀDA and Tibetan traditions, it was on the full moon of the fourth lunar month that the Buddha was born, was enlightened, and passed into PARINIRVĀṆA. This date is therefore the most important in the Buddhist calendar of many traditions. Wesak is widely celebrated across much of the Buddhist world, but especially in Southeast Asia, where it is considered an especially important time to perform meritorious deeds. According to many East Asian traditions, the full moon of the fourth lunar month marks only the date of the Buddha's birth, with his enlightenment and passage into PARINIRVĀṆA occurring in the twelfth and eleventh lunar months, respectively ; Wesak is therefore not nearly as important in the East Asian calendar as it is in Southeast Asia and Tibet.

Wŏlchŏngsa. (). In Korean, "Lunar Essence Monastery "; the fourth district monastery (PONSA) of the contemporary CHOGYE CHONG of Korean Buddhism, located on Odaesan (see WUTAISHAN) in Kangwŏn province. The monastery 's history is closely linked to the VINAYA master CHAJANG (fl. c. 590–658). While Chajang was on pilgrimage at Wutaishan in China, he came across a my sterious old monk who interpreted a prophetic dream he had had and gave him relics (K. sari; S. ŚARĪRA) of the buddha to take back to Korea with him. Seven day s later, a dragon told him to return to Odaesan in Korea to build a monastery ; in 643, Chajang arrived at Odaesan, where he eventually constructed Wŏlchŏngsa. Wŏlchŏngsa's main shrine hall, Chŏkkwang chŏn (Calm Radiance Hall), enshrines an image of ŚĀKYAMUNI as well as a my sterious statue that was found in the diamond pond south of the monastery. This statue, delicately carved in a sty le common to the eleventh century, is believed to be of BHAIṢAJYAGURU. In front of the main hall is a nine-story octagonal pagoda, fifty feet (15.2 meters) high, that was constructed in the tenth century. Skillfully carved and multiangled, it is representative of Kory ŏ-era STŪPAs. In front of the stūpa is a seated BODHISATTVA, perhaps MAÑJUŚRĪ, making an offering. The statue has been carved with detailed attention to ornamental accessories and clothing. The Chŏngmy ŏl pogung (Precious Basilica of Calm Extinction) houses the relics of the Buddha that Chajang brought back to Korea and is one of four major shrine halls in Korea that does not enshrine a buddha image (the relics take the place of an image). One of

Wŏlchŏngsa’s most famous residents during the twentieth century was the monk HANAM CHUNGWŎN (1876–1951), who helped save some of its buildings from soldiers who had been ordered to burn them down during the Korean War (seventeen buildings were unfortunately burned and had to be reconstructed). Sangwŏnsa, one of Wŏlchŏngsa’s branch monasteries (MALSA), is famous among Korean monasteries for its spectacular scenery and is a popular tourist stop.

Wŏnbulgyo. (). In Korean, “Wŏn Buddhism” or “Consummate Buddhism”; a modern Korean new religion, founded in 1916 by PAK CHUNGBIN (1891–1943), later known by his sobriquet SOT’AESAN. Based on his enlightenment to the universal order of the “one-circle image” (IRWŎNSANG), Sot’aesan sought to establish an ideal world where this universal order could be accomplished in and through ordinary human life, rather than the specialized institution of the monastery. After perusing the scriptures of various religions, Sot’aesan came to regard the teachings of Buddhism as the ultimate source of his enlightenment and in 1924 named his new religion the Pulpŏp Yŏn’gu hoe (Society for the Study of the Buddhadharma); this organization was later renamed Wŏnbulgy o in 1947 by Sot’aesan’s successor and the second prime Dharma master of the religion, Chŏngsan, a.k.a. Song Ky u (1900–1962). Since the tenets and institutions of Wŏnbulgy o are distinct from those of mainstream Buddhism in Korea, the religion is usually considered an indigenous Korean religion that is nevertheless closely aligned with the broader Buddhist tradition. Sot’aesan used the “one-circle image” as a way of representing his vision of the Buddhist notion of the “DHARMAKĀYA buddha” (pŏpsinbul), which was reality itself; since this reality transcended all possible forms of conceptualization, he represented it with a simple circle, an image that is now display ed on the altar at all Wŏnbulgy o temples. Sot’aesan’s religious activities were also directed at improving the daily lot of his adherents, and to this end he and his followers established thrift and savings institutions and led land reclamation projects. Wŏnbulgy o has focused its activities on the three pillars of religious propagation (ky ohwa), education (ky oy uk), and public service (chasŏn): for example, the second prime master Chŏngsan established temples for propagation, schools such as Wŏn’gwang University for education, and social-welfare facilities such as hospitals and orphanages. These activities, along with international prosely tization, were continued by his successors Taesan, Kim Taegŏ (1914–1988), who became the third prime master in 1962, Chwasan, Yi Kwangjŏng (b. 1936), who became the fourth prime master in 1994, and Ky ŏngsan, Chang Ŭngch’ŏl (b. 1940), who became the fifth prime master in 2006. The two representative scriptures of Wŏnbulgy o are the Wŏnbulgyo chŏngjŏn (“Principal Book of Wŏn Buddhism”), a primer of the basic tenets of Wŏnbulgy o, which was published by Sot’aesan in 1943, and the Taejonggyŏng (“Scripture of the Founding Master”), the dialogues and teachings of Sot’aesan, published in 1962 by his successor Chŏngsan.

Wŏnbulgy o remains an influential religious tradition in Korea, especially in the Chŏlla region in the southwest of the peninsula; in addition, there currently are over fifty Wŏnbulgy o temples active in over fourteen countries.

Wŏnch'ŭk. (T. Wen tsheg; C. Yuance; J. Enjiki) (613–695). In Korean, "Consummate Keenness"; Silla-dy nasty monk renowned for his expertise in Sanskrit and YOGĀCĀRA doctrine, who was influential in Chinese and in later Tibetan Buddhism. Wŏnch'ŭk is said to have left for Tang-dy nasty China at the age of fifteen, where he studied the writings of PARAMĀRTHA and the She lun, o r MAHĀYĀNASAṂGRAHA, under Fachang (567–645). Wŏnch'ŭk later became the disciple of the Chinese pilgrim-translator XUANZANG who, in accordance with the new Yogācāra teachings of DHARMAPĀLA that he had brought back from India (see FAXIANG ZONG), denounced the existence of the ninth "immaculate consciousness" (AMALAVIJÑĀNA), which Paramārtha had advocated, and taught instead the innate impurity of the eighth "storehouse consciousness" (ĀLAYAVIJÑĀNA). These crucial doctrinal issues are said to have caused a split between the major disciples of Xuanzang: Wŏnch'ŭk and his followers came to be known as the Ximing tradition in honor of Wŏnch'ŭk's residence, XIMINGSI, and was said to have been more open to positions associated with the earlier SHE LUN ZONG; and the lineage of his fellow student and major rival KUIJI (632–682), which came to be known as the Ci'en tradition after Kuiji's monastery, Da CI'ENSI, and honed more rigidly to Xuanzang and Dharmapāla's positions. Wŏnch'ŭk's famed Haesimmilgyŏng so (C. Jieshenmi jing shu), his commentary on Xuanzang's translation of the SAṂDHINIRMOCANASŪTRA, includes traces of Wŏnchŭk's earlier training in She lun zong thought and Paramārtha's expositions on the controversial notion of amalavijñāna. Wŏnchŭk regarded the amalavijñāna as simply another name for the inherent purity of the ālay avijñāna, but, unlike Xuanzang, he considered the ālay avijñāna to be essentially pure in nature. He also disagreed with Xuanzang's contention that the ICCHANTIKA could not attain buddhahood. Hence, his work seems to be an attempt to reconcile the divergences between the old Yogācāra of Paramārtha and the new Yogācāra of Xuanzang. Wŏnch'ŭk's commentary to the Saṃdhinirmocanasūtra was extremely popular in the Chinese outpost of DUNHUANG, where CHOS GRUB (Ch. Facheng; c. 755–849) translated it into Tibetan during the reign of King RAL PA CAN (r. 815–838). Only nine of the ten rolls of the commentary are still extant in Chinese; the full text is available only in its Tibetan translation, which the Tibetans know as the "Great Chinese

Commentary " (Rgy a nag gi 'grel chen) even though it was written by a Korean. Five centuries later, the renowned Tibetan scholar TSONG KHA PA drew liberally on Wŏnch'ŭk's text in his major work on scriptural interpretation, LEGS BSHAD SNYING PO. Wŏnch'ŭk's views were decisive in Tibetan formulations of such issues as the hermeneutical stratagem of the three turnings of the wheel of the dharma (DHARMACAKRAPRAVARTANA), the nine ty pes of consciousness (VIJÑĀNA), and the quality and nature of the ninth "immaculate" consciousness (amalavijñāna). Exegetical sty les subsequently used in all the major sects of Tibetan Buddhism, with their use of

elaborate sections and subsections, may also derive from Wŏnch'ŭk's commentary. Consequently, Wŏnch'ŭk remains better known and more influential in Tibet than in either China or Korea. Wŏnch'ŭk also wrote a eulogy to the PRAJÑĀPĀRAMITĀHṚDAYASŪTRA, and commentaries to the RENWANG JING and Dharmapāla's *VIJÑAPTIMĀTRATĀSIDDHI, the latter of which is no longer extant.

Wŏndon sŏngbul non. (). In Korean, "The Perfect and Sudden Attainment of Buddhahood"; posthumous publication on the convergence of HWAŎM (C. HUAYAN) and SŎN (C. CHAN) thought and practice by the mid- Kory ŏ reformer POJO CHINUL (1158–1210). The Wŏndon sŏngbul non is said to have been found in a wooden box belonging to Chinul after his death and published posthumously by his disciple CHIN'GAK HYESIM. The text provides Chinul's most sustained presentation of his views on Hwaŏm thought and practice, which were profoundly influenced by LI TONGXUAN's (635–730) idiosy ncratic commentary on the AVATAṂSAKASŪTRA, the HUAYAN JING HELUN. Chinul seeks to demonstrate that the sudden understanding-awakening (K. haeo; C. JIEWU; viz., knowing that one is a buddha) is attained at the first level of the ten stages of faith (sipsin), which were usually thought to be a preliminary stage of training, rather than at the first arousing of the thought of enlightenment (BODHICITTOTPĀDA), which occurred at the first of the ten stages of abiding (sipchu). Chinul supports this argument by drawing on the Hwaŏm concept of "nature origination" (XINGQI), which he finds superior to the alternative Hwaŏm theory of the conditioned origination of the dharmadhātu (FAJIE YUANQI). This Hwaŏm understanding at the very inception of practice that one is endowed with the fundamental nature of buddhahood is compared to the CHAN and SŎN notion of "seeing one's nature and attaining buddhahood" (JIANXING CHENGFO). But because Chan/Sŏn does not sanction the prolix

conceptual descriptions of this experience that are found in the Hwaŏm school, it is the true "perfect and sudden" school. See also YUANDUN JIAO.

Wŏn'gam Kuksa. (K) (). See MIRAM CH'UNGJI.

Wŏn'gwang. (C. Yuanguang) (542–640). In Korean, "Consummate Brilliance"; Silla-dy nasty monk known as an early exponent of the VINAYA tradition in Korea. Wŏn'gwang went to the Chinese kingdom of Chen and studied various texts such as the *TATTVASIDDHI and the MAHĀPARINIRVĀṆASŪTRA. After the fall of the Chen dy nasty, Wŏn'gwang traveled to Chang'an, where he attended lectures on ASAṄGA'S MAHĀYĀNASAṂGRAHA delivered by the monk Tanqian (542–607). Wŏn'gwang returned to Korea in 600 and devised a set of lay precepts known as the "five secular injunctions" (Sesok ogy e) at the request of two "flower y ouths" (hwarang) named Kwisan (d.u.) and Ch'uhang (d.u.). These injunctions adapted Confucian and Buddhist moral codes to the needs of a militant society involved in the ongoing peninsular reunification wars. The five are (1) loy alty, (2) filial piety, (3) trust, (4) not killing wantonly, and (5) not retreating in battle. According to his biography in the HAEDONG KOSŬNG CHŎN, Wŏn'gwang was also a renowned thaumaturge and tamer of

autochthonous spirits. He passed away at the roy al monastery of HWANGNYONGSA. Two commentaries on the TATHĀGATAGARBHASŪTRA, the Taebangdŭng yŏraejanggyŏng so and Yŏraejanggyŏng sagi, are attributed to Wŏn'gwang, but neither is extant.

Wŏnhyo. (C. Yuanxiao; J. Gangy ō) (617–686). In Korean, "Break of Dawn"; famous monk of the Silla dy nasty and probably one of the two most important monks in all of Korean Buddhist history, who was renowned for both his scholastic achievements and his efforts to propagate Buddhism among the common people. He is reputed to have written over one hundred commentaries, of which some twenty are extant. According to the hagiographical accounts of Wŏnhy o in the SONG GAOSENG ZHUAN and the SAMGUK YUSA, Wŏnhy o tried, but failed, to travel to China with his friend ŬISANG in order to study with the Chinese translator and YOGĀCĀRA exegete XUANZANG. While on the road, Wŏnhy o is said to have attained enlightenment after a traumatic experience in which he discovered that the earthen sanctuary in which the two travelers had taken refuge one stormy night was in fact a tomb. This experience prompted his awakening that all things are created by mind, which led Wŏnhy o to realize that

he did not need to continue on to China in order to understand Buddhism. (Ŭisang did travel to the mainland, where he studied with the early HUAYAN exegete ZHIYAN.) As the legends about Wŏnhy o's enlightenment experience evolve, this story becomes even more horrific: Wŏnhy o is said to have discovered that the sweet water he drank in the tomb to slake his thirst was actually offal rotting in a skull, a traumatic experience that immediately prompted his realization that the mind creates all things. Wŏnhy o spent much of his life writing commentaries to the many new translations of Buddhist scriptures then being introduced into the Korean peninsula. A brief affair with the widowed princess of Yosŏk palace led to the birth of a son, who would grow up to become the famous literatus, Sŏl Ch'ong (c. 660–730), the creator of Idu ("clerical writing"), the earliest Korean vernacular writing sy stem. After the affair, Wŏnhy o changed into lay clothes and traveled among the peasantry, singing and dancing with a gourd he named Unhindered (Muae) and practicing "unconstrained conduct" (K. muae haeng; C. WU'AI XING). ¶ In Wŏnhy o's many treatises, he pioneered a hermeneutical technique he called "reconciling doctrinal controversies" (HWAJAENG), which seeks to demonstrate that various Buddhist doctrines, despite their apparent differences and inconsistencies, could be integrated into a single coherent whole. This "ecumenical" approach is pervasive throughout Wŏnhy o's works, although its basic principle is explained chiefly in his Simmun hwajaeng non ("Ten Approaches to the Reconciliation of Doctrinal Controversy," only fragments are extant), TAESŬNG KISILLON SO ("Commentary to the 'Awakening of Faith According to the Mahāy āna'"), and KŬMGANG SAMMAEGYŎNG NON ("Exposition of the VAJRASAMĀDHISŪTRA"). Wŏnhy o was versed in the full range of Buddhist philosophical doctrines then accessible to him in Korea, i n c l u d i n g MADHYAMAKA, YOGĀCĀRA, Hwaŏm, and TATHĀGATAGARBHA thought, and hwajaeng was his attempt to demonstrate how all

of these various teachings of the Buddha were part of a coherent heuristic plan within the religion. Since at least the twelfth century, Wŏnhy o's hwajaeng exegesis has come to be portray ed as characteristic of a distinctively Korean approach to Buddhist thought.

wŏnju. (C. y uanzhu; J. inju). In Korean, lit. "chief of the campus"; the preferred term in Korean monasteries for the "prior." See JIANYUAN.

Wŏnmyo Yose . () (1163–1240). In Korean, "Consummate Sublimity, Knower of the World"; monk during the mid-Kory ŏ dy nasty, who is considered

an influential figure in the revitalization of the Korean CH'ŎNT'AE (C. TIANTAI) tradition. Yose also play ed a major role in the popularization of a movement known as the PAENGNYŎN KYŎLSA, or White Lotus retreat society (see also JIESHE; BAILIAN SHE). Yose was ordained by the monk Ky unjŏng (d.u.) at the monastery of Ch'ŏllaksa in present-day Hapch'ŏn. In 1185, he passed the clerical examinations (SŬNGKWA) and led a retreat at a monastery known as Changy ŏnsa on Mt. Yŏngdong. The eminent SŎN monk POJO CHINUL is known to have sent Yose a letter with a poem at that time, inviting Yose to his "Samādhi and Prajñā retreat society " (CHŎNGHYE KYŎLSA) at Kŏjosa. Yose subsequently joined the society and practiced Sŏn meditation with Chinul, but left the society when Chinul moved the society to the monastery of Kilsangsa (present-day SONGGWANGSA). With the support of some prominent lay followers, Yose restored a group of dilapidated buildings on Mt. Mandŏk and established a White Lotus Society there in 1211. Yose continued to reside at the site after the restoration was completed five y ears later in 1216. He was posthumously awarded the title of state preceptor (K. kuksa; C. GUOSHI) and given the funerary name Wŏnmy o. He is the reputed author of the Samdaebu chŏryo, which is no longer extant.

Wŏnyung chong. (). In Korean, "Consummate Interfusion school"; an alternate name for the Hwaŏm (C. HUAYAN) school in Korea. See KYO.

World Fellowship of Buddhists. The first international Buddhist organization, founded in Colombo, Sri Lanka, in 1950, by representatives from twenty -seven countries, and headed by GUNAPALA PIYASENA MALALASEKERA (1899– 1973). Although most Buddhist traditions around the world are actively involved in the organization, THERAVĀDA Buddhists of Southeast Asia have traditionally play ed a central role: all its previous and current headquarters have been located in countries where the Theravāda tradition predominates (e.g., Sri Lanka, My anmar, and Thailand) and all its presidents have also come from those countries. The WFB has more than 130 regional centers in over thirty countries, including India, Australia, the United States, Korea, Japan, and some African and European countries. The organization aims to promote the teachings of the Buddha, strengthen collegiality among Buddhists of different national traditions, and contribute to world peace by participating in social, educational, and humanitarian activities. The current headquarters is located in Bangkok, Thailand.

wu. (J. satori; K. o) In Chinese, “awakening,” “enlightenment”; one of the common Chinese translations for the Sanskrit term BODHI (awakening); often seen in English through its indigenous Japanese pronunciation of SATORI. The precise content of this awakening differs according to the various schools of Buddhism. In the East Asian tradition, wu could ty pically involve a gradual awakening (JIANWU), but it is more commonly associated with “sudden awakening” (DUNWU), especially in the CHAN ZONG (J. ZEN; K. SŎN). Sudden awakening refers to the view that the mind is inherently enlightened (cf. “buddha-nature,” or FOXING) and thus does not need to be purified of its afflictions (KLEŚA) in order for that buddha-nature to be realized. Gradual awakening, by contrast, refers to the view that enlightenment is the result of a process of purify ing the mind of its afflictions over a series of stages, which may take several lifetimes to complete. The Chan scholiasts GUIFENG ZONGMI and POJO CHINUL, following earlier taxonomies of awakening in the HUAYAN ZONG, distinguish between two kinds of awakening: an initial sudden understanding-awakening (JIEWU), i.e., the instant when one first comes to know that one is innately a buddha; and, following a lengthy period of gradual cultivation (jianxiu), a final realization-awakening (ZHENGWU), when one is able fully to act on the potential inherent in one’s initial awakening and not only be a buddha but also act like one. This description of the soteriological process is called sudden awakening followed by gradual cultivation (see DUNWU JIANXIU). Chan authors discuss many other possible permutations in this awakening and cultivation binary, including gradual cultivation/gradual enlightenment, sudden awakening/sudden cultivation, etc. Although the SUDDEN- GRADUAL ISSUE is most commonly associated with the CHAN school, there are precedents in Indian Buddhism. The so-called BSAM YAS DEBATE , or Council of Lha sa, that took place in Tibet at the end of the eighth century is said to have pitted the Indian monk KAMALAŚĪLA against the Chan monk Heshang MOHEYAN in a debate over the issue of whether enlightenment occurs gradually or suddenly .

wu. (J. mu; K. mu). In Chinese, a Sinograph meaning “not have,” “without,” “no,” and, as a philosophical term, “nonbeing,” “nothingness.” Exegetes in the Dark Learning (XUANXUE) school of Chinese philosophy, which was influential in early Chinese Buddhist thought, first explored the philosophical implications of the term wu. Based on their reading of the Daode jing (“The Way and Its Power”), a seminal Daoist classic traditionally attributed to the legendary Laozi,

they interpreted wu as meaning either (1) “nonexistence” or “nonbeing,” in distinction to the Sinograph y ou, viz., “existence,” or “being”; or (2) the metaphy sical substratum of the universe, viz., “nothingness,” which transcended the dichotomy of y ou and wu. Wu in this second denotation did not indicate simply voidness or negation; it rather referred to the source of the DAO itself or the principle underly ing all existence. In this sense, wu was inseparable from y ou, the phenomenal expressions of the dao. This wu was termed “original nothingness” (benwu), because it served as the ultimate foundation of the my riad of existing things in the universe, and thus represented a

preconceptual reality that transcended dichotomous existence (y ou). Wang Bi (226–249), traditionally regarded as the founder of Xuanxue, defined a person who attained wu as a sage (shengren). ¶ Early Chinese Buddhist thinkers, such as DAO'AN (312–385) and Zhu Fatai (320–387), drew on this Xuanxue concept of benwu to render the Buddhist concept of emptiness (ŚŪNYATĀ) ; SENGZHAO (374–414) in his ZHAO LUN also equates the original nothingness (benwu) with the dharma- nature (DHARMATĀ). As Chinese Buddhists gradually refined their understanding of the Buddhist notion of emptiness, prompted especially by the influence of KUMĀRAJĪVA's translations of the PRAJÑĀPĀRAMITĀ texts, this rendering of śūny atā as wu was ultimately replaced by the new term kong (emptiness). ¶ In the context of the CHAN ZONG, wu was often used to emphasize the mental state of nonattachment. However, ever since the character wu (pronounced mu in Japanese and Korean) was singled out by Chan master DAHUI ZONGGAO as a meditative topic (HUATOU) in Chan practice, Chan adepts began to use "wu" as an aid in their "questioning meditation" (KANHUA CHAN). This meditative topic was derived from a popular GONG'AN (KŌAN) attributed to ZHAOZHOU CONGSHEN: "Does a dog have buddha nature, or not?" Zhaozhou answered, "wu" ("no," lit. "it does not have it"). The Sinograph wu was also a frequent subject of monochrome brushstroke calligraphy, which was and is still often hung on the walls of the abbot's quarters (FANGZHANG) in Chan monasteries. See WU GONG'AN; GOUZI WU FOXING.

wu'ai xing. (J. mugegy ō; K. muae haeng). In Chinese, "unhindered action" or "unconstrained conduct"; one of the ty pes of practice of a BODHISATTVA-MAHĀSATTVA, as expounded especially in the AVATAṂSAKASŪTRA, referring to a conduct that is not constrained by the restrictions of customary morality or mundane societal expectations. Other related terms that are described as unhindered include "unhindered phy sicality "

(wu'ai shen), "unhindered SAMĀDHI" (wu'ai sanmei), "unhindered wisdom" (wu'ai zhi), "unhindered dharma" (wu'ai fa), "unhindered path" (wu'ai dao), etc. The actions of a bodhisattva-mahāsattva conform to those of the buddhas themselves and any merit forthcoming from them are freely transferred (huixiang) to other sentient beings to help them with their salvation; for this reason, their actions are free from any kinds of hindrances. The MAHĀYĀNASAṂGRAHA (She Dasheng lun) also explains "unhindered action" as the merit of a buddha, which is obtained through the purest of wisdom. Unhindered action sometimes refers to a particular stage or practice of a bodhisattva-mahāsattva: the BODHISATTVABHŪMI (Pusa shanjie jing) presents it as the tenth of the twelve conducts of a bodhisattva-mahāsattva, along with such advanced practices as the signless practice, untainted practice, practice-less practice, and contented practice. In this context, unhindered action refers to the stage where a bodhisattva cultivates the realm of reality (DHARMADHĀTU) that transcends all discrimination and teaches the true dharma (SADDHARMA) for the sake of innumerable sentient beings. This status is said to correspond specifically to the ninth of the ten bodhisattva stages (DAŚABHŪMI), and the bodhisattva on this stage is

described as being endowed with four ty pes of analy tical knowledges (PRATISAṂVID), which in Chinese were known as the four “unhindered knowledges” (C. si wu’ai jie): i.e., unhindered knowledge of (1) phenomena (DHARMA), viz., one makes no mistakes in one’s teachings; (2) meaning (ARTHA), viz., to be unhindered with regard to the content and meaning of one’s teachings; (3) ety mology or language (NIRUKTI), viz., the ability to comprehend all languages; and (4) eloquence (PRATIBHĀNA), viz., ease in offering explanations. CHENGGUAN (738–839) states in his massive HUAYAN JING SHU (“Commentary to the AVATAṂSAKASŪTRA”) that the bodhisattva is able to abide in unhindered action (lit. “unhindered abiding”) because he no longer has any cognitive obstructions (JÑEYĀVARAṆA). The practice of unconstrained conduct has been a prominent, if controversial, feature of Korean Buddhism throughout its history. Several eminent Korean monks were known as practitioners of unconstrained conduct, including WŎNHYO (617–686), Chinmuk (1562–1633), a n d KYŎNGHŎ SŎNGU (1849–1912), and they followed way s of life that disregarded the standards of conduct ty pically incumbent upon ordained monks.

Wubai wenlun shiyi. (C) (). See FAHUA WUBAI WENLUN.

wuchong xuanyi. (J. gojūgengi; K. ojung hy ŏnŭi). In Chinese, “five lay ers of profound meaning” according to the TIANTAI school. See FAHUA WUCHONG XUANYI.

wudao song. (J. godōju; K. odo song). In Chinese, lit. “hy mn on awakening to the way (DAO)”; an “enlightenment hy mn.” See YIJI.

wufa. (J. gohō; K. obŏp). In Chinese, “the five [aspects of] dharmas.” According to various Chinese scholastic traditions, deriving from translations of the LAṄKĀVATĀRASŪTRA and YOGĀCĀRA materials, these five delineate the full ontological and epistemological range of all dharmas: phenomena (SHI), characteristics (xiang), conceptual discrimination (fenbie), correct knowledge of the way things are (zhengzhi), and suchness (ZHENRU). The first three aspects are called “factors associated with delusion/unenlightenment” (mifa) because the multiplicity, duality, and reality of “phenomena” and “characteristics” are merely “imagined” and “superimposed” by the discriminatory property of the unenlightened mind (which is covered by the third aspect, fenbie, viz., PARIKALPITA). In contrast, the last two aspects are called “factors associated with enlightenment” (wufa), with “knowledge” being the ability to discern the true “suchness” of things without conceptual superimpositions.

wu gong’an. (J. mukōan; K. mu kongan). In Chinese, “the case ‘no’”; an influential CHAN case or precedent (GONG’AN) associated with the Tang- dy nasty Chan master ZHAOZHOU CONGSHEN (778–897). In this exchange, once a student came to Zhaozhou and asked, “Does a dog have the buddha-nature (FOXING), or not?” Zhaozhou answered, “No” (lit., “It does not have it”). The complete exchange from which this gong’an is drawn continues: “Every thing has buddha-nature, from the buddhas above, to the ants below. Why wouldn’t a dog have it?” Zhaozhou replied: “Because he has the

nature of karmically conditioned consciousness." This response seems to be associated with Chan debates concerning the Sinitic Buddhist doctrine of the "buddha-nature of the insentient" (wuqing foxing), which presumed that all insentient things, including rocks and tiles, trees, and grass, were also endowed with the buddha-nature; thus, if even rocks have the buddha-nature, why not dogs? Since the answer to the student's question should unequivocally be "Yes, a dog does have the buddha-nature," Zhaozhou's enigmatic response, which Wumen calls a "checkpoint of the patriarchs," seems to challenge one of the foundational beliefs of East Asian

Buddhism; in so doing, it engenders a question in the student's mind, which will help to foster inquiry and ultimately a sense of doubt (YIQING). This answer "WU" ("no") became a popular meditative topic (HUATOU) in the Chan meditation practice of "questioning meditation" (KANHUA CHAN) and is one of the most important gong'ans used in kanhua Chan training, especially in the Chinese LINJI ZONG and Japanese RINZAISHŪ lineages, as well as in the Korean CHOGYE CHONG. The wu gong'an is the first case collected in the gong'an anthology WUMEN GUAN ("Gateless Checkpoint"), and its use in kanhua practice was popularized by the Chinese Linji teacher DAHUI ZONGGAO (1089–1163). See also GOUZI WU FOXING.

wuhui nianfo. (J. goe nenbutsu; K. ohoe y ŏmbul). In Chinese, "five- tempo intonation of [the name of] the buddha" (see NIANFO). A method of intoning the name of the buddha AMITĀBHA devised by the Tang-dy nasty m onk FAZHAO (d.u.). While in SAMĀDHI, Fazhao is said to have received instructions for the wuhui nianfo technique directly from Amitābha himself. The practice seems to be based on the larger SUKHĀVATĪVYŪHASŪTRA, which speaks of the bejeweled trees that produce music in five tempos when sway ed by the wind. The first tempo is a leisurely chant performed in a high tone (ping). The second tempo is a high and rising tone (pingshang). The third tempo is neither leisurely nor rapid, and the fourth gradually becomes rapid. The fifth tempo is a rapid and repetitious recitation of the four characters "A-mi-tuo-fo," the Chinese pronunciation of Amitābha. According to Fazhao, the practical aim of this practice is to focus on the three jewels (RATNATRAYA) until one attains "no- thought" (WUNIAN) and nonduality (ADVAYA). Fazhao recommends wuhui nianfo for both clergy and lay who wish to rid themselves of the five ty pes of suffering and the five hindrances, or to purify the five sense organs (INDRIYA) and attain the five powers (BALA). The ultimate purpose of the practice is to attain rebirth in the PURE LAND of SUKHĀVATĪ. Two manuals by Fazhao detailing the practice of wuhui nianfo, the Jingtu wuhui nianfo lüefa shiyi canben ("Praise for the Abbreviated Ritual Manual of the Pure Land Five-Tempo Intonation of [the Name of] the Buddha") and the Jingtu wuhui nianfo songjing guanxing yi ("Rite for Intoning the Buddha's Name, Reciting Scripture, and Performing Meditation According to the Five Tempos of the Pure Land"), were recovered in the DUNHUANG manuscript cache.

wujiao. (C) (). In Chinese, the "fivefold taxonomy of the teachings"

according to the Huay an school. See HUAYAN WUJIAO.

Wujiao zhang. (C) (). See HUAYAN WUJIAO ZHANG.

wu jia qi zong. (J. goke shichishū; K. oga ch'ilchong). In Chinese, "five houses and seven schools." According to the traditional historical narratives of the CHAN tradition, the lineages of the sixth patriarch (LIUZU) HUINENG's two major disciples NANYUE HUAIRANG and QINGYUAN XINGSI grew into five houses and eventually seven schools. The five houses refer to the lineages of th e GUIYANG [alt. Weiy ang] ZONG, LINJI ZONG, CAODONG ZONG, YUNMEN ZONG, and FAYAN ZONG of the Tang dy nasty. Each of these "houses" (jia) is said to have had its own unique teaching sty le (jiafeng) and was respectively named after its purported founder or "patriarch": the Guiy ang was named after GUISHAN LINGYOU and his disciple YANGSHAN HUIJI, the Linji after LINJI YIXUAN, the Caodong after DONGSHAN LIANGJIE and his disciple CAOSHAN BENJI, the Yunmen after YUNMEN WENYAN, and the Fay an after FAYAN WENYI. Among these houses, the Linji became predominant during the Song dy nasty, when it further split into two separate lineages known as the HUANGLONG PAI (named after HUANGLONG HUINAN) and the YANGQI PAI (named after YANGQI FANGHUI). These two Song-dy nasty lineages, together with the original listing of five houses, constitute the so-called seven schools. According to the Chan historian GUIFENG ZONGMI, the early Chan lineages known as the NIUTOU ZONG, Heze zong (see HEZE SHENHUI), JINGZHONG ZONG, BAOTANG ZONG , BEI ZONG, a n d NAN ZONG were eventually supplanted by the flourishing lineages of Nany ue's disciple MAZU DAOYI (i.e., the Guiy ang and Linji) and Qingy uan's disciples SHITOU XIQIAN (i.e., the Caodong and Yunmen) and XUEFENG YICUN (i.e., the Fay an).

wujinzang yuan. (J. mujinzōin; K. mujinjang wŏn). In Chinese, "inexhaustible storehouse cloister"; the emblematic institution of the Third Stage Sect (SANJIE JIAO), a major school of Buddhism during the Tang dy nasty. The wujinzang y uan was established at Huadusi (Propagation and Salvation Monastery) in the capital Chang'an early in the Tang dy nasty, probably between 618 and 627. The institution was based on the concept of "merit-sharing," i.e., that one could enter into the universal inexhaustible storehouse of the dharma realm, as articulated by the sect's founder XINXING (540–594), by offering alms to the

wujinzang y uan on behalf of all sentient beings. By 713, when the Tang emperor Xuanzong (r. 712–756) issued an edict closing it due to charges of embezzlement, the wujinzang y uan had served as a major agency for promoting the sect for almost a century. Drawing on the AVATAṂSAKASŪTRA and the VIMALAKĪRTINIRDEŚA, the sect interpreted the Sinographs wujin (inexhaustible) to mean that both the field of reverence—viz., the three jewels (RATNATRAYA)—and the field of compassion—viz., sentient beings—were inexhaustible. The wujinzang y uan, therefore, was the place where the sect's sixteen kinds of almsgiving (DĀNA) were to be practiced, through offerings made to (1) the buddha, (2) the dharma, (3) the saṃgha, and (4) all sentient beings; (5) works that serve to ward off evil; (6) works that serve to do good; and offerings of (7) incense, (8) lamps, (9) the monks' baths, (10) bells and chants, (11)

clothing, (12) dwellings, (13) beds and seats, (14) receptacles for food, (15) coal and fire, and (16) food and drink. There were two kinds of offerings made to the wujinzang y uan: (1) regular offerings collected in the form of a daily levy and (2) offerings received at particular times of the y ear. A Sanjie jiao text discovered at DUNHUANG say s that a person is expected to offer one fen (a hundredth of a tael) of cash or one ge (a tenth of a pint) of grain per day, or thirty -six qian (a tenth of a Chinese ounce) or 3.6 dou (pecks) of grain per annum. However, the offerings were mostly made at specific times of the y ear, such as on the fourth day of the first lunar month, the day commemorating Xinxing's death, and the ULLAMBANA festival on the fifteenth day of the seventh lunar month. For those adherents who could not make offerings directly at Huadu monastery, the sect would temporarily open local branches, called "merit offices" (gongde chu), especially at the time of the Ullambana festival. The assets of the wujinzang y uan consisted for the most part of such tangible assets as money, cloth, gold and silver, and jade. The offerings were used, for example, to fund the restoration of monasteries and the performance of religious services (i.e., the reverence field of merit, jingtian), and to provide alms to the poor (i.e., the compassion field of merit, beitian; see PUṆYAKṢETRA). People could also receive loans from the wujinzang, a function comparable to today 's microloans made to help raise people out of poverty. During the reign of Empress Wu, Fuxiansi in Luoy ang was for a brief time also the site of a wujinzang y uan. See also XIANGFA JUEYI JING.

Wuliangshou jing. (J. Mury ōjuky ō; K. Mury angsu ky ŏng). In Chinese, "Sūtra of Infinite Life." See SUKHĀVATĪVYŪHASŪTRA.

Wuliangshou jing lun. (C) (). See WULIANGSHOU JING YOUPOTISHE YUANSHENG JI.

Wuliangshou jing youpotishe yuansheng ji. (J. Mury ōjuky ō upadaisha ganshōge; K. Mury angsugy ŏng ubajesa wŏnsaeng ke). In Chinese, "Verses on the Wish for Rebirth and the Exposition of the Limitless Life Scripture"; also known as the Wuliangshou jing lun ("Commentary on the Limitless Life Scripture"), Jingtu lun ("Treatise on the Pure Land"), Wangsheng lun ("Treatise on Rebirth"), and Yuansheng ji ("Verses on the Wish for Rebirth"). The Wuliangshou jing youpotishe yuansheng ji is attributed to VASUBANDHU and was translated into Chinese by BODHIRUCI at the monastery of YONGNINGSI in 529. The text is largely a commentary on the larger SUKHĀVATĪVYŪHASŪTRA and is comprised of a twenty -four-line verse and prose commentary. The verse section begins with an exhortation to be reborn in the country of peace and happiness (ANLEGUO) or PURE LAND (JINGTU) of the buddha AMITĀBHA, which it subsequently describes in detail, and ends with the dedication of merit (PARIṆĀMANĀ). The prose commentary explains the ritual means of rebirth in terms of "five gates of recollection" (wu nianmen). These five gates are veneration (libai), praise (cantan), vow (zuoy uan), discernment (guancha), and dedication (huixiang). The text came to be held in high regard in China and Japan after the eminent Chinese monk TANLUAN composed an influential commentary on the text.

Along with the shorter and longe r Sukhāvatīvyūhasūtras and the GUAN WULIANGSHOU JING, the Japanese monk HŌNEN recognized the Wuliangshou jing youpotishe yuansheng ji as a central scripture of the school now known as the JŌDOSHŪ. See also JINGTU LUN.

Wuliang yi jing. (J. Mury ōgiky ō; K. Mury ang ŭi ky ŏng). In Chinese, “Sūtra of Immeasurable Meanings,” one of the “Three [Sister] Sūtras of the ‘Lotus’” (FAHUA SANBU [JING]), along with the SADDHARMAPUṆḌARĪKASŪTRA (“Lotus Sūtra”) itself and the GUAN PUXIAN PUSA XINGFA JING (“Sūtra on the Procedures for Contemplating the Practices of the Bodhisattva SAMANTABHADRA”). The Wuliang yi jing, is presumed to be the prequel to the influential Saddharmapuṇḍarīkasūtra, while the Guan Puxian pusa xingfa jing is usually considered its sequel. The extant version of the scripture, in one roll, is attributed to the Indian translator *Dharmāgatay aśas of the Southern Qi dy nasty (479–502), and is claimed to have

been translated in 481; the LIDAI SANBAO JI scriptural catalogue also refers to a second, nonextant translation. There is, however, no evidence that a scripture with this title ever circulated in India, and no such text is ever cited in Indian sources. In addition, there are issues with the biography of the alleged translator (*Dharmāgatay aśas is otherwise unknown and this is his only attributed translation), and peculiar events in the transmission of the scripture, which suggest that attempts were made to obscure its questionable provenance. The scripture also includes unusual transcriptions and translations of Buddhist technical terminology, and peculiar taxonomies of Indian doctrinal concepts. Because of these problematic issues of provenance and content, the sūtra is now suspected of being an indigenous Chinese composition (see APOCRYPHA). Such Chinese exegetes as Huiji (412–496) and TIANTAI ZHIYI (538–597) presumed that this scripture was the otherwise-unknown MAHĀYĀNA sūtra titled “Immeasurable Meanings” that is mentioned in the prologue to the Saddharmapuṇḍarīkasūtra, which the Buddha is said to have preached just prior to beginning the “Lotus Sūtra” proper. The Wuliang yi jing is in three chapters (pin). The first chapter is the prologue, where the bodhisattva “Great Adornment” (Dazhuangy an pusa) offers a long verse paean describing the Buddha’s many virtues. The second chapter is the sermon itself, where the Buddha explains the doctrine of immeasurable meanings as being the one teaching that will enable bodhisattvas to quickly attain complete, perfect enlightenment (ANUTTARASAMYAKSAṂBODHI). This doctrine reveals that all phenomena (DHARMA) are void and calm in both their natures and their characteristics and thus are empty and nondual (ADVAYA). Hence, the immeasurable meanings of all descriptions of dharmas derive from the one dharma that is free from characteristics. The final chapter is the epilogue, which describes the ten kinds of merit that accrue from hearing the sūtra.

Wumen guan. (J. Mumonkan; K. Mumun kwan). In Chinese, lit., “Gateless Checkpoint,” or “Wumen’s Checkpoint”; compiled by the CHAN master WUMEN HUIKAI, after whom the collection is named, also known as the Chanzong Wumen

guan (“Gateless Checkpoint of the Chan Tradition”). Along with the BIYAN LU (“Blue Cliff Record”), the Wumen guan is considered one of the two most important GONG’AN (J. kōan; K. kongan) collections of the Chan tradition. In the summer of 1228, at the request of the resident monks at the monastery of Longxiangsi, Wumen lectured on a series of forty -eight cases (gong’an) that he culled from various “transmission of the lamplight”

(CHUANDENG LU) histories and the recorded say ings (YULU) of previous Chan masters. His lectures were recorded and compiled that same y ear and published with a preface by Wumen in the following y ear (1229). Another case (case 49), composed by the lay man Zheng Qingzhi, was added to the Wumen guan in 1246. The Wumen guan begins with a popular case attributed to ZHAOZHOU CONGSHEN, in which Zhaozhou replies “WU” (no) to the question, “Does a dog have buddha nature, or not?” (see WU GONG’AN). Wumen himself is known to have struggled with this case, which was given to him by his teacher Yuelin Shiguan (1143–1217). The Japanese monk SHINICHI KAKUSHIN, who briefly studied under Wumen in China, brought the Wumen guan to Japan. Although the collection was once declared to be heretical by the SŌTŌSHŪ in the mid-seventeenth century , many Japanese commentaries on the Wumen guan were composed at the time, testify ing to its growing influence during the Edo period.

Wumen Huikai. (J. Mumon Ekai; K. Mumun Hy egae) (1183–1260). In Chinese, “Gateless, Opening of Wisdom”; CHAN master in the LINJI ZONG; author of the epony mous WUMEN GUAN (“Gateless Checkpoint”), one of the two most important collections of Chan GONG’AN (J. kōan; K. kongan). A native of Hangzhou prefecture in present-day Zhejiang province, Huikai was ordained by the monk “One Finger” Tianlong (d.u.), who also hailed from Hangzhou (see a lso YIZHI CHAN). Wumen later went to the monastery of Wanshousi in Jiangsu province to study with Yuelin Shiguan (1143–1217), from whom Huikai received the WU GONG’AN of ZHAOZHOU CONGSHEN; Huikai is said to have struggled with this gong’an for six y ears. In 1218, Huikai traveled to Baoy insi on Mt. Anji, where he succeeded Yuelin as abbot. He subsequently served as abbot at such monasteries as TIANNINGSI, Pujisi, Kaiy uansi, and Baoningsi. In 1246, Huikai was appointed as abbot of Huguo Renwangsi in Hangzhou prefecture, and it is here that the Japanese ZEN monk SHINICHI KAKUSHIN studied under him. Emperor Lizong (r. 1224–1264) invited Huikai to provide a sermon at the Pavilion of My sterious Virtue in the imperial palace and also to pray for rain. In honor of his achievements, the emperor bestowed upon him a golden robe and the title Chan master Foy an (Dharma Ey e).

wunian. (T. bsam pa med pa; J. munen; K. muny ŏm). In Chinese, “no- thought”; a Chinese meditative term that appears in the sixth-century DASHENG QIXIN LUN but finds its locus classicus in the eighth-century CHAN classic, the

LIUZU TAN JING . The putative author of the Liuzu tan jing, the sixth patriarch (LIUZU) HUINENG, defines “no-thought” as “not to think even when involved in thought.” Thought, therefore, is not the issue, but rather the attachment to thought, which would

encourage the proliferation of conceptualization throughout all of one's sensory experience and thus render one a hapless victim of the conceptualizing tendency (cf. PRAPAÑCA). The Liuzu tan jing also explains no- thought in terms of "non-form" (wuxian) and "non-abiding" (wuzhu) and parses the term as follows: wu ("no") refers to the absence of duality and nian ("thought") to thinking about thusness (TATHATĀ) . HEZE SHENHUI used the term "no-thought" to criticize the teaching of the "transcendence of thoughts" (linian) espoused by SHENXIU and his followers in the so-called Northern school (BEI ZONG). According to Shenhui, whereas the "transcendence of thoughts" (linian) emphasized the progressive wiping away of afflictions (KLEŚA) and conceptual thinking, "no-thought" (wunian) by contrast implied that there was no need for such effort since one had only to "see one's nature" (JIANXING) in order to attain enlightenment. Thus, wunian became a central feature of those who espoused a "sudden" theory of enlightenment (see DUNWU). In some radical cases, the notion of wunian was used as theoretical justification for the abandonment of all ritual and practice, including meditation and the conferral of monastic precepts. This extreme form of "no-thought" doctrine play ed an important role in the LIDAI FABAO JI and the antinomian teachings of the Sichuan early -Chan lineages of the JINGZHONG ZONG and BAOTANG ZONG, the latter of which may have had some influence in the development of RDZOGS CHEN thought in Tibet.

Wunian dahui. (C) (). See WUZHE HUI.

wushi. (J. goji; K. osi). In Chinese, "the five periods [of the Buddha's teaching]"; the TIANTAI school's temporal taxonomy of Buddhist doctrines (JIAOXIANG PANSHI), according to which the Buddha's teachings differ because he preached them at different points during his pedagogical career. The initial account of his awakening that the Buddha taught immediately after his enlightenment was described in the AVATAṂSAKASŪTRA; this stage is thus termed the HUAYAN period (huay an shiqi). This account of the experience of buddhahood was, however, so unadulterated and sublime that many ŚRĀVAKA disciples were utterly unable to comprehend its message. The Buddha therefore began his teaching anew in a second period that was termed Luy uan shiqi (after

the Deer Park, MṚGADĀVA, where many of the ĀGAMA scriptures were taught) or ahan shiqi (after the āgamas, which were the compilation of the Buddha's words from this period). This period was said to be an explicit attempt on the part of the Buddha to accommodate those disciples who were confounded during the first period, by teaching his insights in their most elementary form. The third period is called fangdeng (VAIPULYA) shiqi, where the "HĪNAYĀNA" teachings of the second period were superseded by teaching the aspiration for the MAHĀYĀNA. Various sūtras that explicitly compare Mahāy āna favorably to "hīnay āna"—such as the ŚRĪMĀLĀDEVĪSIṂHANĀDASŪTRA and the VIMALAKĪRTINIRDEŚA— were supposedly products of this period. The fourth period is termed the bore shiqi, after its epony mous sūtras, the PRAJÑĀPĀRAMITĀ. This was the stage of the Buddha's teaching

career where he began to remove the boundaries separating Mahāy āna and “hīnay āna” by leading his audience from the presumption that there were two separate vehicles to instead a common realization of emptiness (ŚŪNYATĀ). The final period is called Fahua Niepan shiqi, after its two representative sūtras, the SADDHARMAPUṆḌARĪKASŪTRA and the MAHĀPARINIRVĀṆASŪTRA. The teachings associated with this period are described as the “consummate” or “perfect” teachings (YUANJIAO) because they espouse the idea of one vehicle (or the one buddha vehicle; C. YISHENG; S. EKAYĀNA), which Tiantai claimed was the truest form of the Buddha’s original intention (beny uan; see PŪRVAPRAṆIDHĀNA). The Tiantai school also compares these five stages of the teachings to the five stages in the clarification of milk (see WUWEI, “five tastes”). See also TIANTAI BAJIAO.

wushi bajiao. (J. goji hakky ō; K. osi p’algy o). In Chinese, “five periods and eight teachings”; a classification of teachings (PANJIAO) attributed to the TIANTAI sy stematizer TIANTAI ZHIYI. A detailed explanation of the wushi bajiao is found in the text by the Korean exegete CH’EGWAN, the CH’ŎNT’AE SAGYO ŬI (C. Tiantai sijiao yi). The five periods correspond to what is believed to be the five major chronological periods (WUSHI) of the Buddha’s teaching career (represented by the name of a SŪTRA or group of sūtras preached during each period), namely , (1) Huay an (AVATAṂSAKASŪTRA), (2) ĀGAMA, (3) VAIPULYA, (4) PRAJÑĀPĀRAMITĀ, and (5) Lotus (SADDHARMAPUṆḌARĪKASŪTRA) and Nirvāṇa (MAHĀPARINIRVĀṆASŪTRA). According to Zhiy i, the Buddha also

employ ed different techniques of conversion or pedagogical modes (huay i) for audiences of vary ing capacities, which are broadly divided into four: the sudden, gradual, indeterminate, and secret. The sudden and gradual teachings are distinguished by their variant uses of skillful means (UPĀYA), and indeterminate refers to the differing levels of the understanding of individuals. Zhiy i’s contribution to these well-established categories was his further division of the indeterminate teachings into “secret” and “manifest” based on the awareness of the presence of others in the assembly. The content of the Buddha’s teachings (huafa) is further described in terms of the four categories of TRIPIṬAKA, common, distinct, and consummate. This division is based on whether the teachings are that of TRIPIṬAKA (viz. HĪNAYĀNA) , MAHĀYĀNA (distinct), both (joint), or neither (consummate). Zhiy i referred to the central sūtra of his own Tiantai school, the Saddharmapuṇḍarīkasūtra, as consummate. Zhiy i’s own classification sy stem is based on those of earlier exegetical traditions of the north (wujiao shizong) and south (sanjiao), which he sought to unite and ultimately transcend. See TIANTAI BAJIAO.

wushi jiao. (C) (). See WUSHI.

Wutaishan. (). In Chinese, “Five-Terraces Mountain”; a sacred mountain located in northern Shanxi province, which, together with EMEISHAN, PUTUOSHAN, and JIUHUASHAN, is one of the “four great mountains” (sidamingshan) of Buddhism in China. The name Wutai is derived from its five treeless, barren peaks (one in each

cardinal direction and the center) that resemble terraces or platforms. During the Northern Wei dy nasty (424–532), Wutaishan came to be identified with the my thic Mt. Qingliang (Clear and Cool) of the AVATAṂSAKASŪTRA, which speaks of a mountain to the northeast where the bodhisattva MAÑJUŚRĪ is said to be constantly preaching the DHARMA. From the time of the identification of Mount Wutai as Mt. Qingliang, numerous testimonies to the manifestation of Mañjuśrī on the mountain have been reported. Mt. Wutai thus came to be known as the primary abode and place of worship for Mañjuśrī and for this reason drew pilgrims from across the continent, including South Asia and, later, Tibet. Numerous monasteries and hermitages of both Buddhists and Daoists occupy its peaks. The first Buddhist monastery on Wutaishan, Da Futu Lingjiusi (Great Buddha Vulture Monastery), is claimed to have been built by KĀ ŚYA PA MĀTAṄGA (d.u.) and Dharmaratna (d.u.) sometime during the first century (see also BAIMASI and

SISHI'ER ZHANG JING). The name of the monastery was changed to Xuantongsi and then to (Da) Huay ansi during the Tang dy nasty to reflect its role as the center of HUAYAN studies. The Huay an patriarch CHENGGUAN (738– 839) composed his great HUAYANJING SHU at this monastery. The esoteric monk AMOGHAVAJRA also assisted in the establishment of another monastery on Mt. Wutai, which was given the name Jingesi (Gold Pavilion Monastery) in 770 after its gilded tiles. Emperor Daizong (r. 762–779) declared Jingesi as an important center for the new esoteric teachings (MIJIAO) brought to China by Amoghavajra. The monk FAZHAO also established the monastery of Zhulinsi (Bamboo Grove Monastery) on the model of a majestic monastery that Mañjuśrī had revealed to him in a vision. The monasteries Qingliangsi, Beishansi, Manghaisi, and Da Wenshusi are also located on the mountain. During a pilgrimage to Wutaishan by the Korean monk CHAJANG (d.u., c. mid-seventh century), he had a vision in which Mañjuśrī guided him to a Korean analogue of the mountain; that mountain is now known as Odaesan (the Korean pronunciation of Wutaishan) and is itself a major pilgrimage center of Korean Buddhism. During the Qing dy nasty, Wutaishan was also the major center for the study of Tibetan Buddhism in China.

wuwei. (J. mui; K. muwi). In Chinese, lit., "nonaction," "effortless action," in later contexts "uncompounded"; a key term that appears in early Chinese classics such as the Lunyu ("Analects of Confucius"), the Daode jing ("The Way and Its Power"), and the Zhuangzi. "Nonaction" suggests action that takes place naturally or without artifice; thus variously interpreted as "effortless action," "unattached action," etc. Nonaction thus refers to the ideal mode of behavior for a sage, in which the sage "does nothing and y et there is nothing not done" (wuwei er wu buwei). Rather than acting by fiat, the sage acts by establishing a "sy mpathetic resonance" (GANYING) with the natural movements of heaven, which brings every thing naturally to perfection, just as a tree grows naturally without making any effort to grow. The term is frequently used in indigenous Chinese texts in the context of good governance, where wuwei thus refers to the ultimate ty pe of "soft power": by "practicing nonaction," a ruler creates an appropriate environment in which "the people are able to look after themselves"

(Daode jing, chapter 49); he does not impose his point of view but instead allows common cause with his constituency to develop naturally. In certain Chinese contexts, wuwei could also connote something that was “unproduced,” and the early Chinese Buddhists drew on this connotation to translate the seminal Sanskrit

term NIRVĀṆA and nirvāṇa’s putative “inactivity ”; this misleading translation was eventually abandoned in favor of the phonetic transcription niepan. The Buddhists did however retain the term wuwei in this denotation to translate the concept of “uncompounded” or “unconditioned” factors (ASAṂSKṚTADHARMA), such as nirvāṇa and in some schools space (ĀKĀŚA), which are not conditioned (SAṂSKṚTA) and are thus not subject to the inevitable impermanence (ANITYA) to which all conditioned dharmas are subject.

wuwei. (J. goi; K. owi). In Chinese, lit., “five ranks”; a doctrinal formula generally attributed to the CHAN master DONGSHAN LIANGJIE (807–869), the putative cofounder of the CAODONG ZONG of the mature Chan tradition. The antecedents of these five ranks are traced to SHITOU XIQIAN’s CANTONG QI, which discusses the mutual “turning back on one other” (huihu) of the terms brightness and darkness. This dichotomy is eventually generalized as “relative” (pian), lit., “askew” or “partial,” referring to that which is bright, conceivable, effable, and phenomena (SHI); and absolute (zheng), lit., “upright,” correlating with what is dark, inconceivable, ineffable, and principle (LI). Although these two valences of relative and absolute may be discrete, they are interconnected, interdependent, and mutually defining, thus constantly “turning back on one other.” The five ranks are sy stematized by Dongshan in his “Verses on the Five Ranks” (Wuwei song) as follows. (1) The relative within the absolute (zhengzhong pian): this valence suggests that the ordinary person constantly abides in original enlightenment (BENJUE), but is unaware of it. (2) The absolute within the relative (pianzhong zheng): the practitioner may have become aware of the reality of original enlightenment, but still treats it as an object to be understood conceptually, rather than directly experienced. (3) [The relative] emerging from the absolute (zhengzhong lai): as the Chan practitioner experiences the pervasiveness of emptiness, that emptiness turns back on itself and transforms into a more dy namic and luxuriant way of experience of reality. (4) [The relative and the absolute] jointly accessible (jianzhong zhi): as the reality of each and every independent phenomenon (shi) is experienced, the reality of principle (li) is simultaneously accessed. (5) Integration of the absolute and the relative, or lit. “arriving within together” (jianzhong dao): the bifurcations between relative and absolute, the experiencing subject and the object experienced, the realizer and the realized, etc., all drop away, so that the practitioner continues to practice but now without practicing any thing, and seeks

buddhahood while understanding that there is no buddhahood to be sought. In some interpretations, the first two ranks evoke the famous passage in the PRAJÑĀPĀRAMITĀHṚDAYASŪTRA: “form is emptiness, emptiness is form” (see

RŪPAṂ ŚŪNYATĀ ŚUNYATAIVA RŪPAM). The third rank implies the bodhisattva practice of returning to the world after his or her attainment of enlightenment (BODHI). Similarly, the fourth and fifth ranks imply the bodhisattva vow to save all living beings so that they may all access NIRVĀṆA together. Despite the use of the term “rank,” a sy stematic progression is not necessarily implied, and some commentators suggest that all five ranks may be experienced simultaneously in a moment of sudden awakening (DUNWU); thus, the five ranks may be an attempt to demonstrate how gradual and sequential outlines of Buddhist soteriology can be integrated with the more subitist soteriologies that become emblematic of the mature Chan tradition. The five ranks are also sometimes correlated with the five wisdoms (PAÑCAJÑĀNA) of a buddha in the MAHĀYĀNA, and specifically in the YOGĀCĀRA school. Dongshan’s “five ranks” were frequently used in East Asian GONG’AN collections as a means of checking a student’s level of understanding. In one of the modern Japanese RINZAISHŪ sy stematizations of kōan training, the final stage in the practice that follows initial sudden awakening (J. SATORI, C. dunwu) also involves mastery of the five ranks (J. goi).

wuwei. (J. gomi; K. omi). In Chinese, lit. “five tastes”; an originally Indian list of the five stages in the clarification of milk that is derived from the MAHĀPARINIRVĀṆASŪTRA: milk, cream, curds, butter, and ghee. This list was used in the TIANTAI ZONG as a simile for the five chronological periods (WUSHI) in the Buddha’s preaching of the dharma. According to this school’s taxonomy of the teachings (JIAOXIANG PANSHI), the various teachings of Buddhism may be categorized according to these five “tastes”: milk sy mbolizes th e AVATAṂSAKASŪTRA period; cream, the ĀGAMA period; curds, the VAIPULYA period; and butter, the PRAJÑĀPĀRAMITĀ period; the subtlest and more clarified form of milk, the flavor of ghee (tihuwei; see MAṆḌA), is finally compared to the “consummate” period of the SADDHARMAPUṆḌARĪKASŪTRA and the MAHĀPARINIRVĀṆASŪTRA.

Wuwei sanzang chanyao. (J. Mui sanzō zen’y ō; K. Muoe samjang sŏny o). In Chinese, “Essentials of Meditation by the TREPIṬAKA ŚUBHAKARASIṂHA”; a relatively short treatise that purportedly records a

sermon that the esoteric master Śubhākarasiṃha prepared for a debate he had with CHAN master SHENXIU’s disciple Jingxuan (660–723) sometime after 716. The sermon is largely concerned with the conferral of the BODHISATTVA precepts, repentance, the threefold pure precepts (SANJU JINGJIE; see ŚĪLATRAYA), and what Śubhākarasiṃha calls the secret essentials of meditation. Śubhākarasiṃha critiques Jingxuan and other fellow practitioners of meditation for their adherence to the doctrine of “no-thought” (WUNIAN) and offers instead a meditation technique that involves uttering a series of DHĀRAṆĪs, gesturing in a series of MUDRĀs, mindful breathing, and visualizing a lunar disk.

wuwei zhenren. (J. mui no shinnin; K. muwi chinin). In Chinese, “true man of no rank”; a CHAN expression attributed to LINJI YIXUAN (d. 867), which is used to refer to

the sentience, or “numinous awareness” (LINGZHI), of the mind, that constantly moves through the sense faculties, thus enabling sensory experience; equivalent to the buddha-nature (FOXING). Linji contrasts this true man of no rank with the “lump of red flesh” (CHIROUTUAN), the phy sical body that is constantly buffeted by sensory experience. The term zhenren is also used within the Daoist tradition to refer to a Daoist “perfected,” who has realized perfect freedom both mentally and phy sically by achieving immortality and transcending all dichotomies. See also GANSHIJUE.

Wuxiang. (C) (). See CHŎNGJUNG MUSANG.

wuxiang jie. (J. musōkai; K. musang ky e). In Chinese, “formless precepts”; a ty pe of precept mentioned in the LIUZU TAN JING , where they are said to help constrain practitioners so that they are able to gain enlightenment. The formless precepts reflect the early CHAN community ’s effort to offer its own understanding of the MAHĀYĀNA precepts. Although no clear explanation of exactly what these precepts are is provided in the text, the wuxiang jie are said to be the premier ty pe of precepts, which are superior to the usual ty pes of constraints taught in earlier ty pes of Buddhism, which sought to develop wholesome way s of action and deter unwholesome actions. The conferral of these precepts appears to have occurred at the start of a kind of initiation ceremony, which subsequently followed with acceptance of the four great vows (SI HONGSHIYUAN), repentance (chan), the three refuges (TRIŚARAṆA), and PRAJÑĀPĀRAMITĀ.

wuxin. (J. mushin; K. musim). In Chinese, lit. “no-mind.” The term wuxin appears in the Chinese classic the Zhuangzi and was adapted by the early Chinese Buddhists exegetes of PRAJÑĀPĀRAMITĀ literature as a gloss on the Madhy amaka notion of ŚŪNYATĀ or “emptiness.” These exegetes were collectively known as the “school of the nonexistence of mind” (xinwu zong) and belonged to the larger tradition known as “Dark Learning” (XUANXUE). In later Buddhist treatises, most notably those belonging to the CHAN tradition, “no- mind” came to refer ambiguously either to a state in which all mental activity had ceased or one in which the mind was free of all discrimination, making it effectively equivalent to nonconceptualization (see NIṢPRAPAÑCA). In this latter sense, the term is closely sy nony mous with “no-thought” (WUNIAN). See also WUXIN LUN.

Wuxin lun. (J. Mushinron; K. Musim non). In Chinese, “Treatise on No- Mind”; an early CHAN treatise attributed by tradition to the legendary monk BODHIDHARMA, which, in both content and sty le, resembles NIUTOU FARONG’S JUEGUAN LUN. As the title indicates, the treatise is concerned with the notion of WUXIN, or “no-mind,” which the text attempts to elucidate by enumerating a long list of dichotomies, such as visible and invisible, bright and dark, and differentiated and undifferentiated. The treatise argues largely in catechistic format that the attainment of no-mind engenders a state that is unmarred by the my riad afflictions (KLEŚA), birth and death, and even NIRVĀṆA. The treatise was largely unknown until its rediscovery in the manuscript cache at the DUNHUANG caves at the end of the nineteenth century .

Wuxue Zuyuan. (J. Mugaku Sogen; K. Muhak Chowŏn) (1226–1286). Chinese CHAN master in the LINJI ZONG, who was the founder of the influential monastery of ENGAKUJI in Kamakura, Japan; also known as Ziy uan. On the advice of his brother, Wuxue entered the Chinese monastery of Jingcisi, where he was ordained by Beijian Jujian (1164–1246). Wuxue later became the student of the Linji Chan master WUZHUN SHIFAN (1178–1249) and received his seal of transmission (YINKE). Wuxue also studied under XUTANG ZHIYU (1185–1269) and Wuchu Daguan (1201–1268) and spent the next few decades residing at various monasteries in Zhejiang prefecture. In 1275, Wuxue left for Nengrensi to avoid the invading Mongol troops of the Yuan dy nasty. In 1279, at the invitation of Hōjō Tokimune (1251–1284), the eighth regent of the Kamakura

shogunate, Wuxue reluctantly left China for Japan. Upon his arrival in Kamakura, Wuxue was appointed abbot of KENCHŌJI, succeeding the third abbot LANXI DAOLONG. In 1282, Tokimune established Engakuji to commemorate the defeat of the invading Mongol troops and installed Wuxue as its founding abbot (J. kaisan; C. KAISHAN). Serving as administrator of the two most powerful Buddhist institutions in Japan at the time, Wuxue established a firm foundation for the success of the RINZAISHŪ in Japan. Wuxue was given the posthumous title state preceptor (J. kokushi, C. GUOSHI) Bukkō (Buddha Radiance). His students included Japan's first female Zen master, MUGAI NYODAI (1223–1298), and KŌHŌ KENNICHI (1241–1316), the son of Emperor Gosaga (r. 1242–1246) and the teacher of MUSŌ SOSEKI. Wuxue's teachings appear in his Bukkō kokushi goroku.

wuyun shijian. (J. goun seken; K. oon segan). In Chinese, "the world of the five aggregates." See SATTVALOKA.

Wu Zetian. (J. Bu Sokuten; K. Mu Ch'ŭkch'ŏn) (624–705). Chinese concubine and empress who was an important patron of Buddhism during the Tang dy nasty and the short-lived Zhou-dy nasty interregnum (684–704). Wu Zetian entered the palace as a concubine of Emperor Taizong (r. 626–649) while she was still in her teens. After the emperor's death, she became a Buddhist nun, but was summoned again to the palace as a concubine of Taizong's successor and son, the Gaozong emperor (r. 649–683). She bore Gaozong a son in 652 and began to exert much influence in court. Despite fierce opposition from court officials, Gaozong enthroned Wu Zetian as the new empress in 655. Wu Zetian quickly exiled all her foes in court and had the former empress Wang killed. In 657, she reinstated Luoy ang as the cocapital of the empire and permanently moved the entire court there after Gaozong's death in 683. She subsequently exiled the Zhongzong emperor (r. 683–684, 705–710) and established her own dy nasty named Zhou (684–704). Wu Zetian was an ardent supporter of Buddhism. She associated with such eminent monks as XUANZANG, SHENXIU, FAZANG, and YIJING. In an attempt to legitimize her reign, Wu Zetian also ordered the circulation of the MAHĀMEGHASŪTRA ("Great Cloud Sūtra"), which described a female reincarnation of MAITREYA and her rule over the whole world. She also arranged for the construction in every prefecture of the empire of monasteries all known as DAYUNSI (Great Cloud

Monastery). In 705, she abdicated the throne to the restored Emperor Zhongzong.

wuzhe hui. (J. mushae; K. much'a hoe). In Chinese, "unrestricted assembly "; an assembly hosted by the reigning monarch to make offerings to clergy and laity regardless of their status or station in life. The assembly was ty pically held every five y ears and is therefore also known as the "five-y ear great assembly " (C. wunian dahui; S. pañcavārṣikapariṣad). The first such assembly is attributed to King AŚOKA. Emperor Wu of the Liang dy nasty (LIANG WUDI) is known to have held a wuzhe dahui in 529 for an assembly said to have numbered fifty thousand. The famous pilgrim XUANZANG also witnessed an unrestricted assembly during his travels along the SILK ROAD. In 596, Empress Suiko (554–628) held the first reported unrestricted assembly in Japan. In 732, HE Z E SHENHUI organized an unrestricted great assembly (wuzhe dahui) at the monastery of DAYUNSI in Henan prefecture, where he attacked SHENXIU and his followers.

Wuzhensi. (). In Chinese, "Awakening to Truth Monastery "; located in the Wuzhen Valley of ZHONGNANSHAN near the capital of Chang'an (present- day Xi'an). The monastery is comprised of two compounds, known as the upper and lower monasteries. The upper monastery is also named Zhulinsi, or Bamboo Grove Monastery, because of the bamboo forest surrounding it. Wuzhen Monastery was founded by the Sui-dy nasty Buddhist monk Jingy e (564–616), who stay ed there from 595 to 608. He was accompanied by other eminent monks including Huichao (546–622), a disciple of the TIANTAI master HUISI (515– 568), and Facheng (563–640). The latter was instrumental in expanding the monastery by building the Huay an Hall and another hall to enshrine images of a hundred buddhas. He also inscribed Buddhist verses on cliffs surrounding the monastery and along its roads. Due to his efforts, Wuzhen monastery became renowned during the Tang dy nasty for its majesty and became a favorite haunt of literati. Eminent SAN LUN ZONG monks such as HUIYUAN (523–592), Baogong (542–621), and Huiy in (539–629) also either resided here or were affiliated with the monastery. It was either at Wuzhensi or LONGCHISI that the HUAYAN master FAZANG (643–712), at the behest of the Ruizong emperor of Tang (r. 684–690, 710–712), is said to have famously performed a ritual to pray for snow in order to stave off a severe drought the region was experiencing. During the Song dy nasty, the monastery was renamed CHONGFASI, or Monastery of the Esteemed Dharma.

wuzhong xuanyi. (J. goshu no gengi; K. ojong hy ŏnŭi). In Chinese,

"five categories of profound meaning"; a list of five general hermeneutical issues that should be addressed prior to undertaking an in-depth exegesis of any SŪTRA, attributed to TIANTAI ZHIYI (538–597) and emblematic of scriptural exegesis in the TIANTAI SCHOOL . These five are (1) explicating the meaning of the text's title (shiming), (2) analy zing the fundamental intent of the sūtra (bianben), (3) clarify ing its principal themes or doctrines (mingzong), (4) expounding the sūtra's "function" or impact on its audience (luny ong), and (5) classify ing the sūtra (PANJIAO), viz.,

delineating its place within the entire corpus of sūtras expounded by the Buddha. These five issues ty pically would be addressed by the commentator prior to beginning the exegesis of the sūtra proper. See also SANFEN KEJING; JIAOXIANG PANSHI.

Wuzhu. (C) () (714–774). See BAOTANG WUZHU.

Wuzhun Shifan. (J. Bujun Shihan/Bushun Shiban/Mujun Shihan; K. Mujun Sabŏm) (1178–1249). Chinese CHAN master in the LINJI ZONG. After his ordination in the winter of 1194, Wuzhun studied under a series of famed Chan masters, including FOZHAO DEGUANG and Po'an Zuxian. Wuzhun eventually attained awakening under Po'an and succeeded his lineage. During his illustrious career at such important monasteries as WANSHOUSI on Mt. Jing, Wuzhun also taught the Japanese pilgrims Hōshin (d.u.), Dōy ū (1201–1258), and the famed ENNI BEN'EN, who is now regarded as the first exponent of ZEN in Japan. Wuzhun was later summoned by Emperor Lizong (r. 1224–1264) to provide a public lecture at the Pavilion of Benevolent Illumination in the imperial palace. The emperor later bestowed upon him the title Chan master Fojian (Buddha Mirror). Wuzhun left many famous disciples such as WUXUE ZUYUAN and Mu'an Puning, both of whom went to Kamakura in Japan and served as abbots of the powerful monastery of KENCHŌJI.

Wuzu Fayan. (J. Goso Hōen; K. Ojo Pŏby ŏn) (d. 1104). Chinese CHAN master in the LINJI ZONG. Wuzu was a native of Mianzhou prefecture in present-day Sichuan province. After being ordained at the age of thirty -four, Fay an studied YOGĀCĀRA doctrine in his home province, but later went south where he studied under Huilin Zongben (1020–1099), Fushan Fay uan (991–1067), a nd BAIYUN SHOUDUAN. Fay an eventually became Baiy un's disciple and inherited his Linji lineage. After stay ing at various monasteries in Anhui province, Fay an moved to Mt. Wuzu (also known as East Mountain) in Hubei

province, where he acquired his topony m. The mountain itself received its name, Wuzu (fifth patriarch), from its most famous past resident, the fifth patriarch of Chan, HONGREN. Mt. Wuzu thus became an important center for the Linji lineage, and it was there that Fay an taught his famous disciples YUANWU KEQIN, Taiping Huiqin (1059–1117), and Foy an Qingy uan (1067–1120), known collectively as the "three Buddhas of East Mountain." Wuzu's teachings are recorded in the Wuzu Fayan chanshi yulu.

X xiala. (C) (). See JIELA.

xiangdai miao. (C) (). See DAIJUE ERMIAO.

xiangfa. (J. zōhō; K. sangpŏp). In Chinese, "semblance dharma" or "counterfeit dharma"; a term related to the Sanskrit SADDHARMAPRATIRŪPAKA. The Sanskrit term has a range of uses, including as a designation for the BUDDHADHARMA after the buddha has passed into PARINIRVĀṆA. In the East Asian context, xiangfa came to designate the second and middle period of a buddha's teaching. The first period, that of the SADDHARMA (C. zhengfa), is the period of the true dharma after a buddha's

passage into parinirvāṇa, during which time it is still possible to achieve enlightenment by following his teachings. The second period, of xiangfa, is a time during which the achievement of enlightenment is still possible, but the practice of the dharma has generally been reduced to rote repetition of the teachings and practices; there are also signs of laxity in both monastic and lay practice developing during this period. The third period, that of MOFA (cf. SADDHARMAVIPRALOPA), or the final dharma, is a time of degeneration and decline, during which the practice of the dharma is no longer efficacious, due largely to the diminished capacities of humans. This division into three periods of the dharma seems to have originated in China and was widely influential in East Asian Buddhism.

Xiangfa jueyi jing. (J. Zōbō ketsugiky ō; K. Sangpŏp ky ŏrŭi ky ŏng). In Chinese, the “Scripture on Resolving Doubts Concerning the Semblance Dharma”; an indigenous Chinese Buddhist scripture (see APOCRYPHA), dating from the mid-sixth century . The Xiangfa jueyi jing is set against the background of the Buddha’s PARINIRVĀṆA. At the request of a BODHISATTVA named Changshi (Constant Giving), the Buddha offers instructions on the practice of giving (DĀNA), in which he declares charity to be the most appropriate practice during the age of the semblance dharma (XIANGFA; SADDHARMAPRATIRŪPAKA). The semblance-dharma period is characterized as an age of degeneration, during which both clergy and laity begin to transgress the precepts and slander the Buddha’s teaching. The Xiangfa jueyi

jing emphasizes the importance of collective rather than individual giving during this age, and especially giving to the impoverished and underprivileged, rather than just to the three jewels (RATNATRAYA) of Buddhism. These and other ideas from the Xiangfa jueyi jing were especially influential in the teachings of the Third-Stage school (SANJIE JIAO) and that school’s emblematic institution, th e WUJINZANG YUAN (inexhaustible storehouse cloister). Such eminent monks as TIANTAI ZHIYI, JIZANG, and HŌNEN also held the Xiangfa jueyi jing in high regard.

Xiangguosi. (). In Chinese, “Minister of the State Monastery ”; located in eastern Henan in the city of Kaifeng. Originally built in 555 CE and named Jianguosi, it was subsequently destroy ed during a battle. It then became a private residence and garden; but later, when a monk named Huiy un saw a reflection of a monastery in its garden pool, he collected enough subscriptions to buy the residence and turn it back into a monastery in 711. It was renamed Xiangguosi by the Ruizong emperor of the Tang (r. 684–690, 710–712). The monastery was well supported by Tang and Song emperors, as evidenced by the campus’s extensive grounds and the lavish materials used in its accoutrements, such as using gold dust to decorate images, icons, and paintings. It is well known for its lay out, including its use of twin pagodas (STŪPA). Xiangguosi also became famous for its frescoes, painted by famous contemporary artists from the neighboring region. Artists at the Song Painting Academy painted much of the Buddhist imagery at this monastery. Xiangguosi reached the zenith of its influence during the Song dy nasty , when it became an outpost for foreign monks

visiting China.

xiangjiao. (J. zōky ō; K. sanggy o). In Chinese, “teaching [viz., religion] of images”; a pejorative term coined by Confucians to refer to Buddhism, derived from the emphasis in Buddhism on bowing before images during rituals and ceremonies. Confucianism, in turn, was called the “teaching [viz., religion] of names” (mingjiao), to demonstrate by contrast that it was based on intellectual inquiry and the “rectification of names” (zhengming) rather than on worship of images of Confucius and the teachers within the tradition.

Xiangmo Zang. (T. Bdud ’dul sny ing po; J. Gōma Zō; K. Hangma Chang) (d.u.). In Chinese, “Demon-Subduer Zang.” Chinese monk and leading disciple of the CHAN master SHENXIU, in the Northern school (BEI ZONG). At an early age, Xiangmo Zang acquired the nickname “demon-subduer” (xiangmo) by

dwelling in deserted houses and open fields. Later, he learned to recite the SADDHARMAPUṆḌARĪKASŪTRA and studied the VINAYA after he became a monk. He is said to have had an awakening experience after listening to a lecture on the “theories of the Southern school” (NAN ZONG lun) and, abandoning his scriptural studies, became a student of Shenxiu. As Shenxiu’s disciple, Xiangmo Zang became the target of HEZE SHENHUI’s polemical attack on the Northern school of Chan. Xiangmo Zang also appears in the BSAM GTAN MIG SGRON by GNUBS CHEN SANGS RGYAS YE SHES along with a certain Wolun (d.u.) and MOHEYAN and others of the Northern school, whose teachings may have exerted some influence on MAHĀYOGA in Tibet.

Xiangshansi. (). In Chinese, “Fragrant Mountain Monastery ”; located on SONGSHAN in Ruzhou, Henan province. It is not known when the monastery was first established, but it is thought to have been built c. 516 CE during the Northern Wei dy nasty (386–584). One source credits the founding of a Xiangshan monastery in Xiangzhou to a certain general named Liu Qingzhi, but no further mention is made of either the general or the monastery. The current Xiangshansi underwent a major renovation around 1068 during the Northern Song dy nasty, and special attention was paid to restoring its Dabei ta (Great Compassion pagoda), which still stands today ; housed in the pagoda is a thousand- armed and thousand-ey ed form of GUANYIN (SĀHASRABHUJASĀHASRANETRĀVALOKITEŚVARA). Xiangshansi, like SHANG TIANZHUSI, is known for being a major pilgrimage site for Guany in (AVALOKITEŚVARA) worship. It became associated with the Princess MIAOSHAN incarnation of Guany in, whose legend is inscribed on a stele at the monastery. The stele was commissioned in 1100 by a minor civil servant, Jiang Zhiqi (1031–1104), who was the prefect of Ruzhou. Jiang had the legend reinscribed on another stele at the Shang Tianzhusi when he moved to Hangzhou four y ears later.

xiangxu wuchang. (C) (). See ER WUCHANG.

Xiangyan Zhixian. (J. Ky ōgen Chikan; K. Hy angŏm Chihan) (d. 898). Chinese CHAN master in the GUIYANG ZONG of the Chan tradition. Zhixian entered the

monastery under BAIZHANG HUAIHAI and later became a student o f YANGSHAN HUIJI. Zhixian dwelled for a long time at Mt. Xiangy an, whence his topony m. One day while he was sweeping the garden, Zhixian is said

to have attained awakening when he heard the bamboo brush against the roof tiles. He is best known for the GONG'AN case "Xiangy an Hanging from a Tree": A man is dangling by his mouth from the branch of a tall tree, his hands tied behind his back and nothing beneath his feet. Someone comes under the tree branch and asks, "Why did BODHIDHARMA come from the West?" If he keeps his mouth clenched and refuses to answer, he is rude to the questioner; but if he opens his mouth to answer, he will fall to his death. How does he answer? Upon Zhixian's death, he was given the posthumous title Chan master Xideng (Inheritor of the Lamplight).

xiang zong. (J. sōshū; K. sang chong). In Chinese, "characteristics school"; also known as the FAXIANG ZONG or "Dharma Characteristics" school. Both these names were used polemically by rival scholiasts to polarize certain trends in Buddhist thought. In distinction to the XING ZONG, or "nature" school, FAZANG in the HUAYAN ZONG uses the term xiang zong to refer to those monk-scholars whose scholarship focused on the changing form of phenomena and reality. Monks of the Faxiang or YOGĀCĀRA tradition tended to be categorized as this characteristics school. Maintaining a strict distinction between the xing and the xiang trends was called xingxiang juepan (differentiation of nature and characteristics), while a scholastic approach that attempted to harmonize the two trends was characterized as xingxiang ronghui (harmonizing nature and characteristics).

Xianzong ji. (J. Kenshūki; K. Hy ŏnjong ki). In Chinese, "Notes on Revealing the Cardinal Principle," attributed to HEZE SHENHUI; also known as the Heze dashi xianzong ji ("Notes on Revealing the Cardinal Principle of Great Master Heze") and Xianzong lun ("Treatise on Revealing the Cardinal Principle"). A simpler version of the Xianzong ji, entitled Dunwu wusheng bore song ("Verses on Sudden Enlightenment, the Unborn, and Prajñā"), was also discovered at DUNHUANG. As the title of the Dunhuang version makes clear, in this treatise Shenhui expounds on the notions of no-thought (WUNIAN), the unborn, or nonarising (ANUTPĀDA), and wisdom (prajñā), which all seem to function as sy nony ms for emptiness (ŚŪNYATĀ). Shenhui also mentions the Indian patriarch BODHIDHARMA's transmission of this "secret teaching" to China and his conferral of the patriarchal robe as a mark of transmission. The Xianzong ji was later included in the genealogical history of the Chan tradition, the JINGDE CHUANDENG LU.

Xiaodao lun. (J. Shōdōron; K. Sodo non). In Chinese, "Laughing at the Dao Treatise"; an anti-Daoist polemical treatise composed by Zhen Luan (d.u.) and presented to Emperor Wu (r. 560–578) of the Northern Zhou dy nasty in 570. In response to the Daoist contentions in the LAOZI HUAHU JING that the Chinese sage Laozi went to India and became ŚĀKYAMUNI Buddha in order to convert the Western barbarians, the Xiaodao lun attempts to expose the inconsistencies in Daoist thought,

cosmological perspectives, practice, and ritual, and to demonstrate that the Daoists actually borrowed heavily from Buddhism. The treatise so displeased the emperor that he is said to have immediately ordered the text burned.

xiaoguo. (C) (). In Chinese, “minor misdeed.” See DUṢKṚTA.

xiaomiao. (). In Chinese, lit. “small temple”; a Songdy nasty term for private monasteries whose control was passed within a single monastic lineage. The term is used in distinction to the large public monasteries, or “monasteries of the ten directions” (SHIFANG CHA).

xiaosheng jiao. (C) (). See HUAYAN WUJIAO.

xiayu. (C) . See AGYO.

Xiao zhiguan. (C) (). See XIUXI ZHIGUAN ZUOCHAN FAYAO.

xilai yi. (J. seiraii; K. sŏrae ŭi). In Chinese, lit. “the meaning of coming from the west”; in CHAN literature, a common allusion to the question “What was the meaning of [Bodhidharma’s] coming from the west?” (xilai y i ruohe), i.e., “Why did BODHIDHARMA, the founding patriarch of Chan, come from India to propagate Chan?” This question was commonly asked in Chan GONG’AN exchanges to test the spiritual depth of a teacher or disciple and as a meditative topic in “questioning meditation” (KANHUA CHAN). The phrase is found in HUANGBO XIYUN’s (d. c. 850) CHUANXIN FAYAO, and the use of the question is well display ed in a famous exchange involving MAZU DAOYI (709–788) and his disciple Hongzhou Shuiliao (d.u.): when Shuiliao asks Mazu this question, Mazu encourages him to come closer, whereupon he kicks him to the ground, and Shuiliao immediately jumps up, enlightened. ZHAOZHOU CONGSHEN’s (778–897) answer to this question is the famous gong’an: “Cy press tree in front of the courty ard” (TINGQIAN BOSHUZI). Some of the other

answers that appear in Chan literature include “sitting for a long time is a bother” (BIYAN LU, case no. 17), “there is no meaning in Bodhidharma’s coming from the west” (Biyan lu, case no. 20), and “Zang’s head is white, Hai’s head is black” (Biyan lu, case no. 73).

xilai yi ruohe. (C) ( ). See XILAI YI.

Ximingsi. (). In Chinese, “Luminosity of the West Monastery,” located in the Tang capital of Chang’an (presentday Xi’an). There are two founding narratives. The first credits the Gaozong emperor (r. 649–683) with establishing the monastery at his old residence in 658 and installing DAOXUAN (596–667), founder of the Nanshan VINAYA school (NANSHAN LÜ ZONG), as its abbot. It is there that Daoxuan is said to have compiled the DA TANG NEIDIAN (“Great Tang Catalogue of Inner [viz., Buddhist] Classics”) as an inventory of scriptures for the newly established library at the monastery. Daoxuan also assisted XUANZANG (600/602–664) in translating preceptive texts, collaborated with his brother Daoshi (d. c. 683) in publishing VINAYA texts, and wrote his collection of essay s in defense of Buddhism entitled the GUANG HONGMING

JI. A second narrative instead credits Xuanzang with founding the monastery. According to this story, the grounds were originally the residence of an imperial prince, and at first it was proposed to build both a Buddhist and a Daoist monastery there. After Xuanzang survey ed the site, he pronounced the site too small for two establishments, and thus only a Buddhist monastery was built. When Xuanzang settled there, the Gaozong emperor (r. 649–683) is said to have donated land, silk, and cotton to sustain it. ¶ Regardless of which account is correct, Ximingsi quickly became a major center of Buddhist scholarship and housed the most comprehensive library of Buddhist texts in the country. The monastery is said to have been built to match the dimensions of JETAVANA in India and, at one point, housed sixty -four cloisters. Because of its location in the Tang capital, several eminent monks resided and worked there. For example, the Tang emperor Xuanzong (r. 713–756) is said to have invited ŚUBHAKARASIṂHA to stay at Ximingsi, where YIXING (683–727) assisted him in his translation work. YIJING (635–713) also translated there the Sanskrit manuscripts he brought back with him from his pilgrimage to India. The Korean m onk WŎNCH'ŬK (613–695) worked with Xuanzang at Ximingsi (to the point that his lineage of scholastic interpretation is sometimes called the Ximing lineage, see XIMING XUEPAI), and the Japanese monk KŪKAI (774–835) is

also known to have studied at the monastery .

Ximing xuepai. (C) (). In Chinese, "the Ximing scholastic lineage" of the FAXIANG ZONG, associated with WŎNCH'ŬK. See FAXIANG ZONG.

xindi. (S. cintābhūmikā; J. shinji; K. simji). In Chinese, lit. "mind-ground" or "mind as ground"; a common metaphor used in MAHĀYĀNA literature to suggest that mind or thought is the source, or "ground," of all phenomena. The Dasheng bensheng xindi guan jing ("Sūtra on the Great-Vehicle Contemplation of the Innate Mind Ground"), for example, metaphorically refers to the minds of the sentient beings of the three realms of existence as a "mind-ground," since all phenomena—whether mundane (LAUKIKA) or supramundane (LOKOTTARA), and including all virtuous and nonvirtuous dharmas, as well as the five rebirth destinies (GATI) and the states of a PRATYEKABUDDHA, BODHISATTVA, or even a buddha—are generated from the mind of sentient beings, just as all grains and fruits are generated from soil. A commentary to the MAHĀVAIROCANĀBHISAṂBODHISŪTRA (Dari jing shu) say s that the mind is also metaphorically referred to as a "ground," since the practice of bodhisattvas relies on the mind, just as activities of ordinary people rely on the ground. In the FANWANG JING ("Brahmā's Net Sūtra"), the mind-ground refers to the bodhisattva precepts (PUSA JIE), which help to restrain the activities of body, speech, and mind; the precepts are the mind-ground because the activities of mind, or thought, are the basis for actions performed via body and speech. The buddha Vairocana say s in the sūtra that he achieved complete, perfect enlightenment (SAMYAKSAṂBODHI) only after cultivating the mind- ground over a hundred incalculable eons (ASAṂKHYEYAKALPA). The Korean monk WŎNHYO (617–686), in his Pŏmmanggyŏng Posal kyebon sagi ("Personal

Exposition on the Bodhisattva Precepts Text of the ‘Brahmā’s Net Sūtra’”), described three different denotations of mind-ground in terms of the abider and the ground on which that abider resides. These are (1) the fifty stages of the bodhisattva path (the ten BODHISATTVABHŪMI, plus the forty stages preliminary to the bhūmis), which is the ground on which the thought of enlightenment (BODHICITTA) of the bodhisattva abides; (2) the three categories of precepts (ŚĪLATRAYA), which is the ground on which the enlightened mind abides; and (3) the realm of reality (DHARMADHĀTU), which is the ground on which the practitioner abides. In the CHAN ZONG, the mind that was transmitted by BODHIDHARMA, the putative founder of Chan, is termed the mind-ground,

and his teaching of the one (enlightened) mind is called the dharma teaching of the mind-ground (xindi famen). HUANGBO XIYUN (d. 850) say s in his CHUANXIN FAYAO that the “dharma teaching of the mind-ground means that all dharmas are constructed depending upon this mind.” Finally, GUIFENG ZONGMI in his CHANYUAN CHUCHUANJI TUXU (“Prolegomenon to the Comprehensive References to the Fountainhead of Chan Collection”) equates mind-ground with the buddha-nature (FOXING): “the originally enlightened true nature of sentient beings is called both buddha-nature and mind-ground.”

xingjiao. (J. angy a; K. haenggak). In Chinese, lit., “wandering on foot,” i.e., “pilgrimage”; a term used especially in the CHAN tradition to refer to a pilgrimage, often performed by a y oung monk who is in search of a teacher. Traditionally, this pilgrimage is made to numerous monasteries, most often located deep in the mountains, in hopes of having an interview with the resident master. In Japan, angy a nowaday s refers to the trip that y oung monks (known as unsui; see YUNSHUI) who have just completed their initial training at a provincial temple make to a major Zen training monastery, where they can continue their studies with a senior teacher (RŌSHI).

xingju shuo. (J. shōgusetsu; K. sŏnggu sŏl). In Chinese, the “nature-replete theory ”; also known as liju sanqian, or “principle is replete with the trichiliocosm (TRISĀHASRAMAHĀSĀHASRALOKADHĀTU).” According to TIANTAI doctrine, every thing within the three realms of existence (TRAIDHĀTUKA) is all contained within the original nature of all sentient beings. This theory is said to be based on TIANTAI ZHIYI’s notion of YINIAN SANQIAN, or “the trichiliocosm in a single thought.” During the SHANJIA SHANWAI debate of the eleventh-century Tiantai community, the xingju theory came to connote the trichiliocosm that was replete within my riad phenomena and was distinguished from the HUAYAN doctrine of XINGQI.

xingli. (J. anri; K. haengni). In Chinese, lit., “practice hidden”; a contraction of qiongxing lijian, which literally means “assiduous practice and hidden conduct.” In the CHAN traditions, xingli generally refers to the daily conduct of a monk, which includes a whole gamut of activities from walking, sitting, and keeping silence to drinking tea and eating food. As such, the term can also refer to the progress of a monk’s training or

to the history of his activities.

xingqi. (J. shōki; K. sŏnggi). In Chinese, “nature origination”; an important

HUAYAN soteriological and ontological theory, which emphasizes the common ground of all phenomenal appearances in the true nature of the mind. The term xingqi probably derives from the “Baowang rulai xingqi pin” (“Chapter on the ‘Nature Origination’ of the Tathāgata Jeweled King”), the thirty -second chapter o f BUDDHABHADRA’s (359–429) sixty -roll translation of the AVATAṂSAKASŪTRA, which seems to translate the Sanskrit term tathāgatagotrasaṃbhava (the arising of the lineage of the tathāgata). Its philosophical origins lie in the TATHĀGATAGARBHA corpus of literature, which maintains that all sentient beings are fundamentally identical to the buddhas, since they share the same buddha-nature (FOXING), and the term finds its antecedents in such earlier theories as the “conditioned origination of the true nature” (zhenxing y uanqi) proposed by the Southern DI LUN ZONG master JINGYING HUIYUAN (523–592). ¶ The term “nature origination” was coined by the second Huay an patriarch ZHIYAN (602–668), and its implications were elaborated by the “third patriarch” FAZANG (643–712) in his HUAYANJING TANXUAN JI and especially the “fifth patriarch” GUIFENG ZONGMI (780– 841). In Zhiy an’s soteriological interpretation of the xingqi, as elucidated in his influential treatise, HUAYAN JING NAIZHANGMEN DENG ZA KONGMU ZHANG, “nature” (xing) refers to the “essence” (TI) and “origination” (qi) to the appearance of that essence in the “mind-ground” (XINDI). Zhiy an explicitly contrasts nature origination with the soteriological formulations of dependent origination (C. y uanqi; S. PRATĪTYASAMUTPĀDA): unlike dependent origination, which explains the specific conditions through which the experience of enlightenment occurs—and thus inevitably distinguishes the ordinary realm of SAṂSĀRA from the enlightened realm of NIRVĀṆA—nature origination operates entirely on the level of fruition to explain how enlightenment can “originate” only from within the very “nature” of this world itself. Enlightenment is therefore not something that needs to be produced, for it is the inherent nature of the mind itself. Zongmi subsequently provides a more ontological explanation of the xingqi, by explaining that “nature” refers to the one mind (YIXIN) as discussed in the DASHENG QIXIN LUN (“Awakening of Faith According to the Mahāy āna”) and “origination” refers to the process by which that nature is made manifest in the world at large. Thus, in distinction to the “conditioned origination of the DHARMADHĀTU” (FAJIE YUANQI), which explains how all phenomena in the universe are mutual conditioning, and conditioned by, all other phenomena, “nature origination” instead clarifies that all those phenomena simultaneously derive from the common ground that is the nature. Nature

origination thus provides a description of causality from the standpoint of the “dharmadhātu of the unimpeded interpenetration of principle and phenomena” (LISHI WU’AI FAJIE).

Xingsi. (C) (). See QINGYUAN XINGSI.

Xingtao. (C) (). See MU’AN XINGTAO.

xingzhe. (J. anja; K. haengja). In Chinese, “postulant.” According to the Shishi yaolan, a postulant refers to an unordained lay practitioner, a minimum of sixteen y ears of age, who works in a monastery until he or she is formally ordained. Within the CHAN traditions of East Asia, the sixth patriarch (LIUZU) HUINENG (638–713) is usually presumed to have been a postulant at the time he achieved enlightenment and received transmission from the fifth patriarch HONGREN. In premodern China, a postulant referred to a lay person who lived and worked in the monastic compounds before ordination; the postulant was still permitted to grow his or her hair and might in some cases even have a spouse. Postulants were expected to observe the five lay precepts (C. wujie; S. PAÑCAŚĪLA), but with the third precept against improper sexual conduct strengthened to require celibacy. In Korea, postulants (haengja) work in the monastery for at least six months before being allowed to ordain as novices. In Japan, a postulant (anja) may or may not be expected to ordain and works under the guidance of the administrative monks (y akusō) at the monastery or temple. ¶ The term xingzhe may also be used generically to refer to any one who studies or practices Buddhism.

xing zong. (J. shōshū; K. sŏng chong). In Chinese, the “school of the nature”; also known as the FAXING ZONG, or “Dharma Nature” school. In distinction to th e XIANG ZONG, or “characteristics school,” which mainly involved the analy sis of phenomena, the xing school refers to those Buddhist intellectual traditions that studied the underly ing essence or “nature” of reality. While the xiang school, i.e., the FAXIANG or “Dharma Characteristics” school, was a pejorative term referring to the Chinese YOGĀCĀRA school established on the basis of the new Yogācāra texts introduced from India by XUANZANG (600/602–664) and elaborated by his lineage, the name “xing zong” was used polemically to refer to the MADHYAMAKA teachings of the SAN LUN ZONG, the TATHĀGATAGARBHA teachings, or the last three of the five teachings in the HUAYAN school’s hermeneutical taxonomy (see JIAOXIANG PANSHI):

the advanced teachings of Mahāy āna (Dasheng zhongjiao), i.e., the sudden teachings (DUNJIAO) and the perfect teachings (YUANJIAO). Maintaining a strict differentiation between the xing and xiang tendencies was called xingxiang juepan (differentiation between nature and characteristics); a scholastic approach that sought to harmonize the two trends was characterized as xingxiang ronghui (harmonizing nature and characteristics).

Xin Huayan jing lun. (C) (). See HUAYAN JING HELUN.

xinman chengfo. (C) (). See YUANRONG.

xinxin. (J. shinjin; K. sinsim). In Chinese, “mind of faith” or “faith in mind”; the compound is ty pically interpreted to mean either faith in the purity of one’s own mind or else a mind that has faith in the three jewels (RATNATRAYA) and the principle of causality. The “mind of faith” is generally considered to constitute the inception of the

Buddhist path (MĀRGA). In the elaborate fifty -two stage path schema outlined in such scriptures as the AVATAṂSAKASŪTRA, the RENWANG JING , and the PUSA YINGLUO BENYE JING, “mind of faith” (xinxin) constitutes the first of the ten stages of faith (shixin), a preliminary level of the BODHISATTVA path generally placed prior to the generation of the thought of enlightenment (BODHICITTOTPĀDA) that occurs on the first of the ten abiding stages (shizhu). The MAHĀPARINIRVĀṆASŪTRA also say s that the buddha-nature (FOXING) can be called the “great mind of faith” (da xinxin) because a bodhisattva-mahāsattva, through this mind of faith, comes to be endowed with the six perfections (PĀRAMITĀ). ¶ In the PURE LAND traditions, the mind of faith ty pically refers to faith in the vows of the buddha AMITĀBHA, which ensures that those who have sincere devotion and faith in that buddha will be reborn in his pure land of SUKHĀVATĪ. SHANDAO (613–681) divided the mind of faith into two ty pes: (1) faith in one’s lesser spiritual capacity (xinji), which involves acceptance of the fact that one has fallen in a state of delusion during my riads of rebirths, and (2) faith in dharma (xinfa), which is faith in the fact that one can be saved from this delusion through the vows of Amitābha. SHINRAN (1173–1262) glosses the mind of faith as the buddha-mind realized by entrusting oneself to Amitābha’s name and vow. ¶ The term xinxin is also used as a translation of the Sanskrit ŚRADDHĀ (faith), which is one of the five spiritual faculties (INDRIYA), and of ADHYĀŚAYA (lit. “determination,” “resolution”), which is used to describe the intention of the bodhisattva to liberate all beings

from suffering. See also XINXIN MING.

Xinxing. (J Shingy ō; K. Sinhaeng) (540–594). In Chinese, “Practice of Faith”; founder of the “Third-Stage Sect” (SANJIE JIAO), a school of popular Buddhism that flourished during the Tang dy nasty. Born in Ye in presentday Henan province, Xinxing ordained as a novice monk by the age of seventeen, after which he wandered the country, study ing Buddhism and reading such Buddhist scriptures as the SADDHARMAPUṆḌARĪKASŪTRA (“Lotus Sūtra”), VIMALAKĪRTINIRDEŚA, and MAHĀPARINIRVĀṆASŪTRA. Feeling guilty for accepting from the laity offerings that he did not believe he deserved, Xinxing eventually abandoned monastic life, participating in various state labor projects and cultivating ascetic practices. He is also known to have bowed to all he met on the street, following the teachings of the SADĀPARIBHŪTA chapter of the Saddharmapuṇḍarīkasūtra. It is uncertain exactly when Xinxing established the Third-Stage Sect, but it was probably sometime around 587. In 589, at the behest of Emperor Wendi, he entered Chang’an, the capital city of the Sui dy nasty, and stay ed at Zhenjisi (Authentic Quiescence Monastery, later renamed Huadu monastery), where he promoted actively the teachings of the school until his death in 594. Xinxing had about three hundred followers, including Sengy ong (543–631) and Huiru (d. c. 618). Due to the proscription of the sect during the Tang dy nasty, only a few fragments of Xinxing’s writings are extant. These include the Sanjie fofa (“Buddhadharma during the Third Stage”), in four rolls, and sections of the Duigen qixing fa (“Principles on Practicing in Response to the Sense-Bases”) and the Ming

Dasheng wujinzang fa (“Clarify ing the Teaching of the Mahāy āna’s Inexhaustible Storehouse”). ¶ Xinxing’s teachings derive from the doctrines of the degenerate dharma (MOFA) and the buddha-nature (FOXING); they emphasize almsgiving (S. DĀNA) as an efficient salvific method, which contributed to the development of the school’s distinctive institution, the WUJINZANG YUAN (inexhaustible storehouse cloister). Because people during the degenerate age (mofa) were inevitably mistaken in their perceptions of reality, it was impossible for them to make any meaningful distinctions, whether between right and wrong, good and evil, or ordained and lay . Instead, adherents were taught to treat all things as manifestations of the buddha-nature, leading to a “universalist” perspective on Buddhism that was presumed to have supplanted all the previous teachings of the religion. Xinxing asserted that almsgiving was the epitome of Buddhist practice during the degenerate age of the dharma and that the true perfection of giving (DĀNAPĀRAMITĀ) meant that all

people, monks and lay people alike, should be making offerings to relieve the suffering of those most in need, including the poor, the orphaned, and the sick. In its radical reinterpretation of the practice of giving in Buddhism, even animals were considered to be a more appropriate object of charity than were buddhas, bodhisattvas, monks, or the three jewels (RATNATRAYA). Particularly significant were offerings made to the inexhaustible storehouse cloister (Wujinzang y uan), which served the needs of the impoverished and suffering in society —especially offerings made on the anniversary of Xinxing’s death. See also XIANGFA JUEYI JING.

Xinxin ming. (J. Shinjinmei; K. Sinsim my ŏng). In Chinese, “Inscription on the Mind of Faith” (or “Faith in Mind”); attributed to the dubious third patriarch of the CHAN tradition, the otherwise-unknown SENGCAN. The Xinxin ming is a relatively short poem that praises nonduality and the method for attaining that experience. The last stanza, for instance, states that “faith and mind” (xinxin) are not two, and nonduality (lit. “not two”) is the “perfected mind” (xinxin). According to the Xinxin ming, the method of attaining nonduality largely involves the cultivation of detachment, especially from words and thoughts. Along with the ZHENGDAO GE, CANTONG QI, and BAOJING SANMEI, the Xinxin ming has been regarded as one of the seminal statements of the Chan understanding of the dharma. Numerous commentaries on the poem were composed in East Asia. The Xinxin ming is still recited aloud in some Chan and ZEN monasteries.

xinxun zhongzi. (C) (). In Chinese, “newly acquired seeds.” See BĪJA.

Xiqian. (C) (). See SHITOU XIQIAN.

Xitan ziji. (J. Shittan jiki; K. Siltam chagi). In Chinese, “Notes on the SIDDHAM Sy llabary,” by the Chinese monk Zhikuang (d.u.); an influential primer of the Indian Siddham writing sy stem. The Xitan ziji is said to be based on the teachings of a certain South Indian monk named Prajñābodhi. The main purpose of the Xitan ziji is to explain briefly the morphological operation of combining vowels and consonants.

Zhikuang begins by discussing short and long sy llables (e.g., a and ā). He then provides a detailed explanation of each vowel, their pronunciations, their various inflections, and their names. His coverage then extends to the sy llables formed from the combination of consonants and vowels.

Xiuxin yao lun. (J. Shushin y ōron; K. Susim y o non). In Chinese, “Treatise on the Essentials of Cultivating the Mind,” attributed to the fifth patriarch of the CHAN school, HONGREN; an important text on meditative practice in the early Chan tradition. The edition of the Xiuxin yao lun used within the Chan school was published at the Korean monastery of Ansimsa in 1570 during the Chosŏn dy nasty under the title CH’OESANGSŬNG NON (“Treatise on the Supreme Vehicle”) and again in 1907 as part of an edited volume of SŎN materials known as the SŎNMUN CH’WARYO . With the recent discovery of some earlier versions of the text at DUNHUANG, a more nuanced history of the Xiuxin yao lun has emerged. Overall, the different recensions all seem to share the common goal of establishing “guarding the mind” (shouxin) as an authentic and effective practice in Chan. Largely written in dialogic format, the Xiuxin yao lun emphasizes the inherent purity of the mind, which the author likens to suchness (TATHATĀ). The practice of “guarding the mind” seems to be related to or even derived from the fourth patriarch DAOXIN’s “guarding the one” (shouy i), a practice that Daoxin probably borrowed from indigenous Chinese materials. The Xiuxin yao lun also emphatically notes the superiority of shouxin over the popular practice of reciting the buddha’s name (NIANFO) and a (misguided) experience of SAMĀDHI, suggesting a polemical context for its composition.

Xiuxi zhiguan zuochan fayao. (J. Shujū shikan zazenhōy ō; K. Susŭp chigwan chwasŏn pŏby o). In Chinese, “Essentials for Sitting in Meditation and Cultivating Calmness and Contemplation”; also known as the Tongmeng zhiguan (“Calming and Contemplation for Neophy tes”) and the (Tiantai) Xiao zhiguan (“Shorter Calming and Contemplation of [Tiantai]”). The m onk TIANTAI ZHIYI, the sy stematizer of the TIANTAI ZONG , is known to have composed this treatise as a guide for training his brother Zhen Zhen. The treatise was composed sometime after his Shi chan boluomi cidi chanmen (571) and MOHE ZHIGUAN (594). Despite its popular designation as the Xiao zhiguan, the relatively short Xiuxi zhiguan zuochan fayao borrows heavily from the Shi chan boluomi cidi chanmen and seems to have no direct relation to Zhiy i’s m assive Mohe zhiguan. A preface to the Xiuxi zhiguan zuochan fayao was prepared by the monk Yuanzhao (1048–1116) and was published together with the treatise in 1095. The treatise is divided into ten chapters: (1) necessary conditions, (2) rebuking desires, (3) discarding obstructions, (4) regulation, (5) expedient methods (UPĀYA), (6) proper cultivation, (7) manifestation of the

(roots of) virtue (KUŚALAMŪLA), (8) recognizing MĀRA, (9) healing ailments, and (10) attainment of fruits. The practice of meditation outlined in the treatise is based on the twenty -five preparatory expedient methods of the DAZHIDU LUN and the Shi chan boluomi cidi chanmen. As the title makes clear, the general purpose of the treatise is to

provide the essentials for the concurrent practice of calming (ŚAMATHA) and insight (VIPAŚYANĀ). The treatise is still widely used in various Buddhist traditions as a practical manual for beginning meditators.

Xuanjue. (C) (). See YONGJIA XUANJUE.

xuanmen. (C) (). See SHI XUANMEN.

Xuansha sanbing. (J. Gensha sanby ō; K. Hy ŏnsa samby ŏng). In Chinese, “Xuansha’s Three Infirmities”; a famous sermon attributed to the CHAN master XUANSHA SHIBEI. Different versions of the sermon are found in the BIYAN LU (case 88), JINGDE CHUANDENG LU (roll 18), KAIAN KOKUGO (roll 6), etc. One day, Xuansha asked the assembly what they would do should a blind, mute, and deaf person come to them for teaching, since the blind cannot see them raise their whisk, the mute cannot reply, and the deaf cannot hear. On a different occasion, the Chan master YUNMEN WENYAN demonstrated how this could be done. When a monk stepped back as Yunmen was about to hit him, the master whimsically noted that the monk was not blind. When the monk approached at his bidding, Yunmen then noted that the monk was not deaf. Finally, Yunmen asked the monk if he understood, and when the monk gave him a negative reply , Yunmen declared that he was not mute.

Xuansha Shibei. (J. Gensha Shibi; K. Hy ŏnsa Sabi) (835–908). Chinese CHAN master in the lineage of QINGYUAN XINGSI (d. 740) and a predecessor

in the FAYAN ZONG of the classical Chan school; he was a native of Min (presentday Fujian province). Xuansha left home to study with the Chan master Lingxun (d.u.) on Mt. Furong and later received the monastic precepts in 864 from the VINAYA master Daoxuan (d.u.) at the monastery KAIYUANSI in Jiangxi province. Two y ears later, he visited the Chan master XUEFENG YICUN and became his disciple. Xuansha’s adherence to the precepts is said to have been so strict that he was given the nickname Bei Doutuo, or “DHUTAṄGA Bei.” He subsequently left Xuefeng’s side and established a cloister on Mt. Sheng (also known as Mt. Xuansha) in Fujian province, named Xuansha (Sublime Sand). In 898, he was summoned to live in the cloister of Anguoy in in Fujian by the king of Min. Emperor Zhaozong (r. 888–904) gave Xuansha the title of Great Master Zongy i (Tradition’s Best). Luohan Kuichen (867–928) was one of his disciples. His say ings were published in the Xuansha guanglu and Xuansha Shibei chanshi yulu, and sporadic references to some of his more popular say ings (e.g., XUANSHA SANBING) can also be found in the BIYAN LU.

Xuansu. (C) (). See HELIN XUANSU.

Xuanxue. (J. Gengaku; K. Hy ŏnhak). In Chinese, “Dark Learning,” or “Profound Learning”; a Chinese philosophical movement of the third through sixth centuries CE, which provided a fertile intellectual ground for the emergence of early Chinese forms of Buddhism. It is sometimes known as “Neo-Daoism,” although the target audience of Xuanxue literati was fellow elite rather than adherents of the new schools of religious Daoism that were then developing in China. The social and political upheaval that accompanied the fall of the Han dy nasty (206 BCE–220 CE) prompted many Chinese intellectuals to question the traditional foundations of Chinese thought and society and opened them to alternative worldviews. Buddhism, which was just then beginning to filter into Chinese territories, found a receptive audience among these groups of thinkers. Xuanxue scholars critiqued and reinterpreted the normative Chinese teachings of Confucianism by drawing on the so-called “three dark [treatises]” (sanxuan), i.e., the Yijing (“Book of Changes”), Daode jing (“The Way and Its Power”), and the Zhuangzi. Xuanxue designates a broad intellectual trend that sought a new way of understanding the “way ” (DAO). Xuanxue philosophers explored the ontological grounding of the changing and diverse world of “being” (C. y ou) on a permanent and indivisible substratum called “nothingness” or “non-being” (C. WU). Xuanxue thinkers such as Wang Bi (226–249), who is regarded as the founder of

the movement, and Guo Xiang (d. 312), who is often considered to represent its apex, explored how this ontological stratum of nothingness still was able to produce the world of being in all its diversity. This process was clarified by adopting the mainstream Chinese philosophical bifurcations between (1) the ineffable “substance” or “essence” (TI) of things and the way s in which that substance “functions” (YONG) in the phenomenal world; and (2) the “patterns” or “principles” (LI) that underlie all things and their phenomenal manifestations (SHI). These distinctions between ti/y ong and li/shi proved to be extremely influential in subsequent Chinese Buddhist exegesis. Also according to Xuanxue interpretation, the sage (shengren) is one who understands this association between being and nothingness but realizes that their relationship is fundamentally inexpressible; nevertheless, in order to make it intelligible to others, he feels “compelled” to describe it verbally. This emphasis on the inadequacy of language resonated with Buddhist treatments of the ineffability of spiritual experience and the necessity to deploy verbal stratagems (UPĀYA) in order to make that experience intelligible to others. The sage was able to manifest his understanding in the phenomenal world not by conscious intent but as an automatic “response” (y ing) to “stimuli” (gan); early Chinese Buddhist thinkers deploy the compound “stimulus and response” (GANYING) to explain the Buddhist concepts of action (KARMAN) and of grace (i.e., the “response” of a buddha or BODHISATTVA to a supplicant’s invocation, or “stimulus”). Xuanxue thinkers also began to explore parallels between their ideas of “nonbeing” (wu) and the notion of emptiness (ŚŪNYATĀ) in the PRAJÑĀPĀRAMITĀ corpus, which was just then being translated into Chinese. Xuanxue exegesis has often been described in the scholarly literature as a “matching concepts” (GEYI) sty le of

interpretation, where Buddhist concepts were elucidated by drawing on indigenous Chinese philosophical terminology, though this interpretation of gey i has recently been called into question. Although Xuanxue vanished as a philosophical movement by the early sixth century , its influence was profound on several pioneering Chinese Buddhist thinkers, including ZHI DUN (314–366) and SENGZHAO (374–414), and on such early philosophical schools of Chinese Buddhism as the SAN LUN ZONG and DI LUN ZONG, and eventually on the TIANTAI ZONG and HUAYAN ZONG of the mature Chinese tradition.

Xuanzang. (J. Genjō; K. Hy ŏnjang) (600/602–664). Chinese monk, pilgrim, and patriarch of the Chinese YOGĀCĀRA tradition (FAXIANG ZONG) and one of the two most influential and prolific translators of Indian Buddhist texts into

Chinese, along with KUMĀRAJĪVA (344–413); in English sources, his name is seen transcribed in a variety of way s (now all outmoded), including Hsüan-tsang, Hiuen Tsiang, Yuan Chwang, etc. Xuanzang was born into a literati family in Henan province in either 600 or 602 (although a consensus is building around the latter date). In 612, during a state-supported ordination ceremony, Xuanzang entered the monastery of Jingtusi in Luoy ang where his older brother was residing as a monk. There, Xuanzang and his brother studied the MAHĀPARINIRVĀṆASŪTRA and various MAHĀYĀNA texts. When the Sui dy nasty collapsed in 618, they both fled the capital for the safety of the country side. In 622, Xuanzang was given the complete monastic precepts and was fully ordained as a monk (BHIKṢU). By this time Xuanzang had also studied earlier translations of the MAHĀYĀNASAṂGRAHA, JÑĀNAPRASTHĀNA, and *TATTVASIDDHI under various teachers but came to doubt the accuracy of those translations and the veracity of their teachings. In order to resolve his doubts, Xuanzang embarked on an epic journey to India in 627, in flagrant disregard of the Taizong emperor’s (r. 626–629) edict against traveling abroad. His trek across the SILK ROAD and India is well known, thanks to his travel record, the DA TANG XIYU JI, his official biography, and the famous Ming- dy nasty comic novel based on Xuangzang’s travels, XIYU JI (“Journey to the West”). (See “Routes of Chinese Pilgrims” map.) According to these sources, Xuanzang visited the various Buddhist pilgrimage sites of the subcontinent (see MAHĀSTHĀNA) and spent y ears at NĀLANDĀ monastery mastering Sanskrit, including fifteen months study ing the texts of the Indian Yogācāra tradition under the tutelage of the 106-y ear-old ŚĪLABHADRA. In 645, Xuanzang returned to the Tang capital of Chang’an with over six hundred Sanskrit manuscripts that he had acquired in India, along with images, relics, and other artifacts. (These materials were stored in a five-story stone pagoda, named the DAYAN TA , or Great Wild Goose Pagoda, that Xuanzang later built on the grounds of the monastery of DA CI’ENSI; the pagoda is still a major tourist attraction in Xi’an.) The Taizong and Gaozong emperors (r. 649–683) honored Xuanzang with the title TREPIṬAKA (C. sanzang fashi; “master of the Buddhist canon”) and established a translation bureau (y ijing y uan) in the capital for the master, where Xuanzang supervised a legion of monks in charge of transcribing the texts, “rectify ing” (viz., clarify ing) their meaning, compiling the translations, polishing the

renderings, and certify ing both their meaning and sy ntax. Xuanzang and his team developed an ety mologically precise set of Chinese equivalencies for Buddhist technical terminology, and his translations are known for their rigorous philological

accuracy (although sometimes at the expense of their readability). While residing at such sites as HONGFUSI, Da ci'ensi, and the palace over an eighteen- y ear period, Xuanzang oversaw the translation of seventy -six sūtras and śāstras in a total of 1,347 rolls, nearly four times the number of texts translated by Kumārajīva, probably the most influential of translators into Chinese. (Scholars have estimated that Xuanzang and his team completed one roll of translation every five day s over those eighteen y ears of work.) Xuanzang's influence was so immense that he is often recognized as initiating the "new translation" period in the history of the Chinese translation of Buddhist texts, in distinction to the "old translation" period where Kumārajīva's renderings hold pride of place. Among the more important translations made by Xuanzang and his translation team are the foundational texts of the Yogācāra school, such as the CHENG WEISHI LUN (*Vijñaptimātratāsiddhi) , ASAṄGA' s MAHĀYĀNASAṂGRAHA, and the YOGĀCĀRABHŪMIŚĀSTRA, and many of the major works associated with the SARVĀSTIVĀDA school of ABHIDHARMA, including definitive translations of the Jñānaprasthāna and the ency clopedic ABHIDHARMAMAHĀVIBHĀṢĀ, as well as complete translations of VASUBANDHU's ABHIDHARMAKOŚABHĀṢYA and SAṂGHABHADRA's *NYĀYĀNUSĀRA. He translated (and retranslated) many major Mahāy āna sūtras and śāstras, including the massive MAHĀPRAJÑĀPĀRAMITĀSŪTRA, in six hundred rolls; this translation is given a place of honor as the first scripture in the East Asian Buddhist canons (see DAZANGJING; KORYŎ TAEJANGGYŎNG). Also attributed to Xuanzang is the Chinese translation of the famed PRAJÑĀPĀRAMITĀHṚDAYASŪTRA, or "Heart Sūtra," probably the most widely read and recited text in East Asian Buddhism. Because Xuanzang him self experienced a palpable sense of the Buddha's absence while he was sojourning in India, he also translated the Nandimitrāvadāna (Da aluohan Nantimiduo luo suoshuo fazhu ji, abbr. Fazhu ji, "Record of the Duration of the Dharma Spoken by the Great Arhat NANDIMITRA"), the definitive text on the sixteen ARHAT protectors (see ṢOḌAŚASTHAVIRA) of Buddhism, which became the basis for the LOUHAN cult in East Asia.

Xuanzhong ming. (J. Genchūmei; K. Hy ŏnjung my ŏng). In Chinese, "Inscription on the Center of My stery," by the Chinese CHAN master DONGSHAN LIANGJIE. In this poem, Dongshan sings of the "my stery " of subtle reciprocation (huihu wanzhuan), simultaneous illumination of phenomena and principle (SHI LI shuangming), and the unimpededness of essence and

function (TI YONG wuzhi), which he likens to the activities of a sage. The Xuanzhong ming is found in Dongshan's recorded say ings, the Dongshan yulu.

Xuedou Chongxian. (J. Setchō Jūken; K. Sŏltu Chunghy ŏn) (980–1052). Chinese CHAN master in the YUNMEN ZONG of the mature Chan tradition; also known as

Yinzhi. Xuedou was a native of Sichuan province. After his ordination under Renxian (d.u.) of the cloister of Pu'any uan, Xuedou received doctrinal training from Yuany ing (d.u.) of Dacisi and Guy in Yuncong (965– 1032) of Shimen. During his travels in the south, Xuedou visited the Yunmen master Zhimen Guangzuo (d.u.) in Hubei province and became his leading disciple. Xuedou later resided on Cuiwei peak near Tongting Lake and the monastery of Zishengsi on Mt. Xuedou in Zhejiang province, whence he acquired his topony m. During his residence in Zishengsi, Xuedou acquired more than seventy students and composed his famed collection of one hundred old cases (guce, viz., GONG'AN) known as the Xuedou songgu, which in turn formed the basis of Chan master YUANWU KEQIN's influential BIYAN LU . Xuedou also composed the Tongting yulu , Xuedou kaitang lu, Puquan ji, Zuying ji, and various other texts. Xuedou's successful career as a teacher is often considered a period of revitalization of the Yunmen tradition.

Xuefeng Yicun. (J. Seppō Gison; K. Sŏlbong Ŭijon) (822–908). Chinese CHAN master in the lineage of QINGYUAN XINGSI (d. 740); a native of Min (presentday Fujian province). He was ordained at the age of seventeen and given the dharma name Yicun, but temporarily returned to lay clothing during the severe persecution of the HUICHANG FANAN and studied under Furong Lingxun (d.u.). After a brief stay with DONGSHAN LIANGJIE, Xuefeng left at Dongshan's direction to study with DESHAN XUANJIAN (780/2–865). Xuefeng then embarked on a journey with his colleagues Yantou Quanhuo (828–887) and Qinshan Wensui (d.u.). With the help of Yantou, Xuefeng is said to have had his first awakening experience during a snowfall on Mt. Ao in Hunan. Xuefeng and Yantou became Deshan's leading disciples. Xuefeng later established a monastery with the support of the king of Min on what came to be known as Mt. Xuefeng in Fujian province. The mountain was originally known as Mt. Xianggu (Elephant Bone) but acquired its new name after a famous exchange at the mountain between the king of Min and the monk Xuefeng. Xuefeng's monastery was given the name Chongshengsi and Yingtian Xuefeng Chany uan. In 882, Emperor Xizong (r. 873–888) bestowed upon him the title Great Master Zhenjue

(Authentic Enlightenment) and the purple robe. His disciples include YUNMEN WENYAN (the founder of the YUNMEN ZONG of the classical Chan school), XUANSHA SHIBEI (whose students eventually would go on to establish the FAYAN ZONG), Changjing Huileng (854–932), Baofu Congzhan (d. 928), and Gushan Sheny an (d. 943). His teachings are recorded in his Xuefeng Zhenjue chanshi yulu.

Xuemo lun. [alt. Xuemai lun] (J. Kechimy akuron; K. Hy ŏlmaek non). In Chinese, "Treatise on the Blood-Vessel." This short treatise has been traditionally attributed to the legendary Indian monk BODHIDHARMA and is also referred to as the Damo dashi xuemo lun ("Great Master [Bodhi]dharma's Treatise on the Blood-Vessel"). Judging from its sty le of argumentation and doctrinal content, the treatise was most probably composed by a CHAN adept of the HONGZHOU ZONG or NIUTOU ZONG sometime during the ninth century, long after Bodhidharma's death. The treatise begins with the

claim that the three realms of existence (TRAIDHĀTUKA) return to the “one mind” (YIXIN), which was transmitted from one buddha to another without recourse to words or letters (BULI WENZI). From beginning to end, the treatise consistently underscores the importance of the inherent purity of the mind (xin) and claims that the mind is none other than the buddha, DHARMAKĀYA, BODHI, and NIRVĀṆA. The treatise also polemically contends that the practice of chanting and being mindful of the buddha AMITĀBHA’s name (NIANFO), reading scriptures, and upholding the precepts may guarantee a better rebirth and intelligence but do not ensure the achievement of buddhahood. According to the treatise, only the practice of seeing one’s own nature (JIANXING) can lead to buddhahood (see JIANXING CHENGFO). The first known edition of the Xuemo lun was first published in Korea in 1473 and was republished on several subsequent occasions. It is often anthologized in larger compilations such as the SŎNMUN CH’WARYO and SHŌSHITSU ROKUMON.

Xu gaoseng zhuan. (J. Zoku kōsōden; K. Sok kosŭng chŏn). In Chinese, “Supplement to the Biographies of Eminent Monks,” compiled by the VINAYA master DAOXUAN; also known as the Tang gaoseng zhuan . As the title suggests, the Xu gaoseng zhuan “supplements” or “continues” the work of HUIJIAO’s earlier GAOSENG ZHUAN and records the lives of monks who were active in the period between Huijiao’s composition during the Liang dy nasty and Daoxuan’s own time. The Xu gaoseng zhuan contains 485 major and 219

appended biographies, neatly categorized under translators (y ijing), exegetes (y ijie), practitioners of meditation (xichan), specialists of VINAYA(minglü), protectors of the DHARMA (hufa), sy mpathetic resonance (GANTONG), sacrifice of the body (YISHEN), chanters (dusong), benefactors (xingfu), and miscellaneous (zake). Although Daoxuan generally followed Huijiao’s earlier categorizations, he made several changes. In lieu of Huijiao’s divine wonders (sheny i), viz., thaumaturgists, Daoxuan opted to use the term sy mpathetic resonance, instead; he also subsumed Huijiao’s hy mnodists (jingshi) and propagators (changdao) under the “miscellaneous” category. Daoxuan also introduced the new category of protectors of the dharma order to leave a record of disputes that occurred at court with Daoists. These adjustments seem to reflect ongoing developments within Chinese Buddhism in how to conceive of, and write, history. Other related biographical collections include ZANNING’ s SONG GAOSENG ZHUAN, Shi Baochang’s BIQIUNI ZHUAN, the Korean HAEDONG KOSŬNG CHŎN, and the Japanese HONCHŌ KŌSŌDEN.

Xutang Zhiyu. (J. Kidō Chigu; K. Hŏdang Chiu) (1185–1269). Chinese CHAN master in the LINJI ZONG; also known as Xijingsou. Xutang was ordained at age sixteen by Shiy un (d.u.) of Pumingsi and later became the disciple of YUN’AN PUYAN (1156–1226). He continued to visit various teachers throughout the country until he became the abbot of the monastery of Xingshengsi in 1229. Xutang also served as abbot of many other important Chan monasteries throughout his illustrious career, including BAOLINSI and WANSHOUSI. The emperors Lizong (r. 1224–1264) and Duzong (r.

1264–1274) honored Xutang as their teacher. Among his disciples is the Japanese monk NANPO JŌMYŌ (1235–1308), to whom the abbots of DAITOKUJI and MYŌSHINJI trace their lineage. The eminent Japanese monk and abbot of Daitokuj i, IKKYŪ SŌJUN, even went so far as to consider himself to be a reincarnation of Xutang and had numerous portraits of himself drawn in the likeness of Xutang.

Xuyun. ( ) (1840–1959). In Chinese, “Empty Cloud”; CHAN monk of the modern period, renowned as one of the major reformers of modern Chinese Buddhism, especially of the Chan school; also known as Deqing. Xuy un was a native of Xiangxiang in Hunan province. He entered the monastery at the age of nineteen and received the precepts a y ear later from the monk Miaolian (d.u.). He then embarked on a long pilgrimage to famous mountains in China and to such

distant sites as Tibet, India, and Sri Lanka, where he studied with teachers in a variety of Buddhist traditions. At the age of forty -three, Xuy un climbed WUTAISHAN, where he is said to have had a vision of the resident bodhisattva MAÑJUŚRĪ. His awakening experience came at the drop of a teacup at the age of fifty -six. Xuy un was particularly renowned for his austerities and longevity. He became an important exponent of the convergence of “questioning meditation” (KANHUA CHAN) and recitation of the Buddha’s name (NIANFO), who was noted for using the meditative topic (HUATOU) “Who is reciting the Buddha’s name?” Xuy un spent the rest of his career propagating Buddhism throughout China until his death on Mt. Yunju in Jiangxi province at the advanced age of 120. See also TAIXU; YINGUANG.

Y

yab yum. A Tibetan term, literally meaning “father-mother,” referring to the theme common in VAJRAYĀNA iconography, especially that of ANUTTARAYOGATANTRA, viz., male and female deities in sexual union. The deities are depicted either standing face-to-face or sitting, with the male deity in the VAJRĀSANA and the female deity seated on the male deity ’s lap, with her legs wrapped around his back, their arms embracing each other. Although interpreted in numerous way s, the male figure is generally understood to represent compassion (KARUṆĀ) and method (UPĀYA) and the female figure wisdom (PRAJÑĀ). Their union represents the indivisibility of these two qualities in the state of buddhahood. Although often described in such sy mbolic terms, num e rous SĀDHANAs associated with the anuttaray ogatantras include the practice of sexual union.

yakṣ a. (P. y akkha; T. gnod sby in; C. y echa; J. y asha; K. y ach’a). In Indian my thology, a class of nature spirit, commonly serving as local guardians of the earth and of trees and the treasures hidden there. They possess supernatural powers—including the ability to fly, to change their appearance, and to disappear —which they can employ for good or for evil. They appear often in Buddhist texts, sometimes serving as benevolent protectors of and messengers for the Buddha and his disciples. The most famous of them is VAJRAPĀṆI, who accompanies the Buddha as his body guard. They

are commonly listed among the audience of the Buddha's sermons, with some attaining the rank of stream- enterer. There are also demonic y akṣas, especially the female y akṣas or y akṣiṇī, who devour infants and corpses and must be subdued by the Buddha, an ARHAT, or a BODHISATTVA. The continent of UTTARAKURU and the island of Sri Lanka were considered to be abodes of the y akṣas.

Yakushiji. (). In Japanese, "Medicine Buddha Monastery." One of the seven great monasteries of Nara, Japan. Yakushiji is currently the headquarters (daihonzan) of the Hossō (C. FAXIANG ZONG) tradition. In 680, Emperor

Tenmu (r. 673–686) ordered the construction of a statue of the Medicine Buddha (BHAIṢAJYAGURU) and a new monastery to pray for the recovery of his ill consort, who later succeeded him as Empress Jitō (r. 687–697). Due to the emperor's death and the lack of sufficient funds, construction began under Empress Jitō's reign in the old capital of Fujiwaraky ō in present-day Kashihara city. Construction was completed in 697, but the monastery was phy sically relocated to the new capital Heijōky ō in 718 after the transfer of the capital in 710. The monastery originally consisted of two pagodas to the east and the west flanking a central golden hall (kondō) and a lecture hall (kōdō) behind it. After a great fire in 973, only the pagodas and the golden hall remained. The hall collapsed during a ty phoon in 1445 and the west pagoda was lost to fire during a war in 1528. Reconstruction of the monastery took place during most of the late twentieth and early twenty -first centuries. The golden hall houses the famed Medicine Buddha triad from the Hakuhō period (645–710), now designated a national treasure.

Yama. (T. Gshin rje; C. Yanmo wang; J. Enma ō; K. Yŏmma wang). In the Buddhist pantheon, the lord of death and the king of hell. Among the six rebirth destinies (ṢAḌGATI), Yama is considered a divinity (DEVA), even though his abode is variously placed in heaven (SVARGA), in the realm of the ghosts (PRETA), and in the hells (see NĀRAKA). Birth, old age, sickness, and punishment are said to be his messengers, sent among humans to remind them to avoid evil deeds and to live virtuously. Since KARMAN functions as a natural law, with suffering resulting from unvirtuous actions and happiness from virtuous actions, the process of moral cause and effect should proceed without the need for a judge to mete out rewards and punishments. However, in Indian sources, Yama is sometimes described as the judge of the dead, who interrogates them about their deeds and assigns the wicked to the appropriate hell. This role of Yama was expanded in China, where he oversaw a quintessentially Chinese infernal bureaucracy : Yama is said to have organized the complex array of indigenous "subterranean prisons" (C. diy u) into a streamlined sy stem of ten infernal courts, each presided over by a different king who would judge the incoming denizens. These judges were known collectively as the ten kings of hell (C. SHIWANG) and are the subject of the epony mous Shiwang jing, a Chinese indigenous scripture (see APOCRYPHA). See also KṢITIGARBHA.

yāma. (T. 'thab bral; C. y emo tian; J. y amaten; K. y ama ch'ŏn). In

Sanskrit and Pāli, proper name of a heaven in the sensuous realm (KĀMADHĀTU); also known as suy āma (“where the seasons are alway s good”). The y āma heaven is the third from the bottom of the six heavens located in the sensuous realm above Mount SUMERU, between TRĀYASTRIṂŚA below and TUṢITA above. Like all Buddhist heavens, it is a place of rebirth and not a permanent post-mortem abode. Because this heaven is located in the sky, the divinities who inhabit it do not need to engage in combat with the ASURAs who dwell on the slopes of Mount Sumeru, hence the Tibetan interpretation of the name as “free from conflict.” (The Chinese is a Sinographic transcription of the Sanskrit.) The life span in this heaven is said to be two thousand y ears, with each day lasting two hundred human y ears.

yamabushi. (). In Japanese, lit. “those who lie down [or sleep] in the mountains”; itinerant mountain ascetics associated with the SHUGENDŌ (way of cultivating supernatural power) tradition; also known as shugenja, or “those who cultivate supernatural powers.” Records reveal that as early as the Nara period (although possibly before), y amabushi practiced a variety of severe austerities in the mountains, which were thought to be numinous places that housed the spirits of the dead. Thanks to the special powers accumulated through this training, such adepts were able to mediate with the realm of the dead, convert baleful spirits, and provide healing services. During this early period, the y amabushi were not formally ordained but instead operated independently, drawing freely from Buddhism, Daoism, and indigenous religious beliefs. In the mid to late Heian period (794–1185), such Shugendō sites as the mountains of Yoshino and KUMANO became affiliated with Japanese Tendaishū (TIANTAI) and SHINGONSHŪ institutions, and y amabushi increasingly incorporated esoteric Buddhism into their training, whereby they strove to attain buddhahood (SOKUSHIN JŌBUTSU) through severe asceticism, such as immersion under waterfalls, solitary confinement in caves, fasting, meditating, and the recitation of spells (MANTRA). In addition, y amabushi guided people on pilgrimages through their mountain redoubts and performed powerful rites for the aristocratic nobility and roy al court. During the Tokugawa period (1600–1868), they were forced because of temple regulations (J. jin hatto) to adopt permanent residences. While higher-ranking practitioners stay ed at the mountain centers, many others settled down in villages, where they performed shamanic rituals and offered healing and pray ers. Later in the Tokugawa period, many of these practices would provide the foundation for Japan’s so-called new religions. When Shugendō was

proscribed in 1872, y amabushi were forced to join either Buddhist or Shintō institutions and to forgo many of their former practices. When this ban was lifted in the late 1940s following World War II, y amabushi at some centers, including Mt. Haguro and Kumano, resumed their former practice, which continues to the present.

Yamaka. In Pāli, “Pairs”; one of the principal books of the Pāli abhidhammapiṭaka (see ABHIDHARMAPIṬAKA), which has no precise analogue in the abhidharmas of other MAINSTREAM BUDDHIST SCHOOLS. The text belongs to the second stratum of Pāli

abhidhamma works and is traditionally dated to the time of the third Buddhist council (see COUNCIL, THIRD) (c. third–second century BCE). The Yamaka is divided into ten chapters: (1) nine kinds of faculties or roots (mūla), for example, the three wholesome faculties (see KUŚALAMŪLA), the three unwholesome faculties (see AKUŚALAMŪLA), and the three neutral faculties; (2) five aggregates (see SKANDHA); (3) six sensory bases (ĀYATANA); (4) eighteen elements (DHĀTU); (5) the FOUR NOBLE TRUTHS; (6) conditioning factors (see SAṂSKĀRA) created via body, speech, and mind; (7) the proclivities (see ANUŚAYA); (8) mind (CITTA); (9) factors (see DHARMA); and (10) faculties (INDRIYA). Each of these chapters is organized into three sections: (1) delimitation of terminology, viz., the precise denotation of the terms covered in a chapter; (2) process, viz., discussions of how the terms are deploy ed in the course of abhidhamma analy sis; and (3) penetration, viz., what understandings are generated through this analy sis. The coverage proceeds through series of paired exchanges. An example is the opening discussion of the truth of suffering (P. dukkhasacca; S. DUḤKHASATYA). Exchange A asks: “Are painful sensations (P. dukkha; S. DUḤKHA) alway s included in the truth of suffering? Yes.” Exchange B asks: “Does the truth of suffering alway s refer to painful sensations? No, the truth of suffering involves other ty pes of suffering apart from phy sical and psy chological suffering.” Through this exchange, the text clarifies that the term dukkha cannot be limited solely to phy sical or psy chological pain (see DUḤKHADUḤKHATĀ), but suggests that it may also involve the suffering caused by change (see VIPARIṆĀMADUḤKHATĀ) and in fact lies at the very root of conditioning itself (see SAṂSKĀRADUḤKHATĀ). Perhaps because its format of paired exchanges does not readily lend itself to sy stematic analy sis, the Yamaka has the dubious distinction of being probably the least read of all the works in the Pāli abhidhammapiṭaka.

yamakaprātihārya. (P. y amakapā ṭihāriy a; T. cho ’phrul y a ma zung; C. shuangshenbian; J. sōjinpen; K. ssangsinby ŏn). In Sanskrit, “paired miracle” or “twin miracle”; this and the MAHĀPRĀTIHĀRYA are the two most famous of the miracles performed by the Buddha during his career, which are frequently narrated in both canonical and commentarial literature and widely depicted in Buddhist art. Both ty pes are generally understood to have taken place in the city of ŚRĀVASTĪ and thus are often referred to collectively in the literature as the ŚRĀVASTĪ MIRACLES. The y amakaprātihāry a involved the manifestation of the contrasting phy sical elements (MAHĀBHŪTA) of fire and water. After the Buddha established a rule preventing monks from display ing miraculous powers, he was challenged by a group of non-Buddhist y ogins to a display of his own supranormal powers. As a buddha, he was exempt from this prohibition, so he accepted their challenge and stated that he would perform a miracle at the foot of a mango tree. To keep him from proceeding, his opponents uprooted all the mango trees in the vicinity, leading the Buddha to cause a great tree to grow spontaneously from a mango seed. At the appointed time, the Buddha created a bejeweled walkway in the sky and then proceeded back and forth on it, causing flames to emerge from the upper part of his body and streams of water from

the lower part, then water from the upper part and flames from the lower part, then flames from the right side and water from the left side, then from his front and back, right ey e and left ey e, right ear and left ear, etc. He then created a double of himself (see MANOMAYAKĀYA), with whom he conversed. It is because of the simultaneous presence of fire and water (and perhaps because of his creation of his doppelgänger) that the event is called the “paired miracle.” After performing the miracle and preaching for sixteen day s, the Buddha departed for the heaven of the thirty -three (TRĀYASTRIṂŚA), where he spent the rains retreat (VARṢĀ) teaching the ABHIDHARMA to his mother MĀYĀ (who had been reborn as a divinity in the TUṢITA heaven). This miracle is said to be performed by all buddhas (and only by a buddha) and alway s in Śrāvastī.

Yamāntaka. (T. Gshin rje gshed; C. Yanmandejia/Daweide mingwang; J. Enmantokuka/Daiitoku my ōō; K. Yŏmmandŏkka/Taewidŏk my ŏngwang /).
In Sanskrit, “Destroy er of Death” (lit. “he who brings an end (antaka) to death (y ama)”), closely associated with BHAIRAVA (“The Frightening One”) and VAJRABHAIRAVA; one of the most important tantric deities. In Tibetan Buddhism, he was one of the three primary YI DAM of the

DGE LUGS sect (together with GUHYASAMĀJA and CAKRASAṂVARA). Yamāntaka is considered to be a fully enlightened buddha, who appears alway s in a wrathful form. He is depicted both with and without a consort; the solitary depiction, called “sole hero” (ekavīra), is particularly popular. Bhairava also appears in the Hindu tantric pantheon as a wrathful manifestation of the god Śiva. According to Buddhist my thology, MAÑJUŚRĪ, the bodhisattva of wisdom, took the form of the terrify ing bull-headed deity in order to destroy the Lord of Death (YAMA) who was ravaging the country ; hence the epithet Yamāntaka (Destroy er of Death). Yamāntaka has nine heads, thirty -four arms, and sixteen legs, each arm holding a different weapon or frightening object, and each foot trampling a different being. Each of these receives detailed sy mbolic interpretation in ritual and meditation texts associated with Yamāntaka. Thus, his two horns are said to represent the two truths (SATYADVAYA) of MADHYAMAKA philosophy : ultimate truth (PARAMĀRTHASATYA) and conventional truth (SAṂVṚTISATYA). His nine heads represent the nine categories (NAVAṄGA[PĀVACANA]) of Buddhist scriptures. His thirty -four arms, together with his body, speech, and mind, sy mbolize the thirty -seven “factors pertaining to awakening” (BODHIPĀKṢIKADHARMA). His sixteen legs sy mbolize the sixteen emptinesses (ŚŪNYATĀ). The humans and animals that he tramples with his right foot represent the attainment of the eight accomplishments, viz., supernatural abilities acquired through tantric practice, including the ability to fly, to become invisible, and travel underground. The birds that he tramples with his left foot represent the attainment of the eight powers, another set of magical abilities, including the ability to travel any where in an instant and the power to create emanations. His erect phallus represents great bliss, his nakedness means that he is not covered up with obstacles, and his hair standing on end sy mbolizes his passage bey ond all sorrow (DUḤKHA).

The Yamāntaka root tantras are the Sarvatathāgatakāyavāgcittakṛṣṇayamāritantra (“Body, Speech, and Mind of All Tathāgatas: Black Enemy of Death Tantra”) in eighteen chapters; Sarvatathāgatakāyavāgcittaraktayamāritantra (“Red Enemy of Death Tantra,” in large part, a different version of the same tantra in nineteen chapters); and the important Kṛṣṇayamārimukhatantra, also called the “Three Summaries Tantra” (T. Rgyud sdom gsum) because it has no chapters. Also included in the cy cle is the Yamāntakakrodhavijayatantra (“Victorious Wrathful Yamāntaka Tantra”), a CARYĀTANTRA. Based on these three works, in Tibet, the three varieties of Yamāntaka are called the “red, black, and the frightening” (T. dmar nag ’jigs gsum) derived from Raktay amāri (Red Enemy of Death),

Kṛṣṇay amāri (Black Enemy of Death), and Vajrabhairava.

yāna. (T. theg pa; C. sheng; J. jō; K. sŭng). In Sanskrit, “vehicle,” “convey ance”; a common Sanskrit term for any means of transportation (in Pāli materials and in many of the MAINSTREAM BUDDHIST SCHOOLS, the term is generally used in this literal sense). In MAHĀYĀNA literature, the term takes on great significance in the metaphorical sense of a mode of transportation along the path to enlightenment, becoming a constituent of the term Mahāy āna (“Great Vehicle”) itself. In Mahāy āna SŪTRAs and ŚĀSTRAs, this rhetorical sense of the term is often put to polemical use, with the followers of the Buddha being placed into three or two vehicles. The three vehicles are the BODHISATTVAYĀNA or Mahāy āna, the PRATYEKABUDDHAYĀNA, and the ŚRĀVAKAYĀNA. The two vehicles are the Mahāy āna and the HĪNAYĀNA (the “lesser vehicle,” or even more disparagingly, “base vehicle” or “vile vehicle”), which subsumes the praty ekabuddhay āna and the śrāvakay āna. Other uses of the term y āna include t h e BUDDHAYĀNA and the EKAYĀNA (“one vehicle”), whose precise relationship to the bodhisattvay āna and the Mahāy āna is discussed in the scholastic literature. Among the Mahāy āna sūtras, the most celebrated expression of the rhetoric of the y ānas occurs in the SADDHARMAPUṆḌARĪKASŪTRA (“Lotus Sūtra”) where, in the parable of the burning house, a father promises to reward his children with three different carriages (y āna) when in fact there is only a single magnificent carriage. With the rise of tantric Buddhism, the Mahāy āna itself is divided into two, the PĀRAMITĀYĀNA or “perfection vehicle,” referring to the path to buddhahood involving successive mastery of the perfections (PĀRAMITĀ) as set forth in the sūtras, and the MANTRAYĀNA or “mantra vehicle,” referring to the path to buddhahood as set forth in the TANTRAs (although some scholars have argued that the proper term here is not y āna, but nay a, meaning “mode” or “principle”). The tantric teachings are also variously referred to as the GUHYAMANTRAYĀNA (“secret mantra vehicle”), the PHALAYĀNA (“fruition vehicle”), and, most famously, as the VAJRAYĀNA (“diamond vehicle” or “thunderbolt vehicle”).

yang ’dul gtsug lag khang. (y angdul tsuklakang). In Tibetan, the four “extra- taming temples” or “extra-pinning temples” of BU CHU, MKHO MTHING, DGE GYES, and PRA DUM RTSE said to have been constructed during the time of the Tibetan king SRONG

BTSAN SGAM PO to pin down the limbs of the demoness (T. srin mo) who was impeding the introduction of Buddhism into

Tibet. The LHA SA temple (gtsug lag khang) pins down her heart and the four extra taming temples pin down her right and left elbows and right and left knees.

Yang le shod. (Yangleshö). An important pilgrimage site south of the Kathmandu Valley in Nepal, sacred to Tibetan and Newar Buddhists as well as to Hindus, although the source and meaning of the name are unclear. According to traditional Buddhist accounts, PADMASAMBHAVA practiced meditation in a cave here, subdued NĀGA demons through the practice of VAJRAKĪLAYA, and attained realization of MAHĀMUDRĀ. Hindus relate the site to the avatāra of Viṣṇu called Śeṣa Nārāy aṇa.

Yangqi Fanghui. (J. Yōgi Hōe; K. Yanggi Panghoe) (992–1049). Chinese CHAN master and patriarch of the YANGQI PAI collateral line of the LINJI ZONG; one of the two major Linji sublineages, along with the HUANGLONG PAI . Yangqi was a native of Yuanzhou prefecture in present- day Jiangxi province. After study ing under various teachers, he visited the Chan master Shishuang Chuy uan (986–1039), himself a successor of Feny ang Shanzhao (947–1024), and became one of Shishuang's leading disciples. Yangqi was later invited to serve as abbot of the monastery Putong Chany uan on Mt. Yangqi in his hometown of Yuanzhou, whence he acquired his topony m. In 1046, he moved his residence to the monastery of Haihuisi on Mt. Yung'ai. Among his many talented disciples, the most famous is BAIYUN SHOUDUAN (1025– 1072). His teachings are recorded in the Yangqi Fanghui chanshi yulu , Yangqi Fanghui chanshi houlu, and Yangqi Hui chanshi yuyao . See also WU JIA QI ZONG.

Yangqi pai. (J. Yōgiha; K. Yanggi p'a). One of the two major branches of the LINJI ZONG of the CHAN school, which is listed among the five houses and seven schools (WU JIA QI ZONG) of the mature Chinese Chan tradition. The school is named after its founder, YANGQI FANGHUI (995–1049), who taught at Mt. Yangqi in what is now Yuanzhou province. Yangqi was a disciple of Shishuang Chuy uan (986–1039), a sixth-generation successor in the Linji school, who also taught HUANGLONG HUINAN (1002–1069), the founder of the HUANGLONG PAI sublineage of the Linji school. The Yangqi lineage flourished under its third-generation successors, Fojian Huiqin (1059–1117), Foy an Qingy uan (1067–1120), and YUANWU KEQIN (1063–1135), who promoted it among the literati, and it became one of the dominant schools of

Song-dy nasty Buddhism thanks to the decisive role play ed by Yuanwu's disciple DAHUI ZONGGAO (1089–1163). It was especially within this lineage that the meditative technique of the Chan of investigating the meditative topic or questioning meditation (KANHUA CHAN) flourished. The Yangqi masters took a different approach to GONG'AN (public case) training, criticizing "lettered Chan" (WENZI CHAN), a sty le of Chan developed by Yunmen and Huanglong masters, which gained popularity among the literati officials in the Northern Song period with its polished language and elegant verse explanations of the meaning of the gong'an. Dahui in particular presented the

gong'an as a meditative tool for realizing one's innate enlightenment, not to demonstrate one's talent in clever repartee or one's literary prowess; at the same time, he critiqued the approaches of rival Chan schools, criticizing such Huanglong masters as JUEFAN HUIHONG (1071–1128) for clinging to intellectual and literary endeavors and such CAODONG ZONG masters as HONGZHI ZHENGJUE (1091–1157) for clinging to tranquillity and simply waiting for one's innate enlightenment to manifest itself. The school also produced many gong'an collections, including the BIYANLU ("Blue Cliff Record"), complied by Yuanwu Keqin, and the WUMEN GUAN ("Gateless Checkpoint"), compiled by the seventh-generation successor WUMEN HUIKAI (1183–1260). The Yangqi lineage was formally introduced to Korea by T'AEGO POU (1301–1382), who studied with the eleventh-generation Yangqi teacher Shiwu Qinggong (1272–1352); some modern Korean monks and scholars argue that the contemporary Korean Sŏn tradition should be traced back to T'aego and his Yangqi lineage, rather than to POJO CHINUL (1158–1210). The Yangqi school reached Japan in the thirteenth century through pilgrim monks, including Shunjō (1166–1227), who studied with the Yangqi teacher Meng'an Yuancong (1126–1209), and NANPO JŌMYŌ (1235–1309), better known by his imperially bestowed title Entsū Daiō Kokushi ("state preceptor," see GUOSHI), who studied with the ninth-generation teacher XUTANG ZHIYU (1185–1269). All Linji lineages in contemporary Japan are affiliated with the Yangqi pai.

Yangshan Huiji. (J. Gy ōzan/Ky ōzan Ejaku; K. Angsan Hy ejŏk) (807– 883). Chinese CHAN master and patriarch of the GUIYANG ZONG [alt. Weiy ang zong]. Yangshan was a native of Shaozhou prefecture in present-day Guangdong province. According to his biography, Yangshan's first attempt to enter the monastery at age fifteen failed because his parents refused to give their required permission. Two y ears later he cut off two of his fingers as a sign of his

resolve to become a monk and became a ŚRĀMAṆERA under the guidance of Chan master Tong (d.u.) of Nanhuasi. After he received his monastic precepts, Yangshan studied the VINAYAPIṬAKA. Yangshan is said to have received the teachings of the circle diagrams from Dany uan Yingzhen (d.u.), and he later became a disciple of Chan master GUISHAN LINGYOU after serving him for fifteen y ears. He later moved to Mt. Yang in Yuanzhou prefecture (present-day Jiangxi province), whence he acquired his topony m, and established a name for himself as a Chan master. Yangshan later moved to Mt. Dongping in his hometown of Shaozhou, where he passed away in the y ear 883 (alternative dates for his death are 916 and 891). He was posthumously honored with the title Dengxu dashi (Great Master Clear Vacuity) and a purple robe. He was also named Great Master Zhitong (Penetration of Wisdom). His teachings are recorded in the Yuanzhou Yangshan Huiji chanshi yulu . The names of the mountains on which Yangshan and his teacher Guishan resided were used in compound to designate their lineage, the Guiy ang.

Yangs pa can. (Yangpachen). The monastic residence of the ZHWA DMAR incarnations in Tibet, founded under the direction of the fourth Zhwa dmar Chos ky i grags pa

(Chöky i Drakpa, 1453–1524) and located near MTSHUR PHU monastery west of LHA SA; it was also known as Thub bstan Yangs pa can (Tupten Yangpachen). After the tenth Zhwa dmar was found guilty of treason, the monastery was converted to DGE LUGS and renamed Kun bde gling.

Yang Wenhui. (J. Yō Bunkai; K. Yang Munhoe) (1837–1911). Chinese Buddhist lay man at the end of the Qing dy nasty, renowned for his efforts to revitalize modern Chinese Buddhism. A native of Anhui province, Yang fled from the Taiping Rebellion to Hangzhou prefecture. In 1862, he serendipitously acquired a copy of the DASHENG QIXIN LUN ("Awakening of Faith According to the Mahāy āna") and became interested in Buddhism. In 1878, he traveled to England, where he served at the Chinese Embassy in London, befriending the Japanese Buddhist scholar NANJŌ BUN'YŪ (1849–1927), who helped him to acquire Chinese Buddhist texts that had been preserved in Japan. After his return to China, Yang established a publishing press called the Jingling Kejing Chu and published more than three thousand Buddhist scriptures. In 1893, ANAGĀRIKA DHARMAPĀLA visited Yang in Shanghai. In 1894, Yang and the British missionary Timothy Richard translated the DASHENG QIXIN LUN into English. In 1907, the Jingling Kejing Chu began to publish primers of Buddhism in

various languages. In 1910, Yang also founded the Fojiao Yanjiu Hui (Buddhist Research Society), where he regularly lectured until his death in 1911.

Yanshou. (C) (). See YONGMING YANSHOU.

yantra. (T. 'khrul 'khor; C. tuxiang; J. zuzō; K. tosang). In Sanskrit, "diagram" or "instrument." Although the term can have many meanings in Sanskrit, within the Buddhist tradition it is most commonly used to refer to a picture made of images and/or geometric shapes, usually triangles, which are repeated in such a way that they form a pattern. Such magical diagrams are used in tantric rituals and meditations to depict in visual form the power of the invoked deities, representing the universe, or certain spiritual or cosmological powers in the universe. A y antra is commonly understood as rendering through lines and colors the sacred sound of a MANTRA. Yantras are used for such purposes as gaining magical protection, worshipping tantric deities, or facilitating meditation. The term is in some cases interchangeable with a MAṆḌALA, although there are some differences: a y antra is ty pically small in size while a maṇḍala is variously sized and may even be large enough for a practitioner to enter during the rituals; a y antra, except for those under temple statues, is often portable, while a maṇḍala is not; and deity figures rarely appear on a y antra, while they are common on a maṇḍala. A y antra can be two- or three-dimensional and may range from such simple geometric designs as dots or triangles to more elaborate temple structures. Some texts suggest that merely seeing a maṇḍala or drawing or imagining a y antra also brings benefits. Yantra tattooing (Thai, y ak sant) is a common practice in Southeast Asia among both monks and laity. It is generally performed by specialist monks using traditional needles.

yaoshi. (J. y akuseki; K. y aksŏk). In Chinese, lit. “herbal medicine (y ao) and stone probes” (shi); “medicine stone,” the Chinese Buddhist euphemism for “supper.” The VINAYA restricts monks and nuns from eating after noon; any time afterwards is an “improper time.” There are waivers allowed for certain ty pes of “medicine,” however, which may legally be consumed. To circumvent this prohibition against eating after noon, the Chinese referred to food consumed after noon as “medicine,” and an evening meal therefore euphemistically came to be referred to as a “medicine stone.”

Yaśas. (P. Yasa; T. Grags pa; C. Yeshe; J. Yasha; K. Yasa). An early ARHAT disciple of the Buddha. The son of a wealthy merchant of Vārāṇasī,

Yaśas was brought up in luxury. He had three mansions, one for the winter, one for the rainy season, and one for the summer, and was attended by a troupe of female musicians. Once, he happened to awake in the middle of the night and witnessed his attendants sleeping in an indecorous manner. Greatly disturbed, he put on a pair of golden sandals and wandered in the direction of the Deer Park (MṚGADĀVA) where the Buddha was dwelling, exclaiming, “Alas, what distress, what danger.” The Buddha saw him approach and, knowing what he was experiencing, called out to him, “Yaśas, come. Here there is neither distress nor danger.” Yaśas approached the Buddha, took off his golden sandals, and sat down beside him. The Buddha preached a graduated discourse (ANUPUBBIKATHĀ) to him, at the conclusion of which Yaśas became a stream-enterer (SROTAĀPANNA). He thus became the Buddha’s sixth disciple and the first who had not known him prior to his achievement of enlightenment (as had his first five disciples, the bhadravargīy a or PAÑCAVARGIKA). Yaśas was also the first person to become an enlightened lay disciple (UPĀSAKA), although he ordained a few minutes later. Later, Yaśas’s father, who had come searching for his son, arrived at the Buddha’s residence. The Buddha used his magical powers to make Yaśas invisible and, inviting his father to sit, preached a discourse to him. Yaśas’s father also became a stream-enterer, while Yaśas, who overheard the sermon from his invisible state, became an arhat. When the Buddha made Yaśas visible to his father, he informed him that, since his son was now an arhat, it would be impossible for him to return home to a householder’s life and he would have to become a monk. Yaśas thus became the sixth member of the Buddha’s monastic order. Yaśas accompanied the Buddha to his father’s house the next day to receive the morning meal. After the meal, the Buddha preached a sermon. Yaśas’s mother, SUJĀTĀ, and other members of the household became stream- enterers, his mother thus becoming the first female disciple (UPĀSIKĀ) of the Buddha and the first woman to become a stream-enterer. At that time, fifty -four of Yaśas’s friends also were converted and entered the order of monks, swelling its ranks to sixty members. It was at this time that the Buddha directed his disciples to go forth separately and preach the dharma they had realized for the welfare and benefit of the world. ¶ There was a later monk, also named Yaśas, whose protest led to the second Buddhist council (COUNCIL, SECOND), held at VAIŚĀLĪ. Some one hundred y ears after the Buddha’s death, Yaśas was traveling in Vaiśālī when he observed the monks there receiving gold and silver as alms directly from the laity, in

violation of the VINAYA prohibition against monks touching gold and silver. He also found that the monks had identified ten

points in the vinay a that were identified as violations but that they felt were sufficiently minor to be ignored. The ten violations in question were: (1) carry ing salt in an animal horn; (2) eating when the shadow of the sundial was two fingerbreadths past noon; (3) after eating, traveling to another village to eat another meal on the same day ; (4) holding several assemblies within the same boundary (SĪMĀ) during the same fortnight; (5) making a monastic decision with an incomplete assembly and subsequently receiving the approval of the absent monks; (6) citing precedent as a justification to violate monastic procedures; (7) drinking milk whey after mealtime; (8) drinking unfermented wine; (9) using mats with a fringe; and (10) accepting gold and silver. Yaśas told the monks that these were indeed violations, at which point the monks are said to have offered him a share of the gold and silver they had collected. When he refused the bribe, they expelled him from the order. Yaśas sought the support of several respected monks in the west, including Sambhūta, ŚĀṆAKAVĀSIN, and REVATA. Together with other monks, they went to Vaiśālī, where they convened a council (SAṂGĪTI) at which Revata submitted questions about each of the disputed points to Sarvagāmin, the eldest monk of the day, who is said to have been a disciple of ĀNANDA. In each case, he said that the practice in question was a violation of the vinay a. Seven hundred monks then gathered to recite the vinay a. Those who did not accept the decision of the council held their own convocation, which they called the MAHĀSĀṂGHIKA or “Great Assembly,” the rival group coming to be called the STHAVIRANIKĀYA, or “School of the Elders.” This event is sometimes referred to as “the great schism,” since it marks the first permanent schism in the order (SAṂGHABHEDA).

Yasenkanna. [alt. Yasenkanwa] ( ). In Japanese, “Idle Talk on a Night Boat”; a short meditative text composed by the ZEN master HAKUIN EKAKU in the RINZAISHŪ, and his most popular piece. The Yasenkanna was first published in 1757 and has remained in print ever since. The title seems to be an allusion to the popular say ing, “night boat on the Shirakawa River” (Shirakawa y asen), which refers to the story of a man from the country side and the lies he tells about his trip to Ky ōto. Hakuin wrote the Yasenkanna to offer beginners of meditation an expedient technique for overcoming “Zen illness” (zenby ō) and fatigue. The Yasenkanna details Hakuin’s own bout with this illness and his miraculous recovery with the help of a secret technique known as inner discernment or visualization (naikan), which he purports to have learned from the obscure hermit Hakuy ū. Different versions of this story also appear in Hakuin’s

other writings, such as the Kanzanshi sendai kimon, Orategama, and Itsumadegusa.

Yaśodharā. (P. Yasodharā; T. Grags ’dzin ma; C. Yeshutuoluo; J. Yashudara; K. Yasudara). The Sanskrit proper name of wife of the prince and BODHISATTVA, SIDDHĀRTHA GAUTAMA, and mother of his son, RĀHULA (she is often known in Pāli sources as Rāhulamātā, Rāhula’s Mother); she eventually became an ARHAT, who was

declared by the Buddha to be foremost among nuns possessing the six superknowledges (ABHIJÑĀ; P. abhiññā). According to Pāli accounts, she was born on the same day as Prince Gautama and had skin the color of gold, hence another of her epithets, Bhaddā Kaccānā. She is also referred to in Pāli commentaries as Bimbā. Yaśodharā married the prince when she was sixteen, after he had proved his superior skill in archery and other manly arts. She was chief consort in a harem of forty thousand women. On the day her son, Rāhula, was born, the prince renounced the world and abandoned his wife, child, and palace to become a mendicant. According to another version of the story, Rāhula was conceived on the night of the prince's departure and was not born until the night of the prince's enlightenment, six y ears later. Yaśodharā was so heartbroken at her husband's departure that she took up his ascetic lifesty le, eating only one meal per day and wearing the y ellow robes of a mendicant. When the Buddha returned to his former palace in KAPILAVASTU after his enlightenment, Yaśodharā was allowed the honor of worshipping him in the manner she saw fit. After seven day s, as the Buddha was about to depart, Yaśodharā instructed her son Rāhula to ask for his inheritance. In response, the Buddha instructed ŚĀRIPUTRA to ordain his son. As Rāhula was the first child to be admitted to the order, he became the first Buddhist novice (ŚRĀMAṆERA). Yaśodharā and Rāhula's grandfather ŚUDDHODANA were greatly saddened at losing the child and heir to the order; hence, at Śuddhodana's request, the Buddha passed a rule that, thenceforth, no child should be ordained without the consent of its parents. When later the Buddha allowed women to enter the order, Yaśodharā became a nun (BHIKṢUṆĪ) under MAHĀPRAJĀPATĪ, who was chief of the nuns' order and the Buddha's stepmother. Yaśodharā cultivated insight and became an arhat with extraordinary supranormal powers. She could recall her past lives stretching back an immeasurable age and one hundred thousand eons without effort. The JĀTAKA records numerous occasions when Yaśodharā had been the wife of the bodhisattva in earlier existences. Also mentioned as the wife of the Buddha is

Gopā, although it is unclear whether this refers to another wife or is another name for Yaśodharā.

Yaśomitra. (T. Grags pa bshes gny en) (fl. c. late sixth century). Indian ĀBHIDHARMIKA scholastic, probably affiliated with the SAUTRĀNTIKA school, and author of the SPHUṬĀRTHĀ-ABHIDHARMAKOŚAVYĀKHYĀ, an important commentary on VASUBANDHU's ABHIDHARMAKOŚABHĀṢYA. His commentary is noted for its detail and clarity, and for its attempt to identify the adherents of the various doctrinal positions mentioned by Vasubandhu. The text is preserved in both Sanskrit and Tibetan. Yaśomitra's text was among the first ABHIDHARMA works to be studied in Europe; it was one of the Sanskrit manuscripts send by BRIAN HOUGHTON HODGSON from Kathmandu to Paris, where it was read by EUGÈNE BURNOUF, who discusses it in his Introduction à l'histoire du Buddhisme indien (1844).

Yasutani Hakuun. () (1885–1973). Japanese ZEN teacher in the SŌTŌSHŪ, who was influential in the West. Born in Japan, Yasutani attended public school until he entered a Sōtō Zen seminary at the age of thirteen. Yasutani was trained as a teacher and taught elementary school. He was married at the age of thirty and raised five children before turning to a life dedicated to the work of a Sōtō priest. He met Sogaku Harada in 1924 while lecturing in Tōky ō. Yasutani began intensive study with Harada roshi and dedicated his life to teaching the dharma to lay people. Yasutani organized a group called the Sanbō Ky odan (Fellowship of the Three Jewels), which became independent of the Sōtō school in 1954. Yasutani was the teacher of PHILIP KAPLEAU, who studied with him for eight y ears, and maintained a close relationship with him until 1967. Kapleau's The Three Pillars of Zen was based heavily on Yasutani's teachings. Yasutani traveled to the United States for the first time at the age of seventy - seven, three y ears after SHUNRYŪ SUZUKI arrived. For seven y ears, Yasutani taught Zen to many lay people in the USA and, although he had prepared to live somewhat permanently in the country, a tuberculosis test prevented him from receiving a permanent visa. In his later y ears, Yasutani continued to travel in the United States as well as in India. He preferred to teach Zen in a nonmonastic environment. He died in Kamakura in 1973.

Yatana Htut-hkaung zedi. The Yatana Htut-hkaung Pagoda (Burmese, JEDI; P.

cetī; S. CAITYA) is located on Min-wun Hill in the northern part of the Sagaing Hills in Upper Burma (My anmar). It was built in 1315 CE by Princess Soe Min- gy i, the daughter of Sagaing's founder, King Athinkay a Saw-y un. Over the course of time, the neighboring village, along with its monastery and line of SAYADAWs (abbots), came to be known as Htut-hkaung. One such abbot was Htut-hkaung Say adaw, who flourished in the nineteenth century, was greatly respected by King MINDON (r. 1853–1878) for his learning and piety. The king built for the say adaw a famous monastery named Mahādhammika Ky aung where he taught scripture and meditation to many hundreds of monks and nuns. This say adaw was a prolific writer, and his catechisms are famous in Burmese literature. He received many titles from the King Mindon and was believed by some to have been an arahant (S. ARHAT).

yathābhūtajñānadarśana. (P. y athābhūtañā ṇadassana; C. rushi zhijian; J. ny ojitsu chiken; K. y ŏsil chigy ŏn). In Sanskrit, "knowledge and vision that accord with reality "; a crucial insight leading to deliverance (VIMUKTI), which results in dispassion toward the things of this world because of seeing things as they actually are: i.e., as impermanence (ANITYA), suffering (DUḤKHA), and nonself (ANĀTMAN). "Knowledge and vision (jñānadarśana)" is usually interpreted to suggest the direct insight into things "as they are" (y athābhūta), meaning these three marks of existence (TRILAKṢAṆA), or sometimes the FOUR NOBLE TRUTHS. Yathābhūtajñānadarśana is presumed to be closely related to wisdom (PRAJÑĀ), but with one significant difference: y athābhūtajñānadarśana is the first true insight, but it is intermittent and weak, while prajñā is continuous and strong. Seeing things as they are, however, is intense enough that the insight so gleaned is sufficient to transform an ordinary

person (PṚTHAGJANA) into an ĀRYA. ¶ In the Upanisāsutta of the SAṂYUTTANIKĀYA, the standard twelvefold chain of dependent origination (PRATĪTYASAMUTPĀDA) is connected to an alternate chain that is designated the “supramundane dependent origination” (P. lokuttara-pa ṭiccasamuppāda; S. lokottara-pratīty asamutpāda), which outlines the process leading to liberation and prominently includes the knowledge and vision that accord with reality. Here, the last factor in the standard chain, that of old age and death (JARĀMARAṆA), is substituted with suffering (P. dukkha; S. DUḤKHA), which in turn becomes the first factor in this alternate series. According to the Nettipakaraṇa, a Pāli exegetical treatise, this chain of supramundane dependent origination consists of: (1) suffering (P. dukkha; S. du ḥkha), (2) faith (P. saddhā; S. ŚRADDHĀ), (3)

delight or satisfaction (P. pāmojja; S. prāmody a), (4) rapture or joy (P. pīti; S. PRĪTI), (5) tranquility or repose (P. passaddhi; S. PRAŚRABDHI), (6) mental ease or bliss (SUKHA), (7) concentration (SAMĀDHI), (8) knowledge and vision that accord with reality (P. y athābhūtañāṇadassana; S. y athābhūtajñānadarśana), (9) disgust (P. nibbidā; S. NIRVEDA), (10) dispassion (P. virāga; S. VAIRĀGYA), (11) liberation (P. vimutti; S. VIMUKTI), and (12) knowledge of the destruction of the contaminants (P. āsavakkhay añā ṇa; S. āsravakṣay ajñāna; s e e ĀSRAVAKṢAYA). The Kimatthiyasutta of the AṄGUTTARANIKĀYA gives a slightly different version of the first links, replacing suffering and faith with (1) observance of precepts (P. kusalasīla; S. kuśalaśīla) and (2) freedom from remorse (P. avippa ṭisāra; S. avipratisāra). In both formulations, y athābhūtajñānadarśana arises as a result of the preceding factor of meditative concentration (samādhi); it is regarded as the specific awareness (JÑĀNA) of the nature of reality, which is seen (DARŚANA) vividly and directly. In this context, y athābhūtajñānadarśana is essentially sy nony mous with insight (VIPAŚYANĀ). As this chain of transcendental dependent origination is sometimes interpreted, the stage of faith (P. saddhā; S. śraddhā) is made manifest through generosity (DĀNA) and observing precepts (ŚĪLA), which frees the mind from feelings of remorse and guilt (avipratisāra). The stage of delight or satisfaction (prāmody a) refers to a satisfied or relaxed state of mind, which is freed from any mental disturbances that might prevent concentration. The stages of rapture (prīti), bliss (sukha), and concentration (samādhi) are factors associated with the four levels of meditative absorption (DHYĀNA). The knowledge and vision that accord with reality arise in dependence on the preceding samādhi; it is able to destroy the afflictions (KLEŚA), rather than simply suppress them, as occurs in the state of concentration, and thus leads to liberation from SAṂSĀRA. The fact that samādhi provides a basis for seeing things “as they are,” which generates an insight that can bring about liberation, demonstrates the explicitly soteriological dimensions of concentration in a Buddhist meditative context. ¶ In Pāli sources, such as the VISUDDHIMAGGA, y athābhūtajñānadarśana is the fifteenth of eighteen principal ty pes of superior insight (P. mahāvipassanā), which liberate the mind from delusions regarding the world and the self. The eighteen insights are contemplations of: (1) impermanence (aniccānupassanā); (2) suffering (dukkhānupassanā); (3) nonself

(anattānupassanā); (4) aversion (nibbidānupassanā); (5) dispassion (virāgānupassanā); (6) extinction (nirodhānupassanā); (7) abandoning (paṭinissaggānupassanā); (8) waning (khay ānupassanā); (9) disappearing (vay ānupassanā); (10) change

(vipariṇāmānupassanā); (11) signlessness (animittānupassanā); (12) wishlessness (appaṇihitānupassanā); (13) emptiness (suññatānupassanā); (14) advanced understanding into phenomena (adhipaññādhammavipassanā); (15) knowledge and vision that accord with reality (y athābhūtañāṇadassana); (16) contemplation of danger (ādīnavānupassanā); (17) contemplation involving reflection (paṭisaṅkhānupassanā); and (18) contemplation of turning away (vivaṭṭanānupassanā). The counterparts which are overcome through these eighteen insights are: (1) the idea of permanence, (2) the idea of pleasure, (3) the idea of self, (4) delighting, (5) greed, (6) origination, (7) grasping, (8) the idea of compactness, (9) the accumulation of action (kamma), (10) the idea of lastingness, (11) signs, (12) desire, (13) misinterpretation, (14) misinterpretation due to grasping, (15) misinterpretation due to confusion, (16) misinterpretation due to reliance, (17) nonreflection or thoughtlessness, (18) misinterpretation due to entanglement.

yathābhūtaparijñāna. (T. ji lta ba mkhy en pa'i y e shes). An alternate term for YATHĀVADBHĀVIKAJÑĀNA (knowledge of the mode).

yathāvadbhāvikajñāna. (T. ji lta ba mkhy en pa'i y e shes; C. ruli zhi; J. ny orichi; K. y ŏri chi). In Sanskrit, lit. "knowledge of the mode"; a buddha's knowledge of the single mode of being of the universe. This ty pe of knowledge is ty pically mentioned in conjunction with the "knowledge of the multiplicities" (YĀVADBHĀVIKAJÑĀNA), a buddha's knowledge of each of the phenomena of the universe in its specificity. Only a buddha possesses these two knowledges and possesses them simultaneously ; thus, only he is able to perceive all of the various phenomena of the universe as well as their ultimate nature. This joint awareness is referred to as the simultaneous knowledge of the two truths (SATYADVAYA).

yāvadbhāvikajñāna. (T. ji sny ed pa mkhy en pa'i y e shes; C. ruliang zhi; J. ny ory ōchi; K. y ŏry ang chi). In Sanskrit, lit., "knowledge of the multiplicities" or "knowledge of the varieties"; a buddha's knowledge of each of the phenomena of the universe in its specificity. This ty pe of knowledge is ty pically mentioned in conjunction with a buddha's "knowledge of the mode" (YATHĀVADBHĀVIKAJÑĀNA), which understands the single mode of being of the universe. Only a buddha possesses these two knowledges and possesses them simultaneously ; thus, only he is able to perceive all of the various

phenomena of the universe as well as their ultimate nature. This joint awareness is referred to as the simultaneous knowledge of the two truths (SATYADVAYA).

yavana. (T. y ol ba; C. biandi; J. henji; K. py ŏnji). In Sanskrit (from Greek Ionian), "peripheral" or "outly ing regions"; referring to the regions bey ond the civilizing influences of Buddhism and higher spiritual culture. The term was used to designate

Greeks (Ionians) and later even Arab Muslims. In Buddhist cosmology, the term was used to designate regions north and west of India proper, which are inhabited by illiterate, barbaric peoples hostile to Buddhism. The birth into a “peripheral region” is considered to be one of the “insuperable difficulties” (see AKṢAṆA) to the attainment of enlightenment in the present lifetime. See also BIANDI.

Yazawin-kyaw. In Burmese, “Celebrated Chronicle”; the traditional title given to t h e MAHĀSAMMATAVAṂSA, the oldest extant y azawin, or Burmese (My anmar) roy al chronicle. It was completed in two installments by the monk MAHĀSĪLAVAṂSA of AVA, the first completed in 1502, the second in 1520. The chronicle is written in mixed Burmese and Pāli and contains the earliest surviving examples of the Burmese nissay a (Pāli to Burmese word-by -word translation) sty le of writing. The text follows roughly the outline of the MAHĀVAṂSA and devotes most of its coverage to the history of Buddhist dy nasties in India and Sri Lanka. Only the last seventh of the work concerns the history of Burma from the time of the Buddha through the PAGAN (Bagan) and Ava periods. The text contains the assertion that the Buddhism of Burma was established by the elder Mahāpuṇṇa during the lifetime of the Buddha and hence is older and longer-lived than that of Sri Lanka. The Yazawin-ky aw concludes with an account of the meritorious deeds of Shwe-nan-ky aw-shin (r. 1502–1527), the king of Ava at the time the work was composed.

ye dharmā. In Sanskrit, lit. “those phenomena…”; the opening words of perhaps the most famous sy nopsis of the teachings of Buddhism; the full declaration in Sanskrit is “y e dharmā hetuprabhavā hetuṃ teṣāṃ tathāgato hy avadat teṣāṃ ca y o nirodha, evaṃ vādī mahāśramaṇaḥ”: “Of those phenomena produced through causes, the TATHĀGATA has proclaimed their causes (HETU) and also their cessation (NIRODHA). Thus has spoken the great renunciant (ŚRAMAṆA).” This statement play s a central role in the story of ŚĀRIPUTRA’s conversion. Śāriputra, who was a disciple of the agnostic teacher SAÑJAYA

VAIRĀṬĪPUTRA, encountered one of the Buddha’s five original disciples (PAÑCAVARGIKA) , AŚVAJIT. Noticing Aśvajit’s serene countenance, Śāriputra asked him who his teacher might be, to which Aśvajit replied that his teacher was the Buddha. When Śāriputra asked what it was that the Buddha taught, Aśvajit demurred, explaining that he had only recently renounced the life of a householder and was unable to present the teaching in full. Śāriputra asked Aśvajit to give him the gist of the Buddha’s teaching. Aśvajit replied with this famous y e dharmā line. Immediately upon hearing these words, Śāriputra is said to have gained the rank of stream-enterer (SROTAĀPANNA), the first stage of sanctity (ĀRYAMĀRGA). He then asked the whereabouts of the Buddha and was ordained, going on to become the disciple most renowned for his wisdom. Aśvajit’s précis points to the central importance of causality in the Buddha’s teachings and provides a kind of summary of the FOUR NOBLE TRUTHS. The Buddha has identified the causes (such as KARMAN and KLEŚA) of those things that have causes (such as suffering, S. DUḤKHA), and he has also identified their

cessation in the experience of NIRVĀṆA. What may therefore have begun as a simple statement to mollify an eager questioner eventually became a slogan and ultimately a MANTRA, the very recitation of which was said to produce apotropaic powers. Like a mantra, the words of the y e dharmā slogan were often transcribed phonetically, rather than translated, into various languages across Asia. These words were also often written on strips of paper and enshrined in STŪPAs; they thus became a dharmaverse relic (ŚARĪRA), serving as a substitute for a bodily relic of the Buddha.

Yellow Hats . (C. huangmao). A popular designation in both European languages and Chinese for the DGE LUGS sect of Tibetan Buddhism, whose monks do indeed wear y ellow hats. Although the term zhwa gser, or "y ellow hat," does occur occasionally in Tibetan as a term of self-appellation for the Dge lugs, the Western and Chinese division of major Tibetan sects into Yellow Hats, RED HATS, and BLACK HATS has no corollary in Tibetan Buddhism and should be avoided.

Yel pa bka' brgyud . (Yelpa Kagy ü). One of the four major and eight minor subsects of the BKA' BRGYUD sect of Tibetan Buddhism (BKA' BRGYUD CHE BZHI CHUNG BRGYAD), originating with Ye shes brtsegs pa (b. 1134), a student of Bka' brgy ud hierarch PHAG MO GRU PA RDO RJE RGYAL PO . After a period of decline, it was revived by CHOS KYI 'BYUNG GNAS but was

latter absorbed into KARMA BKA' BRGYUD.

ye shes. (y eshe). In Tibetan, lit. "primordial knowledge," with y e meaning "original" or "primordial." The term renders the Sanskrit JÑĀNA; in the RNYING MA sect of Tibetan Buddhism, it refers to the originally pure mind. See RIG PA; JÑĀNA.

Ye shes mtsho rgyal. (Yeshe Tsogy al) (c. 757–817). A renowned female Tibetan Buddhist master, generally regarded as a wisdom ḌĀKINĪ and venerated especially as consort and disciple of the Indian adept PADMASAMBHAVA. Ye shes mtsho rgy al was born into an aristocratic family in central Tibet, south of LHA SA. According to traditional biographical accounts, a nearby lake miraculously swelled at the time of her birth and she was thus given the name "victor of the lake" (mtsho rgy al). This lake, near the cave complex of SGRAG YANG RDZONG , is believed to still hold Ye shes mtsho rgy al's life essence (bla). Her remarkable beauty even at a y oung age drew numerous suitors, but rather than submit to a marriage arranged by her father, she fled in order to undertake religious practice. She spent a brief period of time in the court of the Tibetan ruler KHRI SRONG LDE BTSAN (perhaps as one of his wives), after which she met Padmasambhava and was accepted as one of his chief disciples. In addition to receiving and practicing numerous tantric instructions, Ye shes mtsho rgy al helped to conceal many of Padmasambhava's treasure teachings (GTER MA), many of which are said to be her transcriptions of Padmasambhava's teachings. She is regarded as the first Tibetan to achieve buddhahood in a single lifetime. As a wisdom ḍākinī, she is also known as Bde chen rgy al mo ("Great Bliss Queen").

Ye shes ’od. (Yeshe Ö) (947–1024). A Tibetan king of the western region of GU GE credited with inspiring a revival of Buddhism that initiated the latter dissemination (PHYI DAR) of Buddhism in Tibet. He decried the state of Tibetan Buddhist practice, especially the practice of TANTRA, in a famous ordinance (bka’ shog), complaining that people were engaging in murder and illicit sex under the guise of the tantric practices of “liberation” (grol) and “union” (sby or). According to a famous story, Ye shes ’od was captured by a Gar log Turk chieftain while seeking to raise the capital necessary to invite ATIŚA DĪPAṂKARAŚRĪJÑĀNA to Tibet. He then sacrificed his own life by commanding his grandnephew BYANG CHUB ’OD to use whatever gold had

been accumulated not as a ransom for his own release, but rather as an offering to the Indian scholar. Atiśa was so moved by the king’s act of selflessness that, despite his previous declinations, he agreed to make the journey north. Traditional accounts also suggest that Ye shes ’od sponsored a group of twenty -two y oung scholars to study Indian languages and tantric literature in Kashmir (see KASHMIR-GANDHĀRA), of whom only two survived: the translators RIN CHEN BZANG PO and RNGOG LEGS PA’I SHES RAB . Both the story of his noble death for the sake of Atiśa’s invitation and the story of his sponsorship of Rin chen bzang po present difficulties in chronology, suggesting that they are embellishments. He is also credited with inspiring the establishment of numerous religious institutions, including THO LING, NYAR MA, and TA PHO. He is also known as Lha bla ma (Lha Lama).

Ye shes sde. (Yeshe De) (fl. late eighth/early ninth century). A Tibetan translator (LO TSĀ BA) during the early dissemination (SNGA DAR) of Buddhism in Tibet; a native of Ngam shod of the Sna nam clan, also referred to by the clan name Zhang. He is said to have been a disciple of both PADMASAMBHAVA a nd ŚRĪSIṂHA, from whom he received tantric instructions, especially in the SEMS SDE (mind class) of RDZOGS CHEN. He collaborated with some fifteen Indian scholars, among them Jinamitra, Śīlendrabodhi, and Dānaśīla, on the translation of as many as 347 different works, if the later canonical records are correct. His translations includes upwards of 163 Mahāy āna sūtras, among them the PRAJÑĀPĀRAMITĀ, AVATAṂSAKASŪTRA, and RATNAKŪṬASŪTRA collections, translations of the YOGĀCĀRABHŪMI and other basic MADHYAMAKA and YOGĀCĀRA treatises, as well as a number of works by his contemporaries ŚĀNTARAKṢITA and KAMALAŚĪLA. He is also credited with the translation of tantric works that would come to be known as the “old translations” used by the RNYING MA sect. He is said to have been a practitioner of the VAJRAKĪLAYA tantras. He is also author of a number of original compositions, among them the Lta ba’i khyad par (“Differences in Views”), preserved in both a BSTAN ’GYUR and DUNHUANG version, which divides the Madhy amaka school into Sautrāntika-Madhy amaka and Yogācāra- Madhy amaka. See also DPAL BRTSEGS; KLU’I RGYAL MTSHAN.

yi bao. (C) (). See ER BAO.

yi dam. In Tibetan, a term often translated as “meditational deity ” or “tutelary

deity .” In the practice of Buddhist tantra, it is the enlightened being, whether male or female, peaceful or wrathful, who serves as the focus of one’s SĀDHANA practice. One is also to visualize one’s tantric teacher (VAJRĀCĀRYA) as this deity. The term is of uncertain origin and does not seem to be a direct translation of a Sanskrit term, although iṣṭadevatā is sometimes identified with the term. The ety mology that is often given sees the term as an abbreviation of y id ky i dam tshig, meaning “commitment of the mind.” Traditionally, the y i dam is selected by throwing a flower onto a MAṆḌALA, with the deity upon whom the flower lands becoming the “chosen deity.” However, when one receives a tantric initiation, the central deity of that tantra ty pically becomes the y i dam, with daily practices of offering and meditation often required. Through the propitiation of the deity and recitation of MANTRA, it is said that the deity will bestow accomplishments (SIDDHI). In the practice of DEVATĀYOGA, one meditates upon oneself as that deity in order to achieve buddhahood in the form of that deity. The y i dam is considered one of the three roots (rtsa gsum) of tantric practice, together with the GURU and the ḌĀKINĪ: the guru is considered to be the source of blessings; the y i dam, the source of accomplishments; and the ḍākinī, the source of activities. These three roots are considered the inner refuge, with the Buddha, DHARMA, and SAṂGHA being the outer refuge, and the channels (NĀḌĪ), winds (PRĀṆA), and drops (BINDU) being the secret refuge.

yidashi. (). In Chinese, the “one great matter.” See DASHI.

Yifu. (J. Gifuku, K. Ŭibok) (661–736). Chinese CHAN master associated with the Northern school (BEI ZONG) of the early Chan tradition. Yifu was a native of Luzhou prefecture in present-day Shanxi province, who became a student of the lay master DU FEI (d.u.), the author of the CHUAN FABAO JI, at Fuxiansi in Luoy ang. After Yifu received the full monastic precepts in 690, he went to the monastery of YUQUANSI in Jingzhou prefecture to study with the eminent Chan master SHENXIU. Yifu became Shenxiu’s close disciple and continued to study under him probably until his master’s death. Later, Yifu moved to the monastery of Huagansi on ZHONGNANSHAN, where he lived for about twenty y ears. During his stay at Huagansi, Yifu attracted a large following. In 722, he moved again to the grand monastery of DACI’ENSI in Chang’an, where he was patronized by the upper echelons of Tang Chinese society. At the request of Emperor Xuanzong (r. 712–756), Yifu returned once again to Luoy ang and resided at the monasteries of Fuxiansi and Nanlongxingsi. He received the

posthumous title Chan Master Dazhi (Great Wisdom).

yi ge brgya pa. (y i ge gy apa). In Tibetan, “hundred-sy llable MANTRA”; term used to describe a number of lengthy MANTRAs, most commonly that of VAJRASATTVA, recited as part of a Tibetan tantric confession and purification practice. This is one of the preliminary practices (SNGON ’GRO) of the RNYING MA sect of Tibetan Buddhism, involving one hundred thousand repetitions of the Vajrasattva mantra.

yiji. (J. y uige; K. y uge). In Chinese, “bequeathed verse” or “death verse”; a verse (C. ji; lit. S. GĀTHĀ) left by eminent monks and nuns, especially in the CHAN school, just before the moment of death, as a final expression of their enlightenment experience; also called a “taking leave of the world hy mn” (cishi song) or, especially in the Korean tradition, a “moment of death gāthā” (imjongge). The verse may be either recited or written and is left as the master’s last bequeathed teaching immediately before he passes away, often delivered as part of a final sermon. The final instructions of a buddha or a monk for the edification of his disciples are referred to as a “bequeathed teaching” (y ijiao; see also YIJIAO JING), and the tradition of specifically bequeathing a verse as part of this final instruction is thought to have originated in the Tang-dy nasty Chan tradition. Such bequeathed verses usually consisted of four lines of four, five, or seven Sinographs per line and thus are similar in format to other ty pes of verses found within the Chan tradition, such as an “enlightenment hy mn” (C. wudao song), the verse recited by a student upon achieving enlightenment, and “dharma-transmission gāthā” (C. chuanfa ji), the verse bestowed on a dharma successor as an authorization to teach. As an example of such a bequeathed ve r se , HONGZHI ZHENGJUE (1091–1157), a well-known teacher in the CAODONG ZONG, is said to have written the following gāthā just before his death: “An illusory fantasy and a flower in the sky (KHAPUṢPA),/ Are these sixty -seven y ears,/ A white bird fades into the mist,/ The autumnal waters merge with the sky.” Not all renowned Chan masters left y iji and others derided the practice. The y iji of DAHUI ZONGGAO (1089–1163), the influential LINJI ZONG master and a contemporary of Hongzhi, expressed ironically his indifference to y iji: “Birth is thus,/ Death is thus,/ Verse or no verse,/ What’s the fuss?” In Japan, handwritten death verses were treasured as precious calligraphic art and a virtual relic of the deceased master. They were thus often hung in the abbot’s quarters (J. hōjō, C. FANGZHANG) or in the retirement cloisters.

Yijiao jing. (J. Yuiky ōgy ō; K. Yugy o ky ŏng). In Chinese, “Scripture on the Bequeathed Teachings”; also known as Foshuo banniepan jiaojie jing (“Scripture on the Admonishments Taught by the Buddha [before] his PARINIRVĀṆA”) and Fo yijiao jing (“Scripture on the Teachings Bequeathed by the Buddha”). Sanskrit and Tibetan versions of this text are not known to have existed. The Chinese translation of this text is attributed to KUMĀRAJĪVA, but the text is now widely assumed to be an indigenous Chinese Buddhist scripture (see APOCRYPHA). The sūtra is set against the backdrop of the Buddha’s parinirvāṇa, when he imparts his final instructions to the gathered disciples. The Buddha instructs his disciples to uphold the precepts and regard them as their teacher after his entry into parinirvāṇa. He then instructs them to control sensuality (KĀMA) and cultivate serenity and DHYĀNA. Finally, the Buddha asks the assembly if they have any questions regarding the FOUR NOBLE TRUTHS. When no one replies, the Buddha succinctly expounds upon impermanence and the need to seek liberation (VIMOKṢA). This sūtra bears striking resemblances in sty le and content to the MAHĀPARINIBBĀNASUTTA a n d AŚVAGHOṢA’ s BUDDHACARITA. Along with the SISHI’ER ZHANG JING and GUISHAN JINGCE, the Yijiao jing has been cherished by the

CHAN tradition for its simple and clear exposition. Sometime during the late Tang and early Song dy nasties, the three texts were edited together as the Fozu sanjing (“The Three Scriptures of the Buddhas and Patriarchs”) and recommended to Chan neophy tes.

yijing. (C) (). In Chinese, lit. “suspicious scriptures” or “scriptures of doubtful [provenance].” See APOCRYPHA.

Yijing. (J. Gijō; K. Ŭijŏng) (635–713). Chinese Buddhist monk and pilgrim. Ordained at the age of twenty , Yijing dreamed of following in the footsteps of the renowned pilgrims FAXIAN and XUANZANG. He eventually set out for India in 671 via the southern maritime route. After visiting the major Indian pilgrimage sites (see MAHĀSTHĀNA), Yijing traveled to the monastic university at NĀLANDĀ, where he remained for the next ten y ears. On his return trip to China, Yijing stopped at ŚRĪVIJAYA (Palembang in Sumatra) to continue his studies. He praised the monks there for their high level of learning, describing them as primarily HĪNAYĀNA in affiliation. It was in Śrīvijay a that he began to compose his record of his travels, the NANHAI JIGUI NEIFA ZHUAN , which remains an important source on the practice of Buddhism in the many regions

where he traveled and for understanding the various NIKĀYA affiliations of the period. It was also during his time in Śrīvijay a that Yijing began his translation of the massive MŪLASARVĀSTIVĀDA VINAYA. When he ran out of paper and ink, he made a brief trip back to China in 689 to retrieve more writing supplies and then returned to Śrīvijay a. After a thirty -y ear sojourn overseas, Yijing finally returned to China in 695 with some four hundred Sanskrit texts and three hundred grains of the Buddha’s relics (ŚARĪRA). Yijing was warmly welcomed in the capital of Luoy ang by Empress WU ZETIAN, who appointed him to the monastery of Foshoujisi. Later, from 695 to 699, Yijing participated in ŚIKṢĀNANDA’s new translation of the AVATAṂSAKASŪTRA and devoted the next decade or so to the translation of the scriptures that he had brought back with him from India. In addition to the Mūlasarvāstivāda vinay a, his translations also include several important YOGĀCĀRA treatises and TANTRAs. His writings also include a collection of the biographies of renowned East Asian Buddhist pilgrims to India, the DA TANG XIYU QIUFA GAOSENG ZHUAN.

yijing sanzang. (J. y akuky ō sanzō; K. y ŏkky ŏng samjang). In Chinese, lit. “master of the three repositories, translator of scriptures.” See TREPIṬAKA.

Yingluo jing. (C) (). See PUSA YINGLUO BENYE JING.

Yinguang. (J. Inkō; K. In’gwang) (1862–1940). Chinese monk renowned for his efforts to revitalize modern Chinese Buddhism, especially of the PURE LAND tradition; also sometimes referred to as the thirteenth patriarch of the Chinese JINGTU school and as Chang Cankui Seng (Forever Ashamed Monk). Yinguang was a native of Gey ang in Shaanxi province. At a y oung age, Yinguang suffered from an ey e ailment, probably conjunctivitis, which he is said to have cured by study ing the Buddhist scriptures. He

was formally ordained later at the monastery of Xing'an Shuangqisi in his home province. Yinguang's interest in pure land thought and practice is said to have been cataly zed by his encounter with the writings of the CHAN master Jixing Chewu (1741–1810), who came to be known as the twelfth patriarch of the pure land tradition in China. For more than twenty y ears, he resided in isolation at the monastery of Fay usi on the sacred mountain of PUTUOSHAN, where he studied the scriptures and practiced the recitation of the name of the buddha AMITĀBHA (NIANFO; cf. NAMU AMIDABUTSU). Yinguang's reputation grew with the publication of his private correspondences and his collected essay s known as Jingtu jueyi lun ("Treatise on

Resolving Doubts about the Pure Land"). His writings were often critical of Chan and emphasized the efficacy of pure land practice instead. Yinguang also worked to restore monasteries and to republish important pure land writings until his death in 1940. See also TAIXU; XUYUN.

yingwu Chan. (J. ōmuzen; K. aengmu Sŏn). In Chinese, lit. "parrot Chan"; a CHAN Buddhist expression referring to the way some practitioners merely parrot with their mouths the pithy say ings and GONG'AN dialogues of the patriarchs and masters (ZUSHI), but fail to realize their true message and attain enlightenment for themselves. This pejorative description is also applied to pundits of the traditional Buddhist scholastic schools (C. jiao, see K. KYO), whose intellectual erudition and doctrinal prowess were caricatured as "parrot Chan," in contrast to the Chan school's supposed subitist spiritual approach that did not rely on mere intellectual understanding (see BULI WENZI). These pundits are likened to parrots in that they also mimic other people's understanding through their doctrinal exegeses, but without comprehending it themselves. Cf. KOUTOU CHAN.

yingyan. (). In Chinese, "responsive attestation." See GANYING.

yinian sanqian. (J. ichinen sanzen; K. illy ŏm samch'ŏn). In Chinese, lit. "the TRICHILIOCOSM in a single instant of thought"; a TIANTAI teaching that posits that any given thought-moment perfectly encompasses the entirety of reality both spatially and temporally. An instant (KṢAṆA) of thought refers to the shortest period of time and the trichiliocosm (TRISĀHASRAMAHĀSĀHASRALOKADHĀTU) to the largest possible universe; hence, according to this teaching, the microcosm contains the macrocosm and temporality encompasses spatiality. Thus, whenever a single thought arises, there also arise the my riad dharmas; these two events occur simultaneously, not sequentially. Any given thought can be categorized as belonging to one of the ten realms of reality (DHARMADHĀTU). For example, a thought of charity metaphorically promotes a person to the realm of the heavens at that instant, whereas a subsequent thought of consuming hatred metaphorically casts the same person into the realm of the hells. Tiantai exegetes also understood each of the ten dharmadhātus as containing and pervading all the other nine dharmadhātus, making one hundred dharmadhātus in total (ten times ten). In turn, each of the one hundred dharmadhātus contains "ten aspects of

reality ” (or the “ten suchnesses”; see SHI RUSHI) that pervade all realms of existence, which makes one thousand “suchnesses” (qianru, viz., one hundred dharmadhātus times ten “suchnesses”). Finally the one thousand “suchnesses” are said to be found in the categories of the “five aggregates” (SKANDHA), “sentient beings” (SATTVA), and the phy sical environment (guotu). These three latter categories times the one thousand “suchnesses” thus gives the “three thousand realms,” which are said to be present in either potential or activated form in any single moment of thought. This famous dictum is attributed to the eminent Chinese monk TIANTAI ZHIYI, who spoke of the “trichiliocosm contained in the mind during an instant of thought” (sanqian zai y inian xin) in the first part of the fifth roll of his magnum opus, MOHE ZHIGUAN. Zhiy i’s discussion of this dictum appears in a passage on the “inconceivable realm” (ACINTYA) from the chapter on the proper practice of ŚAMATHA and VIPAŚYANĀ. Emphatically noting the “inconceivable” ability of the mind to contain the trichiliocosm, Zhiy i sought through this teaching to emphasize the importance and my stery of the mind during the practice of meditation. Within the context of the practice of contemplation of mind (GUANXIN), this dictum also anticipates a “sudden” theory of awakening (see DUNWU) . TIANTAI exegetes during the Song dy nasty expanded upon the dictum and applied it to practically every aspect of daily activity, such as eating, reciting scriptures, and ritual prostration. See also SHANJIA SHANWAI.

yinke. (J. inka; K. in’ga). In Chinese, lit. “seal of/in approval,” “certification” and often seen in Western sources in its Japanese pronunciation inka; a seal of approval, certification, or transmission, which is given by masters in the various CHAN traditions across East Asia to practitioners who, in their estimation, have attained a satisfactory level of awakening or maturity of understanding to serve as public exponents of their lineage. Because these lineages are presumed to trace back to BODHIDHARMA, the founder of the Chan school, and ultimately to the person of the Buddha himself, the person who receives such certification is considered to be qualified to speak for the current generation of Chan adepts on behalf of the Chan patriarchs, masters, and even the Buddha, to accept and train students, and to give them certification in turn once their training is complete. The manner of certification differs within traditions. Certification often entails admission into the master’s lineage; the conferral of such sy mbols of religious authority and memorial worship as robes, bowls, chowries (BINGFU), or portraits; and the right to serve in high ecclesiastical office in a sectarian

monastery. In the modern ZEN traditions of Japan, certification is offered by a RŌSHI, a teacher who has himself been previously certified. Especially in the Japanese traditions, receiving inka need not necessarily be testimony to the profundity of a person’s enlightenment experience, but may simply be public recognition that a student has sufficient maturity and ability to serve as abbot or hold other high ecclesiastical office in the monasteries and temples of a specific sectarian lineage. In some cases, y inke is an abbreviation for y inke zhengming, or “certification via seal of approval.” Certification is also known as y inding (seal of meditation), renke

(acceptance and approval), and y inzheng (seal and certify). See also CHUANFA; FASI.

yinke zhengming. (J. inka shōmy ō; K. in'ga chŭngmy ŏng). In Chinese, "certification via a seal of approval." See YINKE.

yinsheng nianfo. (J. inshō nenbutsu/inzei nenbutsu; K. insŏng y ŏmbul). In Chinese, "intoning [the name of] the Buddha by drawing out the sound" (see NIANFO); one of the "five-tempo intonations of [the name of] the Buddha" (WUHUI NIANFO) devised by FAZHAO. Yinsheng nianfo involves the long, drawn-out intonation of the name of the buddha AMITĀBHA. Even before Fazhao, the practice of y insheng nianfo is known to have been practiced by the CHAN master CHŎNGJUNG MUSANG (680–756 [alt. 684–762]), who recommended this practice for those who wished to attain "no recollection" (wuy i), "no thought" (WUNIAN), and "no forgetting" (mowang).

Yinyuan Longxi. (J. Ingen Ry ūki) (1592–1673). Chinese CHAN master and founding patriarch of the Japanese ŌBAKUSHŪ. Yiny uan was a native of Fuzhou, in present-day Fujian province. He began his training as a monk in his early twenties on PUTUOSHAN and was formally ordained several y ears later at Wanfusi on Mt. Huangbo. Yiny uan continued his training under the Chan master MIYUN YUANWU and, while serving under the Chan master FEIYIN TONGRONG at Wanfusi Yiny uan, was formally recognized as an heir to Feiy in's lineage in 1633. Seven y ears later, in 1640, Yiny uan found himself at the monastery of Fuy ansi in Zhejiang province and at Longquansi in Fujian province in 1645. The next y ear, in 1646, he returned to Mt. Huangbo and revitalized the community at Wanfusi. In 1654, at the invitation of Yiran Xingrong (1601–1668), the abbot of the Chinese temple of Kōfukuji in Nagasaki, Yiny uan decided to leave China to escape the succession wars and political turmoil that had

accompanied the fall of the Chinese Ming dy nasty. He was to be accompanied by some thirty monks and artisans. Due to political issues, however, Yiny uan was only allowed to enter Japan a y ear later in 1655. That same y ear, largely through the efforts of the Japanese monk Ry ōkei Shōsen (1602–1670), the abbot of MYŌSHINJI, Yiny uan was allowed to stay at Ry ōkei's home temple of Fumonji under virtual house arrest. The next y ear when Yiny uan expressed his wishes to return to China, Ry ōkei arranged a visit to Edo and an audience with the y oung shōgun. At the end of 1658, Yiny uan made the trip to Edo and won the patronage of the shōgun and his ministers. With their support, Yiny uan began the construction of MANPUKUJIs in Uji in 1661. The site came to be known as Mt. Ōbaku, the Japanese pronunciation of his mountain home of Huangbo, and served as the center for the introduction of Ming-dy nasty Chan into Japan. Yiny uan's teachings, especially those concerning monastic rules, cataly zed institutional and doctrinal reform among the entrenched Japanese ZEN communities. In 1664, Yiny uan left his head disciple MU'AN XINGTAO in charge of all administrative matters involving the monastery and retired to his hermitage on the compounds of Manpukuji. Nine y ears later Emperor Gomizunoo (r. 1611–1629) bestowed upon him the title state preceptor (J. kokushi, C. GUOSHI) Daikō Fushō (Great Radiance, Universal Illumination). He died shortly thereafter. Yiny uan brought many texts and precious

art objects with him from China, and composed numerous texts himself such as the Huangbo yulu, Hongjie fayi, Fushō kokushi kōroku, Ōbaku oshō fusō goroku, Ingen hōgo, and Ōbaku shingi.

Yiqiejing yinyi. (J. Issaiky ō ongi; K. Ilch'egy ŏng ŭmŭi). In Chinese, "Pronunciation and Meaning of All the Scriptures"; a specialized Chinese glossary of Buddhist technical terminology. As more and more Indian and Central Asian texts were being translated into Chinese, the use of Sanskrit and Middle Indic transcriptions and technical vocabulary increased, leading to the need for comprehensive glossaries of these abstruse terms. Because of the poly semous and sacred character of such Buddhist doctrinal concepts as BODHI, NIRVĀṆA, and PRAJÑĀ, many Chinese translators also preferred to transcribe rather than translate such crucial terms, so as not to limit their semantic range to a single Chinese meaning. The Indian pronunciations of proper names were also commonly retained by Chinese translators. Finally, the spiritual efficacy thought to be inherent in the spoken sounds of Buddhist spells (MANTRA) and codes (DHĀRAṆĪ) compelled the translators to preserve as closely as possible in Chinese the pronunciation of the Sanskrit or Middle Indic original. By the sixth

century, the plethora of different transcriptions used for the same Sanskrit Buddhist terms led to attempts to standardize the Chinese transcriptions of Sanskrit words, and to clarify the obscure Sinographs and compounds used in Chinese translations of Buddhist texts. This material was compiled in various Buddhist "pronunciation and meaning" (y iny i) lexicons, the earliest of which was the twenty -five-roll Yiqiejing yinyi compiled by the monk Xuany ing (fl. c. 645–656). Xuany ing, a member of the translation bureau organized in the Chinese capital of Chang'an by the renowned Chinese pilgrim, translator, and Sanskritist XUANZANG (600/602–664), compiled his anthology in 649 from 454 of the most important MAHĀYĀNA, ŚRĀVAKAYĀNA, VINAYA, and ŚĀSTRA materials, probably as a primer for members of Xuanzang's translation team. His work is arranged by individual scripture, and includes a roll-by -roll listing and discussion of the problematic terms encountered in each section of the text. For the more obscure Sinographs, the entry provides the fanqie (a Chinese phonetic analy sis that uses paired Sinographs to indicate the initial and final sounds of the target character), the Chinese translation, and the corrected transcription of the Sanskrit, according to the phonologically sophisticated transcription sy stem developed by Xuanzang. Xuany ing's compendium is similar in approach to its predecessor in the secular field, the Jingdian shiwen, compiled during the Tang dy nasty in thirty rolls by Lu Deming (c. 550–630). The monk Huilin (783–807) subsequently incorporated all of Xuany ing's terms and commentary into an expanded glossary that included difficult terms from more than 1,300 scriptures; Huilin's expansion becomes the definitive glossary used within the tradition. Still another y iny i was compiled later during the Liao dy nasty by the monk Xilin (d.u.). In addition to their value in establishing the Chinese interpretation of Buddhist technical terms, these "pronunciation and meaning" glossaries also serve as important sources for

study ing the Chinese phonology of their times.

yiqing. (J. gijō; K. ŭijŏng). In Chinese, lit. the “sensation of doubt,” or simply “doubt”; a feeling of puzzlement and sense of questioning that is a crucial factor in the meditation technique of “questioning meditation” (KANHUA CHAN) as sy stematized by DAHUI ZONGGAO (1089–1163). In the kanhua technique, doubt refers to the puzzlement and perplexity that the meditator feels when try ing to understand the conundrum that is the GONG’AN (public case) or HUATOU (meditative topic). This doubt arises from the inability to understand the significance of the huatou through rational thought. This loss of confidence in one’s conceptual and intellectual faculties releases the mind from the false sense

of security engendered through habitual way s of thinking, creating a feeling of frustration that is often compared to “a mosquito try ing to bite an iron ox.” The meditator’s sense of self ultimately becomes so identified with the huatou that the intense pressure created by the doubt “explodes” (C. po), freeing the mind from the personal point of view that is the self. Hence, by cutting off conceptualization and producing a state of intense concentration, the sensation of doubt helps to impel meditation forward toward the experience of awakening (WU). The term “sensation of doubt” was not coined by Dahui. One of its earliest usages is in the enlightenment poem of Luohan Guichen (867–928), the teacher of FAYAN WENYI (885–958), which describes enlightenment as shattering the “ball of doubt” (YITUAN). Dahui’s grandteacher, WUZU FAYAN (d. 1104), also taught his students to keep the great ball of doubt. But it was Dahui who put doubt at the core of his interpretation of kanhua Chan meditation; for him, the sensation of doubt becomes an effective antidote to conceptual thinking as well as the force that drives the student forward toward enlightenment. The Chinese term y i is also used as the translation for the Sanskrit term VICIKITSĀ, or skeptical doubt, which was one of the five hindrances (NĪVARAṆA) to meditative absorption (DHYĀNA). But rather than being viewed as it had been in India as a hindrance, in Dahui’s interpretation doubt instead play s a crucial role in the meditative process.

Yishan Yining. (J. Issan Ichinei; K. Ilsan Illy ŏng) (1247–1317). Chinese CHAN master in the LINJI ZONG; a native of Taizhou prefecture in present-day Zhejiang province. At a y oung age, Yishan became a student of a certain Wudeng Rong (d.u.) at the monastery of Hongfusi on Mt. Fu near his hometown in Taizhou. He was later ordained at the monastery of Puguangsi in Siming in Zhejiang province and continued to study VINAYA at Yingzhensi and TIANTAI thought and practice at Yanqingsi. Yishan then began his training in Chan under several teachers. He eventually became a disciple of Wanji Xingmi (d.u.), a disciple of the Chan master CAOYUAN DAOSHENG. In 1299, the Yuan emperor Chengzong (r. 1294–1307) bestowed upon him the title Great Master Miaoci Hongji (Subtle Compassion, Universal Salvation) and an official post as the overseer of Buddhist matters in Zhejiang. That same y ear, he was sent to Japan as an envoy of the court, but was detained temporarily at the temple of Shūzenji in Izu by

the Kamakura shogunate. When the Hōjō rulers learned of Yishan's renown in China, Yishan was invited to reside as abbot of the powerful monasteries of KENCHŌJI, ENGAKUJI, and Jōchiji in Kamakura. In 1313,

Yishan was invited by the retired Emperor Gouda (r. 1274–1287) to reside as the third abbot of the monastery NANZENJI in Ky ōto. Yishan had many students in Japan including the eminent Japanese monk MUSŌ SOSEKI. Yishan became ill and passed away in the abbot's quarters (J. hōjō; C. FANGZHANG) of Nanzenji in 1317. The emperor bestowed upon him the title state preceptor (J. kokushi; C. GUOSHI) Issan (One Mountain). Yishan is also remembered for his calligraphy and for introducing to Japan the new commentaries written by the great Neo- Confucian scholar Zhu Xi (1130–1200) to Japan. He and his disciples, such as Shiliang Rengong (1266–1334), Mujaku Ry ōen (d.u.), Monkei Ry ōsō (d. 1372), and Tōrin Yūky ū (d. 1369), contributed much to the development of GOZAN culture in Japan.

yishen. (J. y uishin; K. y usin). In Chinese, lit., "to let go of the body," viz., "self-immolation." See SHESHEN.

Yisheng xianxing jiao. (C) (). See HUAYAN WUJIAO.

yituan. (J. gidan; K. ŭidan). In Chinese, "ball of doubt"; also referred to as day ituan, or "great ball of doubt." Although the term appears in a verse recorded in the JINGDE CHUANDENG LU that is attributed to Luohan Guichen (867– 928), the teacher of FAYAN WENYI, it was the CHAN master DAHUI ZONGGAO who sy stematized and popularized its use. Dahui probably inherited the notion of a ball of doubt from his teacher YUANWU KEQIN, whose teacher WUZU FAYAN also mentions a ball of doubt in his teachings. Dahui described the arousal of the sensation of doubt (YIQING) or the ball of doubt as an important tool in his meditative approach called KANHUA CHAN, or investigation of the meditative "topic" (HUATOU).

yixin. (S. ekacitta; J. isshin; K. ilsim). In Chinese, "one mind"; the ground of being and the principle (LI) foundational to all phenomena (SHI). The LAṅKĀVATĀRASŪTRA and the DASHENG QIXIN LUN ("Awakening of Faith According to the Mahāy āna"), both central texts in the TATHĀGATAGARBHA corpus of literature, treat the "one mind" as a central doctrine. The Laṅkāvatārasūtra states that the "calm extinction [of NIRVĀṆA] is called the one mind, and this one mind is called the tathāgatagarbha." The Dasheng qixin lun presents all of Buddhism in terms of the one mind and its two aspects: the mind's true-thusness aspect (xin zhenru men) and production-and-cessation aspect (xin shengmie men). The Dasheng qixin lun, arguably the most

influential tathāgatagarbha text within the East Asian Buddhist tradition, has long been considered the principal treatise outlining the doctrine of the one mind and its associations with the YOGĀCĀRA theory of consciousness and tathāgatagarbha thought. ¶ The exegeses to the Dasheng qixin lun by JINGYING HUIYUAN (523–592), WŎNHYO (617–686), and FAZANG (643–712), which the tradition has regarded as its three major commentaries (san dashu), have each elucidated in considerable detail the

foundational role that the notion of the one mind play s in that text. Fazang, for example, glossed the one mind of the Dasheng qixin lun as the “one tathāgatagarbha mind” and thus identified the one mind with the tathāgatagarbha; the two aspects of the one mind, true thusness and production-and-cessation, were correlated, respectively, with either MADHYAMAKA and YOGĀCĀRA or principle (li) and phenomena (shi). Fazang thus places tathāgatagarbha thought above both the SAN LUN ZONG (the Chinese analogue of the Madhy amaka school) and the FAXIANG ZONG (Yogācāra) teachings in his doctrinal taxonomy (panjiao; see JIAOXIANG PANSHI). By contrast, Huiy uan’s commentary treats the one mind within the context of the nine-consciousnesses theory of the SHE LUN ZONG, an early Yogācāra-oriented strand of Chinese Buddhist thought. In his analy sis of the two aspects of the one mind, Huiy uan correlates the true-thusness aspect of the one mind with the ninth “immaculate consciousness” (AMALAVIJÑĀNA); he correlates the production-and-cessation aspect of the one mind with the eighth “storehouse consciousness” (ĀLAYAVIJÑĀNA). Unlike Fazang’s interpretation, tathāgatagarbha is here not identified with the one mind but is instead viewed as the production-and-cessation aspect of the mind. In Wŏnhy o’s case, rather than seeking as Fazang did to distinguish the Faxiang teachings of Yogācāra from tathāgatagarbha thought, he sought instead to reconcile the Faxiang perspective on consciousness with the Dasheng qixin lun’s analy sis of mind. Like Huiy uan, Wŏnhy o identified the tathāgatagarbha with the production-and-cessation aspect of the one mind. ¶ The one mind is also a central theme of the ZONGJING LU, an ency clopedic CHAN anthology compiled by YONGMING YANSHOU (904– 976) in the FAYAN ZONG, which seeks to unify the various Chinese schools of Buddhism, including HUAYAN, Yogācāra, and TIANTAI, and to demonstrate the compatibility of doctrinal teachings and meditative practice. Yanshou draws on the doctrinal classification schema of GUIFENG ZONGMI (780–841), the Chan scholiast who was also the fifth patriarch of the Huay an school, in positing three broad strands of Buddhist teaching: dharma characteristics (Faxiang zong), destruction of characteristics (Poxiang), dharma nature (FAXING ZONG).

Yanshou states that the Faxing (dharma nature) teachings, which include both the Huay an and Chan schools and which are based on tathāgatagarbha thought, treat both aspects of true thusness or the one mind, that is, the aspect of “immutability ” (bubian) and “adaptability ” (lit., “according to conditions,” suiy uan); the Faxiang (dharma characteristics) teachings, by contrast, only treat the aspect of “adaptability.” ¶ In the TIANTAI school, one mind or sometimes one thought (y inian) is said to be the ground of all things in existence in both their tainted and pure manifestations, a notion expressed in the aphorism “one thought [contains] the TRICHILIOCOSM” (YINIAN SANQIAN), one of the main doctrines of the school. The Tiantai teaching that “one mind,” viz., a single instance of thought, contains all three “viewpoints” (y ixin sanguan) also expresses how the three inseparable aspects of phenomena (SANDI)—viz., the truth of emptiness (kongdi), the truth of being only provisionally real (jiadi), and the truth of the mean (zhongdi)—are each contained in one thought

moment. In the PURE LAND tradition, one mind generally refers to single-minded recollection (NIANFO) of, especially, the buddha AMITĀBHA, and is a sy nony m of one-pointedness of mind.

yixin chuanxin. (J. ishin denshin; K. isim chŏnsim). In Chinese, “mind- to-mind transmission.” An oft-repeated phrase used mainly by the East Asian CHAN traditions to refer to a special transmission of the “mind” of the Buddha from master to disciple in a “telepathic” way that does not rely on words or letters (see JIAOWAI BIECHUAN and BULI WENZI). In an attempt to distinguish itself from the other Buddhist traditions that sought the teachings of the Buddha in sūtras and commentaries, the burgeoning Chan tradition of the eighth and ninth centuries emphasized the nonverbal transmission of the Buddha’s teachings. The notion of mind-to-mind transmission has thus served as an important trope in the self-fashioning of the Chan tradition. Mind-to-mind transmission is often explained by reference to a famous Chan legend that first appears in the Tiansheng guangdeng lu. While at Vulture Peak (GṚDHRAKŪṬAPARVATA), the Buddha is said to have raised a flower in front of a large assembly , whereupon the elder MAHĀKĀŚYAPA smiled in response. The Buddha then announced that he had thereby entrusted his “treasury of the true dharma ey e” (ZHENGFAYANZANG) to Mahākāśy apa, thus recognizing him as the Buddha’s successor and first patriarch (ZUSHI). For this legend, see NIANHUA WEIXIAO.

Yixing. (J. Ichigy ō; K. Irhaeng) (683–727). In Chinese, “Single Practice”; a famous student of CHAN and master of esoteric Buddhism (MIJIAO), translator, and distinguished astronomer. Yixing was a native of Julu prefecture in present- day Hebei province. He became a monk under the eminent Chan master PUJI (651–739) in the Northern school (BEI ZONG) of the early Chan tradition and also studied the VINAYA under a monk by the name of Huizhen (d.u.). Having made a name for himself at the monastery of Guoqingsi on Mt. Tiantai, in 717, Yixing was invited by Emperor Xuanzong (r. 712–756) to the palace in Luoy ang. While residing at the palace, Yixing became a disciple of the TREPIṬAKA ŚUBHAKARASIṂHA and, together, they translated the MAHĀVAIROCANĀBHISAṂBODHISŪTRA. Based on Śubhakarasiṃha’s oral interpretations provided in the course of preparing their translation, Yixing also composed an important commentary on the sūtra, the Darijing shu. In 727, Yixing’s reputation in astronomy and calendrics prompted the emperor to have him devise a new calendar, which is known as the Day an li. Yixing also devised an elaborate celestial globe, which used hy draulic power to portray the precise movements of the sun, moon, and constellations across the firmament. After his death, he was bestowed the posthumous title Chan master Dahui (Great Wisdom).

yixing sanmei. (S. ekavy ūhasamādhi; J. ichigy ō zanmai; K. irhaeng sammae). In Chinese, “single-practice SAMĀDHI.” The term y ixing sanmei seems to first appear in a passage in the Chinese translation of the SAPTAŚATIKĀPRAJÑĀPĀRAMITĀSŪTRA: “The DHARMADHĀTU has only a single mark; to take the dharmadhātu as an object is called one-practice samādhi.” Two practices are then recommended by the text for

cultivating y ixing sanmei, viz, the perfection of wisdom (PRAJÑĀPĀRAMITĀ) and recollection of the Buddha's name (S. BUDDHĀNUSMṚTI; C. NIANFO). The concept of y ixing sanmei was later incorporated into the apocry phal Chinese treatise DASHENG QIXIN LUN and the influential meditation manual MOHE ZHIGUAN. TIANTAI ZHIYI , the author of the Mohe Zhiguan, identified the practice of constant sitting, the first of the so-called four kinds of samādhi (sizhong sanmei), with y ixing sanmei. Famous teachers of the early CHAN community, such as DAOXIN, HUINENG, and HE Z E SHENHUI, also emphasized the importance of y ixing sanmei, which they identified with seated meditation (ZUOCHAN) and the cultivation of prajñāpāramitā. According to the LIUZU TANJING ("Platform Sūtra of the Sixth Patriarch"), Huineng interpreted y ixing sanmei as the maintenance of a straightforward mind (y izhi xin) while walking,

standing, sitting, and ly ing. Shenhui identified y ixing sanmei with "no mind" (WUXIN; see also WUNIAN).

Yixuan. (C) (). See LINJI YIXUAN.

yizhi Chan. (J. isshi no zen; K. ilchi sŏn). In Chinese, "one-finger Chan"; the famous pedagogical technique used by the CHAN master Juzhi Yizhi (c. ninth century) and his teacher Hangzhou Tianlong (d.u.) in the lineage of MAZU DAOYI. "One-finger Chan" refers to Juzhi's propensity to answer any question he was asked by simply raising one finger, so as not to allow any conceptual understanding of Buddhism to arise in the student's mind. The phrase appears in Case 19 of the BIYAN LU and Case 3 of the WUMEN GUAN, and is frequently cited in Chan sources. In one well-known Chan case (GONG'AN), Juzhi is said to have cut off the finger of a boy who mimicked him without understanding the meaning of the gesture.

yizi guan. (J. ichijikan; K. ilcha kwan). In Chinese, "one-word checkpoint" or "one-word barrier"; a pedagogical device developed by YUNMEN WENYAN (864–949), the founder of the YUNMEN ZONG of the classical CHAN tradition, which used only a single utterance to respond to a student's question. For example, once a monk asked him, "When y ou kill y our parents, y ou repent before the Buddha. But when y ou kill the buddhas and patriarchs, to whom do y ou repent?" Yunmen answered, "Lu" ("exposed"). Another time a monk asked him, "What is the treasury of the true dharma ey e (ZHENGFAYANZANG)?" Yunmen answered, "Pu" ("universal"). Such terse answers offered no basis for conceptual understanding, instead demanding that students have a direct realization of truth. These one-word checkpoints were highly praised by DAHUI ZONGGAO for fostering especially close concentration during KANHUA CHAN meditation: "Once y ou enter into the gate of the one-word GONG'AN, even nine oxen wouldn't be able to pull y ou out."

yoga. (T. sby or ba/rnal 'by or; C. xiu/xiuxing/xiuxi/y uqie; J. shu/shugy ō/shujū/y uga; K. su/suhaeng/susŭp/y uga ///). In Sanskrit, "bond," "restraint," and by extension "spiritual discipline"; in Buddhism, a generic term for soteriological training or contemplative practice, including tantric practice.

Yogabhāvanāmārga. [alt. Bhāvanāy ogamārga; Yogabhāvanāpatha] (T. Rnal

’by or bsgom pa’i lam). In Sanskrit, “Path of Yogic Cultivation”; a work on the BODHISATTVA path usually attributed to the eighth-century Indian master Jñānagarbha, who is known as the teacher of ŚĀNTARAKṢITA (c. 725–788) and a disciple of Śrīgupta. It is presumed that the Yogabhāvanāmārga is an example of the later MADHYAMAKA school’s attention to the theme of the stages of meditative cultivation (BHĀVANĀ), as best exemplified by KAMALAŚĪLA’s three BHĀVANĀKRAMAs. There are two Jñānagarbhas known to the tradition, one from the early ninth century and the other from the eleventh century. Some scholars suggest that the commentary to the Maitrey a chapter of the SAṂDHINIRMOCANASŪTRA should be attributed to the first Jñānagarbha, while authorship of the Yogabhāvanāmārga should be ascribed to the second. The Yogabhāvanāmārga, along with Jñānagarbha’s two other works, the Satyadvayavibhaṅga (“Analy sis of the Two Truths”) and its autocommentary Satyadvayavibhaṅgavṛtti (“Commentary on Analy sis of the Two Truths”), are only extant in Tibetan translation.

Yogācāra. (T. Rnal ’by or spy od pa; C. Yuqiexing pai; J. Yugagy ōha; K. Yugahaeng p’a). In Sanskrit, “Practice of YOGA”; one of the two m aj or MAHĀYĀNA philosophical schools (along with MADHYAMAKA) in India, known especially for its doctrines of “mind-only ” (CITTAMĀTRA) or “representation-only ” (VIJÑAPTIMĀTRATĀ), the TRISVABHĀVA, and the ĀLAYAVIJÑĀNA. In addition, much of the exposition of the structure of the Mahāy āna path (MĀRGA) and of the Mahāy āna ABHIDHARMA derives from this school. The texts of the school were widely influential in Tibet and East Asia. Although several of the terms associated with the school occur in such important Mahāy āna sūtras as the DAŚABHŪMIKASŪTRA, the LAṄKĀVATĀRASŪTRA, and especially the SAṂDHINIRMOCANASŪTRA, the exposition of the key doctrines was largely the work of two Indian scholastics of the fourth to fifth centuries CE, the half brothers ASAṄGA and VASUBANDHU and their commentators, especially STHIRAMATI and DHARMAPĀLA. Asaṅga’s major works include the central parts of the YOGĀCĀRABHŪMI, the MAHĀYĀNASAṂGRAHA, and the ABHIDHARMASAMUCCAYA. Vasubandhu’s most famous Yogācāra works are the VIṂŚATIKĀ and the TRIṂŚIKĀ (his most famous work of all, the ABHIDHARMAKOŚABHĀṢYA, is said to have been composed prior to his conversion to the Mahāy āna). Among the “five books of MAITREYA” (see BYAMS CHOS SDE LNGA), three are particularly significant in Yogācāra: the

MADHYĀNTAVIBHĀGA, the DHARMADHARMATĀVIBHĀGA, and the MAHĀYĀNASŪTRĀLAṂKĀRA. Important contributions to Yogācāra thought were also made by the logicians DIGNĀGA and DHARMAKĪRTI. Although Yogācāra and Madhy amaka engaged in polemics, in the latter phases of Buddhism in India, a sy nthesis of Yogācāra and Madhy amaka took place in the works of such authors as ŚĀNTARAKṢITA and KAMALAŚĪLA; Tibetan doxographers dubbed this sy nthesis YOGĀCĀRA-SVĀTANTRIKA- MADHYAMAKA. ¶ Yogācāra authors offered detailed

presentations and analy ses of virtually all of the important topics in Buddhist thought and practice, built upon an edifice deriving from meditative experience. The school is perhaps most famous for the doctrines of “mind-only ” (cittamātra) and “representation- only ” (vijñaptimātra), according to which the conception of the objects of experience as existing external to and independent of the consciousness perceiving them was regarded as the fundamental ignorance and the cause of suffering. Instead of the standard six consciousnesses (VIJÑĀNA) posited by other Buddhist schools (the five sensory consciousnesses and the mental consciousness), some Yogācāra texts described eight forms of consciousness: these six, plus the seventh “afflicted mind” (KLIṢṬAMANAS), which mistakenly generates the false notion of a perduing self (ĀTMAN), and the eighth foundational, or “storehouse,” consciousness (ālay avijñāna). This foundational consciousness is the repository of seeds (BĪJA) or imprints (VĀSANĀ) produced by past actions (KARMAN) that fructify as experience, producing simultaneously consciousness and the objects of consciousness. The afflicted mind mistakenly regards the foundational consciousness as a permanent and independent self. The doctrine of the three natures (trisvabhāva), although variously interpreted, is also often explained in light of the doctrine of representation-only. The imaginary nature (PARIKALPITA) refers to misconceptions, such as the belief in self and in the existence of objects that exist apart from consciousness. The dependent nature (PARATANTRA) encompasses impermanent phenomena, which are products of causes and conditions. The consummate nature (PARINIṢPANNA) is reality, classically defined as the absence of the imaginary nature in the dependent nature. By removing these latent predispositions from the ālay avijñāna and overcoming the mistaken bifurcation of experience between a perceiving subject and perceived objects (GRĀHYAGRĀHAKAVIKALPA), a transformation of consciousness (ĀŚRAYAPARĀVṚTTI) occurs which turns the deluded mind of the sentient being into the enlightenment cognition of the buddhas (BUDDHAJÑĀNA), with

the ālay avijñāna being transformed into the mirrorlike wisdom (ĀDARŚAJÑĀNA). In the realm of soteriology, much of what would become the standard Mahāy āna elaboration of the five paths (PAÑCAMĀRGA) and the bodies (KĀYA, e.g., TRIKĀYA) of a buddha is found in works by Yogācāra authors, although there are important differences between Yogācāra and Madhy amaka on a number of key soteriological questions, including whether there is one vehicle (EKAYĀNA) or three final vehicles (TRIYĀNA), that is, whether all beings are destined for buddhahood, or whether some, such as the ARHATs of the mainstream Buddhist schools, are stuck in a soteriological dead end. ¶ Not all the scholastics regarded as Yogācāra exegetes adhered to all of the most famous doctrines of the school. The most common division of the school is into those who do and do not assert the existence of eight consciousnesses (and hence the ālay avijñāna). The former, who include Asaṅga and Vasubandhu, are called “followers of scripture” (āgamānusārin), and the latter, who include the famous logicians DIGNĀGA and DHARMAKĪRTI, are called “followers of reasoning” (ny āy ānusārin). Yogācāra strands of Buddhism were extremely influential in the

development of indigenous East Asian schools of Buddhism, including the mature schools of HUAYAN and even CHAN. For specifically East Asian analogues of Yogācāra, see FAXIANG ZONG, XIANG ZONG, DI LUN ZONG, and SHE LUN ZONG.

Yogācārabhūmiśāstra. [alt. Yogācārabhūmi] (T. Rnal ’by or spy od pa’i sa’i bstan bcos; C. Yuqieshidi lun; J. Yugashijiron; K. Yugasaji non). In Sanskrit, “Treatise on the Stages of Yogic Practice”; an ency clopedic work that is the major treatise (ŚĀSTRA) of the YOGĀCĀRA school of Indian Buddhism. It was widely influential in East Asia and Tibet, being translated into Chinese by XUANZANG between 646 and 648 and into Tibetan circa 800. Authorship is traditionally ascribed to ASAṄGA (or, in China, to MAITREYA), but the size and scope of the text suggest that it is the compilation of the work of a number of scholars (possibly including Asaṅga) during the fourth century CE. The work is divided into five major sections. The first and longest, comprising approximately half the text, is called the “Multiple Stages” (Bahubhūmika or Bhūmivastu) and sets forth the stages of the path to buddhahood in seventeen sections. The two most famous of these sections (both of which are preserved in Sanskrit and which circulated as independent works) are the ŚRĀVAKABHŪMI and the BODHISATTVABHŪMI, the latter providing one of the most detailed discussions of the bodhisattva path (MĀRGA) in Indian literature. In this section, many of the

central doctrines of the Yogācāra school are discussed, including the eight consciousnesses, the ĀLAYAVIJÑĀNA, and the three natures (TRISVABHĀVA). The structures and practices of the paths of the ŚRĀVAKA, PRATYEKABUDDHA, and BODHISATTVA are presented here in the form that would eventually become normative among MAHĀYĀNA scholasts in general (not just adherents of Yogācāra). The second section, “Compendium of Resolving [Questions]” (Viniścay asaṃgrahaṇī), considers controversial points that arise in the previous section. The third section, “Compendium of Interpretation” (Vy ākhy ānasa ṃgrahaṇī), examines these points in light of relevant passages from the sūtras; it is interesting to note that the majority of the texts cited in this section are Sanskrit ĀGAMAs rather than Mahāy āna sūtras. The fourth, called “Compendium of Sy nony ms” (Pary āy asaṃgraha) considers the terms mentioned in the sūtras. The fifth and final section, “Compendium of Topics” (Vastusaṃgraha), considers central points of Buddhist doctrine, including PRATĪTYASAMUTPĀDA and BODHI. This section also contains a discussion of VINAYA and (in the Chinese version) ABHIDHARMA.

Yogācāra-Svātantrika-Madhyamaka. (T. Rnal ’by or spy od pa’i dbu ma rang rgy ud pa). According to Tibetan exegetes, who coined the term, one of the two branches of the SVĀTANTRIKA school of MADHYAMAKA, together with the SAUTRĀNTIKA-SVĀTANTRIKA-MADHYAMAKA. Its main proponents include ŚĀNTARAKṢITA and KAMALAŚĪLA. Like YOGĀCĀRA, the school holds that external objects do not exist and that objects are of the nature of consciousness. Like MADHYAMAKA, the school holds that consciousness is empty of true existence. In its presentation of the three vehicles (TRIYĀNA), it correlates each vehicle with a different

wisdom, thus bringing together the views of the HĪNAYĀNA, Yogācāra, and Madhy amaka. In order to achieve liberation from rebirth as an ARHAT, the ŚRĀVAKA must understand that a perduring self (ATMAN) does not exist. A PRATYEKABUDDHA must understand that objects, and hence the external world, do not exist separately from the consciousnesses that perceive them, thereby abandoning the GRĀHYAGRĀHAKAVIKALPA, the misconception of there being a bifurcation between subject and object. In order to achieve buddhahood, the BODHISATTVA must understand the emptiness (ŚŪNYATĀ) of all phenomena.

yogatantra. (T. rnal ’by or rgy ud). One of the four traditional Indian categories of tantric texts. In a late Indian categorization of Buddhist TANTRA, a hierarchy

was established that placed texts into one of four categories, in descending order: ANUTTARAYOGATANTRA, y ogatantra, CARYĀTANTRA, and KRIYĀTANTRA. The precise meaning of these categories, their parameters, and their contents were widely discussed, especially in Tibet. In one influential description, y ogatantra was said to emphasize internal y oga over external ritual practice and therefore did not employ the practice of sexual union. An examination of texts included in this category shows, however, that this description is somewhat arbitrary. Important texts classed as y ogatantras include t h e SARVATATHĀGATATATTVASAṂGRAHA, the MAÑJUŚRĪMŪLAKALPA, the SARVADURGATIPARIŚODHANATANTRA, and the VAJRAŚEKHARA. MAṆḌALAs with the buddha VAIROCANA as the central deity occur often in the y ogatantras.

yogin. (T. rnal ’by or pa; C. xiuxing ren; J. shugy ōnin; K. suhaeng in). A male practitioner of YOGA (generally in the generic sense of meditative practice) who has gained some level of attainment in his practice. The term can be used to refer to any advanced Buddhist practitioner, although it refers especially to advanced practitioners of Buddhist TANTRA.

yoginī. (T. rnal ’by or ma). A female practitioner of YOGA, or contemplative practice, but used especially to refer to female adepts of Buddhist TANTRA, particularly those who engage in tantric rituals (including sexual rituals) with tantric YOGINs. The term is sometimes sy nony mous with ḌĀKINĪ.

yoginītantra. (T. rnal ’by or ma’i rgy ud). Also known as “mother tantras” (MĀTṚTANTRA) and “wisdom tantras” (T. shes rab ky i rgy ud), one of the two categories into which the ANUTTARAYOGATANTRAs are divided, the other being “father tantras” (PITṚTANTRA). Developing in India from the SIDDHA tradition, the y oginītantras apparently receive this name because the majority (and in some cases all) of the deities in the tantra’s MAṆḌALA are female. According to a traditional explanation, these tantras emphasize wisdom (PRAJÑĀ), especially the mind of clear light (PRABHĀSVARACITTA), while father tantras emphasize method (UPĀYA), especially the illusory body (MĀYĀDEHA). See CAKRASAṂVARATANTRA.

yogipratyakṣ a. (T. rnal ’by or mngon sum; C. dingguan zhi; J. jōkanchi; K. chŏnggwan chi). In Sanskrit, “y ogic direct perception”; a specific variety of direct perception (PRATYAKṢA) that is ty pically presumed to derive from

meditative practice (BHĀVANĀ; YOGA). A direct intuition of the real obtained through meditative practice, this ty pe of understanding was accepted as a valid means of knowledge by most of the traditional Indian religious schools. In Buddhism, the psy chological analy sis of the notion of y ogipraty akṣa and the related y ogijñāna (y ogic knowledge or cognition) was undertaken by DHARMAKĪRTI (c. 600–670) in his PRAMĀṆAVĀRTTIKA and NYĀYABINDU, as well as by his commentators. Dharmakīrti’s predecessor DIGNĀGA (c. 480–540) had posited that there were only two reliable sources of knowledge (PRAMĀṆA): direct perception (PRATYAKṢA) and logical inference (ANUMĀNA). Dharmakīrti, however, subdivided direct perception (praty akṣa) into four subty pes, viz., sensory cognition (indriy ajñāna), mental discrimination (MANOVIJÑĀNA), self-awareness (SVASAṂVEDANA), and y ogic cognition (y ogijñāna). In Dharmakīrti’s analy sis, y ogic cognition (y ogijñāna) is a form of y ogic perception (y ogipraty akṣa), because it fulfills the two conditions of perception (praty akṣa): (1) it is devoid of conceptual construction (KALPANĀ); and (2) it is a cognition that is “nonerroneous” (abhrānta), viz., real. The treatment of y ogipraty akṣa in the literature thus focuses on how y ogipraty akṣa fulfills these two conditions of perception. Yogic knowledge is devoid of conceptual construction (kalpanā), Dharmakīrti maintains, because it is nonconceptual (akalpa; NIRVIKALPA) and thus “vivid” or “distinct” (spaṣṭa). This ty pe of perception is therefore able to perceive reality directly, without the intercession of mental images or concepts. Since y ogic cognition is said to be devoid of conceptual construction, this raises the issue of its second condition, its lack of error. Why is meditatively induced perception true and reliable? How does a meditator’s y ogic perception differ from the hallucinations of the deranged, since both of them presume they have a vivid cognition of an object? The reason, Dharmakīrti maintains, is that the objects of y ogic knowledge are “true” or “real” (bhūta; sadbhūta), whereas hallucinations are “false” or “unreal” objects (abhūta; asadbhūta). The only true objects of y ogic knowledge offered by Dharmakīrti are the FOUR NOBLE TRUTHS: that is, the perception of these truths is true and reliable because they enable one to reach the goal of enlightenment, not because they involve a perception of an ultimate substance. In this sense, Dharmakīrti’s understanding of y ogijñāna is more focused on the direct realization of the soteriological import of the four noble truths than on extraordinary sensory ability. Therefore, y ogic direct perception is qualitatively different from the various forms of clairvoy ance that are the by products of deep states of concentration that may be achieved by both

Buddhist and non-Buddhist practitioners. Yogipraty akṣa is a form of insight (VIPAŚYANĀ) posssessed only by noble persons (ĀRYAPUDGALA); and among the five paths it occurs only on the path of vision (DARŚANAMĀRGA) and above. See also DARŚANA.

yojana. (T. dpag tshad; C. y ouxun; J. y ujun; K. y usun). In Sanskrit, a “league”; a standard measure of distance in ancient India, and often used in Buddhist texts; it is said to be the distance a y oked team of oxen could travel in one day. Modern estimates of this distance vary widely, with the figure of eight miles often provided as an approximation, although estimates of from four to ten miles (six to sixteen kilometers) are also found.

Yōkan. () (1032–1111). Japanese VINAYA master of the Sanronshū (C. SAN LUN ZONG); also known as Eikan. Yōkan wrote two important works on PURE LAND doctrine known as the Ōjōjūin and the Ōjōkōshiki. In contrast to the TENDAISHŪ and SHINGONSHŪ interpretation of the practice of NENBUTSU (C . NIANFO) as the contemplation of the buddha AMITĀBHA, Yōkan emphasized instead the efficacy of the vocal recitation of name of Amitābha (NAMU AMIDABUTSU). Doctrinally, Yōkan supported the view that enlightenment and afflictions, like buddhas and human beings, are not two but of a single essence. Yōkan or Eikan is also well known for the monastery in Ky ōto that took his name, Eikandō, which is also called Zenrinji.

Yokawa. (). The northern of the three main subcomplexes of the TENDAISHŪ (C. TIANTAI ZONG) monastery ENRYAKUJI on HIEIZAN in Japan. In 848, the Japanese pilgrim-monk ENNIN established the Shūry ōgon’in complex in Yokawa; subsequent expansion projects were undertaken by the monks RYŌGEN and GENSHIN. The Yokawa complex is famous for its central hall, now known as the Yokawa chūdō, also founded in 848, and the Eshin’in (or Eshindō) established by Genshin, which came to function as a special hall for practicing nenbutsu (C. NIANFO).

Yona. One of nine adjacent lands (P. paccantadesa) converted to Buddhism by missionaries dispatched by the elder MOGGALIPUTTATISSA at the end of the third Buddhist council (see COUNCIL, THIRD), which was held in PĀṬALIPUTRA during the reign of AŚOKA in the third century BCE. The region is generally identified as located in northwest India, homeland of the Bactrian Greeks, and is also known as Yonakā or YAVANA. Yona was converted

by the elder Mahārakkhita, who preached the Aggikkhandhopamasutta. The third Buddhist council at Pāṭaliputra, and the nine Buddhist missions are known only in STHAVIRANIKĀYA sources and are first recorded in the fifth-century DĪPAVAṂSA.

Yŏndam Yuil. () (1720–1799). Korean SŎN master and exegete during the Chosŏn dy nasty ; also known as Mui. Shortly after his parents’ death in 1737, Yŏndam became a student of the monk Sŏngch’ŏl (d.u.) at the monastery of Pŏpch’ŏnsa on Mt. Sŭngdal and received the monastic precepts the next y ear from the VINAYA master Anbin (d.u.). In 1739, he began scriptural studies under the Sŏn master Py ŏkha Taeu (1676–1763), which he continued under Yongam Ch’ejo (1714–1779) and Sŏlp’a Sangŏn (1707–1791). In 1741, Yŏndam began training in Sŏn meditation under Hoam Ch’ejŏng (1687–1748) and eventually became his disciple. Yŏndam established himself as a talented exegete of Sŏn materials and was installed as the abbot of the monastery of

Sŏbongsa in 1779. He left many writings, including the Imha nok, Chabo haengŏp, Tosŏ kwamok pyŏngip sagi, Sŏnyo sagi, Sŏjang sagi, Wŏn'gak sagi, Simsŏng non, and others. In his influential Imha nok, Yŏndam addressed the anti-Buddhist polemics of the Confucian scholars. His "personal notes" (sagi) on the CHANYUAN ZHUQUANJI DUXU, DAHUI SHUZHUANG, CHANYAO, and YUANJUE JING are still widely used in Korean monastic seminaries, or kangwŏn.

yŏndŭng hoe. (). In Korean, "lantern-lighting ceremony "; a Korean Buddhist celebration that originated sometime during the Kory ŏ dy nasty. To celebrate the lunar New Year, lanterns were lit on the fifteenth day of the first lunar month and kept lit for two nights. Although King Sŏngjong (r. 982–997) banned the ceremony, the ban was lifted in the first y ear of King Hy ŏnjong's (r. 1010–1031) reign and the ceremony was held again on the fifteenth day of the second lunar month and continued to be held on the second month from that point onward. In 1352, the celebration of the y ŏndŭng hoe took place in the palace on the traditional East Asian date of the Buddha's birthday (the eighth day of the fourth lunar month) with one hundred monks in attendance, and the event was subsequently held on the Buddha's birthday throughout the remainder of the Chosŏn dy nasty. This custom of lighting lanterns to celebrate the Buddha's birthday continues today in Korea.

yong. (J. y ū; K. y ong). In Chinese, "function," or "application"; a term often deploy ed in the East Asian religious traditions, including Buddhism, as a philosophical pair with "essence" (TI). Chinese Daoist and "Dark Learning" (XUANXUE) texts first imbued the term with philosophical implications: the Daode jing refers to y ong as the "attributes" of the way, and the Daodejing zhu, Wang Bi's (226–249) commentary to the text, employ s the term to indicate the functions or attributes of "nonbeing" (WU) or "voidness" (xu). However, y ong, along with its companion ti, was not widely used until the Buddhists adopted both terms to provide a basic conceptual frame for reality or truth. For example, the SAN LUN ZONG master JIZANG (549–623) used ti and y ong to explicate his theory of the middle way (MADHYAMAPRATIPAD). He connected the middle (zhong) to ti, which he described as "neither ultimate nor conventional" (feizhen feisu), and the provisional (jia) to y ong, which he described as "ultimate and conventional" (zhensu). The ti and y ong pair was often used in the HUAYAN, TIANTAI, and CHAN traditions. GUIFENG ZONGMI (780–841), a Tang-dy nasty master of both the HUAYAN ZONG and Heze Chan traditions, provided a sy stematic explanation for y ong and ti, based on the DASHENG QIXIN LUN ("Awakening of Faith According to the Mahāy āna"). In particular, he distinguished between two different ty pes of function in his theory of mind: the "inherent function of the self-nature" (zixing beny ong), which he called "numinous awareness" (LINGZHI), and the responsive functions that accord with conditions (suiy uan y ingy ong), which he described as the various mental functions that derive from the inherent function of the mind. Many Chinese and Korean Neo-Confucian thinkers, such as Cheng Yi (1033–1107), Zhu Xi (1130– 1200), and Yi Hwang (1501–1570), applied Zongmi's interpretation of this pair to their own philosophical sy stems.

Yongjia Xuanjue. (J. Yōka Genkaku; K. Yŏngga Hy ŏn'gak) (675–713). Chinese CHAN monk renowned for his writings on meditation, also known as Mingdao, Yishujue, and Great Master Zhenjue (True Awakening); Yongjia is his topony m, the name of his hometown in Zhejiang province. Yongjia made a name for himself at a y oung age as an expert on meditation and the TIANTAI practices of calmness and insight (see ŚAMATHA and VIPAŚYANĀ). He is said to have later received a seal of approval (YINKE) from the sixth patriarch (LIUZU) of Chan, HUINENG, after study ing under the master for only one day and a night; hence, his cognomen Yishujue (Single-Night Enlightened, or Overnight Guest). His teachings are primarily known through the influential works

attributed to him, such as the ZHENGDAO GE and Yongjia ji. Yongjia was given the posthumous title Great Master Wuxiang (No Marks).

Yongjusa. (). In Korean, "Dragon Pearl Monastery "; the second district monastery (PONSA) of the contemporary CHOGYE CHONG of Korean Buddhism, located on Mt. Hwa in Ky ŏnggi province. The temple was constructed in 854 and originally named Kary angsa. It was rebuilt in 1790 to serve as the roy al tomb of Prince Sado (1735–1762), the father of King Chŏngjo (r. 1776– 1800). During the Japanese colonial period (1910–1945), Yongjusa became one of thirty -one head monasteries (PONSA) and it managed forty -nine branch temples (malsa) in several regions. A monks' training school was established in 1955, followed by a meditation hall in 1969. Yongjusa's main shrine hall (TAEUNG CHŎN) was constructed in 1790 and enshrines images of the buddhas ŚĀKYAMUNI, BHAIṢAJYAGURU, and AMITĀBHA. Other cultural properties at the site include the main temple bell, bronze censers, and a hanging painting of the Buddha (KWAEBUL).

yongmaeng chŏngjin. (S. ārabdhavīry a; T. brtson 'grus rtsom pa, C. y ongmeng jingjin; J. y ūmy ōshōjin). In Korean, "ferocious effort"; an especially rigorous period of practice performed during a SŎN (C. CHAN) meditative retreat (K. ky ŏlche; C. JIEZHI) in Korea. The term most commonly refers to a one-week period during the winter retreat and leading up to the enlightenment day of the Buddha (Puch'ŏnim sŏngdo il) on the eighth day of the twelfth lunar month (usually in early January), during which all the monks (or nuns) in the meditation hall will undertake the ascetic practice (see DHUTAṄGA) of constantly sitting and never ly ing down to sleep (K. CHANGJWA PURWA) for the entire seven day s. This practice is a ritual reenactment of the Buddha's own final fervent effort to awaken. The phrase has also come to refer more generally to an intense session of meditation carried out by a small group of elite monks during a three-y ear retreat (samny ŏn ky ŏlsa). See also SESSHIN; RŌHATSU SESSHIN.

Yongming Yanshou . (J. Yōmei Enju; K. Yŏngmy ŏng Yŏnsu) (904– 975). Chinese CHAN master in the FAYAN ZONG during the Five Dy nasties and Song dy nasty periods; also known as Chongxuan and Baoy izi. Yongming was a native of Lin'an prefecture in Zhejiang province. At the age of twenty -seven, Yongming left his post as

a minor official to become a monk under Cuiy an

Lingcan (d.u.), a disciple of the Chan master XUEFENG YICUN (822–908); he subsequently studied under TIANTAI DESHAO (891–972) and inherited his Fay an lineage. Beginning in 952, Yongming served as abbot of a series of different monasteries, including Zishengsi on Mt. Xuedou, Lingy insi (at the request of the king of Wuy ue), and Yongmingsi, whence he acquired his topony m. Yongming was renowned for his advocacy of the simultaneous cultivation of Chan meditation and NIANFO (recitation of the Buddha's name) and for his magnum opus ZONGJING LU, a massive Chan genealogical history, in one hundred rolls. His writings also include the famous WANSHAN TONGGUI JI and the WEIXIN JUE. Although Yongming's Fay an lineage declined in China during the Song dy nasty, thirty -six envoy s sent by the Kory ŏ king to study under Yongming returned with his teachings to Korea, where the line continued to flourish. Yongming was posthumously given the title Chan master Zhijue (Wise Awakening).

Yongningsi. (J. Eineiji; K. Yŏngny ŏngsa). In Chinese, "Eternal Peace monastery "; one of the most important monasteries in the Northern Wei capital of Luoy ang. After the Wei rulers moved the Chinese capital to Luoy ang, Empress Dowager Ling, the birth mother of Emperor Xiao Mingdi (r. 515–528), began construction of Yongningsi in 516. According to the LUOYANG QIELAN JI, Yongningsi was a grand complex that could house more than a thousand monks and was located to the west of the imperial highway and south of the Changhe gate. In the northern precinct of the monastery was a buddha hall, which housed various golden images, and to the south, a triple-gated tower more than two hundred feet in height. A nine-story pagoda that rose a thousand feet supported a tall golden pole with golden disks to collect the dew. Golden bells were also hung from the pagoda. Since it overlooked the palace, only Emperor Xiao Mingdi and the Empress Dowager were allowed to climb the pagoda to gaze at the entire capital. All the scriptures and paintings from foreign countries available at the time are said to have been stored at the monastery. The eminent translator BODHIRUCI also translated many scriptures while in residence at Yongningsi. The monastery was devastated by a fire and was left in ruins after the capital was moved again to Ye. Several restorations were made during the Sui and Tang dy nasties, but the monastery remains in ruins today .

Yŏngsanjae. ( ). In Korean, "Vulture Peak Ceremony "; a Korean Buddhist rite associated with the SADDHARMAPUṆḌARĪKASŪTRA ("Lotus

Sūtra"), which has been performed in Korea since the mid to late Kory ŏ dy nasty (918–1392). This elaborate ritual is a loose reenactment of the Saddharmapuṇḍarīkasūtra and is intended to depict the process by which all beings, both the living and the dead, are led to enlightenment. Its performance often occurs in conjunction with the forty -ninth day ceremony (K. sasipku [il] chae; C. SISHIJIU [RI] ZHAI), which sends a deceased being in the intermediate transitional state (ANTARĀBHAVA) on to the next rebirth. The Yŏngsanjae is renowned for including the

most complete repertoire of Buddhist chant and dance preserved in the Korean tradition. The rite may last for between one day and a week, although it is rare nowaday s to see it extend bey ond a single day ; briefer productions lasting a couple of hours are sometimes staged for tourists. The Yŏngsanjae is protected through the Korean Cultural Property Protection Law as an intangible cultural asset (Muhy ŏng Munhwajae, no. 50), and the group responsible for protecting and preserving the rite for the future consists of monks at the monastery of PONGWŎNSA in Seoul, the headquarters of the T'AEGO CHONG. The monks at the monastery also train monks and nuns from other orders of Buddhism, as well as lay people, in different components of the rite. In recent y ears, the dominant CHOGYE CHONG of Korean Buddhism has also begun to perform the Yŏngsanjae again, thanks to training from the Pongwŏnsa specialists in the tradition. ¶ The Yŏngsanjae is held in front of a large KWAEBUL (hanging painting) scroll depicting ŚĀKYAMUNI teaching at Vulture Peak (GṚDHRAKŪṬAPARVATA), delivering the Saddharmapuṇḍarīkasūtra to his followers. A day -long version of the ceremony starts with bell ringing and a procession escorting the attending spirits in a palanquin, which then proceeds to a ceremonial raising of the kwaebul. The rest of the day is made up of the following sequence of events: chanting spells (DHĀRAṆĪ) to the bodhisattva AVALOKITEŚVARA (K. Kwanseŭm posal); the cy mbal dance, or PARACH'UM, as monks chant the Ch'ŏnsu kyŏng (C. QIANSHOU JING) dedicated to the thousand-handed incarnation of Avalokiteśvara (see SĀHASRABHUJASĀHASRANETRĀVALOKITEŚVARA); PŎMP'AE; purification of the ritual site (tory anggy e), during which the butterfly dance, or NABICH'UM, is performed to entice the dead to attend the ceremony while the pŏmp'ae chants entreat the three jewels (RATNATRAYA) and dragons (NĀGA) to be present; the dharma drum dance, or PŎPKOCH'UM, during which a large drum is beaten to awaken all sentient beings; a group pray er to the Buddha and bodhisattvas, where every one in attendance has the chance to take refuge in the three jewels (ratnatray a); an offering of flowers and incense

(hy anghwagy e) to the Buddha and bodhisattvas is made by the nabich'um dancers, followed by offering chants; a chant hoping that the food offerings on the altar will be sufficient as the parach'um is performed again together with four dhāraṇī chants; placing the offerings on the altar while chanting continues; culminating in a transfer of merit (kongdŏkky e) to all the people in attendance, including sending off the spiritual guests of the ceremony. The siktang chakpŏp, an elaborate ceremonial meal, is then consumed. A recitation on behalf of the lay donors who funded the ceremony (hoehy ang ŭisik) concludes the rite.

Yongsŏng Chinjong. () (1864–1940). Korean monk during the Japanese colonial period (1910–1945), also known as Paek Yongsŏng; leader of a conservative group of monastic reformers, and one of the thirty -three signatories to the Korean Declaration of Independence in 1919. Ordained at the monastery o f HAEINSA in 1879, he received full monastic precepts five y ears later and became a disciple of Taeŭn Nango (1780–1841) at the hermitage of Ch'ilburam. Later, he had a great awakening while he

was study ing the JINGDE CHUANDENGLU at the monastery of SONGGWANGSA, where he became a disciple of the SŎN master HWANSŎNG CHIAN . One y ear after Korea was annexed by Japan, he established the monastery of Taegaksa and a Sŏn center (Sŏnhagwŏn) in Seoul in an attempt to propagate Buddhism among a wider public. On March 1, 1919, he signed the Korean Declaration of Independence as a representative of the Buddhist community and was consequently incarcerated by the Japanese colonial government for eighteen months. During his y ear and a half in prison, he translated many sūtras (such as the voluminous AVATAṂSAKASŪTRA, or Hwaŏmgyŏng) from literary Chinese into han'gŭl, the Korean vernacular script, in order to make more Buddhist texts accessible to ordinary Koreans. After his release from prison in March 1921, he established a community known as the Taegakky o (Teaching of Great Awakening) and a translation center called Samjang Yŏkhoe (Society for Translating the TRIPIṬAKA), and devoted most of his time to the translation of Buddhist scriptures. In 1928 he published the journal Mua ("No Self") and with HANYŎNG CHŎNGHO also published the journal Puril ("Buddha Sun"). In May 1929, he and 127 other monks submitted a petition to the Japanese colonial government asking for the restoration of the tradition of celibacy in the Buddhist monasteries. Because of his interest in ensuring the continuance of the BHIKṢU a n d BHIKṢUṆĪ traditions, Yongsŏng personally established many ordination platforms and transmitted the complete monastic precepts (kujokky e) several

times during his career. He also stressed the need for monasteries to be self- sustaining economically. In accordance with his plan for self-sustenance, he participated in the management of a mine in Hamgy ŏng province, and in 1922, he bought some land in Manchuria and ran a farm on the compounds of a branch of the Taegakky o. He also started a Ch'amsŏn Manil Ky ŏlsahoe (Ten-Thousand Day Meditation Retreat Society) at the monastery of Ch'ilbulsa and attracted many followers from other monasteries. Yongsŏng was a prolific writer who left behind many works, including his famous Kwiwŏn chŏngjong ("The Orthodox Teaching that Returns to the Source"), a tract that compared Buddhism to Confucianism, Daoism, and Christianity, a modern twist on the old "three teachings" sy ncretism of medieval East Asian philosophy. This work was one of the first attempts by Buddhists to respond to the inroads made by Christianity in modern Korea. In his treatment, he suggests that Confucianism presented a complete moral doctrine but was deficient in transcendental teachings; Daoism was deficient in moral teachings but half-understood transcendental teaching; Christianity was fairly close to the Buddhist ch'ŏn'gy o ("teachings of [humans] and divinities"), which taught the kinds of meritorious actions that would lead to rebirth in heavenly realms but was completely ignorant of the transcendental teaching. Only Buddhism, Yongsŏng concluded, presented all facets of both moral and transcendental teachings. Yongsŏng's other works include his Kakhae illyun, Susim non, and Ch'ŏnggong wŏnil. See also IMWŎTKO.

Yongzhong. (C) (J. Eichū; K. Yŏngchung) (d.u.). Yuan-dy nasty CHAN master in the LINJI ZONG, also known as Jueji Yongzhong, and author of the ZIMEN JINGXUN.

yoni. (T. sky e gnas; C. sheng; J. shō; K. saeng). In Sanskrit and Pāli, “modes of birth”; four modes by which sentient beings are born into the three realms of existence (TRAIDHĀTUKA): (1) oviparous birth (aṇḍajay oni), viz., beings born from eggs, such as birds, reptiles, fish, and insects; (2) viviparous birth (jarāy uja- y oni), viz., beings born from a womb, such as mammals and human beings; (3) moisture-born (saṃsvedajay oni), viz., beings such as maggots generated by rotten meat or mosquitoes born from swamp water, which are understood to be born as the result of the combination of heat and moisture; (4) metamorphic birth (UPAPĀDUKAYONI), viz., spontaneously generated beings, such an divinities (DEVA), hungry ghosts (PRETA), denizens of hell (NĀRAKA), and those residing in the intermediate state (ANTARĀBHAVA). In some interpretations,

even beings generally classified in one category may in certain circumstances be born through other modes. For example, although human beings are viviparously born, the five hundred sons of the king of Pañcāla, one of the sixteen ancient kingdoms of India, are said to have been born from eggs, King Māndhātṛ was born from moisture, and the first humans to appear at the beginning of the KALPA are born by metamorphosis. Among animals, although the first three modes of birth are most common, there are also some animals born by metamorphosis, such as NĀGAs and GARUḌAs. Finally, among beings that are born through metamorphosis, there are certain ty pes of preta who are said to be born viviparously .

yoniśomanaskāra. [alt. y oniśomanasikāra] (P. y onisomanasikāra; T. tshul bzhin y id la by ed pa; C. ruli zuoy i/zheng siwei; J. ny orisai/shōshiy ui; K. y ŏri chagŭi/chŏng say u /). In Sanskrit, “sy stematic attention”; attention directed to an object or a phenomenon purposely and thoroughly, without becoming entranced by its external marks (LAKṢAṆA) and secondary characteristics (ANUVYAÑJANA). The term is used in the context of meditation to refer to the thoroughgoing reflection in which one traces an object or a phenomenon back to its cause or origin, so that one perceives how it arises and perishes in accordance with conditions. Thus, y oniśomanaskāra ultimately refers to attention directed to the FOUR NOBLE TRUTHS, which reveals that the things of this compounded world are fundamentally impermanent (ANITYA), suffering (DUḤKHA), and nonself (ANĀTMAN). While unsy stematic attention (AYONIŚOMANASKĀRA) to the characteristics of sensory objects creates false views, craving, and eventually subjection to the objective order of SAṂSĀRA, sy stematic attention instead brings this unsy stematic attention to an end so that the practitioner perceives the true nature of things. Thus, because of sy stematic attention, as y et unarisen erroneous views (MITHYĀDṚṢṬI) do not arise, already arisen ones cease, unarisen right views arise (SAMYAGDṚṢṬI), and already arisen ones increase. Sy stematic attention is thus foundational to the path that leads to liberation from saṃsāra. See also YUKTI.

yŏnji. (C. ranzhi; J. nenshi). In Korean, “finger burning.” Although not officially sanctioned by the Korean Buddhist SAṂGHA, the ascetic practice of finger burning is

sometimes performed by a handful of devoted Korean monks and nuns. Unlike a similar Chinese practice, the practice of finger burning is not performed in the context of ordination, and is held in high regard. The rationale

for such a practice is often traced to the self-immolation of the bodhisattva BHAIṢAJYARĀJA in the SADDHARMAPUṆḌARĪKASŪTRA and the b o d h i s a t t v a SADĀPRARUDITA's self-mutilation in the AṢṬASĀHASRIKĀPRAJÑĀPĀRAMITĀ. See also DEHADĀNA; SHESHEN.

yon mchod. [alt. mchod y on] (y ön chö). In Tibetan, "priest-patron," a term used to describe the relationship between various Tibetan Buddhist hierarchs and Mongol, Manchu, and Chinese rulers. The compound is composed of abbreviations of two terms. The first, "y on bdag," connotes a powerful benefactor or patron, often a political or military leader. The second "mchod gnas" connotes a religious official, such as a court chaplain. The relationship between Tibetan hierarchs and Mongol rulers is traced to the meeting of SA SKYA PAṆḌITA and Godan Khan (1206–1251, the grandson of Genghis Khan). When Mongol troops invaded Tibet, Sa sky a Paṇḍita led a delegation to the Mongol court in 1247, during which he cured Godan Khan of an illness and offered him religious instruction. Subsequently, Godan Khan became his disciple, sparing Tibet from further invasion and granting control of central Tibet to Sa sky a Paṇḍita. The classic example of the "priest-patron" relationship occurred when Sa sky a Paṇḍita's nephew 'PHAGS PA BLO GROS RGYAL MTSHAN served as religious preceptor and close advisor to Qubilai Khan. Other Tibetan Buddhist hierarchs would serve in similar roles during the Ming and Qing dy nasties. As often invoked in Tibetan sources, in the "priest-patron" relationship, the Tibetan Buddhist lama provides religious instruction and spiritual protection (through the performance of tantric rituals) to the Mongol, Manchu, or Chinese chieftain and in return the Mongol, Manchu, or Chinese ruler provides material support and military protection, while allowing Tibet to remain independent.

Yon tan rgya mtsho. (Yöntan Gy atso) (1589–1616). In Tibetan, "Ocean of Good Qualities"; the fourth DALAI LAMA. The DGE LUGS monk BSOD NAMS RGYA MTSHO, later recognized as the third Dalai Lama, visited the court of the Mongol ruler, the Altan Khan, in 1578. It was the Altan Khan who first used the term "Dalai Lama" to refer to this leader of the Dge lugs sect. The third Dalai Lama soon returned to Tibet but came back to Mongolia after the death of the Altan Khan, spending the next five y ears giving Buddhist teachings and founding monasteries before dy ing in 1588. His incarnation was identified by the Mongols among their own people, as the grandson of Altan Khan's successor. He was given the name Yon tan rgy a mtsho. He was thus the only Dalai Lama who was

not ethnically Tibetan. The Dge lugs hierarchy in Tibet did not immediately recognize the Mongol as the incarnation of Bsod nams rgy a mtsho. To assuage their concerns, a Mongolian delegation was sent to Tibet in 1600 to invite a group of Dge lugs dignitaries to come to Mongolia and administer the traditional tests to determine the boy 's

identity. After the tests convinced the Tibetan delegation that he was indeed the fourth Dalai Lama, they took the boy back to LHA SA in 1602, where he was ordained as a novice at the JO KHANG. He received BHIKṢU ordination in 1614 from his tutor BLO BZANG CHOS KYI RGYAL MTSHAN , who would later become the first (or according to a different reckoning, the fourth) PAṆ CHEN LAMA. Tibet was on the brink of civil war, with the king of Gtsang, a patron of the KARMA BKA' RGYUD, seeking to control central Tibet, where the Dge lugs were in power with the support of the Mongols. Although the y oung fourth Dalai Lama appears not to have been involved in politics, the fact that he was a foreigner seems to have been resented in some quarters. He died of uncertain causes in 1616 at the age of twenty -seven. The close relations that developed between the Mongols and the Dge lugs sect as a result of his selection as Dalai Lama would be an important factor in the eventual political ascendancy of his successor, the fifth Dalai Lama, NGAG DBANG BLO BZANG RGYA MSHO, in 1642.

Yōsai. (J) (). See MYŌAN EISAI.

Yose. (K) (). See WŎNMYO YOSE.

Yu. (J. U; K. U). Ethnikon used in China for monks who hailed from KHOTAN (transcribed as Yutian in Chinese), an Indo-European oasis kingdom at the southern edge of the Takla Makhan desert in Inner Asia, along the northern slope of the Kunlun mountains. Khotan was a major center of Buddhism in Central Asia and an important conduit for the transmission of Buddhism from India to China along the SILK ROAD.

Yuandeng. (C) (). See ZHANRAN YUANDENG.

yuandun jiao. (J. endongy ō; K. wŏndon ky o). In Chinese, "perfect and sudden teaching"; one of the highest levels of the various doctrinal taxonomies (panjiao; see JIAOXIANG PANSHI) deploy ed in the TIANTAI ZONG , HUAYAN ZONG , and sometimes the CHAN ZONG. The Tiantai school first introduced the term to refer to the highest form of the teachings. In the Tiantai analy sis, "perfect" refers to "perfect teaching" or "consummate teaching" (YUANJIAO), the last of the four ty pes of teachings according to content (huafa sijiao), while "sudden" refers to the "sudden teaching" (DUNJIAO), the first of the four modes of exposition (huay i sijiao) (see TIANTAI BAJIAO). The compound "perfect and sudden teaching" thus refers to the consummate vision of the ultimate truth of Buddhism that is expounded all at once without any provisional or gradual expedients. In the Tiantai zong, this "perfect and sudden teaching" may refer either to (1) the teachings of the Tiantai school itself, which provide an approach to Buddhist soteriology in which every stage, condition, and thought, whether defiled or pure, becomes the basis of enlightenment since it represents the perfect median truth (see SANDI); or (2) the teachings of the AVATAṂSAKASŪTRA, in which the Buddha expounded his consummate and unadulterated vision of reality immediately after his enlightenment without any consideration of the ability of his audience to understand that vision. The Huay an school follows closely the Tiantai concept of y uandun jiao. The Huay an and CHAN teacher GUIFENG ZONGMI (780–841), for example, refers to

the perfect and sudden teaching as the “huay i dun” (sudden teaching according to the method of exposition), correlating it with the teaching of the dharma-realm of the mutual and unobstructed interpenetration between phenomenon and phenomena (SHISHI WU’AI FAJIE). The Korean SŎN (Chan) master POJO CHINUL (1158–1210), based on the works of LI TONGXUAN (635–730), interpreted the term as referring to the perfect and sudden enlightenment to the truth of nature origination (XINGQI), which occurs through understanding Huay an doctrine from a Sŏn perspective. In the Chan tradition, therefore, the “perfect and sudden teaching” may refer to the highest form of the Buddhist teachings rather than to the teachings of any specific scholastic school (KYO). See also WŎNDON SŎNGBUL NON.

yuanjiao. (). In Chinese, “perfect/consummate teaching.” See HUAYAN WUJIAO.

Yuanjue jing. (J. Engakuky ō; K. Wŏn’gak ky ŏng). In Chinese, “Scripture of Perfect Enlightenment”; also known as Dafangguang yuanjue xiuduoluo liaoyi jing; an influential indigenous Chinese sūtra (see APOCRYPHA). The Yuanjue jing was purportedly translated by a certain Buddhatrāta (d.u.) at the monastery of BAIMASI in 693, but no Sanskrit or Tibetan equivalent is known to have existed and the scripture is now recognized as being an apocry phon. While in a special SAMĀDHI named “great illuminating repository of spiritual penetration” (shentong daguang mingzang), the Buddha is requested by twelve bodhisattvas inc luding MAÑJUŚRĪ, SAMANTABHADRA, and MAITREYA to explain perfect enlightenment (y uanjue), the originally pure mind as its cause, and the different way s to cultivate it. The scripture focuses on ŚAMATHA, SAMĀPATTI, and DHYĀNA as the primary means of cultivation, and divides the spiritual capacity of sentient beings into three levels. The TATHĀGATAGARBHA and original-enlightenment (BENJUE) theories of the apocry phal DASHENG QIXIN LUN seem to have influenced the composition of the Yuanjue jing . The scripture was especially influential in the writings of the CHAN historian GUIFENG ZONGMI, who wrote several commentaries and subcommentaries on the text, including his Yuanjue jing lueshu , Yuanjue jing lüeshu chao, Yuanjue jing daochang xiuzheng yi, Yuanjue jing dashu , and Yuanjue jing dashu chao. Zongmi also wrote manuals, no longer extant, on the use of the Yuanjue jing in repentance rituals. The Yuanjue jing is one of a number of Chan- related texts that were translated into Uighur Turkish in the TURFAN region.

Yuanmiao. (). See GAOFENG YUANMIAO.

Yuanming lun. (J. Enmy ōron; K. Wŏnmy ŏng non). In Chinese, “Treatise on Perfect Illumination”; attributed to AŚVAGHOṢA, but almost certainly a transcription of a lecture by a teacher associated with the Northern school (BEI ZONG) in the nascent Chinese CHAN tradition. Several copies of this text have been discovered at DUNHUANG, and a private copy is extant in Japan. The treatise consists of nine chapters written largely in catechistic format. The treatise elucidates the causes and results of the path, the nature of the DHARMADHĀTU as the manifestation of one’s own mind, false and correct views, the importance o f UPĀYA, and the practice of

meditation. The Yuanming lun serves as an important source on the teachings of the early Chan tradition before its coalescence around the my thology of the “sixth patriarch” (LIUZU) HUINENG and the so-called Southern school (NAN ZONG).

Yuanren lun. (J. Genninron; K. Wŏnin non). In Chinese, “Treatise on the Origin of Humanity ”; by the eminent HUAYAN and CHAN scholiast GUIFENG ZONGMI. A preface to this relatively short treatise was prepared by Zongmi, as was another by his lay disciple Pei Xiu (787?–860). The treatise largely consists of four chapters: exposing deluded attachments, exposing the partial and superficial, directly revealing the true source, and reconciling root and branches. In his critique of deluded attachments, Zongmi offers a response to the different Confucian and Daoist theories of the way (DAO), spontaneity (ziran), primal pneuma (y uanqi), and the mandate of heaven (tianming). Zongmi then briefly summarizes the teachings of the different vehicles of Buddhism, such as HĪNAYĀNA and MAHĀYĀNA, and expounds their different approaches to reality . Rely ing on the teachings of the AVATAṂSAKASŪTRA, Zongmi finally offers a Buddhist alternative to the theories of the Confucian and Daoist critics: the TATHĀGATAGARBHA as the origin of humanity .

yuanrong. (J. enny ū; K. wŏny ung). In Chinese, “consummate interfusion,” “perfectly interfused”; a term used in the HUAYAN and TIANTAI traditions to refer to the ultimate state of reality wherein each individual phenomenon is perceived to be perfectly interfused and completely harmonized with every other phenomena. Yuanrong is contrasted with “separation” (GELI), the understanding of reality in terms of the discriminative phenomena of the conventional realm. ¶ The concept of y uanrong is deploy ed soteriologically as one of the two modes of describing the bodhisattva path in the Huay an tradition, viz., the “approach of consummate interfusion” (y uanrong men), also known as the “approach of consummate interfusion and mutual conflation” (YUANRONG XIANGSHE MEN); this mode is contrasted with the “approach of sequential practices” (CIDI XINGBU MEN). The approach of sequential practices refers to the different stages in the process of religious training, which progress through the fifty -two stages of the bodhisattva path (MĀRGA). By contrast, the y uanrong men focuses instead on the principle of equivalency (pingdeng) and indicates the way in which any one stage of training subsumes all stages of the path, or how the inception of the path is in fact identical to its consummation. According to this mode of description, then, the completion of the ten stages of faith (shixin), a preliminary stage of the mārga in the Huay an tradition, is often stated to be identical to the achievement of buddhahood (XINMAN CHENGFO). In the Huay an school’s fivefold taxonomy of the teachings (HUAYAN WUJIAO) as sy stematized by FAZANG (643–712), the three vehicles are considered to

represent the xingbu men, while the “consummate teaching” (YUANJIAO), the final and highest level of teaching in this schema, corresponds to the y uanrong men. ¶ Yuanrong is also used in accounts of contemplation practice in the Huay an school, as, for example, in the “contemplation on the consummate interfusion of the three sages”

(sansheng y uanrong guan), which was treated by both CHENGGUAN (738–839) and LI TONGXUAN (635–730). In this Huay an meditation, the bodhisattvas MAÑJUŚRĪ and SAMANTABHADRA represent the causal aspects of practice (y infen), and the buddha VAIROCANA, the fruition aspect (guofen); the consummate interfusion of the causal and effect aspects of practice thus indicates enlightenment. Samantabhadra and Mañjuśrī are juxtaposed as, respectively , the DHARMADHĀTU as the object of faith (suoxin) and the mind as the subject of faith (nengxin), as practice (xing) and understanding (jie), and as principle (LI) and wisdom (zhi). When these juxtaposed aspects are perfectly interfused with each other, the causal aspect is consummated and becomes perfectly interfused with the effect aspect. Thus Samantabhadra as the "empty TATHĀGATAGARBHA" (kong rulaizang) and Mañjuśrī as the "nonempty tathāgatagarbha" (bukong rulaizang) are interfused with Vairocana Buddha's "comprehensive tathāgatagarbha" (zong rulaizang). ¶ In the Tiantai tradition, the "consummate interfusion of the three truths" (y uanrong sandi) is one of the two way s of interpreting the three truths (SANDI), viz., of emptiness (kongdi), provisionally real (jiadi), and the mean (zhongdi). The y uanrong sandi, also termed the "nonsequential three truths" (BU CIDI SANDI), refers to the notion that each truth (di) is endowed with all three of these truths together, and thus the particular and the universal are not separate from one another. This mode is distinguished from the "differentiated three truths" (GELI SANDI), also known as the "sequential three truths" (cidi sandi), where each truth is treated independently ; in this mode, the first two truths represent the aspect of phenomena, while the last truth, of the mean, refers to the aspect of principle. In the Tiantai doctrinal taxonomy (see TIANTAI BAJIAO; WUSHI BAJIAO), geli sandi and y uanrong sandi are said to correspond, respectively, to the "distinct teaching" (biejiao) and the "consummate teaching" (y uanjiao), the third and fourth of the "four ty pes of teaching according to their content" (huafa sijiao) in the Tiantai doctrinal classification. ¶ In both the Huay an and Tiantai traditions, y uanrong is also employ ed as a defining characteristic of the "dharma realm" (fajie; S. dharmadhātu). The term "consummate interfusion of the dharma realm" (fajie y uanrong) describes both the infinitely interdependent state of the Huay an "dharmadhātu of the unimpeded interpenetration of phenomenon with

phenomena" (SHISHI WU'AI FAJIE), as well as the Tiantai doctrine of "intrinsic inclusiveness" (xingju), in which each individual phenomenon is said to be endowed with the TRICHILIOCOSM (SANQIAN DAQIAN SHIJIE; see TRISĀHASRAMAHĀSĀHASRALOKADHĀTU), which represents the entirety of existence in the Tiantai cosmology. The Huay an "dharmadhātu of the unimpeded interpenetration of phenomenon with phenomena" is sy stematized in the doctrine of the Huay an version of causality, the "conditioned origination of the dharmadhātu" (FAJIE YUANQI), and this Huay an causality of the dharmadhātu is also explained as the "consummate interfusion of the six aspects" (LIUXIANG y uanrong).

yuanrong sanguan. (). In Chinese, "three contemplations of consummate interfusion." See SANGUAN.

yuanrong xiangshe men. (). In Chinese, “approach of consummate interfusion and mutual conflation.” See YUANRONG.

Yuanwu Keqin. (J. Engo Kokugon; K. Wŏno Kŭkkŭn) (1062–1135). Chinese CHAN master in the LINJI ZONG; also known as Wuzhuo and Foguo. Yuanwu was a native of Chongning, Pengzhou prefecture, in present-day Sichuan province (northwest of the city of Chengdu). Little is known about his early career, but Yuanwu eventually became a disciple of the Chan master WUZU FAYAN. According to legend, Yuanwu became ill after leaving Wuzu’s side, and returned as Wuzu had predicted. Yuanwu then inherited Wuzu’s Linji lineage. While traveling in the south, Yuanwu befriended the statesman ZHANG SHANGYING (1043–1122) and also won the support of other powerful local figures, such as the governor of Chengdu. At their request, Yuanwu served as abbot of several monasteries, including Jiashansi and Daolinsi, where he lectured on the Xuedou gonggu by XUEDOU CHONGXUAN. These lectures were later edited together as the BIYAN LU (“Blue Cliff Record”), an influential collection of Chan cases (GONG’AN). Yuanwu was honored with several titles: Emperor Huizong (r. 1100–1125) gave him the title Chan master Foguo (Buddha Fruition) and Gaozong the title Chan master Yuanwu (Consummate Awakening). The title Chan master Zhenjue (True Enlightenment) was also bestowed upon him. Among his hundred or so disciples, DAHUI ZONGGAO, the sy stematizer of the KANHUA CHAN method of meditation, is most famous. Yuanwu’s teachings are recorded in the Yuanwu Foguo chanshi yulu and Yuanwu chanshi xinyao.

yuganaddha. (T. zung ’jug; C. shuangru/shuangy un; J. sōny ū/sōun; K. ssangip/ssangun /). In Sanskrit and Pāli, lit., “y oked together,” sometimes translated as “union” or “joining.” The term is especially important in tantric literature, where it often refers to the union of two things, resulting in a state of nonduality (ADVAYA). However, the term appears in a variety of contexts where two elements are conjoined, including serenity (ŚAMATHA) and insight (VIPAŚYANĀ), wisdom (PRAJÑĀ) and method (UPĀYA) , SAṂSĀRA and NIRVĀṆA, male and female, and subject and object. In Pāli literature, the term appears especially in the context of treatments of samatha and vipassanā, both in practices in which the meditator alternates between the two and practices in which the two are unified.

Yuimae. (C. Weimo hui; K. Yuma hoe). In Japanese, “VIMALAKĪRTI ceremony.” One of the three great ceremonies (Nanky ō san[n]e) held in the ancient Japanese capital of Nara. In 656, when the senior courtier Nakatomi no Kamatari (an ancestor of the Fujiwara clan) became seriously ill, the Paekche nun Pŏmmy ŏng (J. Hōmy ō) advised Empress Saimei to sponsor a reading of the “Inquiry about Illness” chapter of the VIMALAKĪRTINIRDEŚA in order to speed his recovery. The reading was successful and, out of gratitude, Kamatari and his family subsequently sponsored a lecture on the sūtra in 658 to commemorate the construction of the new monastery of Sankaiji. This ceremony was transferred to the Hossōshū (C. FAXIANG ZONG) monastery of KŌFUKUJI in Nara in 712, where it was held periodically every two to five y ears; it is

now observed annually on the tenth day of the tenth lunar month. For seven day s, a lecture on the Vimalakīrtinirdeśa is offered to the public and offerings are made to the SAṂGHA.

Yujŏmsa. (). In Korean, “Elm Hillock Monastery ”; one of the four major monasteries located in the Diamond Mountains (KŬMGANGSAN) in present- day North Korea, and best known traditionally for its fifty -three buddha images. Yujŏmsa claims to be one of the oldest monasteries on the Korean peninsula. According to its historical record, Kŭmgangsan Yujŏmsa sajŏkki, written in 1297 by the Kory ŏ official and diplomat Min Chi (1248–1326), icons of fifty -three buddhas drifted to the Silla seashore in the y ear 4 CE through the intercession of an Indo-Scy thian [alt. Yuezhi, Rouzhi] king from the northwestern region of India. These images were originally cast by MAÑJUŚRĪ in the Indian city of ŚRĀVASTĪ and enshrined inside a large bell. After landing in Korea, the bell

containing these fifty -three icons magically traveled inland and was eventually discovered in a branch of an elm tree by a Korean local official. To house these icons, the Silla king Namhae Ch’ach’aung (r. 4–24 CE) ordered the construction of this monastery, which he named after the elm tree in which the bell was discovered. Despite this legend of the monastery ’s origins, however, the main construction work at Yujŏmsa could not have begun before 1168. In the thirteenth century, during the late Kory ŏ period, the monastery enjoy ed the patronage of the Mongol–Korean court, which raised its political status and importance. The fifty -three buddhas of Yujŏmsa remained a popular destination for both literati tourists and Buddhist pilgrims to the Diamond Mountains throughout the Chosŏn dy nasty. When the site was survey ed in 1912 by the Japanese scholar Sekino Tadashi (1867–1935), only fifty small gilt bronze icons were display ed in the Nŭngin pojŏn on a unique screen altar that was ornamented with meandering tree branches. In contrast to Min Chi’s description of the iconography, various other images, including bodhisattvas and monastic figures, were included along with the buddha icons. Sty listically, forty -three individual figures could be dated to the Unified Silla period, and the remaining seven were determined to be post-Kory ŏ products. This incongruent mixture of sty les is due to continuous devastations of the images by fire and theft and their subsequent restorations. Yujŏmsa burned to the ground during the Korean War (1950–1953) and the current whereabouts of the fifty -three icons are unknown.

Yujŏng. (K) (). See SAMYŎNG YUJŎNG.

yukti. (P. y utti; T. rigs pa; C. daoli; J. dōri; K. tori). In Sanskrit, “reasoning” or “argumentation”; the process of analy tical reflection that results in correct understanding. The term often appears in conjunction with ĀGAMA (scripture), as criteria or tools deploy ed to verify a particular point of doctrinal correctness. Yukti is usually presumed to have two denotations in the literature, viz., “reasoning” and “rational principles,” although sometimes it is difficult to differentiate between these two senses in a particular text. ¶ The MAHĀYĀNASŪTRĀLAṂKĀRA, for instance, refers

to y ukti as one of the four ty pes of provisional establishment (prajñaptivy avasthāna), that is, provisional establishment of dharma (dharmaprajñaptivy avasthāna), truth (saty aprajñaptivy avasthāna), reasoning (y uktiprajñaptivy avasthāna), and vehicle (y ānaprajñaptivy avasthāna). Yukti is itself subdivided into four ty pes, that is, the y ukti of reference (apekṣāy ukti), defined as sy stematic attention

(YONIŚOMANASKĀRA); efficacy (kāry akāraṇay ukti), defined as right view together with its fruits (samy agdṛṣṭiḥ phalānvitā); valid proof (upapattisādhanay ukti), defined as analy sis by means of correct cognition (pramāṇavicay a); and reality (DHARMATĀ-y ukti), defined as the inconceivable (ACINTYA). ¶ In such texts as the YOGĀCĀRABHŪMI, the SAṂDHINIRMOCANASŪTRA, and the ABHIDHARMASAMUCCAYA, the four ty pes of y ukti are described as tools or means for investigating Buddhist teachings and y ukti thus carries the denotation of “rational principles” (see VYĀKHYĀYUKTI). In these scriptures, the principle of dependence (apekṣāy ukti) is defined as the principle of dependent origination (PRATĪTYASAMUTPĀDA); thus, in dependence on the seed, the shoot emerges. The principle of efficacy (kāry akāraṇay ukti) is defined as the way in which particular causes are associated with specific effects; thus, visual consciousness affects vision but not hearing. The principle of valid proof (upapattisādhanay ukti) is defined as the three ty pes of valid knowledge (PRAMĀṆA), that is, direct perception (PRATYAKṢA), logical inference (ANUMĀNA), and scripture (āgama). The principle of reality (dharmatā-y ukti) is defined as the generic properties and natures of dharmas, such as the property of water falling downward, or the sun rising in the east. The Saṃdhinirmocanasūtra’s emphasis on the third y ukti of valid proof ultimately led to a narrowing of the term to refer to the three ty pes of valid knowledge (pramāṇa). After DIGNĀGA (c. 480–540), who accepted only two pramāṇas— that is, direct perception (praty akṣa) and logical inference (anumāna), but not scripture (āgama)—y ukti is subsequently confined to only these two ty pes of pramāṇas. In the ABHIDHARMAKOŚABHĀṢYA, Vasubandhu advocates that the wisdom obtained through reflection (CINTĀMAYĪPRAJÑĀ), the second of the three modes of wisdom (prajñā) (along with the wisdom obtained through listening/learning [ŚRUTAMAYĪPRAJÑĀ] and the wisdom obtained through meditative practice [BHĀVANĀMAYĪPRAJÑĀ]) is produced from investigation by means of y ukti (y uktinidhy ānajā). Since Vasubandhu presents all three modes of wisdom as arising from meditative concentration (SAMĀDHI), y ukti in this context seems to have been understood in relation to meditative practice, not purely intellectual reasoning. ¶ The Pāli equivalent y utti, which appears in the NETTIPPAKARAṆA, is presented as one of the sixteen categories (hārā) of scriptural exposition, referring to (logical) fitness, right construction, or correctness of meaning.

yuktikāya. (T. rigs tshogs). In Sanskrit, literally “corpus of reasoning,” or “collection of reasoning”; a term used in the Indian and Tibetan traditions to refer collectively to six works that traditionally constitute NĀGĀRJUNA’s philosophical oeuvre. The six works are the MŪLAMADHYAMAKAKĀRIKĀ, YUKTIṢAṢṬIKĀ, ŚŪNYATĀSAPTATI,

VIGRAHAVYĀVARTANĪ, VAIDALYAPRAKARAṆA, and RATNĀVALĪ. (Some versions list only five works in the corpus, eliminating the Ratnāvalī; others substitute the AKUTOBHAYĀ in place of the Ratnāvalī as the sixth work). This group of texts is often referred to in connection with the STAVAKĀYA, or “corpus of hy mns,” the devotional works attributed to Nāgārjuna. There are traditionally four works in this group of hy mns, known collectively as the CATUḤSTAVA: the LOKĀTĪTASTAVA, NIRAUPAMYASTAVA, ACINTYASTAVA, and PARAMĀRTHASTAVA, although a number of other important hy mns are also ascribed to Nāgārjuna. These two collections of Nāgārjuna’s works figure prominently in the “self-emptiness, other emptiness” (RANG STONG GZHAN STONG) debate in Tibetan Buddhism, where the parties disagree on the question of which corpus represents Nāgārjuna’s final view.

Yuktiṣ aṣ ṭikā. (T. Rigs pa drug cu pa; C. Liushisong ruli lun; J. Rokujūju ny oriron; K. Yuksipsong y ŏri non). In Sanskrit, “Sixty Stanzas of Reasoning”; one of the most famous and widely cited works attributed to NĀGĀRJUNA, traditionally counted as one of the texts in his “corpus of reasoning” (YUKTIKĀYA). Although lost in the original Sanskrit, the work is preserved in both Tibetan and Chinese; a number of the Sanskrit stanzas have however been recovered as citations in other works. Sixty -one stanzas in length, the work is a collection of aphorisms generally organized around the topic of PRATĪTYASAMUTPĀDA. It begins with the famous homage to the Buddha, “Obeisance to the King of Sages who proclaimed dependent origination, this mode by which production and disintegration are abandoned.” The work argues throughout that the world that is subject to production and disintegration is an illusion created by ignorance and that the path taught by the Buddha is the means to destroy this illusion and the suffering it creates. Individual stanzas are quoted by such commentators as BHĀVAVIVEKA, CANDRAKĪRTI, and ŚĀNTARAKṢITA in support of some of the central debates in MADHYAMAKA, such as whether ARHATs must understand the Madhy amaka conception of emptiness (ŚŪNYATĀ) in order to be liberated from rebirth and whether Nāgārjuna held that external objects do not exist (the thirty -fourth stanza

can be read to suggest that he held this view).

Yuktiṣ aṣ ṭikāvṛ tti. (T. Rigs pa drug cu pa’i ’grel pa). “Commentary on [NĀGĀRJUNA’s] Sixty Stanzas of Reasoning,” by CANDRAKĪRTI. See YUKTIṢAṢṬIKĀ.

Yulan Guanyin. (C) (). See MALANG FU.

yulanben. (T. y ongs su sky ob pa’i snod; J. urabon; K. uranbun). In Chinese, lit. “y ulan vessel,” referring to the “ghost festival.” The Sinographs “y ulan” have ty pically been interpreted by scholars to be a transcription of a hy pothetical BUDDHIST HYBRID SANSKRIT, Middle Indic, or perhaps even Iranian form *ULLAMBANA, which is presumed to correspond to the Sanskrit avalambana (lit. “hanging downward,” “suspended”); the term refers to the “Ghost Festival,” a ritual that sought the salvation of beings condemned to the unfortunate fate of being “suspended” in hell. This explanation of y ulan is questionable, however, since this connotation of the Sanskrit

term avalambana is unknown in Indian Buddhist contexts. The Tibetan translation of y ulanben as y ongs su sky ob pa'i snod, or "vessel of complete protection," also does not fit any connotations of "hanging down"; the Tibetan rendering does, however, seem to fit better an alternate explanation of the derivation of y ulan(ben) as the Buddhist Hy brid Sanskrit term ullumpana (sometimes mistakenly transcribed as ullumpana, ullumbana, etc.), lit. "rescuing, extracting [from an unfortunate fate]." The Sinograph "ben" ("bowl") is less problematic: it refers to the bowl in which offerings are placed during the PRAVĀRAṆĀ festival in order to rescue one's ancestors from their unfortunate destinies. A more recent hy pothesis is that "y ulan" is a transcription of the Sanskrit and Pāli term odana (cooked rice) and "ben" a native word for bowl; the compound "y ulanben" is thus not a transcription of the hy pothetical Sanskrit word ullambana but actually means a "rice bowl," perhaps even a special kind of rice bowl for making offerings on the pravāraṇā day. The term y ulanben is now used to refer to the "ghost festival," a popular ceremony in medieval China, Korea, and Japan, when offerings were made to the SAṂGHA of the ten directions (DAŚADIŚ) on behalf of one's ancestors. A bowl was filled with all kinds of flavorful foods and fruits and offered on behalf of seven generations of one's deceased parents and ancestors. The festival was held on the full moon of the seventh lunar month, when the saṃgha performed the pravāraṇā ceremony, ending the summer rains retreat

(VARṢĀ). The origin my th and practices associated with the ghost festival are found in various sources, including popular stories known as BIANWEN and such Buddhist apocry phal scriptures as the YULANBEN JING and BAO'EN FENGBEN JING ("Sūtra for Offering Bowls to Repay Kindness"). The Japanese BON FESTIVAL (alt. Obon) derives from this term; it is celebrated in either mid- July or mid-August in order to honor the spirits of one's deceased ancestors.

Yulanben jing . (T. 'Phags pa y ongs su sky obs pa'i snod ces by a ba'i mdo; J. Urabongy ō; K. Uranbun ky ŏng). In Chinese, "Book of the Yulan Vessel"; an influential indigenous Chinese Buddhist scripture (see APOCRYPHA), often known in English as the Ullambana Sūtra or simply the Yulanben Sūtra . Along with the BAO'EN FENGBEN JING ("Scripture for Offering Bowls to Repay Kindness"), the Yulanben jing details the practice of the ghost festival (YULANBEN) and its origin my th. Little is known about the provenance of either text. Both are now generally presumed to be indigenous Chinese works, although some scholars continue to maintain that they are of Indian or Central Asian origin. They are thought to have been composed sometime between the fourth and fifth centuries and were included in the Chinese Buddhist canon as early as the sixth century. The origin my th recounted in the scripture describes the pious efforts of Mulian (S. MAHĀMAUDGALYĀYANA), one of the two main disciples of the Buddha, to save his mother from the tortures of her rebirth as a hungry ghost (PRETA). The Buddha explains to Mulian that it is impossible for an individual on his own to save his ancestors from their suffering; instead, one should place offerings in a bowl for the entire SAṂGHA of the ten directions, and these offerings will be sufficient to liberate up to seven generations of one's parents and ancestors from their unfortunate

rebirths. At least six commentaries were written on the Yulanben jing, although only two survive, including an influential exegesis by GUIFENG ZONGMI. The Tibetan translation of the scripture, made in the Chinese outpost of DUNHUANG sometime in the early ninth century by ’GOS CHOS GRUB (C. Facheng; c. 755–849), is rendered directly from the Chinese recension and is extant in only three manuscript editions of the Tibetan canon (BKA’ ’GYUR). See also YULANBEN.

yulu. (J. goroku; K. ŏrok). In Chinese, “discourse records” or “recorded say ings,” also known as y uben (lit. “edition of discourses”) or guanglu (“extensive records”); compilations of the say ings of CHAN, SŎN, and ZEN

masters. This genre of Chan literature ty pically involved collections of the formal sermons (SHANGTANG), exchanges (WENDA), and utterances of Chan masters, which were edited together by their disciples soon after their deaths. The y ulu genre sought to capture the vernacular flavor of the master’s speech, thus giving it a personal and intimate quality, as if the master himself were in some sense still accessible. Often the recorded say ings of a master would also include his biography, poetry, death verse (YIJI), inscriptions, letters (SHUZHUANG), and other writings, in addition to the transcription of his lectures and say ings. For this reason, Chan discourse records are the Buddhist equivalent of the literary collections (wenji) of secular literati. The term first appears in the SONG GAOSENG ZHUAN, and the genre is often associated particularly with the Chan m aster MAZU DAOYI (709–788) and his HONGZHOU line of Chan. Among the more famous recorded say ings are the Mazu yulu (a.k.a. Mazu Daoyi chanshi guanglu), LINJI YIXUAN’s LINJI LU, and HUANGBO XIYUN’s CHUANXIN FAYAO. Recorded say ings written in Japanese vernacular are also often called a hōgo (dharma discourse).

Yum bu bla sgang . (Yumbu Lagang). A palace and adjacent tower purported to be Tibet’s oldest building, established according to legend by the first Tibetan king Gny a’ khri btsan po (Ny atri Tsenpo) in central Tibet’s Yar klungs (Yarlung) Valley. It may have served as the residence for the earliest Tibetan rulers and was likely renovated by the twenty -eighth king, Lha Tho tho ri gny an btsan (Lha Tothori Ny entsen, b. 433) during the mid-fifth century. Legends state that this king received the first Buddhist scriptures while residing at the Yum bu bla sgang as they miraculously descended from the sky, heralding the eventual religious conversion of the country . According to one early Tibetan historian, however, the texts were actually transported by the Indian cleric Buddharakṣita; the king, unable to read the Indic script, declared their miraculous descent in order to keep secret their foreign origins. The texts were therefore called the gny an po gsang ba, “the sacred secret,” and indeed remained a secret until the advent of king SRONG BTSAN SGAM PO in the seventh century .

Yum chen mo . In Tibetan, lit., “great mother”; a Tibetan epithet for a goddess who is the deified embodiment of the PRAJÑĀPĀRAMITĀ, or perfection of wisdom. The term is also used to refer to the ŚATASĀHASRIKĀPRAJÑĀPĀRAMITĀ (“Perfection of Wisdom in One Hundred Thousand Lines”), or to any other prajñāpāramitā sūtra. Finally, Yum

chen mo is also an honorific term used to refer to the mother of the DALAI LAMA.

Yun'an Puyan. (J. Unnan Fugan; K. Unam Poam) (1156–1226). Chinese CHAN master in the LINJI ZONG; a native of Siming in present-day Sichuan province. After study ing under Shigu Xiy i (d.u.) and Wuy ong Jingquan (1137–1207) following his ordination, Yun'an traveled to the monastery of Zhengzhao Chany uan on Mt. Yang in 1184 and continued his training under the Chan master Songy uan Chongy ue (1132–1202), who early in his vocation had been a student of DAHUI ZONGGAO. When Songy uan was moved to Guangxiao Chansi in Jiangsu province and again to Shiji Chany uan in Anhui province, Yun'an followed and continued to serve the master for eighteen y ears. Yun'an eventually became Songy uan's successor. In 1202, after Songy uan's death, Yun'an was invited to reside in a new hermitage established by the master's brother in Yun'an's hometown in Siming. This hermitage was named Yun'an, whence he acquired his topony m. In 1206, Yun'an moved to Dasheng Puzhao Chansi in Jiangsu province, where he trained many eminent disciples, such as XUTANG ZHIYU. His disciples edited his say ings together in the Yun'an Puyan chanshi yulu.

Yungang. (J. Unkō; K. Un'gang). A complex of some fifty -three carved Buddhist caves located at the southern foot of Mt. Wuzhou some ten miles west of the city of Datong, in the Chinese province of Shaanxi. The Yungang grottoes extend roughly half a mile from east to west and were carved over a fifty -y ear period between the fifth and sixth centuries CE under the patronage of the Northern Wei dy nasty (386–534) court. The caves themselves contain roughly fifty thousand Buddhist sculptures, which are noted for their rich variety. The grottoes at Yungang are divided into eastern, western, and central zones. Most of the best-preserved grottoes are found in the western zone, although Grotto No. 1 in the eastern section still contains numerous sculptures in relief. Grotto No. 5, located inside the entrance to the site, contains a giant buddha statue. Grottoes 16– 20 are especially renowned for their five colossal buddha images. The iconographical features of the sculptures preserved at the Yungang caves are similar to those found in the contemporaneous cave complex at DUNHUANG; unlike Dunhuang, however, the Yungang caves contain no paintings. Since their completion, the Yungang grottoes have fallen victim to both war and natural disasters. After the People's Republic of China was founded in 1949, the Chinese

government took an interest in the site, officially placing it under state protection in 1961. In December 2001, the Yungang grottoes were listed as a UNESCO World Heritage site.

Yunjusi. (). In Chinese, "Cloud Dwelling Monastery "; monastery that is the home of the FANGSHAN SHIJING (stone scriptures). The monk Jingwan (?– 639) allegedly founded this monastery in 631, but a stone inscription dated to 669 is the earliest written record of its existence. The monastery was also known as Xiy usi (Western Valley or Western Region Monastery), and in the seventh- century Mingbaoji ("Records of Miraculous Retribution") it is called Zhichuansi (Fount of Wisdom Monastery). On the nearby hill of Shijingshan (Stone Scriptures Hill) just to the east of

Yunjusi, nine cave libraries stored the Fangshan lithic canon: its total of 14,278 lithic blocks of 1,122 Buddhist scriptures represent textual lineages that derive from recensions that circulated during the Tang and Khitan Liao dy nasties. The carving of the lithic scriptures started during the Sui dy nasty under the monk Jingwan with the support of Empress Xiao (r. 604–617), and continued through the late Ming dy nasty. The monastery itself is famous for its pagodas, which were closely associated with the engraving of the lithographs. Seven stone pagodas date from the Tang, of which the single-story one at the top of Stone Scriptures Hill, with an inscription dated to 898, is noted for both its architecture and carved decorations. Two of the five pagodas from the Liao are especially significant. Built in 1117, the octagonal Southern Pagoda has eleven stories and pointed eaves and includes a depository of Buddhist scriptures beneath it. The Northern Pagoda is uniquely shaped: the bottom half is octagonal with bracketed eaves and carved niches, while the upper half is cone-shaped and decorated with nine circular bands. Its surface is decorated with more than thirty groups of brick reliefs depicting scenes of dancing and singing, the most interesting example of which is a goddess strumming a three-stringed instrument, one of the rare extant examples for the study of Liao musical culture. The Northern Pagoda is surrounded by smaller stone pagodas dating from the Tang dy nasty, several of which resemble the Xiaoy anta (Small Wild Goose Pagoda; see DACI'ENSI) in the ancient Chinese capital of Chang'an (modern Xi'an).

Yunmen Wenyan. (J. Unmon Bun'en; K. Unmun Munŏn) (864–949). Chinese CHAN monk and founder of the YUNMEN ZONG, one of the so-called five houses and seven schools (WU JIA QI ZONG) of the classical Chinese Chan tradition. Yunmen was a native of Jiaxing in present-day Zhejiang province. He

was ordained at the age of sixteen by the VINAYA master Zhideng (d.u.) of the monastery Kongwangsi and two y ears later received the full monastic precepts at the precept platform in Piling (present-day Jiangsu province). After his full ordination, Yunmen returned to Kongwangsi and studied the DHARMAGUPTAKA vinay a (SIFEN LÜ) under Zhideng. Later, Yunmen visited Muzhou Daoming (d.u.), a prominent disciple of the eminent Chan master HUANGBO XIYUN, and continued his studies of Chan under XUEFENG YICUN. Yunmen eventually became Xuefeng's disciple and inherited his lineage. Taking his leave of Xuefeng, Yunmen continued to visit other Chan masters throughout the country, and in 911 he visited the funerary STŪPA of the sixth patriarch (LIUZU) HUINENG on CAOXISHAN. Yunmen then visited Lingshu Rumin (d. 918), a famed disciple of the Chan master Fuzhou Da'an (793– 883), at his monastery of Lingshu Chany uan in Shaozhou (present-day Guangdong province) and continued to study under Lingshu until his death in 918. Yunmen was then asked by the ruler of the newly established Nan Han state (917–971), Liu Yan (r. 917–942), to succeed Lingshu's place at Lingshu Chany uan. In 923, he established a monastery on Mt. Yunmen in the region, whence he acquired his topony m. He continued to reside on Mt. Yunmen for thirty y ears and frequently visited the palace of the Nan Han state to preach. In 938, Liu Cheng (943–958), monarch of the Nan Han, bestowed on him the

title Great Master Kuangzhen (Genuine Truth). According to his wishes, no funerary stūpa was prepared for Yunmen and his body was left in his abbot's quarters (FANGZHANG). Yunmen was especially famous for his so-called one-word barriers (YIZI GUAN), in which he used a single utterance to respond to a student's question. For example, once a monk asked him, "When y ou kill y our parents, y ou repent before the Buddha. But when y ou kill the buddhas and patriarchs, to whom do y ou repent?" Yunmen answered, "Lu" ("exposed"). Eighteen of Yunmen's most famous Chan cases (GONG'AN) are collected in the BIYAN LU ("Blue Cliff Record"); his extended teachings are recorded in the Yunmen Kuangzhen chanshi guanglu.

Yunmen zong . (J. Unmonshū; K. Unmun chong). In Chinese, "Cloud Gate school"; one of the so-called five houses and seven schools (WU JIA QI ZONG) of the mature Chinese CHAN tradition. It is named after the mountain, located in Shaozhou (present-day Guangdong province), where its founder YUNMEN WENYAN (864–949) taught. Yunmen Weny an was famous for his "one-word barriers" or "one-word checkpoints" (YIZI GUAN), in which he

responded to his students' questions by using only a single word. The school became one of the dominant Chan traditions in the Five Dy nasties (Wudai) and early Song dy nasty, producing such prominent masters as DONGSHAN SHOUCHU (910–990), Dongshan Xiaocong (d. 1030), XUEDOU ZHONGXIAN (980–1052), and Tiany i Yihuai (992–1064). Yunmen masters play ed a major role in the development of classical Chan literature. Xuedou Zhongxian's earlier collection of one hundred old cases (guce, viz., GONG'AN), known as the Xuedou songgu, served as the basis for the famous BIYAN LU ("Blue Cliff Record"), which added the extensive commentaries and annotations of the Linji master YUANWU KEQIN (1063–1135) to Zhongxian's original compilation. Several Yunmen masters were closely associated with the Song-dy nasty intelligentsia. Dajue Huailian (1009–1090), for example, was as personal friend of the Song literocrat (shidafu) and poet Su Shi (1036–1101). Fori Qichong (1007–1072) asserted the fundamental harmony of Confucianism and Buddhism, explaining Confucian philosophical concepts using Buddhist terminology. CHANGLU ZONGZE (fl. c. late eleventh to early twelfth century) institutionalized the practice of reciting the name of the Buddha (NIANFO) into the routine of Chan monastic life and wrote an influential text on Chan monastic regulations or "rules of purity " (QINGGUI), the CHANYUAN QINGGUI ("Pure Rules for the Chan Grove"). The Yunmen school survived for about two centuries before it was eventually absorbed into the LINJI ZONG.

Yunqi fahui. (). In Chinese, "Anthology of the Teachings of Yunqi." See YUNQI ZHUHONG.

Yunqi Zhuhong . (J. Unsei Shukō; K. Unsŏ Chugoeng) (1535–1615). Chinese CHAN master of the LINJI ZONG and one of the so-called four great monks of the Ming dy nasty, along with HANSHAN DEQING (1546–1623), DAGUAN ZHENKE (1543–1603), and OUYI ZHIXU (1599–1655); also known as Fohui and Lianchi. Yunqi was a native of Renhe, Hangzhou prefecture (present-day Zhejiang province). In 1566, Yunqi

abandoned his family and his life as a Confucian literatus and was ordained by Xingtianli (d.u.) of West Mountain. Yunqi wandered throughout the country in search of prominent teachers and attained his first awakening at Dongchang in present-day Shandong province. In 1571, he arrived at Mt. Yunqi in Hangzhou, whence he acquired his topony m. There, he was able to restore Yunqi monastery with the help of local followers. His reputation grew after he successfully brought rain and drove tigers

from the area. Yunqi remained on the mountain and composed over thirty major works. With the help of his Confucian background, Yunqi was able to draw a large public to his Chan teachings, and he also promoted the practice known as NIANFO Chan in what was at the time the largest lay society in China. His influential works, such as the CHANGUAN CEJIN, Zizhi lu (“Record of Self- Knowledge”), Sengxun riji, and Zimen chongxing lu, were edited together as the Yunqi fahui (“Anthology of the Teachings of Yunqi Zhuhong”).

yunshui. (J. unsui; K. unsu). In Chinese, lit. “clouds and water”; a term abbreviated from the phrase “moving clouds and flowing water” (C. xingy un liushui; J. kōun ry ūsui; K. haengun y usu), which is used to refer to an itinerant Buddhist practitioner who, like clouds or water, is alway s on the move and never settles down. The term is especially associated with the CHAN (K. SŎN; J. ZEN) school, where it refers to a Chan monk in training. The term implies that a novice monk is expected to travel to various monasteries and learn from different teachers as part of his training, rather than remaining attached to one specific monastery or teaching. In contemporary Japanese Zen usage, unsui refers to neophy te priests who undergo training as novices and live in a sōdō (SAṂGHA hall, see SENGTANG) at a Zen training center. A “cloud robe” (J. unnō), by extension, refers to a monk’s robe that is worn and ragged from following an itinerant lifesty le. During the Edo period (1600–1868), the term unsui became popularized to mean liberated, blissful travel, as exemplified in the novel, Tōkaidōchū hizakurige (“Traveling the Eastern Highway on a Chestnut Pony ”) by Jippensha Ikku (1765–1831). Unsui is also contrasted with the term “dragons and elephants” (C. longxiang; J. ry ūzō; K. y ongsang; see S. HASTINĀGA), which is commonly found in Chan texts to refer to an advanced adept of Chan.

yuntang. (). In Chinese, “cloud hall”; a monastic residential hall. See SENGTANG.

Yuquansi. (). In Chinese, “Jade Spring Monastery ”; important meditative center located on Mt. Yuquan in Jingzhou prefecture (present-day Hubei province). During the Day e reign period (605–617) of the Sui dy nasty, a name plaque for the monastery was prepared by the King of Jin, and the eminent monk TIANTAI ZHIYI lectured there on his FAHUA XUANYI and MOHE ZHIGUAN. Yuquansi soon became a prominent center for meditators in China. The monastery became even more famous when the CHAN master SHENXIU

of the Northern school (BEI ZONG) took up residence at the site sometime in the last quarter of the seventh century. The famed Chan master NANYUE HUAIRANG is also

said to have ordained at Yuquansi.

Yu sim allak to. (C. Youxin anledao; J. Yūshin anrakudō). In Korean, “Wandering the Path to Mental Peace and Bliss”; traditionally attributed to the Korean monk WŎNHYO, its authorship remains a matter of debate. No early references to this text are found in Korean canonical catalogues, and the earliest extant version was found in the library of the Raigōin in Ky ōto, Japan. The prevailing scholarly view is that the text was composed in tenth-century Japan, perhaps by an adherent of the TENDAISHŪ, with the first half of the work taken virtually verbatim from Wŏnhy o’s Muryangsugyŏng chongyo (“Doctrinal Essentials of the SUKHĀVATĪVYŪHASŪTRA”). The Yu sim allak to was influential in Japan, especially during the Kamakura period, when it was quoted in such texts as the Kōmyō shingon dosha kanjinki by MYŌE KŌBEN, An’yōshū by Minamoto Takakuni (1004–1077), Ketsujō ōjōshū by Chinkai (1087–1165), and the SENCHAKU HONGAN NENBUTSUSHŪ by HŌNEN. The Yu sim allak to consists of seven sections: (1) the central tenet (i.e., the benefits of rebirth), (2) the whereabouts of the land of peace and happiness (ANLEGUO, viz., SUKHĀVATĪ), (3) clarification of doubts and concerns, (4) the various causes and conditions of rebirth in the PURE LAND, (5) the nine grades (JIUPIN) of rebirth, (6) the ease and difficulty of rebirth in the different buddha-fields (BUDDHAKṢETRA), (7) and the rebirth of women, those with dull faculties, and sinners. The last section also contains a MANTRA from the Amoghapāśakalparājāsūtra and an empowerment (ADHIṢṬHĀNA) ritual.

Yu-Sŏk chirŭi non. (). In Korean, “Treatise on Queries and Doubts concerning Yu (C. Ru, viz., Confucius) and Sŏk (C. Shi, ŚĀKYAMUNI)”; a Buddhist “defense of the faith” against Neo-Confucian criticisms, written during the early Chosŏn period. Although the authorship of this text remains a my stery, the sty le and content of the treatise resemble the HYŎNJŎNG NON by KIHWA (1376–1433), and it is clear that its Buddhist author was well versed in both Confucian and Daoist thought. The Yu-Sŏk chirŭi non is written in catechetic sty le and consists of nineteen questions and answers, which largely address misleading views that Confucian scholars hold regarding Buddhism. Following a sy ncretic approach that seeks to reconcile the teaching of Confucianism, Buddhism, and Daoism, this work generally argues that these three teachings each have their

own distinctive roles to play in people’s lives and need not be in conflict. Buddhism, Confucianism, and Daoism are explained as corresponding, respectively, to (1) nature (K. sŏng, C. XING), mind (K. sim, C. XIN), and pneuma (K. ki, C. qi); (2) truth (K. chin, C. zhen), its traces (K. chŏk, C. ji), and the connection between them; and so on. The treatise claims that these three teachings are ultimately in accord with one another because of their identical basis in the mind. The text also treats such traditional aspects of Chinese thought as y in-y ang cosmology and the five phases (K. ohaeng, C. wuxing) (viz., the five traditional Chinese elements), as well as astrological and cosmological issues.

yūzūnenbutsu. (). In Japanese, lit. “consummate-interfusion recitation of the Buddha’s name”; a method of chanting Amida (S. AMITĀBHA) Buddha’s name (J. nenbutsu; C. NIANFO), devised by the founder of the YŪZŪNENBUTSU school, RYŌNIN (1072–1132). The principle of y ūzūnenbutsu is derived from Kegonshū (C. HUAYAN ZONG) and TENDAISHŪ (C. TIANTAI ZONG) philosophy, especially the Kegon teachings of “comsummate interfusion” (J. y ūzū, C. YUANRONG) and the unobstructed interpenetration of all phenomena (J. jiji muge; see C. SHISHI WU’AI FAJIE) and the Tendai teaching of the mutual inclusion of the ten dharma-realms (J. jikkai goku; C. shijie huju). The principle of y ūzūnenbutsu builds upon this sense that each and every phenomenon is perfectly interfused with all other phenomena to propose that the merit coming from one person’s chanting of Amitābha’s name is transferred to all other persons and vice versa. When more people chant the Buddha’s name, more merit is thus transferred to all people, and the merit derived from these cooperative efforts reaches not only the dharma- realm (DHARMADHĀTU) in which it is created but also all other dharma- realms as well. Therefore, all things in all realms of existence receive benefit from any one individual’s practice of chanting the Buddha’s name. The practice of y ūzūnenbutsu thus has two major characteristics: (1) the individual’s burden to practice is relieved because salvation is due not just to one’s own merit but to every one’s merit; (2) the notion of “other power” (TARIKI) in this form of pure land means both the power of one’s fellow beings and the power deriving from Amitābha Buddha’s vow of compassion.

Yūzūnenbutsushū. (). In Japanese, “School of Consummate- Interfusion Recitation of the Buddha’s Name”; one of the first Japanese PURE LAND schools. The school was founded by the TENDAISHŪ monk RYŌNIN

(1072–1132), who claimed to have a direct revelation from the buddha Amida (S. AMITĀBHA) regarding the principle of YŪZŪNENBUTSU, in which every individual benefits from both his own and other’s chanting of the Buddha’s name (J. nenbutsu; C. NIANFO) through a mutual transfer of merit. Ry ōnin traveled around Japan to teach the practice and spread the school, keeping a register of new adherents as he traveled. Indeed, carry ing this register of adherents became a privilege of the leader of the school. Ry ōnin also made Dainenbutsuji (Great Recitation of the Buddha’s Name Temple), in the Ōsaka area, the center for his campaign in 1127. ¶ The Yūzūnenbutsu school declined after six generations. When the sixth patriarch of the school Ry ōchin (d. 1182) died without a successor, the register of adherents was entrusted to the Iwashimizu Hachiman shrine, in the hopes that the HACHIMAN KAMI cum BODHISATTVA resident there would select the next patriarch of the school. About 140 y ears later, the Yūzūnenbutsu school was revitalized through the efforts of Hōmy ō (1279–1349), who claimed to have received a revelation from Hachiman. After becoming Ry ōnin’s seventh successor in 1321, Hōmy ō restored Dainenbutsuji and several other branch temples that had long been neglected. He also received imperial patronage from the monarch Godaigo (r. 1318–1339), who added his name and the names of many government officials to the school’s register of adherents. After Hōmy

ō's death, the school declined again as other pure land schools gained popularity, until 1689, when Daitsū (1649–1716) became the forty -sixth patriarch of the school. Daitsū rejuvenated the school, ardently propagating the school's teachings and the practice of chanting the Buddha's name. Daitsū sy stematized the school's teachings: he established an academic institute and wrote two treatises, the Yūzū enmonshō ("Essay on the Complete Teachings of Perfect Interpenetration [Yūzū]") and the Yūzūnenbutsu shingeshō ("Essay on Faith and Understanding in the Yūzūnenbutsu"). In the former text, Daitsū lists five classifications of the Buddhist teachings in ascending order (the teaching of humans and divinities, HĪNAYĀNA, gradual, sudden, and consummate teachings) and classified Yūzūnenbutsu teachings in the fifth category of the "consummate teachings" (see YUANJIAO); he also discusses the school's daily practice of chanting Amida Buddha's name ten times while facing west. The Yūzūnenbutsu school remains active today at its head temple of Dainenbutsuji, although it is relatively small in size compared to the major Japanese pure land schools of JŌDOSHŪ and JŌDO SHINSHŪ. The AVATAṂSAKASŪTRA and th e SADDHARMAPUṆḌARĪKASŪTRA are the principal scriptures of the school, with the three major pure land sūtras (JINGTU SANBUJING) of

secondary importance.

Z Zanabazar (Mongolian). See RJE BTSUN DAM PA.

Zangs mdog dpal ri. (Sangdok Palri). In Tibetan, the "Glorious Copper-Colored Mountain"; the abode of PADMASAMBHAVA. It is located on the island of Cāmara, one of the two "subcontinents" flanking the island of JAMBUDVĪPA; Cāmara is sometimes identified as Sri Lanka. After leaving Tibet, Padmasambhava is said to have departed for the Copper-Colored Mountain. The island was inhabited by ogres (RAKṢASA), whom he first had to subdue. He then constructed an octagonal palace, called "Lotus Light" (Padma 'od), at the summit of the mountain, where he will abide until the end of SAṂSĀRA. In Tibetan Buddhism, Copper-Colored Mountain came to function as a PURE LAND, although it is located on earth, and is not flat as pure lands are supposed to be. There are numerous pray ers for rebirth on the Copper-Colored Mountain and numerous accounts of devotees being transported there in dreams and visions. Among the most common depictions of Padmasambhava in Tibetan painting are those of him enthroned on the Copper-Colored Mountain.

zangzhu. (J. zōshu/zōsu; K. changju). In Chinese, "library prefect." One of the six prefects (C. TOUSHOU) at a CHAN monastery. The library prefect is in charge of the scriptures at the monastery. According to the CHANYUAN QINGGUI, the library prefect prepares the reading desks and tea for those who wish to study the scriptures at the library or scriptorium.

Zanning. (J. Sannei; K. Ch'anny ŏng) (919–1001). Chinese VINAYA master and historian. Zanning was a native of Bohai in present-day Hebei province. Sometime between 926 and 930, he was ordained at the monastery of Xiangfusi in Hangzhou,

Zhejiang province, and received his monastic precepts on Mt. Tiantai. Zanning then studied the “Four-Part Vinay a” (SIFEN LÜ) of the DHARMAGUPTAKA school and became an expert in the South Mountain vinay a lineage (NANSHAN LÜ ZONG). He thus came to be known as Lühu or “Vinay a Tiger,” and was given the title Great Master Mingy i (Bright Righteousness). In 978, he also received the title Great Master Tonghui (Penetrating Wisdom) and was invited to the monastery of Tianshousi. Upon the Emperor’s decree, Zanning compiled the influential Buddhist biographical record,

th e SONG GAOSENG ZHUAN, which was completed and entered into the official canon (DAZANGJING) in 988. He also composed the DA SONG SENG SHI LÜE, one of the earliest attempts to provide a comprehensive account of the history of Buddhism throughout Asia. His other writings include the Neidian ji, Jiuling shengxian lu, and Shichao yinyi zhigui.

Zaō gongen. (). In Japanese, “Provisional Manifestation of the Matrix King,” also known as Zaō, Zaō bosatsu, and Kongō Zaō; proper name of a tutelary deity revered largely by followers of the Japanese SHUGENDŌ and SHINGONSHŪ traditions. Zaō gongen is said to have revealed himself to the legendary Japanese ascetic EN NO GYŌJA, the reputed founder of Shugendō, on Mt. Kinbu in Nara. Zaō gongen is considered to be a BODHISATTVA who quells demons, as well as a NIRMĀṆAKĀYA of the Buddha. Offerings and worship for Zaō gongen are conducted at the hall of Zaōdō on Mt. Kinbu. This wrathful deity is often depicted with three fearsome heads, with a three-pronged VAJRA in his right hand and his right leg suspended in the air.

Zaya Paṇ ḍ ita. [alt. Jay a Paṇḍita] (1599–1662). An important Mongolian monk of the DGE LUGS sect of Tibetan Buddhism. Born as the fifth son in a noble family of the Qoshot tribe, in 1615 he was selected by its leader to become a monk. He was sent to Tibet where he became a disciple of the first (also counted as the fourth) PAṆ CHEN LAMA, BLO BZANG CHOS KYI RGYAL MTSHAN, study ing both the scholastic curriculum and the tantric curriculum. In 1639, after twenty -two y ears in Tibet, on the instructions of the Paṇ chen Lama and the fifth DALAI LAMA, he returned to his homeland, serving as a missionary among the Qoshot. During this period, he invented the todorxoi üzüg (clear script) for the transcription of the Oirad language. In 1650, he returned to Tibet to make offerings to the Dalai Lama and to visit the Paṇ chen Lama, and then continued his missionary work, going as far west as the Kalmy k region of the Volga. Zay a Pa ṇḍita died while en route back to Tibet in 1662. He was a distinguished translator, translating 177 works from Tibetan into the Oirad language. The title of Zay a Paṇḍita was given to masters of the five traditional sciences; there were at least two other important Mongolian monks who bore the title and had lines of incarnation. The monk described here can be distinguished by his Tibetan name, Nam kha’i rgy a mtsho.

zazen. (J) (). See ZUOCHAN.

Zazen wasan. (). In Japanese, “Praise of Seated Meditation”; a short song by the Japanese ZEN master HAKUIN EKAKU in the RINZAISHŪ, which is probably his most popular work. The Zazen wasan is still printed in manuals for scripture recitation and is chanted at many Rinzai temples and monasteries today . In his song, Hakuin extols as the supreme virtues original enlightenment (J. HONGAKU; C. BENJUE), seated meditation (J. zazen; C. ZUOCHAN), and seeing one’s own nature (J. kenshō; C. JIANXING).

Zazen yōjinki. ( ). In Japanese, “Notes on Employ ing the Mind during Seated Meditation,” by the ZEN master KEIZAN JŌKIN in the SŌTŌSHŪ; published in 1680. Following the model of his teacher DŌGEN KIGEN and his meditation manual FUKAN ZAZENGI, Keizan composed this relatively short treatise of his own on seated Zen (J. zazen; C. ZUOCHAN) for the edification of clergy and laity alike. The Zazen yōjinki delineates the purpose, method, and technique of seated meditation, with an emphasis on what kinds of mental states should be maintained during practice. Sitting meditation is explained as being a technique designed to set aside all attachments and concerns so that one will be able to abide serenely in one’s true nature, or original face. Keizan also speaks of the specific impediments to meditative practice, such as deluded visions and sloth and torpor, and suggests some practical techniques for mitigating such problems.

zedi. (Burmese). See JEDI.

Zen. (). In Japanese, “Meditation”; the Japanese strand of the broader East A s ia n CHAN school, which includes Chinese Chan, Korean SŎN, and Vietnamese THIỀN. Zen is the Japanese pronunciation of the Chinese term Chan, which in turn is a transcription of the Sanskrit term DHYĀNA, or meditative absorption. More specifically, Zen denotes the Japanese Buddhist traditions that trace their origins back to the Chinese Chan school, or CHAN ZONG. Currently three major traditions in Japan, RINZAISHŪ, SŌTŌSHŪ, and ŌBAKUSHŪ, refer to themselves as Zen schools, and are thus known collectively as the Zen tradition (J. ZENSHŪ; C. CHAN ZONG). The Rinzaishū was first transmitted to Japan in the late twelfth century by MYŌAN EISAI (1141–1215), who visited China twice and received training and certification in the Chinese LINJI ZONG. By the end of the Kamakura period, some twenty -one different Rinzai lineages had been transmitted to Japan. The Rinzai school came to be associated with the

meditative practice of contemplating Zen “cases” (J. kōan; C. GONG’AN; see also J. kanna Zen; C. KANHUA CHAN). The foundation of the Sōtōshū is attributed to DŌGEN KIGEN (1200–1253), who is credited with transmitting the CAODONG ZONG of the Chinese CHAN teacher TIANTONG RUJING (1162– 1227). Dōgen is said to have taught the technique of “just sitting” (SHIKAN TAZA), through which the mind would become stabilized and concentrated in a state of full clarity and alertness, free from any specific content. During the Tokugawa period, the Sōtō school developed into one of the largest Buddhist sects in Japan through the mandatory parish sy stem (DANKA

SEIDO), in which every household was required to register as a member of a local Buddhist temple. By the middle of the eighteenth century, there were more than 17,500 Sōtō temples across the country. The Ōbakushū was founded by the émigré Chinese CHAN master YINYUAN LONGXI (J. Ingen Ry ūki; 1592–1673), who traveled to Japan in 1654/1655 to escape the succession wars and political turmoil that had accompanied the fall of the Ming dy nasty. The Ōbaku school introduced exotic contemporary Chinese customs and monastic practices to the Japanese Zen Buddhism of the time. Although it remained much smaller than the Rinzai and Sōtō Zen traditions, the presence of the Ōbaku school compelled the monks of its two larger rivals to reevaluate their own practices and to initiate a series of important reform movements within their respective traditions (see IN'IN EKISHI). In the modern era, largely through the efforts of such towering intellectual figures as DAISETZ TEITARO SUZUKI (1870–1966), NISHIDA KITARŌ (1870–1945), and NISHITANI KEIJI (1900–1991), the term Zen has also come to connote a "pure experience" (junsui keiken) that transcends language and thought, which is sometimes argued to be the unique property of the Japanese people and their culture (cf. KYOTO SCHOOL). The cavalier way in which the term Zen is now deploy ed in generic Western writings (e.g., the my riad "Zen in the Art of" books) often has little to do with the traditional perspectives of the Zen tradition found in either Japan or the rest of East Asia. As in the case of Chan, in more common parlance, Zen can also denote the particular teaching sty le of a Zen master and is often expressed as "so-and-so's Zen." See also entries on the SŌTŌSHŪ, RINZAISHŪ, and ŌBAKUSHŪ and on specific Japanese Zen masters and monasteries.

zendō. (). In Japanese, "meditation hall." See SENGTANG.

Zenkōji. (). In Japanese, "Monastery of the Radiance of Goodness";

located in modern-day Nagano. According to the Zenkōji engi, the monastery was built at the beginning of the seventh century by a certain Honda Yoshimitsu to enshrine a famous Amida (AMITĀBHA) triad. In the ancient Indian kingdom of VAIŚĀLĪ, a merchant by the name of Somachattra is said to have warded off epidemic demons and cured his daughter by invoking the name of the buddha Amitābha ten times. Somachattra was so moved by the appearance of Amitābha and his two attendants AVALOKITEŚVARA and MAHĀSTHĀMAPRĀPTA in the sky that he asked the Buddha for an icon to be made in their likeness. The triad was then forged with special gold from the dragon king's palace and worshipped as a living manifestation of Amitābha and his attendants. Somachattra was later reborn as King Sŏng (r. 523–553) of the Korean kingdom of Paekche. The triad first traveled to Paekche to aid King Sŏng, after which it was taken to Japan. Honda Yoshimitsu is said to have discovered the triad in the Naniwa Canal and enshrined it in his house, which was later transformed into a magnificent buddha hall by Empress Kōgy oku (r. 642–645). With support from the Hōjō bakufu, a Zenkōji cult proliferated especially during the Kamakura period and onwards, and numerous replicas of the "original" (Shinano) Zenkōji triad were made and enshrined in Shin ("New") Zenkōji temples. For centuries, the (Shinano) Zenkōji in

Nagano remained under the control of another powerful TENDAISHŪ monastery known as MIIDERA. Zenkōji was devastated by fire in 1179, but legendary accounts testify to the miraculous escape of the “original” triad, which now remains as a secret buddha (HIBUTSU) image largely unavailable for public viewing. After the Japanese monk IPPEN’s visit to Zenkōji, several Shin Zenkōji temples also came to be associated with his tradition, the JISHŪ.

Zenrin kushū. (). In Japanese, “Phrase Collection of the ZEN Grove”; a lengthy collection of more than four thousand Zen phrases—specifically capping phrases (JAKUGO) or appended phrases (AGYO)—culled from Buddhist SŪTRAs, discourse records (YULU), kōan collections (see C. GONG’AN), and various Chinese belletristic classics. The collection was edited by a certain Ijūshi in 1688. Ijūshi’s collection is based on a shorter phrase book entitled the Kuzōshi, compiled by the Zen master Tōy ō Eichō (1428–1504) of the MYŌSHINJI lineage of the RINZAISHŪ. Beginning with single-character phrases, the Zen phrases in the Zenrin kushū are sequentially organized according to their number of Sinographs. The Zenrin kushū is one of the most commonly used collections in Japanese kōan training today .

Zenrin shōkisen. (). In Japanese, “A Composition on the Images and Utensils of the Zen Grove”; compiled by the ZEN historian MUJAKU DŌCHŪ in the RINZAISHŪ; a comprehensive catalogue of regulations, events, utensils, and accoutrements used by the Zen (C. CHAN) tradition. The preface was prepared by Mujaku in 1741. More than just a simple catalogue, Mujaku’s Zenrin shōkisen also meticulously notes the possible origin and history of each catalogued item and also expounds upon the significance of its implementation during his day, making it an invaluable tool for the study of Zen in practice. His research is based on an exhaustive list of sources (a total of 488 selections) beginning with sūtras and commentaries to Chinese and Japanese classics, lamplight histories (see CHUANDENG LU), and poetry. A handwritten copy of the text is currently housed at MYŌSHINJI in Ky ōto.

Zenshū. (J) (). In Japanese, the school, lineage, or tradition of CHAN. See ZEN.

Zetawun Pagoda. In Burmese, “Prince Jeta’s Grove” (P. JETAVANA); regarded as the oldest shrine in Sagaing. Zetawun Pagoda commemorates the Buddha’s legendary first visit to Burma (My anmar) in the company of ĀNANDA. According to tradition, the site was occupied by ninety -nine ogres (Burmese, bilu), the leader of whom was named Zeta. When they encountered the Buddha and Ānanda, the ogres welcomed them and, in return for their piety, the Buddha preached the dharma to them for seven day s. All ninety -nine ogres became stream-enterers (P. sotāpanna; S. SROTAĀPANNA) while listening to these sermons. The Zetawun Pagoda purportedly contains the lower robe or waist cloth (P. antaravāsaka; S. ANTARVĀSAS) of the Buddha, which he is said to have presented to the ogres upon their entreaty to leave a token of his visit as an object of worship. The name Zetawun honors the ogre chief Zeta and recalls the fact that at the time of the Buddha’s visit this spot was covered by forests (Burmese, wun). To commemorate the spiritual attainment of the ogres, the village that grew up around

the site became known as Thotapan Ywa or Sotāpanna Village. An annual pagoda festival is held in the village on the new moon day of the Burmese month of Waso (July –August). Adjacent to the Zetawun can also be found an ordination hall said to have been established by the Mon saint, Shin Arahan.

Zhabs dkar tshogs drug rang grol. (Shapkar Tsokdruk Rangdröl) (1781–1851).

One of the most revered Tibetan preachers and saints of the nineteenth century. He was born in the Reb kong region of A mdo in the northeast of the Tibetan cultural domain. During his y outh, he received instruction in RDZOGS CHEN and various treasure (GTER MA) cy cles of the RNYING MA sect. He undertook a one-y ear retreat at the age of sixteen and was ordained at the age of twenty at Rdo bis, a DGE LUGS monastery. He maintained his monastic vows throughout his life but wore his hair long and piled on the top of his head in the manner of a tantric YOGIN. His main teacher was Chos rgy al Ngag gi dbang po, but he studied with a variety of teachers, including those of the Dge lugs sect. He also studied traditional painting. An adept, pilgrim, and poet of the Rny ing ma sect, he traveled throughout Tibet, undertaking retreats at such famous sites as Rma chen spom ra, TSA RI, and Mount KAILĀSA, including in a number of caves where MI LA RAS PA is said to have meditated. He became known as Zhabs dkar, or “white footprint,” because he meditated at Mount Kailāsa, where the Buddha is said to have left his footprints (BUDDHAPĀDA). He also traveled to Kathmandu, where he offered gold for the spire of the BODHNĀTH STŪPA. He gained fame among all social classes through his wide-ranging activities as a Buddhist teacher and his enormous personal generosity and charisma. His autobiography , entitled Snyigs dus ’gro ba yongs kyi skyabs mgon zhabs dkar rdo rje ’chang chen po’i rnam par thar pa rgyas par bshad pa (translated as The Life of Shabkar) is regarded as one of the masterworks of that genre of Tibetan literature.

Zhabs drung Ngag dbang rnam rgyal. (Shapdrung Ngawang Namgy al) (1594– 1651). A Tibetan Buddhist figure noted for unify ing Bhutan as a Buddhist state. At a y oung age, Ngag dbang rnam rgy al was installed as the eighteenth successor to the throne of RWA LUNG monastery, seat of the ’BRUG PA BKA’ BRGYUD sect of Tibetan Buddhism in central Tibet and its leaders, the ’BRUG CHEN INCARNATIONS. In 1616, at the age of twenty -three, he was forced to flee to Bhutan in a political dispute over his recognition as the reincarnation of the fourth ’Brug chen master, PADMA DKAR PO. Ngag dbang rnam rgy al initially gained control over the western region, with his forces eventually defeating his rivals and uniting the various regions into a single country under his leadership. He later successfully repelled an invasion of Bhutan by Tibetan forces mustered by the fifth DALAI LAMA. His title Zhabs drung (literally “at the feet”) refers to his great stature as a Buddhist master. He is famed for establishing a religious and political sy stem of monastic and administrative centers called rdzong (fortress),

which are still in use today in Bhutan. Ngag dbang rnam rgy al is also considered the first master of a prominent Bhutanese incarnation lineage, the Zhabs drung incarnations.

zhai. (J. sai; K. chae). A poly semous Chinese term that means “fast,” “purify,” “make offerings to monks,” “festival,” or “vegetarian feast” (and often seen translated as “maigre feast”); it is also used to translate the Sanskrit term UPOṢADHA. The traditional PRĀTIMOKṢA prohibition against monks and nuns eating after noon was referred to in Chinese as zhai, hence its translation as “fast.” In China, zhai came to refer generally to meals offered at Buddhist rituals and events and more specifically to vegetarian feasts held at monasteries throughout the country. Monasteries often maintained special funds to be used for such purposes. These vegetarian feasts and festivals served as one of the primary means through which the laity made offerings to the monastic community. One of the most famous of such festivals in East Asia was the “Ghost Festival” (YULANBEN).

Zhancha shan’e yebao jing. (J. Senzatsu zen’aku gōhōky ō; K. Chŏmch’al sŏnak ŏppo ky ŏng). In Chinese, “Scripture of Divining the Requital of Good and Evil Actions”; an indigenous Chinese Buddhist scripture (see APOCRYPHA) compiled sometime during the late sixth century. The scripture seems to have been used by a community in Guangdong that was deemed heretical and whose practice of divination and repentance was banned in 593. The first roll of this scripture is largely concerned with the practice of divination, which is made possible through repentance. The scripture emphasizes the need for faith in this dharma-ending age (MOFA); the method of cultivating this faith is offered by the bodhisattva KṢITIGARBHA. This method largely involves the use of various spinning tops (lit. “wheels”) on which the possible fate and fortune of the client is written. A total of 189 possible fates are offered. The repentance rite in the Zhancha shan’e yebao jing seems to have been influenced by the Upāsakaśīlasūtra translated by DHARMAKṢEMA. The second roll of the scripture has been a subject of controversy , for it provides an early version of the monistic “one mind” (YIXIN) and TATHĀGATAGARBHA doctrine that came to dominate in the East Asian schools of Buddhism. Comparisons are often made between this second roll and the influential DASHENG QIXIN LUN.

Zhang Sengyao. (C) () (d.u.; fl c. 502–549). The first Chinese artist to paint

a rendering of the sixteen ARHAT protectors of Buddhism. See ṢOḌAŚASTHAVIRA.

Zhang Shangying. (J. Chō Shōei; K. Chang Sangy ŏng) (1043–1122). Influential Chinese Buddhist lay man and statesman; also known as Tinajue and Wujin jushi (Lay man Infinite). Born to a prominent literati family in Xinjin (present-day Sichuan province), Zhang Shangy ing began his illustrious career in 1065 after receiving his jinshi degree. He first made a name for himself through military expeditions against neighboring barbarian tribes in Yuzhou, after which he was given a high metropolitan post by the powerful grand councilor Wang Anshi (1021–1086). Zhang thus became a supporter of Wang’s administrative and fiscal reform attempts known as the “new policies” (xinfa). Even after Wang’s fall from power, Zhang maintained his support for reform, which eventually allowed him to become grand councilor himself in 1111. Due to political battles at court and his complaints regarding Emperor Huizong’s (r.

1100–1125) support of the Daoists' anti-Buddhist polemics, Zhang's tenure at court was cut short, and he spent the rest of his life in retirement. During this period of retirement, Zhang Shangy ing devoted much of his time to Buddhism. Throughout his life, Zhang befriended and studied under the most respected CHAN masters of his day, such as Dantang Wenzhun (1061–1115), Doushuai Congy ue (1044–1091), Huitang Zuxin (1025–1100), ZHENJING KEWEN, YUANWU KEQIN, DAHUI ZONGGAO, and JUEFAN HUIHONG, and exchanged correspondence with many of them, some of which are still extant. Zhang was particularly fond of the AVATAṂSAKASŪTRA and commentaries on the text composed by the famous Tang dy nasty lay man LI TONGXUAN; emulating Li, Zhang made a pilgrimage to WUTAISHAN. He also wrote a treatise entitled Hufa lun ("Arguments in Defense of the Dharma)" as a rebuttal to the growing anti- Buddhist polemics among the Daoists at court.

Zhanran. (C) (). See JINGXI ZHANRAN.

Zhanran Yuandeng. (J. Tannen Enchō; K. Tamy ŏn Wŏnjing) (1561– 1626). Chinese CHAN master in the CAODONG ZONG; also known as Sanmu daoren. Zhanran was a native of Huiji prefecture in Zhejiang province. In his early twenties, Zhanran became the student of the monk Miaofeng (d.u.) on Mt. Tianhuang and later received monastic precepts from the Chan master YUNQI ZHUHONG, one of the most eminent Chan teachers of the Ming dy nasty. In

1591, Zhanran became the disciple of Cizhou Fangnian (d. 1594) and inherited his Caodong lineage. Zhanran first made a name for himself while residing at the monastery of Shouxingsi and subsequently served as abbot of the monasteries WANSHOUSI on Mt. Jing, and Xianshengsi in his hometown of Huiji, as well as several other monasteries in different regions of Zhejiang province. Zhanran composed the ZONGMEN HUOMEN, an influential treatise on Chan meditation, and his other teachings are recorded in the Zhanran Yuandeng chansi yulu.

zhao'er changji. (C) (). See JI ER CHANGZHAO.

Zhao lun. (J. Jōron; K. Cho non). In Chinese, "(Seng)zhao's Treatise"; an influential work by the eminent Chinese monk SENGZHAO (374–414), one of the major disciples of the important Kuchean translator KUMĀRAJĪVA (344–413). The Zhao lun was compiled sometime between 384 and 414 and brings together Sengzhao's four major works. The first, Wubuqian lun ("On the Immutability of Things"), explores the irrelevancy of time in explaining dharmas that are not subject to production and cessation. The second, Buzhenkong lun ("Emptiness of the Unreal"), explains how dharmas can simultaneously appear as both real and unreal. The BORE WUZHI LUN ("The Nescience of Prajñā") explains that because wisdom (PRAJÑĀ) is quiescent, empty, and lacking a perduring essence, any conscious awareness of it, or emanating from it, is impossible. Finally , "Niepan wuming lun" ("The Anony mity of Nirvāṇa") demonstrates that NIRVĀṆA is fundamentally ineffable and therefore nameless. A chapter entitled "Zong beny i" ("Fundamental Meaning of the Major Tenets") appears at the beginning of the

Zhao lun and offers a succinct explanation of some important doctrinal matters, such as original nothingness (benwu), the true mark of reality (shixiang), dharma nature (faxing), and the emptiness of nature (xingkong). Letters exchanged between Sengzhao and the lay man Liu Yimin (d. 410) of LUSHAN are appended at the end of the Zhao lun. Numerous commentaries on this text exist across the East Asian traditions.

Zhaozhou Congshen. (J. Jōshū Jūshin; K. Choju Chongsim) (778–897). One of the most renowned Chinese CHAN teachers of the Tang dy nasty ; his topony m Zhaozhou derives from the Zhaozhou region in Hebei province, where he spent much of his later teaching career. Zhaozhou was ordained in his y outh at Hutongy uan in his hometown of Caozhou (in present-day Shandong province). At the age of eighteen, he met NANQUAN PUYUAN (748–835), a successor of

MAZU DAOYI (709–788), and studied under him for several decades until that teacher's death. Then in his fifties, Zhaozhou began to travel throughout China, visiting prominent Chan masters such as HUANGBO XIYUN (d. 850) and Daowu Yuanzhi (760–835). Having served as abbot of various monasteries on Mt. Huangbo, Baoshou, and Jia, Zhaozhou settled at the age of eighty in Guany iny uan (AVALOKITEŚVARA Cloister) in Zhaozhou, and taught a small group of monks there for the next forty y ears. Zhaozhou did not use the iconoclastic pedagogical techniques, such as shouting and beating (BANGHE), made famous by other teachers of his era, but used his words to challenge his students and lead them to self-realization. The Song-dy nasty Chan master YUANWU KEQIN (1063–1135) described this characteristic of Zhaozhou's teachings when he said, "Zhaozhou's Chan lies on the lips." Zhaozhou is frequently cited in the collections of Chan GONG'AN (public cases), including five of the forty -eight gong'ans collected in the WUMEN GUAN ("Gateless Checkpoint") and twelve of the one hundred in the BIYAN LU ("Blue Cliff Record"). The most influential gong'an associated with Zhaozhou is the first case collected in the Wumen guan, the so-called WU GONG'AN: "'Does a dog have the buddha-nature (FOXING) or not?' 'No.'" Zhaozhou's "WU" (no; lit. "it does not have it"), became one of the most oft-cited statements in all of Chan, SŎN, and ZEN literature. Due in large part to the efforts of Chan master DAHUI ZONGGAO and his followers, Zhaozhou's wu came to be used as one of the meditative topics (HUATOU) in the Chan meditation practice of "questioning meditation" (KANHUA CHAN). Although Zhaozhou had thirteen dharma heirs, his lineage soon died out. He posthumously received the title "Zhenji dashi" (Great Master Apex of Truth). The record of his teachings is contained in the three rolls of the Zhenji dashi yulu ("Discourse Record of Zhenji Dashi") and in his Zhaozhou lu.

Zhe chen. (Shechen). One of the four main RNYING MA monasteries in eastern Tibet, the others being KAḤ THOG, RDZOGS CHEN, and DPAL YUL; founded in 1735 by the second ZHE CHEN RAB 'BYAMS incarnation, 'Gy ur med kun bzang rnam rgy al (Gy urme Kunsang Namgy el, 1710–1769). Zhe chen then became the seat for his subsequent incarnations, who all served as abbot, and a principal institution of the Rny ing ma sect of Tibetan Buddhism. The monastery, comprised of several main

temples and surrounding structures, was at times also governed by a line of regent lamas, the Zhe chen rgy al tshab (Shechen Gy altsap) incarnations. The fourth Zhe chen rgy al tshab, Padma rnam rgy al (Pema Namgy el, 1871–1926), formally recognized the y oung twentieth-century

luminary DIL MGO MKHYEN BRTSE as one of five reembodiments of ’JAM DBYANG MKHYEN BRTSE DBANG PO , a leading figure of the nineteenth- century RIS MED, or nonsectarian movement. The institution’s full name is Zhe chen bden gny is dar rgy as gling (Shechen Denny i Dargy eling).

Zhe chen rab ’byams. (Shechen Rapjam). An important line of Tibetan incarnate lamas. The first Zhe chen rab ’by ams, Bstan pa’i rgy al mtshan (Tenpe Gy altsen, 1650–1709), was a disciple of the fifth DALAI LAMA, NGAG DBANG BLO BZANG RGYA MTSHO , and Padma rig ’dzin (Pema Rikdzin, 1625–1697)—the latter being the first RDZOGS CHEN INCARNATION and founder of RDZOGS CHEN monastery . The second Zhe chen rab ’by ams, ’Gy ur med kun bzang rnam rgy al (Gy urme Kunsang Namgy el, 1710–1769), founded Zhe chen monastery in 1735. Subsequent incarnations served as the abbots of Zhe chen monastery .

zheng bao. (J. shōhō; K. chŏngbo). In Chinese “retribution proper,” the actions, or KARMAN, directly affect the individual, conditioning one’s phy sical body and psy chological makeup. See ER BAO.

Zhengdao ge. (J. Shōdōka; K. Chŭngdo ka). In Chinese, “Song of the Attainment of the Way ”; attributed to YONGJIA XUANJUE (675–713); also known as the Chanmen biyao jue (“Secret Essentials of the Chan Tradition”). Along with the XINXIN MING, the Zhengdao ge is cherished by the CHAN tradition as one of the classic verse expressions on the process of meditation and the experience of enlightenment. Its contents purport to convey Yongjia’s awakening after only a single day and night of tutelage under the sixth patriarch (LIUZU) HUINENG, whence Yongjia’s cognomen Ishujue (“Single-Night Enlightened,” or “Overnight Guest”). The poem consists of fewer than two thousand Sinographs and follows a traditional regulated-verse sty le. The verse describes enlightenment as the realization that the true nature of all things is in fact the buddha-nature (FOXING), which is emptiness itself, transcending all the dichotomies of existence or nonexistence or truth and falsity. This enlightenment is said to occur suddenly , “in a snap of the fingers” (danzhi), the verse say s, and it is this sudden enlightenment (DUNWU) that has been transmitted through the twenty -eight Indian and six Chinese patriarchs (ZUSHI) of the Chan tradition. Aspects of the sty le and vocabulary used in the poem, which seem to antedate the eighth century, have led to questions about the authenticity of its attribution to Yongjia. Several copies of this text were found at DUNHUANG, and numerous

commentaries of this text are extant, dating from the Song dy nasty. The Song- dy nasty teacher DAHUI ZONGGAO claimed that the verse was held in such high esteem that it had even been back-translated into Sanskrit.

Zhengfayanzang. (J. Shōbōgenzō; K. Chŏngpŏbanjang). In Chinese, “Treasury of the Ey e of the True Dharma,” in three rolls, edited by the CHAN master DAHUI ZONGGAO and his lay disciples in 1147. The Zhengfay anzang is largely a collection of 661 cases or GONG’AN with Dahui’s prose commentary (pingchang), annotations (C. zhuoy u/zhuy u; see J. JAKUGO), and instructions for the assembly. The zhengfay anzang of the title is a term used within Chan to indicate the school’s special repository of the “ey e” or “mind” of the BUDDHADHARMA, which is independent from the scriptural tradition. (See JIAOWAI BIECHUAN). The exchanges between masters and disciples that Daohui covers in his collection are described as being the transmission of this ey e. His Zhengfayanzang thus records the exchanges of a number of renowned Tang and Northern Song Chan masters and their disciples, including ZHAOZHOU CONGSHEN, DESHAN XUANJIAN, and XUEFENG YICUN, as well as the sermons of masters associated especially with the LINJI ZONG, inc luding LINJI YIXUAN, YANGQI FANGHUI, and HUANGLONG HUINAN. Dahui strings together ty pically between three and six exchanges or sermons and, at the end of each section, adds his own brief prose commentary, often about twenty Sinographs in length, most starting with “Miaoxi say s.” (Miaoxi is one of Daihui’s cognomens.) The Zhengfayanzang seems to have exerted some influence on the compilation of the ZONGMEN LIANDENG HUIYAO, by Dahui’s third-generation successor Huiweng Wuming (d.u.). The SHŌBŌGENZŌ, the magnum opus of the Japanese SŌTŌSHŪ monk DŌGEN KIGEN, bears the same title but in its Japanese pronunciation.

Zhengjue. (C) (). See HONGZHI ZHENGJUE.

Zhengnian. (C) (). See DAXIU ZHENGNIAN.

zhengwu. (J. shōgo; K. chŭngo). In Chinese, “realization-awakening”; the most advanced of the two ty pes of enlightenment (WU; BODHI) discussed in some CHAN schools, equivalent to the achievement of buddhahood. This ty pe of awakening is achieved at the consummation of the ten stages (BHŪMI) of the bodhisattva path, rendering one a buddha in fact as well as in principle. The initial “seeing the nature” (JIANXING) of buddhahood cataly zes the “understanding-

awakening” (JIEWU), in which the Chan adept comes to know that he is not a deluded sentient being but a buddha. This initial sudden awakening is not in itself sufficient, however, to bring an end to the habituations (VĀSANĀ) that have been engrained in the mind for an essentially infinite amount of time. It is only after a period of gradual cultivation (jianxiu) that these habitual tendencies will be removed and one’s actions will finally correspond with one’s understanding. That point where knowledge and action are fully integrated marks the final “realization-awakening” (ZHENGWU) and thus constitutes the complete, perfect enlightenment of buddhahood (ANUTTARASAMYAKSAṂBODHI). This two- tiered approach to awakening is the hallmark of the sudden awakening/gradual cultivation (DUNWU JIANXIU) path (MĀRGA) schema of certain Chan masters, such as GUIFENG ZONGMI (780–841) in the Chinese Hoze school of Chan, and POJO CHINUL (1158–1210) of the Korean Sŏn

tradition.

Zhenjing Kewen. (J. Shinjō Kokubun; K. Chinjŏng Kŭngmun) (1025– 1102). Chinese CHAN master in the HUANGLONG PAI collateral line branch of the LINJI ZONG; also known as Yun'an, Baofeng, and Letan. Zhenjing was a native of Shanfu in present-day Henan province. He became a student of a certain master Guang of the North Pagoda in Fuzhou (present-day Hubei province) and was given the name Kewen. After receiving the monastic precepts at age twenty -four, Zhenjing began study ing the sūtras and commentaries, but left for the South to seek out teachers of Chan. In 1065, Zhenjing spent a summer retreat on Mt. Dawei and had his first awakening experience upon hearing the words of the Chan master YUNMEN WENYAN from another monk. Zhenjing eventually became a disciple of the eminent Chan master HUANGLONG HUINAN (1002–1069) in Jicui and inherited his Linji lineage. At the request of the local king, Zhenjing moved to Jinleng, where he became the founding abbot of a monastery named Baoningsi. Zhenjing later retired to Gao'an, where he built a small hermitage named Toulao'an. Six y ears later, he moved to the monastery of Guizongsi on LUSHAN and again to Letan at the request of the famed statesm an ZHANG SHANGYING. Along with his colleagues Huanglong Zuxin (1025–1100) and Donglin Changcong (1025–1091), Zhenjing helped to build their teacher Huanglong Huinan's lineage into one of the most prosperous in China. He retired to the hermitage of Yun'an, where he passed away in 1102. Zhenjing left numerous disciples and students, many of whom were statesmen and officials from Jiangxi province. His teachings can be found in the Yun'an Zhenjing chanshi yulu.

Zhenke. (C) (). See DAGUAN ZHENKE.

zhenru. (J. shinny o; K. chiny ŏ). In Chinese, "true thusness" or "true suchness"; the Chinese translation of the Sanskrit terms BHŪTATATHATĀ or TATHATĀ, which comes to play its own important role in indigenous Chinese Buddhist thought. According to the Chinese scholastic tradition, deriving from translations of the LAṅKĀVATĀRASŪTRA and YOGĀCĀRA sources, ZHENRU is, along with right knowledge (chengzhi), one of the two "factors associated with enlightenment" (wufa), true thusness being what is seen by correct knowledge when perception is freed from conceptual superimpositions. True thusness (zhenru) is described in the DASHENG QIXIN LUN ("Awakening of Faith According to the Mahāy āna") as one of two distinct, but complementary , aspects of the one mind (YIXIN), along with production and cessation (shengmie). True thusness and production and cessation correspond, respectively , to ultimate truth (PARAMĀRTHASATYA) and conventional truth (SAṂVṚTISATYA), or the unconditioned (ASAṂSKṚTA) and conditioned (SAṂKṚTA) realms. Since the mind that is subject to production and cessation (which the Dasheng qixin lun identifies with ĀLAYAVIJÑĀNA) remains alway s grounded on the mind of true thusness (which the treatise identifies with TATHĀGATAGARBHA), the mind may therefore be simultaneously described as both deluded and enlightened. The bifurcation between this enlightened essence of the mind as "true thusness" and its

various temporal manifestations as “production and cessation” also aligns with the “essence” (TI) and “function” (YONG) distinction that Buddhism imported from indigenous Chinese philosophy .

zhenyan. (J. shingon; K. chinŏn). In Chinese, lit. “true word.” See MANTRA; SHINGONSHŪ.

Zhi. (J. Shi; K. Chi). Ethnikon used in China for monks from Scy thia (C. Yuezhi) or its successor state, the KUSHAN kingdom, in the northwest of India.

zhi byed. (shije). In Tibetan, lit. “pacification”; a Tibetan Buddhist tradition of meditation practice traced back to the eleventh-century Indian adept PHA DAM PA SANGS RGYAS, who for many y ears taught at the small temple of GLANG SKOR, near Ding ri in western Tibet. The name derives from the goal of the practice, which is the “pacification” of all suffering, transforming negative states into positive states through the practice of the six perfections (PĀRAMITĀ),

especially the perfection of wisdom (PRAJÑĀPĀRAMITĀ). The practice is also said to extend one’s life. Together with the related tradition of GCOD, or “severance,” promulgated by Pha dam pa sangs rgy as’s female disciple MA GCIG LAB SGRON, pacification is frequently counted as one of eight major streams of Buddhist practice found in Tibet, the so-called eight great convey ances that are lineages of achievement (SGRUB BRGYUD SHING RTA CHEN PO BRGYAD). Unlike the tradition of severance, however, the practice of pacification as a unique sy stem had largely died out by the nineteenth century, when great Tibetan scholars of the nonsectarian (RIS MED) movement attempted to preserve its transmission.

zhidian. (J. chiden; K. chijŏn). In Chinese, lit., “to know the halls,” a “hall prefect”; one of the six prefects (C. TOUSHOU) at a CHAN or ZEN monastery. The hall prefect is in charge of cleaning and preparing the shrine halls and the ritual objects placed therein.

Zhi Dun. [alt. Zhi Daolin] (J. Shi Ton/Shi Dōrin; K. Chi Tun/Chi Torim /) (314–366).
An early exegete of the perfection of wisdom (PRAJÑĀPĀRAMITĀ) literature in the southern part of China and leader of an influential group of early Buddhist philosophers associated with the “Dark Learning” (XUANXUE) school. Zhi is especially important for his crucial reinterpretation of the Chinese philosophical term LI, which previously had meant the “pattern” or natural order of things. Zhi instead reinterprets li in light of perfection of wisdom thought as an absolute “principle,” which later came to be contrasted with the manifestations of that principle in the world as various “phenomena” (SHI). This distinction between principle and phenomena later occupied a crucial position in the thought of many of the indigenous schools of Chinese Buddhism, including the TIANTAI ZONG and the HUAYAN ZONG . Zhi Dun is also known for the earliest communication to a certain monk from the Korean Kogury ŏ Kingdom, at least one decade before the official introduction of Buddhism to the peninsula, suggesting earlier Buddhist contacts between China and Korea than the

extant evidence indicates.

zhike. (J. shika; K. chigaek). In Chinese, “guest prefect”; one of the six prefects (C. TOUSHOU) at a CHAN monastery. The guest prefect is in charge of receiving and accommodating important visitors and guests. In modern Japanese ZEN, the guest prefect play s an important role in the training of y oung

monks on pilgrimage (J. ANGYA; see C. XINGJIAO) as they engage each other in the elaborate ritual of receiving permission to enter the monastery .

zhi khro. (shi dro). In Tibetan, “peaceful and wrathful”; a term used to refer to assemblies (especially in a MAṆḌALA) of peaceful and wrathful (also known as khrag ’thung or “blood drinking”) deities. For example, in the so-called Tibetan Book of the Dead, known in Tibetan as the BAR DO THOS GROL CHEN MO or the Karma zhi khro (“The Peaceful and Wrathful Deities of KARMA GLING PA”), a maṇḍala of forty -two peaceful deities and fifty -eight wrathful deities appears during the chos ny id bar do, the second of the three bardos (ANTARĀBHAVA).

Zhikong Chanxian. (J. Shikū Zenken; K. Chigong Sŏnhy ŏn; S. *Śūny adiśy a- Dhy ānabhadra) (1289–1363). In Chinese, “Pointing to Emptiness, Meditative Worthy,” an Indian monk who taught first in China, but later came to live and teach in Korea at the end of the Kory ŏ dy nasty, where his influence was especially important; his Chinese name is sometimes reconstructed into Sanskrit as *DHYĀNABHADRA, and this is how he is often known in the literature. According to his memorial stele written by the Korean literatus Yi Saek (1328– 1396), Zhikong was born as the third son of the ruler of a small state in the MAGADHA region of northeastern India around 1235. He entered the monastic life at the age of eight and is said to have studied at the famous NĀLANDĀ monastic university under the guidance of Vinay abhadra (C. Lüxian). He claimed to have traveled to Sri Lanka at the age of nineteen to study under Samantaprabhāsa (C. Puming), the 107th patriarch in a putative “Chan” lineage starting from MAHĀKĀŚYAPA, which probably means some sort of meditative lineage quite distinct from the East Asian CHAN lineages. After receiving transmission from Samantaprabhāsa, Zhikong became the 108th patriarch in that lineage. Around 1324, Zhikong traveled via Tibet to the Yuan dy nasty and then went on to Kory ŏ in 1326 at the invitation of King Ch’ungsuk (1294–1339; r. 1313– 1330, 1332–1339), whom he had met in Beijing at the Mongol court. During his stay in Kory ŏ, Zhikong went on pilgrimage to many important Buddhist sites, including the famous Diamond Mountains (KŬMGANGSAN). He also founded Hoeamsa (Fir Tree Cliff Monastery) in 1328 in what is now Ky ŏnggi province, which is said to have been modeled after Nālandā monastery. He returned to the Yuan in 1328, where he was visited by many Korean students, including the late Kory ŏ monks NAONG HYEGŬN (1320–1376) and MUHAK CHACH’O (1327–

1405), on whom he had great influence. He died in 1363, and because of the reverence in which he was held by King Kongmin (r. 1351–1374), some of his relics were sent to

Kory ŏ. The relics were first housed in the roy al palace and later enshrined in a reliquary at Hoeamsa. Zhikong was supposed to have been well versed in literature of PRAJÑĀPĀRAMITĀ, VINAYA, and TANTRA. In Korea, there survives a collection of his teachings, the Chigong hwasang Sŏnyo nok (“Master Zhigong’s Essentials of Sŏn Record”), and his putative sūtra, the Munsusari posal ch’oesangsŭng musaenggye kyŏng (“Sūtra on the Ultimate Nonproduction (ANUTPĀDA) Precepts of the Bodhisattva MAÑJUŚRĪ”), which is supposed to have been translated from a Sanskrit original by his disciple Naong.

Zhili. (C) (). See SIMING ZHILI.

Zhi Q ian. (J. Shi Ken; K. Chi Ky ŏm) (fl. c. 220–252). Prolific earlier translator of Buddhist texts into Chinese. A descendant of an Indo-Scy thian émigré from the KUSHAN kingdom in the KASHMIR-GANDHĀRA region of northwest India, Zhi Qian is said to have been fluent in six languages. Although never ordained as a monk, Zhi Qian studied under the guidance of Zhi Liang (d.u.), a disciple of the renowned Indo-Scy thian translator LOKAKṢEMA (fl. c. 178–198 CE). Zhi Qian fled northern China in the political chaos that accompanied the collapse of the Han dy nasty (206 BCE–220 CE), eventually migrating to the Wu Kingdom in the south. There, he settled first in Wuchang and later in the Wu capital of Jiany e, which was where the majority of his translations appear to have been made. Zhi Qian was known to have been artistically talented, and many of his translations were noted for their fluent sty le that did not strive to adhere to the exact meaning of each word and phrase, but instead sought to convey the insights of the text in an accessible fashion for a Chinese audience. The fifty -three translations that are attributed to Zhi Qian range widely between ĀGAMA and didactic materials and early MAHĀYĀNA scriptural literature, but also include many spurious later attributions (see APOCRYPHA). Among the translations that may with confidence be ascribed to Zhi Qian are early renderings of the VIMALAKĪRTINIRDEŚA, the PUSA BENYE JING, the SUKHĀVATĪVYŪHASŪTRA, the AṢṬASĀHASRIKĀPRAJÑĀPĀRAMITĀ, and a primitive recension of the AVATAṂSAKASŪTRA. Zhi Qian is also presumed to be one of the first Buddhist commentators in the East Asian tradition: DAO’AN (314–385) states in his scriptural catalogue ZONGLI ZHONGJING MULU (now embedded in the

CHU SANZANG JIJI) that Zhi Qian wrote a commentary to the ŚĀLISTAMBASŪTRA (C. Liaoben shengsi jing) while preparing its translation. Late in his life, Zhi Qian retired to Mt. Qionglong, where he is said to have passed away at the age of sixty .

zhishi. (J. chiji; K. chisa). In Chinese, lit., “to know or manage affairs”; a “steward” at a CHAN monastery. Ideally, there are six stewards who oversee the administration and finances of the monastic community. Because their offices were often located on the east side of the monastery , they were also often referred to as the east section or rank. The influential CHANYUAN QINGGUI mentions only four stewards, the prior (C. JIANYUAN), rector (C. WEINUO), cook (C. DIANZUO), and overseer (C. ZHISUI). Later, the prior came to be referred to as the DUSI, and a comptroller (C. JIANSI) and assistant

comptroller (C. FUSI) were added to the list of four.

zhisui. (J. shissui; K. chikse). In Chinese, “overseer”; one of the six stewards (C. ZHISHI) at a CHAN monastery. The zhisui supervises the manual labor conducted in the monastery, including every thing from large construction projects, repairs, and the cultivation of land to patrolling the monastery grounds.

Zhixu. (J. Chigy oku; K. Chiuk) (C). See OUYI ZHIXU.

Zhiyan. (J. Chigon; K. Chiŏm) (602–668). Putative second patriarch of the Chinese HUAYAN tradition. Zhiy an was a native of Tianshui in present-day Gansu province. While still a boy, Zhiy an is said to have become a student of the monk DUSHUN at the monastery of Zhixiangsi on ZHONGNANSHAN. He was ordained at age fourteen and received the full monastic precepts at age twenty , at which time he began study ing the “Four-Part Vinay a” (SIFEN LÜ) of the DHARMAGUPTAKA school, as well as the *TATTVASIDDHI, DAŚABHŪMIKASŪTRA, BODHISATTVABHŪMI, and MAHĀPARINIRVĀṆASŪTRA. Zhiy an also studied the MAHĀYĀNASAṂGRAHA under Fachang (567–645). While study ing under Jinglin (565–640), Zhiy an came across a copy of the AVATAṂSAKASŪTRA and, at age twenty -seven, composed his influential commentary on the Avataṃsakasūtra, the HUAYAN JING SOUXUAN JI . He also composed the KONGMU ZHANG (viz., Huayan jingnei zhangmendeng za kongmu zhang) , Shi xuan men, Huayan wushi yao wenda, Jingang jing lüeshu, and others. Zhiy an began to make a name for himself by preaching the Avataṃsakasūtra to the rural

populace and eventually counted among his many supporters the Emperor Gaozong (r. 649–683) himself. Zhiy an is closely associated with the doctrine of “nature origination” (XINGQI), which explains how enlightenment can be “originated” only from within the very “nature” of this world; enlightenment is therefore not something that needs to be created, for it derives from the inherent nature of the mind itself. ZHIYAN’s teachings on the Avataṃsakasūtra were extremely influential in East Asian Buddhism and were developed further by his disciples ŬISANG and FAZANG. The Korean monk WŎNHYO was also heavily influenced by Zhiy an’s writings. Because Zhiy an resided at his teacher’s monastery Zhixiangsi, he later came to be called Great Master Zhixiang.

Zhiyi. (C) () (538–597). See TIANTAI ZHIYI.

zhiyu. (J. chiy oku; K. chiy ok). In Chinese, the “bath prefect”; one of the six prefects (C. TOUSHOU) at a CHAN monastery. The bath prefect is in charge of cleaning the bathhouse, heating the water for use, and preparing necessities such as towels, incense, and tea. Usually, the bath prefect prepares the bath according to a strict monthly schedule.

zhizhi renxin. (J. jikishi ninshin; K. chikchi insim). In Chinese, “directly point to the human mind”; a famous aphorism summarizing the soteriological approach of the CHAN school. The phrase appears for the first time in HUANGBO XIYUN’s CHUANXIN FAYAO , where it is followed by the line JIANXING CHENGFO (“see one’s own nature and become a buddha”). Subsequently, these two phrases appear together with two

other phrases, BULIWENZI (“not establishing words or letters”) and JIAOWAI BIECHUAN (“a special transmission outside the teachings”), in the ZUTING SHIYUAN compiled in 1108. These four phrases subsequently became a normative teaching for Chan practice and also the foundation on which the Chan, SǑN, and ZEN traditions created their own self-identity as a separate school of East Asian Buddhism.

Zhongfeng Mingben. (J. Chūhō My ōhon; K. Chungbong My ŏngbon) (1263–1323). Chinese CHAN master in the LINJI ZONG and one of the most influential monks of the Yuan dy nasty ; also known by the topony m Huanzhu (Illusory Abode). Zhongfeng was a native of Qiantang in Hangzhou prefecture (present-day Zhejiang province). While still a y outh, Zhongfeng left home to study under the Chan master GAOFENG YUANMIAO of Mt. Tianmu, from

whom he eventually received his monastic precepts at age twenty -four. After he left Gaofeng, Zhongfeng maintained no fixed residence and would on some occasions dwell on a boat. As his reputation grew, he came to be known as the Old Buddha of the South (Jiangnan Gufo). Mingben was an especially eloquent advocate of “questioning meditation” (KANHUA CHAN); his descriptions of the meaning and significance of Chan cases (GONG’AN) and meditative topics (HUATOU) and the processes and experience of kanhua practice are widely cited in the literature. In 1318, he was given a golden robe and the title Chan master Foci Yuanzhao Guanghui (Buddha’s Compassion, Perfect Illumination, Broad Wisdom) from Emperor Renzong (r. 1311–1320). Zhongfeng also served as teacher of the next emperor Yingzong (r. 1320–1323). Emperor Wenzong (r. 1329–1332) also bestowed upon him the posthumous title Chan master Zhijue (Wise Enlightenment). Five y ears later, Emperor Shundi (r. 1333–1367) entered Zhongfeng’s discourse records (YULU), the Zhongfeng guanglu, into the Chinese Buddhist canon (DAZANGJING), a signal honor for an indigenous author (few of whom are represented in the official canon); Shundi also bestowed on him the title State Preceptor Puy ing (Universal Resonance). Zhongfeng also composed his own set of monastic rules (QINGGUI) titled the Huanzhu’an qinggui.

Zhongguan lun shu. (J. Chūgan ronsho; K. Chunggwan non so). In Chinese, “Commentary on the MŪLAMADHYAMAKAKĀRIKĀ”; composed by the Chinese SAN LUN ZONG monk JIZANG in 608. Jizang begins with his observations on Sengrui’s (378–444?) preface to their teacher KUMĀRAJĪVA’s translation of the Mūlamadhyamakakārikā. He then analy zes the twenty -seven chapters of the Mūlamadhyamakakārikā in a manner consistent with other scholars of the San lun tradition. Jizang contends that the middle way is a path traversed by the buddhas and BODHISATTVAs and explains its contents in terms of conventional truth (SAṂVṚTISATYA), absolute truth (PARAMĀRTHASATYA), and neither conventional nor absolute truth. (See also SANDI.) Jizang supports his arguments by citing numerous sūtras, commentaries, and theories of other teachers. For his analy sis of emptiness (ŚŪNYATĀ), Jizang frequently makes recourse to the MAHĀPARINIRVĀṆASŪTRA.

zhongjiao. (C) (). See HUAYAN WUJIAO.

Zhongnanshan. (J. Shūnanzan; K. Chongnamsan). In Chinese, “Southernmost Mountain”; also called Nanshan, Mt. Taibai, Mt. Difei, and Mt.

Zhounan. Zhongnanshan is located west of the former Chinese capital of Chang’an (present-day Xi’an) and occupies a section of the Qinling Mountain range that stretches through southern Shaanxi province. Because of its proximity to the capital, Zhongnanshan became an important practice site in both the Buddhist and Daoist traditions. Two Buddhist monasteries were built on the mountain, and they attracted many eminent Buddhist monks throughout the dy nasties. DAOXUAN, the founder of the Nanshan branch of the Chinese VINAYA school (LÜ ZONG) studied there; because of his long association with the mountain, his tradition of monastic discipline came also to be known as the NANSHAN LÜ ZONG. FAZANG is also said to have begun his study of the AVATAṂSAKASŪTRA on Zhongnanshan and to have performed a Buddho-Daoist pray er ritual on the mountain at the behest of Emperor Ruizong in order to relieve a drought. The sy ncretic character of the ritual he performed sy mbolizes the way in which Zhongnanshan straddles the two religious traditions. Sources differ as to whether the monastery where he performed the ritual was Longchisi (Monastery of the Dragon Pool) or Wuzhensi (Awakening to Truth Monastery).

Zhongxiangcheng. (J. Shūkōjō; K. Chunghy angsŏng). In Chinese, “City of Multitudinous Fragrances”; according to the AṢṬASĀHASRIKĀPRAJÑĀPĀRAMITĀ, the city where the BODHISATTVA DHARMODGATA lived and taught the perfection of wisdom (PRAJÑĀPĀRAMITĀ); an alternate name for the Korean “Diamond Mountains.” See also GANDHAVATĪ, KŬMGANGSAN.

Zhu. (J. Jiku; K. Ch’uk). Ethnikon ty pically used in China for monks who hailed from India (C. TIANZHU).

Zhuanhong jue. (C) (). See MOHE ZHIGUAN FUXING ZHUANHONG JUE.

zhuchi. (J. jūji; K. chuji). In Chinese, “abbot” of a Buddhist monastery. The term literally means “dwelling and holding,” from the sense that the abbot occupies his own monastery and maintains the Buddha’s dispensation in the current generation, serving as a “holding vessel” so that the Buddha’s lineage can never be extinguished. The zhuchi dwells in the “abbot’s quarters” (FANGZHANG), a term that in some contexts comes by metony my to refer to the abbot himself, as is the case in certain Korean monasteries.

Zhu Daosheng. (C) (). See DAOSHENG.

Zhu Fonian. (J. Jiku Butsunen; K. Ch’uk Pully ŏm) (d.u.). A prolific early Chinese translator, who was active between the latter fourth and early fifth centuries. A native of Liangzhou, he collaborated with BUDDHAYAŚAS in the translation of the DĪRGHĀGAMA, with Dharmanandin in the translation of the EKOTTARĀGAMA, and the “Four-Part Vinay a” (SIFEN LÜ), the DHARMAGUPTAKA recension of the VINAYA, which eventually becomes the definitive version of the vinay a in the Sinitic tradition. He was also involved in the translation of such texts as the

AṢṬASĀHASRIKĀPRAJÑĀPĀRAMITĀ, the UDĀNAVARGA, a SARVĀSTIVĀDA anthology of aphorisms, and the JÑĀNAPRASTHĀNA, the central treatise of the Sarvāstivāda ABHIDHARMA. Some indigenous Chinese scriptures (see APOCRYPHA), such as the PUSA YINGLUO BENYE JING, are also attributed to him.

Zhuhong. (C) (). See YUNQI ZHUHONG.

Zhujing yao ji. (J. Shoky ō y ōshū; K. Chegy ŏng y o chip). In Chinese, “Collection of the Essentials of the Various Scriptures,” edited by the Chinese monk Daoshi (d. 683); also known as the Shan’e yebao lun (“Treatise on Good and Evil Karmic Retribution”). As the title implies, the Zhujing yao ji is a collection of what Daoshi considered to be essential passages from more than two hundred primary sources, including various sūtras, VINAYAs, and commentaries. Many of the passages that were chosen by Daoshi for inclusion in his collection are concerned with the issue of KARMAN and retribution, hence the text’s alternative title. The entire collection is comprised of a total of thirty sections: (1) the three jewels (RATNATRAYA), (2) worshiping STŪPAs, (3) controlling thoughts, (4) entering the way, (5) praises and chants, (6) lighting incense, (7) receiving requests, (8) receiving vegetarian feasts (ZHAI), (9) breaking fast, (10) wealth, (11) poverty , (12) leading others, (13) repay ing debt to others, (14) releasing living beings, (15) the flourishing of merit, (16) choosing friends, (17) stay ing alert, (18) six classifications of beings (GATI), (19) cause of karman, (20) desire and defilements, (21) four ty pes of birth, (22) retributions, (23) ten evils, (24) deception, (25) laziness, (26) wine and meat, (27) divination, (28) hell, (29) mortuary customs, and (30) miscellaneous matters.

zhung lnga. (shung nga). [alt. gzhung chen bka’ pod lnga/gzhung chen pod lnga]. In

Tibetan, “the five books,” five Indian treatises that provided the foundation for the monastic curriculum of the DGE LUGS sect. The five works are the ABHISAMAYĀLAṂKĀRA of MAITREYA, the MADHYAMAKĀVATĀRA o f CANDRAKĪRTI, the PRAMĀṆAVĀRTTIKA of DHARMAKĪRTI, the ABHIDHARMAKOŚABHĀṢYA of VASUBANDHU, and the VINAYASŪTRA of GUṆAPRABHA.

zhuoyu. (). In Chinese, “annotation,” or “capping phrase.” See JAKUGO.

zhurengong. (J. shujinkō; K. chuin’gong). In Chinese, literally “master” or “owner”; a term used within the CHAN tradition to refer to “buddha-nature” (C. FOXING) or “true mind” (C. zhenxin), sometimes seen also as the variant “old master” (zhurenweng). The ZIMEN JINGXUN (“Admonitions for the Dark- [Robed]”), an influential Buddhist primer compiled in 1313 by the CHAN monk Yongzhong (d.u.), specifically refers to the variant zhurenweng as a designation for “true mind.” The WUMEN GUAN (“Gateless Checkpoint”), the epony mous GONG’AN collection of WUMEN HUIKAI (1183–1260), includes a gong’an on zhurengong attributed to Ruiy an Shican (850–910), a second-generation successor o f DESHAN XUANJIAN (782–865): Ruiy an would call to himself every day, “Master (zhurengong)!” And he would respond, “Yes.” Then he would say, “Be clear!” “Yes.” “Any time and any day, don’t be

fooled by any thing." "I won't be." Yaun Kagu's (fl. c. 1376) CHAGYŎNG MUN ("Self-admonitions"), one of the three texts included in the Korean monastic primer CH'OBALSIM CHAGYŎNG MUN, opens with an admonition to postulants and novices: "Master (chuin'gong)! Listen to my words! How can y ou continue to transmigrate through the realms of suffering when so many people have realized the way through the gateway of emptiness?" The Korean Sŏn community uses the concept of chuin'gong as a generic "meditative topic" (hwadu; C. HUATOU) in kanhwa Sŏn (C. KANHUA CHAN), or "questioning meditation."

Zhwa dmar incarnations. (Shamar). An influential incarnation (SPRUL SKU) lineage in the KARMA BKA' BRGYUD sect of Tibetan Buddhism, regarded as a human incarnation of AMITĀBHA. The first incarnation, Grags pa seng ge (Drakpa Senge, 1283–1349), was a disciple of the third KARMA PA, who offered him a red crown (zhwa dmar), from which the name of the line of incarnations derives. Subsequent Zhwa dmar embodiments had close relationships with the Karma pa line, in many cases alternately serving as GURU and pupil to the

BKA' BRGYUD hierarch. Grags pa seng ge founded a seat at GNAS NANG monastery in central Tibet, later moved to YANGS PA CAN monastery under the direction of the fourth incarnation, Chos grags y e shes (Chödrak Yeshe, 1453– 1524). Several Zhwa dmar incarnations spent considerable time in Nepal, including the sixth, Gar dbang Chos ky i dbang phug (Garwang Chöky i Wangchuk, 1584–1630), who composed a detailed description of his travels. The lineage was interrupted for nearly a century when the tenth incarnation, Chos grub rgy a mtsho (Chödrup Gy atso, 1741–1791), was accused of forging a treasonous alliance with the Gorkha army during a Tibetan conflict with Nepal, during which BKRA SHIS LHUN PO monastery was sacked. The tenth Zhwa dmar died in prison, by either suicide or murder. The Tibetan government seized Yangs pa can monastery and converted it into a DGE LUGS monastery. It also banned recognition of new Zhwa dmar embodiments, a proscription that lasted more than a century. In the interim, several incarnations were found but never officially installed. The incarnation lineage includes:

1. Grags pa seng ge (Drakpa Senge, 1283–1349)

2. Mkha' spy od dbang po (Kachö Wangpo, 1350–1405)

3. Chos dpal y e shes (Chöpal Yeshe, 1406–1452)

4. Chos grags y e shes (Chödrak Yeshe, 1453–1524)

5. Dkon mchog y an lag (Könchok Yanlak, 1525–1583)

6. Gar dbang Chos ky i dbang phy ug (Garwang Chöky i Wangchuk, 1584– 1630)

7. Ye shes sny ing po (Yeshe Ny ingpo, 1631–1694)

8. Dpal chen chos ky i don grub (Palchen Chöky i Döndrup, 1695–1732)

9. Dkon mchog dge ba'i 'by ung gnas (Könchok Gewe Jungne, 1733–1740)

10. Chos grub rgy a mtsho (Chödrup Gy atso, 1741–1792) [interruption of lineage]

11. ’Jam dby angs Rin po che (Jamy ang Rinpoche, 1892–1946)

12. ’Phrin las kun khy ab (Trinle Kunky ap, 1948–1950)

13. Mi pham smra ba’i go cha (Mipam Mawe Gocha, b. 1952)

Zhwa lu. (Shalu). A modest but important monastery near the Tibetan city of Gzhis ka tse (Shigatse), famous as the seat of fourteenth-century poly math BU STON RIN CHEN GRUB, and renowned for its unusual architectural features. The earliest foundations were laid circa 997 by Lo ston Rdo rje dbang phy ug (Lotön Dorje Wangchuk, b. tenth century), an active teacher during the outset of the later dissemination (PHYI DAR) of Buddhism in Tibet. His disciple, Lce btsun Shes rab ’by ung gnas (Chetsün Sherap Jungne, d.u.), established a larger structure in 1027, having promised his master to construct a temple “as large as a small hat,” from which its name is derived. The project was completed just prior to a visit of the illustrious Bengali scholar ATIŚA DĪPAṂKARAŚRĪJÑĀNA. During the thirteenth century, Zhwa lu formed close ties with the ruling SA SKYA hierarchs and their Mongol patrons. In 1306, the Yuan emperor Temür (1265– 1307) appointed Grags pa rgy al mtshan (Drakpa Gy altsen, d.u.) as prelate, under whom the institution flourished. Bu ston’s rise to the abbacy in 1320 is traditionally viewed as the beginning of a new lineage, the so-called Zhwa lu pa (“Those of Zhwa lu”) or Bu lugs tshul (“Tradition of Bu [ston]”). It was at Zhwa lu that Bu ston famously redacted the several hundred volumes that would comprise his influential edition of the Tibetan Buddhist canon. The monastery is equally famous for its unique blend of Tibetan and Chinese architecture (most notably, its pagoda-sty le roof of glazed turquoise tiles) and murals executed under the direction of Newar artist-disciples of the master Newari artisan Arniko.

Zibo. (C) () (1543–1603). See DAGUAN ZHENKE.

Zimen jingxun. (J. Shimon ky ōkun/Shimon keikun; K. Ch’imun ky ŏnghun). In Chinese, “Admonitions for Those in the Dark-(Robed) School”; an important Buddhist primer, in nine rolls, compiled in 1313 by the CHAN monk YONGZHONG (d.u.) in the LINJI ZONG lineage of ZHONGFENG MINGBEN. Yongzhong’s text is an expansion of an earlier one-roll primer entitled Zilin baoxun (“Precious Admonitions to the Forest of the Dark-[Robed]”), by the Song- dy nasty monk Zexian (d.u.). In 1474, the monk Rujin (d.u.) of the monastery of Zhenrusi added some additional work of his own to Yongzhong’s text and published the compilation as Zimen jingxun, in a total of ten rolls. The text contains 170 anecdotes, instructions, admonitions, and suggestions to neophy tes, derived

from eminent monks who lived between the Northern Song and the Ming dy nasties. The author admonishes Chan students to observe the Buddhist precepts and to exert themselves in the study of Buddhism. Citing such Confucian classics as the Lunyu (“Analects of Confucius”) and the Shijing (“Book of Poetry ”), Yongzhong admonishes students to be diligent in their learning, even encouraging them to study Confucianism

and Daoism in order better to promote Buddhism, just as ancient eminent masters had done. He provides several masters' detailed instructions on Chan meditation, including proper phy sical posture, and offers instructions on the proper way of reading Buddhist scriptures. Finally, Yongzhong includes the instructions of many renowned Chan masters, as convey ed in their sermons (SHANGTANG) and letters (SHUZHUANG). Rujin's edition of Yongzhong's work continues to be widely used today to instruct novices and neophy tes. In Korea, Yongzhong's nine-roll version has been republished several times since T'AEGO POU (1301–1381) imported it to the peninsula during the Kory ŏ period.

Zimmè Paññāsa. In Burmese, lit. "Chiangmai Fifty "; the Burmese recension of t h e Paññāsajātaka, or "Fifty [Apocry phal] Birth Stories." See PAÑÑĀSAJĀTAKA.

Zlum brtsegs lha khang. (Dumtsek Lhakang). A large, three-floored STŪPA constructed in 1421 by the renowned Tibetan adept THANG STONG RGYAL PO (Tangtong Gy alpo), located in Bhutan's Spa gro (Paro) Valley. According to traditional biographies, the master erected this structure at a geomantically powerful location in order to restrain a malignant demoness dwelling in the region. It was restored and enlarged in 1841 by the twenty -fifth head abbot (rje mkhan po) of Bhutan, Shes rab rgy al mtshan (Sherap Gy altsen, served 1836– 1839).

zong. (J. shū; K. chong). A poly semous term in Chinese, which can refer to the "core teaching," "cardinal doctrine," or central "axiom" of a text or scholastic philosophy, or to a "school," "tradition," or even "lineage." Because of the denotation of zong as a cardinal doctrine, the term is used to translate the Sanskrit SIDDHĀNTA, an "axiom" or principal "tenet" of the various schools of Indian philosophy (both Buddhist and non-Buddhist). Although commonly translated as "school" ("sect" is incorrect in a Chinese Buddhist context), this rendering is only appropriate for those scholastic and practice traditions that trace themselves back

through an unbroken lineage of ancestors to a specific founding "patriarch" (ZUSHI), such as the TIANTAI ZONG, HUAYAN ZONG , and CHAN ZONG. Commentarial traditions focused upon the exegesis of a specific text, such as the DI LUN (DAŚABHŪMIKASŪTRA) , SHE LUN (MAHĀYĀNASAṂGRAHA), o r CHENGSHI LUN (*TATTVASIDDHI), do not qualify as true schools of Chinese Buddhism, since they neither claim to derive from a single founder nor posit an exclusive lineage of successors; they might more correctly be termed "scholastic traditions."

Zongjing lu. (J. Sugy ōroku; K. Chonggy ŏng nok). In Chinese, "Records of the Mirror of the Source"; composed c. 961 by the Song-dy nasty CHAN master YONGMING YANSHOU (904–975), in one hundred rolls; also called "Records of the Mirror of the Mind" (Xinjing lu). The "source" (zong), Yanshou say s in the preface to the Zongjing lu, refers to the "one mind" (YIXIN), which functions like a mirror that is able to reflect all dharmas. This comprehensive collection offers an exhaustive elaboration of the Chan teaching of "one mind" by sy stematizing the doctrinal and meditative positions of the

various Chan traditions of past and present. The Zongjing lu consists of three main sections: exemplifications of the source (biaozong zhang), questions and answers (wenda chang), and citations (y inzheng chang). The first section, which comprises much of the first roll, offers a general overview of the treatise, focusing on Chan's "source" in the one mind. The massive second section, corresponding to the second half of the first roll through the ninety -third roll, offers various explanations on the one mind through a question raised at the beginning of each section, followed by Yanshou's detailed response. His explanations are ty pically accompanied by extensive citations from various sūtras and commentaries, such as the YUANJUE JING and the DAZHIDU LUN. Throughout this exhaustive survey and explanation of doctrinal matters, Yanshou underscores the importance of the one mind or one dharma as the underly ing source of all external phenomena. The third and final section, which comprises the last seven rolls of the collection, validates the previous explanations through quotations of hundreds of scriptures and say ings of eminent Chan masters; its aim is to help those of inferior spiritual capacity give rise to faith. Many of these quotations are from materials that are no longer extant, thus providing an important overview of Chan during Yanshou's time. Yanshou's goal throughout this work is to present his distinctive vision of Chan as a pansectarian tradition that subsumes not only the different Chan lineages, but also such doctrinal traditions as TIANTAI, HUAYAN, and FAXIANG. Much of the source

material that Yanshou compiled in the Zongjing lu may derive from GUIFENG ZONGMI's similarly massive Chanyuan ji ("Chan Collection"), only the prolegomenon to which survives (see CHANYUAN ZHUQUANJI DUXU). The collection was influential not only in China, but also in Kory ŏ-period Korean SŎN and the five mountain (GOZAN) schools of Ashikaga-period Japanese ZEN.

Zongli zhongjing mulu. (J. Sōri shūky ō mokuroku; K. Chongni chunggy ŏng m ongnok). A scriptural catalogue (JINGLU) compiled by the Eastern Jin monk DAO'AN (312–385); often referred to by its abbreviated title, An lu, or "An's Catalogue." The complete catalogue is no longer extant, but is partially preserved within the CHU SANZANG JIJI. The catalogue covers texts translated between the Han dy nasty to the y ear 374 and provides the titles, translators's names, and the dates of the translations, wherever possible. As one of the first such scriptural catalogues compiled in East Asia, Dao'an's compilation served as the model for all future such endeavors.

Zongmen huomen. (J. Shūmon wakumon; K. Chongmun hongmun). In Chinese, "Some Inquiries into the [Chan] Tradition," composed by the CHAN master ZHANRAN YUANDENG in the CAODONG ZONG. In 1605, Zhanran replied to inquiries he had received from Chan neophy tes about the school's distinctive teachings and practices and edited together fifty -two of these exchanges as the Zongmen huomen. (The zongmen of the title is a common designation for the CHAN ZONG, especially in Song-dy nasty and later materials.) As Zhanran explains in his preface, he wrote this text because it is difficult for neophy tes to understand Chan since there are so many

different Chan teachings and practices. For example, to the question of what is most essential in Chan meditation and how one should begin in Chan practice, Zhanran answers that one must aspire to investigate the matter of birth-and-death. As to how to investigate the matter of birth-and-death, he answers that one has to arouse three states of mind: (1) the mind of great faith; (2) the mind of ferocious effort (cf. YONGMAENG CHŎNGJIN) and nonretrogression; and (3) the mind of great doubt (see YIQING). (Cf. SANYAO). In the course of his exposition, Zhanran also covers other Buddhist practices, including recitation of the Buddha's name (NIANFO), but he is adamant that Chan is the best and most direct way to enlightenment. In addition to the series of exchanges, Zhanran also appends the following related texts to the Zongmen huomen: the Canchan shinan ("Difficulties in Investigating Chan"), Huomen ("Some Inquiries"), Buyi ("Appended

Say ings"), Daming Dingzi men ("Clear Replies to Dingzi's Inquiries"), and the Daguan heshang zhaoyang zhuan ("Tale of the Monk Daguan's Invitation to Disaster"), a fervent defense of the renowned Chan master DAGUAN ZHENKE (a.k.a. ZIBO), who died amid political intrigue at court.

Zongmen liandeng huiyao. (J. Shūmon rentōey ō; K. Chongmun y ŏndŭng hoey o). In Chinese, "Essential Collection of the Lamplight Connections within the [Chan] Tradition"; composed by Huiweng Wuming (d.u.), a third- generation disciple of the CHAN master DAHUI ZONGGAO, in 1183. This work is a collection of anecdotes and teachings culled from the biographies and discourse records (YULU) of over six hundred patriarchs and teachers (ZUSHI) of the Chan tradition. Huiweng begins the collection with the seven buddhas of the past (SAPTABUDDHA), the twenty -eight Indian patriarchs, and the six patriarchs of China (see CHUANDENG LU). His collections also include the various lineages and collateral lines that split off from the sixth patriarch (LIUZU) HUINENG's disciples QINGYUAN XINGSI (up to the seventeenth generation) and NANYUE HUAIRANG (up to the fifteenth generation). In addition to its role as a genealogical history, the Zongmen liandeng huiyao was favored by many followers of Chan as a reliable and convenient collection of Chan cases (GONG'AN).

Zongmen shigui lun. (J. Shūmon jikkiron; K. Chongmun sipky u non). In Chinese, "Treatise on the Ten Rules of the [Chan] Tradition," composed by CHAN master FAYAN WENYI (885–958); also known as the Fayan chanshi zongmen shigui lun, Jinghui Fayan chanshi zongmen shigui lun, and simply Shigui lun. The Zongmen shigui lun warns against ten maladies to which those in the Chan tradition are succeptible, viz., (1) assuming the role of teacher without first purify ing one's own mind, (2) sectarian disputes, (3) positing the main points of Chan without knowing the specific contexts, (4) answering without consideration of time and situation, (5) failure to distinguish defiled from pure, (6) baseless interpretations of the say ings of the masters of old, (7) memorizing slogans and not being able to use them at the right moment, (8) miscitations by not mastering the canon, (9) improperly composing songs and verses before one's understanding has matured, and (10) defending one's own shortcomings

and indulging in disputes. The Zongmen shigui lun is also the first text to mention the names of the five houses (see WU JIA QI ZONG) of the mature Chan tradition.

Zongmi. (C) (). See GUIFENG ZONGMI.

Zongze. (C) (). See CHANGLU ZONGZE.

Zuihō. (J) () (1683–1769). See MENZAN ZUIHŌ.

zuishangsheng Chan. (J. saijōjōzen; K. ch'oesangsŭng Sŏn). In Chinese, lit. "supreme vehicle Chan," referring to one of the sty les of practice and pedagogy associated with the CHAN school; often considered to be equivalent to "unconventional Chan" (GEWAI CHAN). Supreme vehicle Chan is one of the five categories of Chan listed by GUIFENG ZONGMI (780–841) in his CHANYUAN ZHUJUAN JI DUXU ("Prolegomena to the Source of Chan Collection"). According to Zongmi's treatment, "supreme vehicle Chan" refers to meditation practices that rely on sudden approaches to awakening (DUNWU) and generate an initial insight into the true nature of mind, i.e., the original purity of mind that is shared by both sentient beings and buddhas. The text equates this form of Chan with the "pure Chan of the TATHĀGATAs" (rulai qingjing Chan), also known by its abbreviated name, tathāgata Chan (rulai Chan); it also is said to be equivalent to "single-practice SAMĀDHI" (YIXING SANMEI) and the "samādhi of suchness" (zhenru sanmei), since "supreme vehicle Chan" is the root of all kinds of samādhi. The text also defines supreme vehicle Chan as the "Chan transmitted from BODHIDHARMA"; this latter form of Chan is subsequently named "patriarchal Chan" (zushi Chan) in the Song-dy nasty Chan collections, such as the JINGDE ZHUANDENG LU ("Record of the Transmission of the Lamplight Published during the Jingde Era") and Puji's (1179–1253) Wudeng huiyuan ("Collected Essentials of the Five Lamplight Histories"), which in turn redefines "tathāgata Chan" as subordinate to "patriarchal Chan."

zuochan. (J. zazen; K. chwasŏn). In Chinese, "seated meditation." Zuochan is a combination of the Chinese term "to sit" (zuo) and the character CHAN, a transcription of the Sanskrit term DHYĀNA (meditation); often referred to in English-language sources by the Japanese pronunciation zazen. As its ety mology implies, zuochan refers to sitting with legs folded on top of each other and ey es slightly closed in meditation. This meditative practice may be generically considered to be directed at samādhi, one of the three trainings (C. sanxue; S. śikṣātray a), along with morality (ŚĪLA) and wisdom (PRAJÑĀ), or alternatively

at dhy āna, one of the six PĀRAMITĀs emblematic of BODHISATTVA practice, along with charity (DĀNA), precepts (śīla), forbearance (KṢĀNTI), effort (VĪRYA), and wisdom (prajñā). Sitting has long held pride of place within the Buddhist tradition as the archety pal position (ĪRYĀPATHA) most suited to sustained meditation training. The prototy pe for zuochan is the Buddha's own seated meditation under the BODHI TREE, as well as the legendary Indian monk BODHIDHARMA's "wall gazing" (BIGUAN) for nine y ears in a cave. Because of these associations with both the Buddha and

Bodhidharma, the founder of the Chan school, zuochan was widely considered to be the primary practice within the CHAN, SŎN, and ZEN traditions. In China, zuochan came to be viewed as such a stereoty pical aspect of the Chan school, broadly conceived, that Chan teachers began to critique its necessity and importance; these critiques suggested instead that Chan practice was not to be confined just to zuochan, but should also be conducted throughout the three other standard deportments of walking, standing, and ly ing down. For example, the LIUZU TANJING ("Platform Sūtra"), attributed to the sixth patriarch HUINENG, includes such a rectification of the meaning of zuochan when it say s that "'seated' means, externally, to refrain from generating thoughts related to wholesome or unwholesome objects; 'meditation' means, internally, to see that the self-nature is unmoving." In this redefinition, zuochan means not just "seated meditation" but instead encompasses a way of understanding that is to be carried through all aspects of one's experience.

Zur chung pa. (Zur chung Shes rab grags pa) (1014–1074). A RNYING MA master, the disciple of ZUR PO CHE (Shāky a 'by ung gnas, 1002–1062) and father of Zur Shāky a seng ge (also known as Sgro sbug pa, 1074–1135). Because he was a poor novice, Zur po che encouraged him to marry the daughter of a wealthy patron, which he reluctantly did. He is said to have spent thirteen y ears meditating in a cave. His most famous work is his final testament, the Zhal gdams brgyad cu pa ("Eighty Oral Instructions").

Zur po che. ([alt. Zur chen] Shāky a 'by ung gnas) (1002–1062). A RNYING MA master of the Zur clan. His disciple ZUR CHUNG PA , and Zur Shāky a seng ge (also known as Sgro sbug pa, 1074–1135) are known with him as the three Zur (Zur rnam pa gsum), with Zur po che as the founding figure. He was a disciple of Ny ang Ye shes 'by ung gnas and was renowned especially for his practice and teaching of the "magical net" (MĀYĀJĀLA) class of TANTRAs, the Dgongs pa

'dus pa'i mdo, and the SĀDHANA of VAJRAKĪLAYA. As such, he holds an important place in the transmission of RDZOGS CHEN and SEMS SDE teachings. He was ordained by the famous VINAYA master Bla chen Dgongs pa rab gsal and also studied extensively with GNUBS CHEN SANGS RGYAS YE SHES. During the time of the later dissemination of Buddhism to Tibet, he is credited with organizing the Rny ing ma tantras in such a way that a particular tantra, its commentaries, sādhanas, and ritual manuals were grouped together. He identified the Dgongs pa 'dus pa'i mdo as the root tantra of ANUYOGA, the GUHYAGARBHA as the root tantra of MAHĀYOGA, and the KUN BYED RGYAL PO as the root tantra of ATIYOGA. He is also credited with the fundamental division of the Rny ing ma teachings in BKA' MA (words) and GTER MA (treasures). He founded the monastery of 'Ug pa lung (Owl Land) located to the east of Gzhis ka rtse (Shigatse).

zushi. (J. soshi; K. chosa). In Chinese, "patriarch" (lit. "ancestral teacher"), referring to eminent teachers in lineages that are claimed to trace back to ŚĀKYAMUNI Buddha or even earlier buddhas. Indian Sanskrit texts dating from the 2nd century CE onward refer to a tradition of five "masters of the dharma" (dharmācāry a) who succeeded the

Buddha as head of the SAṂGHA: MAHĀKĀŚYAPA, ĀNANDA, MADHYĀNTIKA, ŚĀṆAKAVĀSIN, and UPAGUPTA . Later sources expand this list into a roster of nine eminent masters who “handed down the lamplight of wisdom successively through the generations.” Often, these genealogies were extended as far back as the seven buddhas of antiquity (SAPTATATHĀGATA). It is widely presumed that this notion of dharma-transmission lineages developed from the earlier VINAYA concept of the “preceptor” (UPĀDHYĀYA), a senior monk who confers the lower ordination (pravrajy ā, see PRAVRAJITA) to new novices (ŚRĀMAṆERA) and higher ordination (UPASAṂPADĀ) to monks (BHIKṢU). This personal connection between preceptor and disciple created incipient ordination families connected to specific preceptors, connections that later could be extended to dharma transmission as well. ¶ In East Asia, these lists of Indian dharma masters continued to be expanded and elaborated upon so that they also included the preeminent indigenous figures within each lineage, thus connecting the Chinese patriarchs of each lineage with their Indian predecessors. Most of the indigenous traditions of East Asian Buddhism, including the CHAN ZONG, TIANTAI ZONG , JINGTU ZONG, and HUAYAN ZONG , draw their legitimacy at least partially from their claims that their teachings and practices

derive from an unbroken lineage of authoritative teachers that can be traced back geographically to India and temporally to the person of the Buddha himself. The specific names and numbers of patriarchs recognized within each lineage ty pically change over time and vary widely between the different traditions. Of these lists, the list of patriarchs recognized in the Chan school has received the lion’s share of scholarly attention in the West. This Chan list varies widely, but a well-established roster includes twenty -eight Indian and six Chinese patriarchs. These six Chinese patriarchs (liu zu)—BODHIDHARMA, HUIKE, SENGCAN, DAOXIN, HONGREN, and HUINENG—are credited by the classical tradition with the development and growth of Chan in China, but early records of the Chan school, such as the LENGQIE SHIZU JI and LIDAI FABAO JI , reveal the polemical battles fought between disparate contemporary Chan communities to place their own teachers on this roster of patriarchal orthodoxy. It is important to note that all of these various lists of patriarchs, in all the different traditions, are created retrospectively as a way of legitimizing specific contemporary lineages or teachers and verify ing the authenticity of their teachings; thus their accounts of the chronology and history of their lineages must be used critically. The compound zushi can mean either “patriarch” (lit., ancestral teacher) or in other contexts “patriarchs and teachers,” as in the stock phrase “all the buddhas of the three time-periods and patriarchs and teachers throughout successive generations” (sanshi zhufo lidai zushi), which explicitly traces a school’s ancestral lineage from the past to the present and into the future. Some modern Buddhists, especially in the West, deplore the sexism inherent in the term “patriarch,” preferring instead to render it with the gender-neutral term “ancestor.” See also CHUANDENG LU; FASI; PARAṂPARĀ; YINKE.

Zutang ji. (J. Sodōshū; K. Chodang chip). In Chinese, “Anthology of the Patriarchs’ Hall.” See CHODANG CHIP.

Zuting qianchui lu. (J. Sotei kantsuiroku; K. Chojŏng ky ŏmch’u nok). In Chinese, “Record of Forceps and Hammers of the Patriarchs’ Hall,” edited by the CHAN master FEIYIN TONGRONG (1593–1661) of the LINJI ZONG during the late Ming dy nasty. This collection includes over fifty anecdotes considered to be essential for the training of students. These anecdotes focus on the enlightenment stories of several renowned Tang- and Song-dy nasty LINJI ZONG masters, such as LINJI YIXUAN, Shoushan Shengnian (926–993), Feny ang Shanzhao (947–1024), Shishuang Chuy uan (986–1039), YUANWU

KEQIN, and DAHUI ZONGGAO, but also include a few stories concerning renowned masters in the YUNMEN ZONG and CAODONG ZONG. Most of these stories are excerpted from Chan texts published during the Song dy nasty, especially Puji’s (1179–1253) Wudeng huiyuan (“Collected Essentials of the Five Lamplight Histories”). Each story is accompanied by Feiy in’s own short prose commentary (pingchang). Four additional exchanges between a certain master Wang Jing and the monk Fohui Faquan (d.u.) concerning the history of the Chan tradition are included as an appendix.

Zuting shiyuan. (J. Sotei jion; K. Chojŏng sawŏn). In Chinese, “Garden of Matters from the Patriarchs’ Hall,” edited in eight rolls by Mu’an Shanxiang (d.u.) in 1108; the oldest ency clopedia of the Chinese CHAN tradition. This collection includes over 2,400 items related to Chan pedagogy, culled from Buddhist and secular stories, proverbs, numerological lists, personal names, local dialects, and so forth. Mu’an is said to have embarked on this project in response to the growing number of monks who were unable to understand the rich content and context of the many GONG’AN exchanges found in Chan literature. Mu’an’s material is drawn from over twenty important Chan sources, such as the discourse records (YULU) of YUNMEN WENYAN, XUEDOU CHONGXIAN, a nd FAYAN WENYI, and YONGJIA XUANJUE’s popular ZHENGDAO GE. The ency clopedia functions as a glossary for these works, offering explanations for their difficult technical terms and obscure names (which are not necessarily Chan or Buddhist in origin), and drawing his explanations from Buddhist, Confucian, and Daoist materials, as well as such secular sources. For example, the first roll of the ency clopedia provides a glossary of the Yunmen lu , which discusses the author Yunmen Weny an, offers definitions of terms and explanations of names appearing in the text, drawing on sources ranging from the Shiji (“Book of History ”) to the AGAMA SŪTRAs, and fills out the my riad numerical lists that appear in the text, such as the three vehicles (C. sansheng; S. TRIYĀNA), the three baskets of the canon (C. sanzang; S. TRIPIṬAKA), the eight teachings of Tiantai (see WUSHI BAJIAO), etc. Mu’an’s exhaustive collection meticulously traces the source of each item and provides a detailed commentary on each. The Zuting shiyuan was republished in 1154, and numerous editions were published during the Tokugawa period in Japan.

List of Lists This roster provides some of the most important numerical lists used in the Buddhist traditions. Generally, we include the equivalencies only in Sanskrit, Tibetan, and Chinese, since in most cases these will be adequate to trace the terms back to the relevant entries in the dictionary. In instances where there are several variations of a list, we seek to provide only one common form. In addition, the various languages often provide different interpretations of a particular term, making it difficult to provide a single English translation. For ease in tracing terms back to their main dictionary entries, the numeric elements in the foreign-language names of each list have not been provided; the exceptions are those lists in which numerals are included in the main dictionary entries (for example, daśabhūmi).

ONES one vehicle. (S. ekay āna; T. theg pa gcig pa; C. y isheng)

TWOS two accesses/entrances. (C. er ru) 1. access of principle (C. liru) 2. access of practice (C. xingru)

two accumulations/equipments. (S. saṃbhāra; T. tshogs; C. ziliang) 1. accumulation/equipment of merit (S. puṇy asaṃbhāra; T. bsod nams ky i tshogs; C. fuziliang) 2. accumulation/equipment of wisdom (S. jñānasaṃbhāra; T. y e shes ky i tshogs; C. zhiziliang)

two aspects of esoteric Buddhism. (C. er mi) 1. esoteric as to principle (li mi) 2. esoteric as to practices (shi mi)

two attainments. (S. siddhi; T. dngos grub; C. chengjiu/xidi /) 1. mundane attainments (S. sādhāraṇasiddhi; T. thun mong gi dngos grub; C. gongtong chengjiu/xidi /) 2. supreme attainment (S. uttamasiddhi; T. mchog gi dngos grub; C. zuishang chengjiu/xidi /)

two benefits. (S. artha; T. don; C. li) 1. benefitting oneself (S. svārtha/ātmahita; T. rang don; C. zili) 2. benefitting others (S. parārtha/parahita; T. gzhan don; C. lita)

two bodies (of a buddha). (S. kāy a; T. sku; C. shen) 1. truth body (S. dharmakāy a; T. chos sku; C. fashen) 2. phy sical body (S. rūpakāy a; T. gzugs sku; C. shengshen)

twofold generation of the aspiration to enlightenment. (S. bodhicittotpāda; T. by ang chub ky i sems bsky ed; C. fa putixin) 1. attitude of aspiration (S. praṇidhicittotpāda; T. smon pa'i sems bsky ed; C. y uan putixin) 2. attitude of undertaking (S. prasthānacittotpāda; T. 'jug pa'i sems bsky ed; C. xing putixin)

two karmic retributions. (C. er bao) 1. retribution proper [viz. one's own actions] (zheng bao) 2. adjunct retribution [viz. environmental factors] (y i bao)

two means of knowledge. (S. pramāṇa; T. tshad ma; C. liang) 1. direct perception (S. praty akṣa; T. mngon sum; C. xianliang) 2. inference (S. anumāna; T. rjes dpag; C. biliang)

two obstructions. (S. āvaraṇa; T. sgribs pa; C. zhang) 1. afflictive obstructions (S. kleśāvaraṇa; T. ny on mongs pa'i sgrib ba; C. fannao zhang) 2. cognitive or noetic

obstructions [to omniscience] (S. jñey āvaraṇa; T. shes by a'i sgrib ba; C. suozhi zhang)

two stages. (S. krama; T. rim pa; C. cidi)
1. stage of generation (S. utpattikrama; T. bsky ed rim; C. shengqi cidi)
2. stage of completion (S. niṣpannakrama; T. rdzogs rim; C. y uanman cidi)

two supreme ones. (T. mchog gny is) 1. Nāgārjuna 2. Asaṅga

OR 1. Guṇaprabha 2. Śāky aprabha

two truths. (S. saty advay a; T. bden pa gny is; C. er di) 1. conventional truth (S. saṃvṛtisaty a; T. kun rdzob bden pa; C. sudi/shisu di /) 2. absolute truth/ultimate truth (S. paramārthasaty a; T. don dam bden pa; C. zhendi/shengy i di/diy iy i di //)

two types of nonself. (S. nairātmy a; T. bdag med; C. wuwo)
1. nonself of the person (S. pudgalanairātmy a; T. gang zag gi bdag med; C. ren wuwo)
2. nonself of phenomena (S. dharmanairātmy a; T. chos ky i bdag med; C. fa wuwo)

two vehicles. (S. y ānadvay a; T. theg pa gny is; C. er sheng) 1. vehicle of disciples (S. śrāvakay āna; T. ny an thos ky i theg pa; C. shengwen sheng) 2 .vehicle of solitary buddhas (S. praty ekabuddhay āna; T. rang rgy al gy i theg pa; C. y uanjue sheng)

OR 1. great vehicle (S. mahāy āna; T. theg pa chen po; C. dasheng)

2. lesser vehicle (S. hīnay āna; T. theg pa dman pa; C. xiaosheng)

THREES three actions. (S. karman; T. las; C. y e) 1. wholesome/virtuous (S. kuśala; T. dge ba; C. shan) 2. unwholesome/unvirtuous (S. akuśala; T. mi dge ba; C. bushan) 3. neutral/indeterminate (S. avy ākṛta; T. lung ma bstan; C. wuji)

three afflictions. (S. kleśa; T. ny on mongs; C. fannao) 1. desire/greed (S. rāga; T. 'dod chags; C. tan) 2. hatred/aversion (S. dveṣa; T. zhe sdang; C. chen) 3. delusion (S. moha; T. gti mug; C. chi)

three baleful destinies. (S. apāy a/durgati; T. ngan song; C. equ) 1. animals (S. tiry ak; T. dud 'gro; C. chusheng) 2. ghosts (S. preta; T. y i dwags; C. egui) 3. hell denizens (S. nāraka; T. dmy al ba; C. diy u)

three baskets of the canon. (S. tripiṭaka; T. sde snod gsum; C. sanzang) 1. basket of discourses (S. sūtrapiṭaka; T. mdo sde'i sde snod; C. jingzang) 2. basket of discipline (S. vinay apiṭaka; T. 'dul ba'i sde snod; C. lüzang) 3. basket of abhidharma/scholastic exegesis (S. abhidharmapiṭaka/*śāstrapiṭaka; T. chos mngon pa'i sde snod; C. lunzang)

three becomings. (S. bhava; T. srid pa; C. y ou) 1. becoming in the sensual realm (S. kāmabhava; T. ’dod pa’i srid pa; C. y uy ou) 2. becoming in the realm of subtle materiality (S. rūpabhava; T. gzugs ky i srid pa; C. sey ou) 3. becoming in the immaterial realm (S. ārūpy abhava; T. gzugs med ky i srid pa; C. wusey ou)

three bodies [of a buddha]. (S. trikāy a; T. sku gsum; C. san shen) 1. truth body (S. dharmakāy a; T. chos sku; C. fashen) 2. enjoy ment body (S. saṃbhogakāy a; T. longs spy od rdzogs pa’i sku; C. baoshen) 3. emanation body (S. nirmāṇakāy a; T. sprul pa’i sku; C. huashen)

three classes of atiyoga. (T. rdzogs chen sde gsum)

1. mental class (T. sems sde)

2. instruction class (T. man ngag sde)

3. expanse class (T. klong sde)

three contaminants. (āsrava; T. zag pa; C. lou)

1. contaminant of sensuality (S. kāmāsrava; T. ’dod pa’i zag pa; C. y u lou
)

2. contaminant of becoming (S. bhavāsrava; T. srid pa’i zag pa; C. y ou lou
)

3. contaminant of ignorance (S. avidy āsrava; T. ma rig pa’i zag pa; C.
wuming lou)

three enlightenments. (S. bodhi; T. by ang chub; C. puti) 1. enlightenment of the disciples (S. śrāvakabodhi; T. ny an thos ky i by ang chub; C. shengwen puti) 2. enlightenment of the praty ekabuddhas (S. praty ekabodhi; T. rang rgy al gy i by ang chub/rang sangs rgy as ky i by ang chub; C. y uanjue puti) 3. complete perfect enlightenment [of the buddhas] (S. anuttarasamy aksaṃbodhi; T. bla na med pa y ang dag par rdzogs pa’i by ang chub; C. anouduoluo sanmiao sanputi)

three families, lords of. (S. trikulanātha; T. rigs gsum mgon po; C. sanbu huzhu) 1. Avalokiteśvara (T. Spy an ras gzigs; C. Guanshiy in) 2. Mañjuśrī (T. ’Jam dpal; C. Wenshu) 3. Vajrapāṇi (T. Phy ag na rdo rje; C. Jingangshou)

threefold contemplation. (C. sanguan) 1. contemplation of emptiness (C. kongguan) 2. contemplation of conventional existence (C. jiaguan) 3. contemplation of their mean (C. zhongguan)

three gates. [viz. ty pes of karmic activity] (S. dvāra; T. sgo; C. men)

1. body (S. kāy a; T. lus; C. shen)

2. speech (S. vāc; T. ngag; C. kou)

3. mind (S. manas; T. y id; C. y i)

three gates to deliverance. (S. vimokṣamukha; T. rnam thar sgo; C. jietuo men)

1. emptiness (S. śūny atā; T. stong pa ny id; C. kong) 2. signlessness (S. ānimitta; T. mtshan ma med pa; C. wuxiang) 3. wishlessness (S. apraṇihita; T. smon pa med pa; C. wuy uan/wuzuo /)

three inner tantras. (T. nang rgy ud sde gsum)
1. mahāy oga (T. rnal ’by or chen po)
2. anuy oga (T. rjes su rnal ’by or)
3. atiy oga (T. shin tu rnal ’by or)
three jewels. (S. ratnatray a; T. dkon mchog gsum; C. sanbao) 1. the buddha (T. sang rgy as; C. fo/fotuo /) 2. the teachings (S. dharma; T. chos; C. fa/damo /) 3. the community (S. saṃgha; T. dge ’dun; C. seng/sengqie /)

three knowledges. (S. trividy ā; T. rig pa gsum; C. sanming) 1. recollection of past lives (S. pūrvanivāsānusmṛti; T. sngon gy i gnas rjes su dran pa; C. suzhu suinian/suming ming /) 2. “the divine ey e”/clairvoy ance (S. divy acakṣus; T. lha’i mig; C. tiany an ming) 3. the extinction of the contaminants (S. āsravakṣay a; T. zag pa zad pa shes pa; C. loujin ming)

three means of knowledge. (S. pramāṇa; T. tshad ma; C. liang) 1. direct perception (S. praty akṣa; T. mngon sum; C. xianliang) 2. inference (S. anumāna; T. rjes dpag; C. biliang) 3. scripture (S. āgama; T. lung; C. shengy an liang/shengjiao liang /)

three natures. (S. trisvabhāva; T. mtshan ny id gsum/ngo bo ny id gsum/rang bzhin gsum; C. sanxing) 1. imaginary /imputed (S. parikalpita; T. kun btags; C. pianji suozhi xing) 2. dependent (S. paratantra; T. gzhan dbang; C. y itaqi xing) 3. perfected/consummate (S. pariniṣpanna; T. y ongs su grub pa; C. y uanchengshi xing)

three poisons. (S. triviṣa; T. dug gsum; C. sandu) 1. desire/greed (S. rāga; T. ’dod chags; C. tan) 2. hatred/aversion (S. dveṣa; T. zhe sdang; C. chen) 3. delusion (S. moha; T. gti mug; C. chi)

three realms. [of existence] (S. traidhātuka; T. khams gsum; C. san jie)
1. sensuous realm/desire realm (S. kāmadhātu; T. ’dod khams; C. y u jie
)
2. realm of subtle materiality /form realm (S. rūpadhātu; T. gzugs khams; C.
se jie)
3. immaterial realm/formless realm (S. ārūpy adhātu; T. gzugs med khams;
C. wuse jie)
three refuges. (S. triśaraṇa; T. sky abs gsum; C. san gui/san guiy i /) 1. the buddha (T. sang rgy as; C. fo/fotuo /) 2. the teachings (S. dharma; T. chos; C. fa/damo /) 3. the community (S. saṃgha; T. dge ’dun; C. seng/sengqie /)

three roots. (S. mūla; T. rtsa ba) 1. teacher (S. guru; T. bla ma) 2. tutelary deity (T. y i dam)

3. ḍākinī (S. ḍākinī; T. mkha’ ’gro ma)

three sages of Huayan. (C. Huay an sansheng) 1. Vairocana Buddha (C. Piluzhena zunfo) 2. Samantabhadra bodhisattva (C. Puxian pusa) 3. Mañjuśrī

bodhisattva (C. Wenshu pusa)

three sufferings. (S. duḥkha; T. sdug bsngal; C. ku) 1. suffering of [phy sical and mental] pain (S. duḥkhaduḥkhatā; T. sdug bsngal gy i sdug bsngal; C. kuku) 2. suffering inherent in change (S. vipariṇāmaduḥkatā; T. 'gy ur ba'i sdug bsngal; C. huaiku) 3. suffering inherent in conditionality (S. saṃskāraduḥkhatā; T. 'du by ed ky i sdug bsngal; C. xingku)

three times. (S. trikāla; T. dus gsum; C. sanshi) 1. past (S. atīta; T. 'das pa; C. guoqushi) 2. present (S. vartamāna; T. da lta ba; C. xianzaishi) 3. future (S. anāgata; T. ma 'ongs pa; C. weilaishi)

three trainings. (S. triśikṣā; T. bslab pa gsum; C. sanxue) 1. morality /higher morality (S. śīla/adhiśīlaśikṣā; T. tshul khrims/lhag pa'i tshul khrims ky i bslab pa; C. jie/zengshangjie xue /) 2. concentration/higher concentration (S. samādhi/adhisamādhiśikṣā; T. ting nge 'dzin/lhag pa'i ting nge 'dzin gy i bslab pa; C. ding/zengshangxin xue /) 3. wisdom/higher wisdom (S. prajñā/adhiprajñāśikṣā; T. shes rab/lhag pa'i shes rab ky i bslab pa; C. hui/zengshanghui xue /)

three truths/judgments. [of the Tiantai school] (C. sandi)
1. truth of emptiness (C. kongdi)
2. truth of being provisionally real (C. jiadi)
3. truth of the mean (C. zhongdi)
three turnings of the wheel of the law. (S. dharmacakrapravartana; T. chos 'khor

rim pa; C. zhuan falun) 1. the dharma-wheel of the four noble truths (S. catuḥsaty adharmacakra; T. bden pa bzhi'i chos 'khor; C. sidi falun) 2. the dharma-wheel of the absence of defining characteristics (S. alakṣaṇadharmacakra; T. mtshan ny id med pa'i chos 'khor; C. wuxiang falun) 3. the dharma-wheel of thorough delineations (S. *suvibhaktadharmacakra/pravicay adharmacakra; T. legs par rnam par phy e ba'i chos 'khor; C. [shan] fenbie falun/shan bian falun [] /)

three vehicles. (S. triy āna; T. theg pa gsum; C. san sheng) 1. śrāvakay āna (T. ny an thos ky i theg pa; C. shengwen sheng) 2. praty ekabuddhay āna (T. rang sangs rgy as ky i theg pa; C. y uanjue sheng/pizhi fo sheng /) 3. bodhisattvay āna (T. by ang chub sems dpa'i theg pa; C. pusa sheng)

three restraints. (S. saṃvara; T. sdom pa; C. lüy i/sanbaluo /)

1. the disciplinary rules of a monk or nun (S. prātimokṣasaṃvara; T. so so thar pa'i sdom pa; C. boluotimuchahu/biejietuo lüy i /) 2. the restraint that is engendered by meditative absorption (S. dhy ānajasaṃvara; T. bsam gtan sky es pa'i sdom pa; C. chanlüy i) 3. the restraint that derives from being free from the contaminants (S. anāsravasaṃvara; T. zag pa med pa'i sdom pa; C. wuloulüy i).

OR

three vows. (S. trisaṃvara; T. sdom gsum; C. san lüy i)

1. the disciplinary rules of a monk or nun (S. prātimokṣasaṃvara; T. so so

thar pa'i sdom pa; C. boluotimuchahu/biejietuo lüy i /) 2. bodhisattva vows (S. bodhisattvasaṃvara; T. by ang sems ky i sdom pa; C. pusa lüy i) 3. secret mantra vows (S. guhy amantrasaṃvara; T. gsang sngags ky i sdom pa; C. mizhou lüy i)

three wisdoms. (S. prajñā; T. shes rab; C. hui) 1. wisdom derived from learning (S. śrutamay īprajñā; T. thos pa las by ung ba'i shes rab; C. wenhui) 2. wisdom derived from reflection (S. cintāmay īprajñā; T. bsam pa las by ung ba'i shes rab; C. sihui) 3. wisdom derived from cultivation (S. bhāvanāmay īprajñā; T. bsgoms pa las by ung ba'i shes rab; C. xiuhui)

FOURS four absorptions. (S. dhy āna; T. bsam gtan; C. chan/ding /)
1. first absorption (S. prathamadhy āna; T. bsam gtan dang po; C. chuchan
)
2. second absorption (S. dvitīy adhy āna; T. bsam gtan gny is pa; C. erchan
)
3. third absorption (S. tṛtīy adhy āna; T. bsam gtan gsum pa; C. sanchan
)
4. fourth absorption (S. caturthadhy āna; T. bsam gtan bzhi pa; C. sichan
)
four activities. (S. karman; T. las; C. shiy e) 1. pacification (S. śāntika; T. zhi ba'i las; C. xizai) 2. enrichment (S. pauṣṭika; T. rgy as pa'i las; C. zengy i) 3. control (S. vaśīkaraṇa; T. bdang gi las; C. huai'ai) 4. wrath (S. abhicāra; T. drag po mngon spy od; C. xiangfu)

four aids to penetration. (S. nirvedhabhāgīy a; T. nges par 'by ed pa'i cha mthun;

C. shunjuezefen) 1. heat (S. ūṣman; T. drod; C. nuan) 2. summit (S. mūrdhan; T. rtse mo; C. ding) 3. receptivity /acquiescence (S. kṣānti; T. bzod pa; C. ren) 4. supreme worldly dharmas (S. laukikāgradharma; T. 'jig rten pa'i chos ky i mchog; C. shi diy i fa)

four analytical knowledges. (S. pratisaṃvid; T. so so y ang dag par rig pa; C. wu'ai jie/wu'ai bian /) 1. of factors (S. dharma; T. chos; C. fa) 2. of meaning (S. artha; T. don; C. y i) 3. of ety mology or language (S. nirukti; T. nges pa'i tshig; C. ci/ci /) 4. of eloquence (S. pratibhāna; T. spobs pa; C. leshuo)

four baleful destinies. (S. apāy a/durgati; T. ngan song; C. equ) 1. demigods (S. asura; T. lha ma y in; C. axiuluo qu) 2. animals (S. tiry ak; T. dud 'gro; C. chusheng qu) 3. ghosts (S. preta; T. y i dwags; C. egui qu) 4. hell denizens (S. nāraka; T. dmy al ba; C. diy u qu)

four bases of psychic power. (S. ṛddhipāda; T. rdzu 'phrul gy i rkang pa; C. shenzu/ruy izu /) 1. aspiration (S. chanda; T. 'dun pa; C. y u) 2. vigor/effort (S. vīry a; T.

brtson ’grus; C. qin) 3. thought/concentration (S. citta; T. bsam pa; C. xin) 4. analy sis (S. mīmāṃsā; T. dpy od pa; C. siwei/guan /)

four bodies [of a buddha]. (S. kāy a; T. sku; C. shen) 1. dharma body (S. dharmakāy a; T. chos sku; C. fashen) 2. enjoy ment body (S. saṃbhogakāy a; T. longs spy od rdzogs pa’i sku; C. baoshen) 3. emanation body (S. nirmāṇakāy a; T. sprul pa’i sku; C. huashen) 4. essence body (S. svābhāvikakāy a; T. ngo bo ny id ky i sku; C. zixing shen)

four bonds/fetters. (S. grantha/saṃy ojana; T. ’ching ba; C. jie/fu /) 1. covetousness (S. abhidhy ā; T. brnab sems; C. y u’ai) 2. ill-will (S. vy āpāda; T. gnod sems; C. chenhui) 3. attachment to rules and rituals (S. śīlavrataparāmarśa; T. tshul khrims dang brtul zhugs mchog tu ’dzin pa; C. jiejinqu) 4. attachment to views/dogmatic fanaticism (S. dṛṣṭiparāmarśa/idaṃsaty ābhiniveśa; T. lta ba mchog tu ’dzin pa; C. wojianqu)

four boundless states/immeasurables. (S. apramāṇa; T. tshad med; C. wuliang xin) 1. loving-kindness (S. maitrī; T. by ams pa; C. ci) 2. compassion (S. karuṇā; T. sny ing rje; C. bei) 3. empathetic joy (S. muditā; T. dga’ ba; C. xi) 4. equanimity (S. upekṣā; T. btang sny oms; C. she)

four characteristics of all conditioned objects. (S. saṃskṛtalakṣaṇa/caturlakṣaṇa; T. ’dus by as ky i mtshan ny id/mtshan ny id bzhi; C. y ouwei xiang/sixiang /) 1. origination/birth (S. jāti; T. sky e ba; C. sheng) 2. maturation/continuance (S. sthiti; T. gnas pa; C. zhu) 3. senescence/decay /aging (S. jarā; T. rga ba; C. y i) 4. desinence/extinction (S. anity a [alt. anity atā]; T. mi rtag pa; C. mie)

four conditions. (S. praty ay a; T. rky en; C. y uan)

1. causal condition (S. hetupraty ay a; T. rgy u rky en; C. y in y uan) 2. immediate antecedent condition (S. samanantarapraty ay a; T. de ma thag pa’i rky en; C. dengwujian y uan) 3. objective-support condition (S. ālambanapraty ay a; T. dmigs rky en; C. suoy uan y uan) 4. predominant condition (S. adhipatipraty ay a; T. bdag rky en; C. zengshang y uan)

four contaminants. (S. āsrava; T. zag pa; C. lou)

1. contaminant of sensuality (kāmāsrava; T. ’dod pa’i zag pa; C. y u lou
)
2. contaminant of becoming (bhavāsrava; T. srid pa’i zag pa; C. y ou lou
)
3. contaminant of ignorance (avidy āsrava; T. ma rig pa’i zag pa; C.
wuming lou)
4. contaminant of views (dṛṣṭy āsrava; T. lta ba’i zag pa; C. jian lou)

four continents. (S. dvīpa; T. gling; C. [da][bu]zhou [][]) 1. videha [east] (T. lus ’phags; C. dong shengshen zhou) 2. Jambudvīpa [south] (T. ’dzam bu gling; C. nan Shanbu zhou) 3. godānīy a [west] (T. ba glang spy od; C. xi niuhuo zhou) 4.

uttarakuru [north] (T. sgra mi sny an; C. bei julu zhou)

four “defeat” offenses. (S. pārājika; T. phas pham pa; C. poluoy i) 1. sexual intercourse (S. abrahmacary a; T. mi tshangs pa spy od pa; C. y in) 2. theft (S. adattādāna; T. ma by in par len pa; C. dao) 3. killing [of a human being] (S. vadha; T. gsod pa; C. sha) 4. ly ing about one’s higher spiritual achievements (S. uttaramanuṣy adharmapralāpa; T. mi’i chos bla mar smra ba; C. wang)

four deportments/postures. (S. īry āpatha; T. spy od lam; C. weiy i) 1. walking (S. caṅkrama; alt. gamana; T. ’chag pa; C. xing) 2. standing (S. sthāna; sthita; T. ’greng ba; C. zhu) 3. sitting (S. niṣaṇṇa; T. ’dug pa; C. zuo) 4. ly ing down (S. śay ana; T. ny al ba; C. wo)

four divine abidings. (S. brahmavihāra; T. tshang pa’i gnas; C. fanzhu) 1. loving-kindness (S. maitrī; T. by ams pa; C. ci) 2. compassion (S. karuṇā; T. sny ing rje; C. bei) 3. empathetic joy (S. muditā; T. dga’ ba; C. xi) 4. equanimity (S. upekṣā; T. btang sny oms; C. she)

four empowerments. (S. abhiṣeka; T. dbang; C. guanding) 1. vase empowerment (S. kalaśābhiṣeka; T. bum dbang; C. baoping guanding) 2. secret empowerment (S. guhy ābhiṣeka; T. gsang dbang; C. mimi guanding) 3. wisdom–knowledge empowerment (S. prajñājñānābhiṣeka; T. shes rab y e shes ky i dbang; C. zhihui guanding) 4. word empowerment (S. śabdābhiṣeka; T. tshig dbang/dbang bzhi pa; C. mingci guanding)

four fearlessnesses/self-confidences. (S. vaiśārady a; T. mi ’jigs pa; C. wusuowei) The Tathāgata’s self-confidence derives from: 1. his knowledge of all phenomena (S. sarvadharmābhisaṃbodhivaiśārady a; T. chos thams cad mkhy en pa la mi ’jigs pa; C. zhufa xiandengjue wuwei) 2. his knowledge that all the contaminants are destroy ed (S. sarvāsravakṣay ajñānavaiśārady a; T. zag pa zad pa thams cad mkhy en pa la mi ’jigs pa; C. y iqie loujinzhi wuwei) 3. his correct identification of all the obstacles to liberation (S. antarāy ikadharmānany athātvaniścitavy ākaraṇavaiśārady a; T. bar du gcod pa’i chos rnams bzhan du mi ’gy ur bar nges pa’i lung bstan pa la mi ’jigs pa; C. zhangfa buxu jueding shouji wuwei) 4. his realization of all the marvelous qualities that are to be achieved through completing the path to liberation (S. sarvasampadadhigamāy anairy āṇikapratipattathātvavaiśārady a; T. phun sum tshogs pa thams cad thob par ’gy ur bar nges par ’by ung ba’i lam de bzhin du gy ur ba la mi ’jigs pa; C. weizheng y iqie juzu chudao ruxing wuwei)

four floods. (S. ogha; T. chu bo; C. puliu) 1. craving for sensuality (S. kāmarāga; T. ’dod pa la ’dod chags; C. y u’ai) 2. craving for continued existence (S. bhavarāga; T. srid pa’i ’dod chags; C.

y ou’ai) 3. ignorance (S. avidy ā; T. ma rig pa; C. wuming) 4. views (S. dṛṣṭi; T. lta ba; C. jian)

four foundations of mindfulness. (S. smṛty upasthāna; T. dran pa'i ny er bzhag; C. nianchu) 1. mindfulness of the body (S. kāy asmṛty upasthāna; T. lus dran pa ny e bar bzhag pa; C. shen nianchu) 2. mindfulness of sensations (S. vedanāsmṛty upasthāna; T. tshor ba dran pa ny e bar bzhag pa; C. shou nianchu) 3. mindfulness of mental states (S. cittasmṛty upasthāna; T. sems dran pa ny e bar bzhag pa ; C. xin nianchu) 4. mindfulness of phenomena (S. dharmasmṛty upasthāna; T. chos dran pa ny e bar bzhag pa; C. fa nianchu)

four fruitions. [of sanctity] (S. phala; T. 'bras bu; C. guo [zheng/wei] [/]) 1. stream-enterer (S. srotaāpanna; T. rgy un du zhugs pa; C. y uliu guo/xutuohuan guo /) 2. once-returner (S. sakṛdāgāmin; T. lan cig phy ir 'ong ba; C. y ilai guo/situohan guo /) 3. non-returner (S. anāgāmin; T. phy ir mi 'ong ba; C. buhuan guo/anahan guo /) 4. worthy one (S. arhat; T. dgra bcom pa; C. wuxue guo/aluohan guo /)

four graspings. (S. upādāna; T. ny er len; C. qu) 1. of sensuality (S. kāmopādāna; T. 'dod pa ny e bar len pa; C. y uqu) 2. of wrong views (S. dṛṣṭy upādāna; T. lta ba ny e bar len pa; C. jianqu) 3. of rules and rituals (S. śīlavratopādāna; T. tshul khrims dang brtul zhugs mchog 'dzin ny e bar len pa; C. jie[jin] qu []) 4. of the concept "self" (S. ātmavādopādāna; T. bdag lta ny e bar len pa; C. woy u qu)

four great elements. (S. mahābhūta; T. 'by ung ba chen po; C. da) 1. earth/solidity (S. pṛthivī; T. sa; C. di)

2. water/cohesion (S. āpas; T. chu; C. shui) 3. fire/warmth (S. tejas; T. me; C. huo) 4. air/mobility (S. vāy u; T. rlung; C. feng)

four guardian kings. (S. mahārājan/lokapāla; T. rgy al chen; C. [hushi] tianwang/huguo tianwang []/) 1. Dhṛtarāṣṭra; in the east (T. Yul 'khor srung; C. Chiguo) 2. Virūḍhaka; in the south (T. 'Phags sky es po; C. Zengzhang) 3. Virūpākṣa; in the west (T. Spy an mi bzang; C. Guangmu) 4. Vaiśravaṇa; in the north (T. Rnam thos sras; C. Duowen)

four immaterial absorptions. (S. ārūpy āvacaradhy āna; T. gzugs med pa'i sny oms 'jug; C. wuse ding) See FOUR IMMATERIAL REALMS (s.v.).

four immaterial realms. (S. ārūpy adhātu; T. gzugs med khams pa'i gnas; C. wuse jie) 1. infinite space (S. ākāśānanty āy atana; T. nam mkha' mtha' y as sky e mched; C. kong wubian chu) 2. infinite consciousness (S. vijñānānanty āy atana; T. rnam shes mtha' y as sky e mched; C. shi wubian chu) 3. nothingness (S. ākiñcany āy atana; T. ci y ang med pa'i sky e mched; C. wu suoy ou chu) 4. neither perception nor nonperception (S. naivasaṃjñānāsaṃjñāy atana; T. 'du shes med 'du shes med min sky e mched; C. feixiang feifeixiang chu)

four intentions. (S. abhiprāy a; T. dgongs pa; C. y iqu/miy i /) 1. intention directed towards sameness (S. samatābhiprāy a; T. mny am pa ny id la dgongs pa; C. pingdeng y iqu) 2. intention directed towards other meanings (S. arthāntarābhiprāy a; T. don

gzhan la dgongs pa; C. biey i y iqu) 3. intention directed towards other times (S. kālāntarābhiprāy a; T. dus gzhan la dgongs pa; C. bieshi y iqu) 4. intention directed towards other individuals (S. pudgalāntarābhiprāy a; T. gang zag gzhan la dgongs pa; C. buteqieluo y iy ao y iqu)

four intermediate states. (S. antarābhava; T. bar do) 1. intermediate state of the birth (S. jāty antarābhava; T. sky e gnas ky i bar do) 2. intermediate state of the moment of death (S. mumūrṣāntarābhava; T. 'chi kha'i bar do) 3. intermediate state of dharmatā (S. dharmatāntarābhava; T. chos ny id bar do) 4. intermediate state of rebirth (S. bhavāntarābhava; T. srid pa bar do)

four Māras. (S. māra; T. bdud; C. mo)

1. Māra of the aggregates (S. skandhamāra; T. phung po'i bdud; C. y inmo)
2. Māra of the afflictions (S. kleśamāra; T. ny on mongs pa'i bdud; C. fannao mo)
3. Māra of death (S. mṛty umāra; T. 'chi bdag gi bdud; C. simo)
4. Māra the deity (S. Devaputramāra; T. Lha'i bu bdud; C. Tianzimo)

four means of conversion. (S. saṃgrahavastu; T. bsdu dngos; C. sheshi; shefa /) 1. generosity (S. dāna; T. sby in pa; C. bushi) 2. kind words (S. priy avādita; T. sny an par smra ba; C. aiy u) 3. helpfulness; viz. teaching others to fulfill their aims (S. arthacary ā; T. don spy od pa; C. lixing) 4. consistency between words and deeds (S. samānārthatā; T. don mthun pa; C. tongshi)

four modes of birth. (S. y oni; T. sky e gnas rigs; C. sheng) 1. oviparous birth (S. aṇḍaja; T. sgo nga las sky e ba; C. luansheng) 2. viviparous birth (S. jarāy uja; T. mngal nas sky e ba; C. taisheng) 3. moisture-born (S. saṃsvedaja; T. drod sher las sky e ba; C. shisheng) 4. metamorphic or transformative birth; viz. spontaneous generation [as of divinities] (S. upapāduka; T. brdzus te sky e ba; C. huasheng)

four noble ones. (S. āry a; T. 'phags pa; C. sheng)

1. śrāvaka (T. ny an thos; C. shengwen)
2. praty ekabuddha (T. rang rgy al; C. y uanjue)
3. bodhisattva (T. by ang chub sems dpa'; C. pusa)
4. buddha (T. sang rgy as; C. fo)

four noble persons. (S. āry apudgala; T. 'phags pa'i gang zag; C. xiansheng) 1. stream-enterer (S. srotaāpanna; T. rgy un du zhugs pa; C. y uliu guo/xutuohuan guo /) 2. once-returner (S. sakṛdāgāmin; T. lan cig phy ir 'ong ba; C. y ilai guo/situohan guo /) 3. non-returner (S. anāgāmin; T. phy ir mi 'ong ba; C. buhuan guo/anahan guo /) 4. worthy one (S. arhat; T. dgra bcom pa; C. wuxue guo/aluohan guo /)

four noble truths. (S. āry asaty a; T. ’phags pa’i bden pa; C. shengdi) 1. truth of suffering (S. duḥkhasaty a; T. sdug bsngal gy i bden pa; C. kudi) 2. truth of origination (S. samuday asaty a; T. kun ’by ung gi bden pa; C. jidi) 3. truth of cessation (S. nirodhasaty a; T. ’gog pa’i bden pa; C. miedi) 4. truth of the path (S. mārgasaty a; T. lam gy i bden pa; C. daodi)

four persons. (S. pudgala; T. gang zag; C. buteqieluo) 1. ordinary persons (S. pṛthagjana; T. so so sky e bo; C. fanfu) 2. disciples (S. śrāvaka; T. ny an thos; C. shengwen) 3. solitary buddhas (S. praty ekabuddha; T. rang rgy al; C. y uanjue) 4. bodhisattvas (T. by ang chub sems dpa’; C. pusa)

four perverted views. (S. vipary āsa; T. phy in ci log; C. diandao) 1. to view as permanent what is actually impermanent (S. nity avipary āsa; T. mi rtag pa la rtag par ’dzin pa; C. chang diandao) 2. to view as pleasurable what is actually suffering (S. sukhavipary āsa; T.

sdug bsngal ba la bde bar ’dzin pa; C. le diandao) 3. to view as pure what is actually tainted (S. śucivipary āsa; T. mi gtsang ba la gtsang bar ’dzin pa; C. jing diandao) 4. to view as self what is actually non-self (S. ātmavipary āsa; T. bdag med pa la bdag tu ’dzin pa; C. wo diandao)

four philosophical systems. (S. siddhāntabheda; T. grub mtha’ smra ba)
1. Vaibhā ṣika [Sarvāstivāda] (T. By e brag tu smra ba; C. Piposha bu
)
2. Sautrāntika (T. Mdo sde pa; C. Jingliang bu)
3. Vijñānavāda/Cittamātra (T. Rnam shes su smra ba/Sems tsam pa; C.
Weishi)
4. Madhy amaka (Dbu ma pa; C. Zhongguan)
four realms of reality [dharmadhātu]. (C. si fajie) 1. dharmadhātu of phenomena (C. shi fajie) 2. dharmadhātu of principle (C. li fajie) 3. dharmadhātu of the unimpeded interpenetration between principle and phenomena (C. lishi wu’ai fajie) 4. dharmadhātu of unimpeded interpenetration of phenomenon and phenomena (C. shishi wu’ai fajie)

four reliances. (S. pratisaraṇa; T. rton pa; C. y i) 1. reliance on the meaning rather than the words (S. arthapratisaraṇena bhavitavy aṃ na vy añjanapratisaraṇena; T. don la rton par by a y i tshig ’bru la rton par mi by a; C. y iy i buy i y u) 2. reliance on the teaching rather than on the person [who delivers the teaching] (S. dharmapratisaraṇena bhavitavy aṃ na pudgalapratisaraṇena; T. chos la rton par by a y i gang zag la rton par mi by a; C. y ifa buy i ren) 3. reliance on wisdom rather than [ordinary] consciousnesses (S. jñānapratisaraṇena bhavitavy aṃ na vijñānapratisaraṇena; T. y e shes la rton par by a y i rnam shes la rton par mi by a; C. y izhi buy i shi) 4. reliance on the definitive meaning rather than the provisional meaning (S. nītārthasūtrapratisaraṇena bhavitavy aṃ na

ney ārthasūtrapratisaraṇena; T. nges don la rton par by a y i drang don la rton par mi by a; C. y iliaoy i buy i buliaoy i)

four right efforts. (S. samy akpradhāna/samy akprahāṇa; T. spong pa; C. zhengqin) 1. to bring about the (future) non-production of evil and unwholesome dharmas that have not y et been produced (S. anutpannānāṃ pāpakānām akuśalānāṃ dharmāṇām anutpādāy a cchandaṃ janay ati/anutpannānāṃ akuśalānāṃ saṃrakṣaṇaṃ; T. mi dge ba ma sky es pa mi bky ed pa; C. weisheng e ling busheng) 2. the abandonment of those evil and unwholesome dharmas that have been produced (S. utpannānāṃ pāpakānām akuśalānāṃ dharmāṇāṃ prahāṇāy a cchandaṃ janay ati/utpannānāṃ akuśalānāṃ prahāṇaṃ; T. mi dge ba sky es pa spong ba; C. y isheng e ling y ongduan) 3. the production of wholesome dharmas that have not y et been produced (S. anutpannānāṃ kuśalānāṃ dharmāṇām utpādāy a cchandaṃ janay ati; T. dge ba ma sky es pa bsky ed pa; C. weisheng shan ling sheng) 4. the increase of those wholesome dharmas that have been produced (S. utpannānāṃ kuśalānāṃ dharmāṇāṃ sthitay e bhūy obhāvāy a asaṃpramoṣāy a paripūraṇāy a cchandaṃ janay ati/anutpannānāṃ punarutpāda; T. dge ba sky es pa spel ba; C. y isheng shan ling zengzhang)

four seals. (S. mudrā; T. phy ag rgy a; C. y in) 1. pledge seal (S. samay amudrā; T. dam tshig phy ag rgy a; C. sanmoy e y in) 2. dharma seal (S. dharmamudrā; T. chos ky i phy ag rgy a; C. fa y in) 3. action seal (S. karmamudrā; T. las ky i phy ag rgy a; C. jiemo y in) 4. great seal (S. mahāmudrā; T. phy ag rgy a chen po; C. da y in)

four seals indicative of the Buddhist view. (S. caturmudrā/dṛṣṭinimittamudrā; T. phy ag rgy a bzhi/bka’ rtags ky i phy ag rgy a; C. siy in/fay in /) 1. all that is compounded is impermanent (S. sarvasaṃskārāanity atāḥ; T. ’dus by as thams cad mi rtag pa; C. zhuxing wuchang) 2. all that is contaminated is suffering (S. sarvasaṃskārāduḥkhāḥ; T. zag

cas thams cad sdug bsngal ba; C. y iqie jie ku) 3. all phenomena are without self (S. sarvadharmā anātmānaḥ; T. chos thams cad bdag med pa; C. zhufa wuwo) 4. nirvāṇa is peace (S. nirvāṇaśānta; T. my a ngan las ’das pa zhi ba; C. niepan jijing)

four tantra classes. (S. tantra; T. rgy ud sde) 1. action tantra (S. kriy ātantra; T. by a ba’i rgy ud) 2. performance tantra (S. cary ātantra; T. spy od pa’i rgy ud) 3. y oga tantra (S. y ogatantra; T. rnal ’by or gy i rgy ud) 4. unexcelled y oga tantra (S. anuttaray ogatantra; T. rnal ’by or bla na med pa’i rgy ud)

FIVES five acts that bring immediate retribution. (S. ānantary akarman; T. mtshams med pa; C. wujian y e [nizui/zhongzui] [/]) 1. matricide (S. mātṛghāta; T. ma gsod pa; C. hai mu/sha mu /) 2. patricide (S. pitṛghāta; T. pha gsod pa; C. hai fu/sha fu /) 3. killing an arhat (S. arhadghāta; T. dgra bcom pa gsod pa; C. hai aluohan/sha aluohan /) 4. maliciously spilling a buddha’s blood (S. tathāgatasy āntike duṣṭacittarudhirotpādanam; T. de bzhin gshegs pa’i sku la ngan sems ky is khrag ’by in pa; C. [exin] chu foshen xie []) 5. creating a schism in the order (S.

saṃghabheda; T. dge ’dun gy i dby en by as pa; C. poseng)

five aggregates. (S. skandha; T. phung po; C. y un/y in /) 1. aggregate of materiality (S. rūpaskandha; T. gzugs ky i phung po; C. se y un/se y in /) 2. aggregate of sensation (S. vedanāskandha; T. tshor ba’i phung po; C. shou y un/shou y in /) 3. aggregate of perception (S. saṃjñāskandha; T. ’du shes ky i phung po; C. xiang y un/xiang y in /) 4. aggregate of conditioning factors (S. saṃskāraskandha; T. ’du by ed ky i

phung po; C. xing y un/xing y in /) 5. aggregate of consciousness (S. vijñānaskandha; T. rnam shes ky i phung po; shi y un/shi y in /)

five aids to liberation. (S. mokṣabhāgīy a; T. thar pa cha mthun; C. shunjietuofen)

1. faith (S. śraddhā; T. dad pa; C. xin) 2. effort (S. vīry a; T. brtson ’grus; C. jingjin/qin /) 3. mindfulness (S. smṛti; T. dran pa; C. nian) 4. concentration (S. samādhi; T. ting nge ’dzin; C. ding) 5. wisdom (S. prajñā; T. shes rab; C. hui)

five buddha families. (S. pañcakula; T. rigs lnga; C. wu bu/jia /) 1. tathāgata family (S. tathāgatakula; T. de bzhin gshegs pa’i rigs; C. rulai bu) 2. vajra family (S. vajrakula; T. rdo rje’i rigs; C. jingang bu) 3. jewel family (S. ratnakula; T. rin chen rigs; C. bao bu) 4. lotus family (S. padmakula; T. padma rigs; C. lianhua bu) 5. action family (S. karmakula; T. las ky i rigs; C. y e bu)

five buddhas. (S. pañcatathāgata; T. de bzhin gshegs pa lnga; C. wuzhi rulai/wu fo /)
1. Vairocana (T. Rnam par snang mdzad; C. Dari rulai/Piluzhena /
)
2. Akṣobhy a (T. Mi bsky od pa; C. Achu fo)
3. Ratnasambhava (T. Rin chen ’by ung gnas; C. Baosheng rulai)
4. Amitābha (T. ’Od dpag med; C. Amituo fo/Wuliangshou fo /
)
5. Amoghasiddhi (T. Don y od grub pa; C. Bukong Chengjiu rulai fo
)
five destinies [of rebirth]. (S. gati; T. ’gro ba; C. qu/dao /) 1. divinities (S. deva; T. lha; C. tian) 2. humans (S. manuṣy a; T. mi; C. ren)

3. animals (S. tiry ak; T. dud ’gro; C. chusheng) 4. ghosts (S. preta; T. y i dwags; C. egui) 5. hell denizens (S. nāraka; T. dmy al ba; C. diy u)

five effects. (S. pañcaphala; T. ’bras bu lnga; C. wu guo) 1. correlative effect (S. niṣy andaphala; T. rgy u mthun gy i ’bras bu; C. dengliu guo) 2. retributive effect (S. vipākaphala; T. rnam smin gy i ’bras bu; C. y ishu guo) 3. separation effect (S. visaṃy ogaphala; T. bral ba’i ’bras bu; C. liji guo) 4. effect caused by human action (S. puruṣakāraphala; T. sky es bus by ed pa’i ’bras bu; C. shiy ong guo) 5. predominant effect (S. adhipatiphala; T. bdag po’i ’bras bu; C. zengshang guo)

five elements. (S. mahābhūta/dhātu; T. ’by ung po chen po; C. da[zhong] []) 1. earth/solidity (S. pṛthivī; T. sa; C. di) 2. water/cohesion (S. āpas; T. chu; C. shui) 3. fire/warmth (S. tejas; T. me; C. huo) 4. air/mobility (S. vāy u; T. rlung; C. feng) 5. space (S. ākāśa; T. nam mkha’; C. kong)

five eyes. (S. cakṣus; T. spy an; C. y an) 1. fleshly ey e (S. māṃsacakṣus; T. sha’i spy an; C. rouy an) 2. divine ey e/clairvoy ance (S. divy acakṣus; T. lha’i spy an; C. tiany an) 3. wisdom ey e (S. prajñācakṣus; T. shes rab ky i spy an; C. huiy an) 4. dharma ey e (S. dharmacakṣus; T. chos ky i spy an; C. fay an) 5. buddha ey e (S. buddhacakṣus; T. sangs rgy as ky i spy an; C. foy an)

five factors of meditative absorption. (S. dhy ānāṅga; T. bsam gtan gy i y an lag; C. chanzhi/dingzhi /) 1. applied thought/initial application of attention (S. vitarka; T. rtog pa; C. xun) 2. sustained thought/sustained attention (S. vicāra; T. dpy od pa; C. si)

3. phy sical rapture (S. prīti; T. dga’ ba; C. xi)

4. mental ease (S. sukha; T. bde ba; C. le)

5. one-pointedness (S. cittaikāgratā; T. sems rtse gcig pa; C. xin y ijing xing)

five faculties/dominants. (S. indriy a; T. dbang po; C. gen) 1. faith (S. śraddhā; T. dad pa; C. xin) 2. effort (S. vīry a; T. brtson ’grus; C. jingjin/qin /) 3. mindfulness (S. smṛti; T. dran pa; C. nian) 4. concentration (S. samādhi; T. ting nge ’dzin; C. ding) 5. wisdom (S. prajñā; T. shes rab; C. hui)

five hindrances [to dhyāna]. (S. nīvaraṇa; T. sgrib pa; C. gai) 1. sensual desire (S. kāmacchanda; T. ’dod pa la ’dun pa ; C. tany u) 2. malice (S. vy āpāda; T. gnod sems; C. chenhui) 3. sloth and torpor (S. sty ānamiddha; T. rmugs pa dang gny id; C. shuimian/huanchen /) 4. restlessness and worry (S. auddhaty akaukṛty a; T. rgod pa dang ’gy od pa; C. diaoju/sanluan/ezuo/hui ///) 5. skeptical doubt (S. vicikitsā; T. the tshom; C. y i)

Five Huayan classifications of the teachings. (C. Huay an wujiao) Earlier division, according to Dushun and Fazang: 1. hīnay āna teachings/śrāvakay āna teachings (C. xiaosheng jiao/shengwensheng jiao /) 2. elementary teachings [of Mahāy āna] (C. shijiao) 3. advanced/final teachings [of Mahāy āna] (C. zhongjiao) 4. sudden teachings (C. dunjiao) 5. perfect teachings/consummate teachings C. y uanjiao)

Later division, according to Guifeng Zongmi: 1. teachings for divinities and humans (C. rentian jiao) 2. hīnay āna teachings (C. xiaosheng jiao) 3. dharma-characteristics teachings of Mahāy āna (C. dasheng faxiang jiao) 4. characteristics-negating teachings of Mahāy āna (C. dasheng poxiang

jiao) 5. The nature-revealing teaching of the one vehicle (C. y isheng xianxing jiao)

five lineages. (S. gotra; T. rigs pa; C. zhongxing /) 1. tathāgata lineage (S. tathāgatay ānābhisamay agotra; T. de bzhin gshegs pa'i theg pa mngon par rtogs pa'i rigs; C. rulai sheng zhongxing) 2. praty ekabuddha lineage (S. praty ekabuddhay ānābhisamay agotra; T. rang rgy al gy i theg pa mngon par rtogs pa'i rigs; C. dujue sheng zhongxing) 3. śrāvakay āna lineage (S. śrāvakay ānābhisamay agotra; T. ny an thos ky i theg pa mngon par rtogs pa'i rigs; C. shengwen sheng zhongxing) 4. uncertain lineage (S. aniy atagotra; T. ma nges pa'i rigs; C. buding zhongxing) 5. no lineage [viz. icchantika] (S. agotraka; T. rigs med pa; C. wu zhongxing)

five nectars. (S. amṛta; T. bdud rtsi; C. ganlu)

1. semen (S. bodhicitta; T. by ang sems; C. nanjing)
2. blood (S. rakta; T. rak ta; C. nüxie)
3. urine (S. mūtra; T. dri chu; C. niao)
4. excrement (S. purīṣa; T. dri chen; C. shi)
5. flesh (S. māṃsa; T. sha; C. gusui)

five paths. (S. pañcamārga; T. lam lnga; C. wuwei)

1. path of equipment/accumulation (S. saṃbhāramārga; T. tshogs lam; C. ziliang wei)
2. path of preparation (S. pray ogamārga; T. sby or lam; C. jiaxing wei)
3. path of vision (S. darśanamārga; T. mthong lam; C. jiandao wei)
4. path of cultivation (S. bhāvanāmārga; T. bsgom lam; C. xiudao wei)
5. adept path (where there is nothing more to learn) (S. aśaikṣamārga; T. mi slob lam; C. wuxue wei)

five periods and eight teachings. [according to the Tiantai school] (C. wushi bajiao) The five major chronological periods of the Buddha's teaching (C. wushi): 1. Huay an period (C. Huay an shiqi) 2. āgamas/Deer Park period (C. ahan shiqi /Luy uan shiqi) 3. expansive (vaipuly a) Mahāy āna period (C. Fangdeng shiqi) 4. perfection of wisdom (prajñāpāramitā) period (C. bore shiqi) 5. Lotus (Saddharmapuṇḍarīkasūtra) and Nirvāṇa (Mahāparinirvāṇasūtra) scriptures period (C. Fahua Niepan shiqi)

Fourfold division of the teaching according to means of conversion (C. huay i sijiao):

1. sudden [Huay an jing] (C. dunjiao)
2. gradual [āgamas, vaipuly a, prajñāpāramitā] (C. jianjiao)
3. indeterminate (C. puding jiao)
4. secret/esoteric (C. mimi jiao)

Fourfold division of the teaching according to content [and based on the capacity of the audience] (C. huafa sijiao): 1. tripiṭaka, viz., hīnay āna (C. sanzang jiao) 2. common/shared [by both hīnay āna and Mahāy āna] (C. tongjiao) 3.

distinct/separate [Mahāy āna] (C. biejiao) 4. perfect/consummate [Lotus and Nirvāṇa sutras] (C. y uanjiao)

five powers. (S. bala; T. stobs; C. li) 1. power of faith (S. śraddhābala; T. dad pa'i stobs; C. xin li) 2. power of effort (S. vīry abala; T. brtson 'grus ky i stobs; C. jingjin li/qin li /) 3. power of mindfulness (S. smṛtibala; T. dran pa'i stobs; C. nian li) 4. power of concentration (S. samādhibala; T. ting nge 'dzin gy i stobs; C. ding li) 5. power of wisdom (S. prajñābala; T. shes rab ky i stobs; C. hui li)

five precepts. [of the laity] (S. pañcaśīla; T. tshul khrims lnga; C. wujie)

1. to abstain from killing living creatures (S. prāṇātipāta-virati; T. srog gcod pa spong ba; C. bu shasheng/li shasheng /) 2. to abstain from taking what is not given (S. adattādāna-virati; T. ma by in par len pa spong ba; C. bu toudao/li buy u qu /) 3. to abstain from engaging in sexual misconduct (S. kāmamithy ācāra- virati; T. 'dod pas log par g.y em pa spong ba; C. bu xiey in/li y u xiexing /) 4. to abstain from ly ing (often explained as ly ing about the possession of high states of attainment or superhuman powers) (S. mṛṣāvāda-virati; T. rdzun du smra ba spong ba; C. bu wangy u/li xukuang y u /) 5. to abstain from intoxicants (S. mady apāna-virati; T. my os par 'gy ur ba'i btung ba spong pa; C. bu y injiu/li y injiu /)

five pure abodes. (S. śuddhāvāsa; T. gtsang gnas; C. jing jutian) 1. free from afflictions (S. avṛha; T. mi che ba; C. wufan tian) 2. not burning/without torment (S. atapa; T. mi gdung ba; C. wure tian) 3. perfect form (S. sudṛśa; T. gy a nom snang ba; C. shanxian tian) 4. perfect vision (S. sudarśana; T. shin tu mthong ba; C. shanjian tian) 5. highest (S. akaniṣṭha; T. 'og min; C. se jiujing tian)

five royal treasure revealers. (T. gter ston rgy al po lnga)

1. Ny ang ral Ny i ma 'od zer
2. Guru Chos ky i dbang phy ug
3. Rdo rje gling pa
4. Pad ma gling pa
5. 'Jam dby ang mkhy en brtse dbang po

five sciences. (S. pañcavidy ā; T. rig pa lnga; C. wuming) 1. manual arts (S. śilpakarma[vidy ā]; T. bzo gnas ky i rig pa; C. gongqiao ming) 2. grammar (S. śabdavidy ā; T. sgra'i rig pa; C. shengming)

3. medicine (S. cikitsāvidy ā; T. gso ba'i rig pa; C. y ifangming) 4. logic (S. hetuvidy ā; T. gtan tshigs ky i rig pa; C. y inming) 5. inner knowledge (S. adhy ātmavidy ā; T. nang gi rig pa; C. neiming)

five supranormal powers. (S. abhijñā; T. mngon shes; C. shentong) 1. psy chic powers (S. ṛddhividhābhijñā; T. rdzu 'phrul gy i by a ba shes pa; C. shenjing zhizheng tong) 2. "the divine ey e"/clairvoy ance (S. divy acakṣus; T. lha'i mig; C. tiany an) 3. "the divine ear"/clairaudience (S. divy aśrotra; T. lha'i rna ba; C. tian'er) 4. knowledge of others' minds (S. paracittajñāna; T. pha rol gy i sems shes pa; C. taxin

tong) 5. knowledge of past lives (S. pūrvanivāsānusmṛti; T. sngon gy i gnas rje su dran pa; C. suzhu suinian/suming tong /)

five turbidities/degenerations. (S. kaṣāy a; T. sny igs ma; C. zhuo)
1. turbidity of the lifespan (S. ay uḥkaṣāy a; T. tshe'i sny igs ma; C. min zhuo
)
2. turbidity of views (S. dṛṣṭikaṣāy a; T. lta ba'i sny igs ma; C. jian zhuo
)
3. turbidity of afflictions (S. kleśakaṣāy a; T. ny on mongs ky i sny igs ma; C.
fannao zhuo)
4. turbidity of sentient beings (S. sattvakaṣāy a; T. sems can gy i sny igs ma;
C. zhongsheng zhuo)
5. turbidity of the age (S. kalpakaṣāy a; T. dus ky i sny igs ma; C. jie zhuo
)

five wheels/cakras. (S. cakra; T. 'khor lo; C. lun) 1. great bliss wheel [at the forehead] (S. mahāsukhacakra; T. spy i bde chen gy i 'khor lo; C. dalelun/dinglun /) 2. enjoy ment wheel [at the throat] (S. sambhogacakra; T. mgrin pa longs spy od ky i 'khor lo; C. baolun/shouy onglun/houlun //) 3. dharma wheel [at the heart] (S. dharmacakra; T. sny ing ka chos ky i 'khor lo; C. falun/xinlun /) 4. emanation wheel [at the navel] (S. nirmāṇacakra; T. lte ba sprul pa'i

'khor lo; C. huanhualun/qilun /) 5. bliss protecting wheel [at the perineum] (S. sukhapālacakra; T. bde sky ong gi 'khor lo; C. hulelun)

five wisdoms/knowledges. (S. pañcajñāna; T. y e shes lnga; C. wuzhi) 1. wisdom of the dharmadhātu (S. dharmadhātujñāna; T. chos dby ings ky i y e shes; C. fajie tixing zhi) 2. mirror-like wisdom/great perfect mirror wisdom (ādarśajñāna/mahādarśajñāna; T. me long gi y e shes; C. da y uanjing zhi) 3. wisdom of equality /knowledge of impartiality (S. samatājñāna; T. mny am ny id ky i y e shes; C. pingdeng xing zhi) 4. wisdom of specific knowledge (S. praty avekṣaṇājñāna; T. so sor rtog pa'i y e shes; C. miao guancha zhi) 5. wisdom of having accomplished what was to be done (S. kṛty ānuṣṭhānajñāna; T. by a ba grub pa'i y e shes; C. cheng suozuo zhi)

SIXES six aspects [of all phenomena in Huay an]. (C. liuxiang) 1. generic/universal aspect (C. zongxiang) 2. constituent/particular aspect (C. biexiang) 3. identity /similarity aspect (C. tongxiang) 4. differentiated aspect (C. y ixiang) 5. integrated/collective aspect (C. chengxiang) 6. disintegration/instantiated aspect (C. huaixiang)

six causes. (S. ṣaḍhetu; T. rgy u drug; C. liu y in) 1. efficient cause (S. kāraṇahetu; T. by ed pa'i rgy u; C. nengzuo y in) 2. coexistent cause (S. sahabhūhetu; T. lhan cig 'by ung ba'i rgy u; C. juy ou y in) 3. conjoined cause (S. saṃpray uktahetu; T. mtshungs ldan gy i rgy u; C. xiangy ing y in)

4. homogeneous cause (S. sabhāgahetu; T. skal mny am gy i rgy u; C. tonglei y in) 5. all-pervasive cause (S. sarvatragahetu; T. kun gro'i rgy u; C. bianxing y in) 6. retributive cause (S. vipākahetu; T. rnam smin gy i rgy u; C. y ishu y in)

six consciousnesses. (S. vijñāna; T. rnam par shes pa; C. shi)
1. visual consciousness (S. cakṣurvijñāna; T. mig gi rnam shes; C. y anshi)
2. auditory consciousness (S. śrotravijñāna; T. rna ba'i rnam shes; C. ershi)
3. olfactory consciousness (S. ghrāṇavijñāna; T. sna'i rnam shes; C. bishi)
4. gustatory consciousness (S. jihvāvijñāna; T. lce'i rnam shes; C. sheshi)
5. tactile consciousness (S. kāy avijñāna; T. lus ky i rnam shes; C. shenshi)
6. mental consciousness (S. manovijñāna; T. y id ky i rnam shes; C. y ishi)

six destinies. [of rebirth] (S. gati; T. 'gro ba; C. dao/qu /) 1. divinities (S. deva; T. lha; C. tian) 2. demigods (S. asura; T. lha ma y in; C. axiuluo) 3. humans (S. manuṣy a; T. mi; C. ren) 4. animals (S. tiry ak; T. dud 'gro; C. chusheng) 5. ghosts (S. preta; T. y i dwags; C. egui) 6. hell denizens (S. nāraka; T. dmy al ba; C. diy u)

six doctrines of Nāropa. (S. Nādapādadharma; T. Nā ro chos drug) 1. inner heat (S. caṇdaliy oga; T. gtum mo) 2. illusory body (S. māy ākāy ay oga; T. sgy u lus) 3. dreams (S. svapanay oga; T. rmi lam) 4. clear light (S. prabhāsvaray oga; T. 'od gsal) 5. intermediate state (S. antarābhavay oga; T. bar do) 6. transference (S. saṃkrāntiy oga; T. 'pho ba)

six elements. (S. dhātu; T. khams; C. da/jie /)
1. earth/solidity (S. pṛthivī; T. sa; C. di)
2. water/cohesion (S. āpas; T. chu; C. shui)
3. fire/warmth (S. tejas; T. me; C. huo)
4. wind/mobility (S. vāy u; T. rlung; C. feng)
5. space (S. ākāśa; T. nam mkha'; C. kong)
6. consciousness (S. vijñāna; T. rnam shes; C. shi)

six heavens of the sensuous realm. (S. kāmadhātu-deva; T. 'dod pa'i khams ky i lha; C. Yujie tian) 1. four great kings (S. cāturmahārājika; T. rgy al chen rigs bzhi; C. siwang tian) 2. divinities of the thirty -three (S. trāy astriṃśa; T. sum cu rtsa gsum; C. daoli tian/sanshisan tian /) 3. free from conflict (S. y āma; T. 'thab bral; C. y emo tian) 4. contented (S. tuṣita; T. dga' ldan; C. doushuai[tuo] tian []) 5. enjoy ment of creation (S. nirmāṇarati; T. 'phrul dga'; C. huale tian) 6. divinities who have power over the creations of others/divinities who partake of the pleasures

created in other heavens (S. paranirmitavaśavartin; T. gzhan ’phrul dbang by ed; C. tahua zizai tian)

six intermediate states. (S. antarābhava; T. bar do) 1. intermediate state of the present lifetime (S. jaty antarābhava; T. sky e gnas rang bzhin gy i bar do) 2. intermediate state of absorption (S. samādhy antarābhava; T. bsam gtan gy i bar do) 3. intermediate state of dreams (S. svapanāntarābhava; T. rmi lam gy i bar do) 4. intermediate state of the moment of death (S. mumūrṣāntarābhava; T. ’chi kha’i bar do) 5. intermediate state of dharmatā (S. dharmatāntarābhava; T. chos ny id bar do) 6. intermediate state of existence (S. bhavāntarābhava; T. srid pa bar do)

six-limbed yoga [of the Kālacakratantra]. (S. ṣaḍaṅgay oga; T. sby or drug)

1. retraction (T. sor sdud)
2. concentration (T. bsam gtan)
3. breath control (T. srog ’dzin)
4. retention of the complete deity (T. sku ril bur ’dzin pa)
5. recollection (T. rjes su dran pa)
6. contemplation (T. ting nge ’dzin)

six non-Buddhist teachers. (S. tīrthika-śāstṛ; T. mu stegs can gy i ston pa; C. waidaoshi) 1. Pūraṇa-Kāśy apa (T. ’Od srung rdzogs by ed; C. Fulanna jiashe) 2. Maskarin Gośālīputra (T. Kun tu rgy u gnag lhas ky i bu; C. Moqieli jusheli/Moqieli jushelizi /) 3. Ajita Keśakambala (T. Mi pham sgra’i la ba can; C. Aqiduo chishe qinpoluo) 4. Kakuda Kāty āy ana (T. Ka ty a’i bu nog can; C. Jialuo jiutuo jiazhany an) 5. Nirgrantha-Jñātīputra (T. Gcer bu pa gny en gy i bu; C. Nijiantuo Ruotizi /) 6. Sañjay a Vairā ṭīputra (T. Smra ’dod ky i bu mo’i bu y ang dag rgy al ba can; C. Shanduy e pily u zhizi)

six ornaments of the world. (T. ’dzam gling rgy an drug)

1. Nāgārjuna (T. Klu sgrub)
2. Āry adeva (T. ’Phags pa lha)
3. Asaṅga (T. Thogs med)
4. Vasubandhu (T. Dby ig gny en)
5. Dignāga (T. Phy ogs glang)
6. Dharmakīrti (T. Chos ky i grags pa)

six perfections. (S. pāramitā; T. pha rol tu phy in pa; C. du/boluomi /) 1. giving/generosity (S. dāna, T. sby in pa; C. bushi/tan /) 2. morality (S. śīla; T. tshul khrims; C. chijie/shiluo /)

3. patience/forbearance (S. kṣānti; T. bzod pa; C. renru/chanti /) 4. effort/vigor (S. vīry a; T. brtson ’grus; C. jingjin/piliy e /) 5. meditative absorption (S. dhy āna; T. bsam gtan; C. jinglü/chan /) 6. wisdom (S. prajñā; T. shes rab; C. zhihui/bore /)

six recollections. (S. anusmṛti; T. rjes su dran pa; C. nian) 1. recollection of the buddha (S. buddhānusmṛti; T. sangs rgy as rjes su dran pa; C. nianfo) 2. recollection

of the dharma (S. dharmānusmṛti; T. chos rjes su dran pa; C. nianfa) 3. recollection of the saṃgha (S. saṃghānusmṛti; T. dge ’dun rjes su dran pa; C. nianseng) 4. recollection of morality (S. śīlānusmṛti; T. tshul khrims rjes su dran pa; C. nianjie) 5. recollection of charity (S. ty āgānusmṛti; T. gtong ba rjes su dran pa; C. nianshi) 6. recollection of the divinities (S. devatānusmṛti; T. lha rjes su dran pa; C. niantian)

six sense faculties/sense bases. (S. indry a; T. dbang po; C. gen) 1. visual faculty (S. cakṣurindriy a; T. mig gi dbang po; C. y angen) 2. auditory faculty (S. śrotrendriy a; T. rna ba’i dbang po; C. ergen) 3. olfactory faculty (S. ghrāṇendriy a; T. sna’i dbang po; C. bigen) 4. gustatory faculty (S. jihvendriy a; T. lce’i dbang po; C. shegen) 5. tactile faculty (S. kāy endriy a; T. lus ky i dbang po; C. shengen) 6. mental faculty (S. manendriy a; T. y id ky i dbang po; C. y igen)

six superknowledges/supramundane powers. (S. abhijñā; T. mngon par shes pa; C. shentong) 1. psy chic powers (S. ṛddhividhi; T. rdzu ’phrul gy i by a ba shes pa’i mngon shes; C. shenjing/shenzu [zhizheng] tong /[]) 2. “the divine ey e”/clairvoy ance (S. divy acakṣus; T. lha’i mig gi mngon shes; C. tiany an [zhizheng] tong []) 3. “the divine ear”/clairaudience (S. divy aśrotra; T. lha’i rna ba’i mngon shes; C. tian’er [zhizheng] tong [])

4. knowledge of other’s minds (S. paracittājñāna; T. pha rol gy i sems shes pa’i mngon shes; C. taxin [zhizheng] tong []) 5. knowledge of past lives (S. pūrvanivāsānusmṛti; T. sngon gy i gnas rje su dran pa’i mngon shes; C. suzhu suinian zhizheng tong/suming [zhizheng] tong []/[]) 6. knowledge of the extinction of the contaminants (S. āsravakṣay ajñāna; T. zag pa zad pa’i mngon shes; C. loujin [zhizheng] tong [])

six tantras. (T. rgy ud sde drug; C. dateluo)

1. kriy ātantra (T. by a rgy ud)

2. cary ātantra (T. spy od rgy ud)

3. y ogatantra (T. rnal ’by or rgy ud)

4. mahāy ogatantra (T. rnal ’by or chen po’i rgy ud)

5. anuy ogatantra (T. rje su rnal ’by or rgy ud)

6. atiy ogatantra (T. shin tu rnal ’by or rgy ud)

SEVENS seven-branch service. (S. saptāṅgavidhi; T. y an lag bdun pa; C. qizhi zuofa)

1. obeisance (S. vandanā; T. phy ag ’tshal ba; C. lijing zhufo)

2. offerings (S. pūjana; T. mchod pa phul ba; C. guangxiu gongy ang)

3. confession of transgressions (S. pāpadeśanā; T. sdig pa bshags pa; C. chanhui y ezhang)

4. admiration/joy (S. anumodana; T. rjes su y i rang ba; C. suixi gongde)

5. request [to turn the wheel of dharma] (S. saṃcodana; T. bskul ba; C. qing zhuan falun)
6. request [to remain in the world] (S. prārthanā; T. gsol ba; C. qingfo zhushi
)
7. dedication of merit (S. pariṇāmanā; T. bsngo ba; C. pujie huixiang
)
seven buddhas [of the past]. (S. saptatathāgata; T. sangs rgy as rabs bdun; C. qifo
)
1. Vipaśy in (T. Rnam gzigs; C. Piposhi[fo] [])
2. Śikhin (T. Gtsug gtor can; C. Shiqi[fo] [])
3. Viśvabhū (T. Kun sky obs; C. Pishepo[fo] [])
4. Krakucchanda (T. Log pa dang sel; C. Juliusun[fo] [])
5. Kanakamuni (T. Gser thub; C. Junahanmouni[fo] [])
6. Kāśy apa (T. 'Od srung; C. Jiashe[fo] []
7. Śāky amuni (T. Shāky a thub pa; C. Shijiamouni)
seven factors of enlightenment/limbs of awakening. (S. bodhy aṅga; T. by ang chub y an lag; C. juezhi/putifen /) 1. mindfulness (S. smṛti; T. dran pa; C. nian) 2. investigation of states (S. dharmapravicay a; T. chos rab tu rnam par 'by ed pa; C. zefa) 3. perseverance/energy (S. vīry a; T. brtson 'grus; C. jingjin) 4. rapture/bliss (S. prīti; T. dga' ba; C. xi) 5. tranquility (S. praśrabdhi; T. shin y u sby angs pa; C. qingan) 6. concentration (T. samādhi; T. ting nge 'dzin; C. ding) 7. equanimity (S. upekṣā; T. btang sny oms; C. she)

seven jewels [of a cakravartin]. (S. ratna; T. rin chen; C. [lunwang]bao [ ]) 1. wheel [chariot] (S. cakraratna; T. 'khor lo rin po che; C. lunbao) 2. precious jewel (S. maṇiratna; T. nor bu rin po che; C. [moni]zhubao [ ]) 3. queen (S. strīratna; T. btsun mo rin po che; C. nübao) 4. minister (S. pariṇāy akaratna; T. blon po rin po che; C. jushi bao/zhuzang bao /) 5. elephant (S. hastiratna; T. glang po rin po che; C. xiangbao) 6. general (S. senāpatiratna; T. dmag dpon rin po che; C. zhubingchen bao/jiangjun bao /) 7. horse (S. aśvaratna; T. rta mchog rin po che; C. mabao)

seven men who were tested. (T. sad mi mi bdun) The first monks ordained in Tibet:

1. Sba khri gzigs, ordained as Śrīghoṣa (Dpal dby angs)
2. Sba gsal snang, ordained as Jñānendra (Ye shes dbang po)
3. Sba khri bzher/bzhir
4. Ba gor Vairocana, or Vairocanarakṣita
5. Rma rin chen mchog
6. Rgy al ba mchog dby angs
7. 'Khon Klu'i dbang po srung ba, or Nāgendrarakṣita

seven-point posture of Vairocana. (T. Rnam snang gi chos bdun) 1. legs in the vajra posture (T. rkang ba sky il krung) 2. hands in the positions of equipoise (T. lag pa mny am bzhag) 3. spine straight (T. sgal tshigs drang por bsrang ba) 4. neck slightly bent (T. mgrin cung zad gug pa) 5. shoulders spread like the wings of a vulture (T. dpung ba rgod gshog ltar brky angs pa) 6. gaze resting at the tip of the nose (T. mig sna rtser phabs pa) 7. tongue touching the palate (T. lce y a rkan la sby ar ba)

seven riches/prizes. (S. saptadhana; T. 'phags pa'i nor bdun; C. qi cai) 1. faith/confidence (S. śraddhā; T. dad pa; C. xin) 2. vigor/effort (S. vīry a; T. brtson 'grus; C. jingjin) 3. morality (S. śīla; T. tshul khrims; C. jie) 4. shame and fear of blame/decency and modesty (S. hrīapatrāpy a; T. ngo tsha shes pa khrel y od pa; C. cankui) 5. learning (S. śruta; T. thos pa; C. wen) 6. relinquishment/renunciation (S. prahāṇa/ty āga; T. spang ba/gtong ba; C. duan/shi /) 7. wisdom (S. prajñā; T. shes rab; C. hui)

EIGHTS eight classes of non-human beings. (S. aṣṭasenā; T. lha srin sde brgy ad/mi ma y in; C. tianlong babu) 1. divinities (S. deva; T. lha; C. tian) 2. serpents (S. nāga; T. klu; C. long)

3. demons (S. y akṣa; T. gnod sby in; C. y echa) 4. demigods (S. asura; T. lha ma y in; C. axiuluo) 5. divine musicians (S. gandharva; T. dri za; C. gantapo) 6. my thical birds (S. garuḍa; T. khy ung, mkha' lding; C. jialouluo 7. half-horse, half-human beings (S. kiṃnara; T. mi 'am ci; C. jinnaluo) 8. great snakes (S. mahorāga; T. lto 'phy e chen po; C. mohouluojia)

eight close sons. See EIGHT GREAT BODHISATTVAS.

eight common accomplishments. (S. sādhāraṇasiddhi; T. thun mong gi dngos grub; C. gongtong chenjiu) 1. medicinal pills (S. gulikā; T. ril bu; C. miaodan) 2. ey e medicine (S. añjana; T. mig sman; C. y any ao) 3. swift-footedness (S. jaṅghākara; T. rkang mgy ogs; C. tuzu) 4. going beneath the earth (S. pātāla; T. sa 'og; C. tuxing) 5. enchanted sword (S. khaḍga; T. ral gri; C. baojian) 6. traveling through the sky (S. khecara; T. rnam mkha' phur ba; C. kongxing) 7. invisibility (S. antardhāna; T. mi snang ba; C. y inxing) 8. immortality (S. amṛta; T. 'chi med; C. busi)

eight consciousnesses. (S. vijñāna; T. rnam shes; C. shi)
1. visual consciousness (S. cakṣurvijñāna; T. mig gi rnam shes; C. y anshi
)
2. auditory consciousness (S. śrotravijñāna; T. rna ba'i rnam shes; C. ershi
)
3. olfactory consciousness (S. ghrāṇavijñāna; T. sna'i rnam shes; C. bishi
)
4. gustatory consciousness (S. jihvāvijñāna; T. lce'i rnam shes; C. sheshi
)
5. tactile consciousness (S. kāy avijñāna; T. lus ky i rnam shes; C. shenshi

)
6. mental consciousness (S. manovijñāna; T. y id ky i rnam shes; C. y ishi
)
7. afflicted mental consciousness (S. kliṣṭamanas; T. ny on y id; C. mona shi
)
8. storehouse consciousness (S. ālay avijñāna; T. kun gzhi'i rnam shes; C.
alaiy e shi)

eight episodes in the life of a buddha. (S. aṣṭabuddhakāry a, T. sangs rgy as ky i mdzad pa brgy ad; C. baxiang) 1. descending from tuṣita heaven (T. dga' ldan gy i gnas nas 'pho ba; C. doushuai jiangshi) 2. entry into the womb (T. lhums su zhugs pa; C. rutai) 3. birth (T. sku bltams pa; C. chutai) 4. renouncing the world (T. rab tu by ung ba; C. chujia) 5. subjugating Māra (T. bdud btul ba; C. xiangmo) 6. attaining enlightenment (T. mngon par rdzogs par sangs rgy as pa; C. chengdao) 7. turning the wheel of the dharma (dharmacakrapravartana) (T. chos ky i 'khor lo bskor ba; C. zhuan falun) 8. passing into parinirvāṇa (T. my a ngan las 'das pa; C. ru niepan
)

eightfold noble path. (S. āry āṣṭāṅgamārga; T. lam y an lag brgy ad; C. bazhengdao/bashengdao /) 1. right views (S. samy agdṛṣṭi; T. y ang dag pa'i lta ba; C. zhengjian) 2. right intention (S. samy aksaṃkalpa; T. y ang dag pa'i rtog pa; C. zhengzhi/zhengsiwei /) 3. right speech (S. samy agvāk; T. y ang dag pa'i ngag; C. zhengy u) 4. right action (S. samy akkarmānta; T. y ang dag pa'i las ky i mtha'; C. zhengy e) 5. right livelihood (S. samy agājīva; T. y ang dag pa'i 'tsho ba; C. zhengming) 6. right effort (S. samy agvy āy āma; T. y ang dag pa'i rtsol ba; C. zhengqin/zheng jingjin /) 7. right mindfulness (S. samy aksmṛti; T. y ang dag pa'i dran pa; C. zhengnian) 8. right concentration (S. samy aksamādhi; T. y ang dag pa'i ting nge 'dzin; C. zhengding)

eight great bodhisattvas. (S. mahā-upaputra; T. ny e sras; C. bada suifo dizi/bada fozi /) 1. Mañjuśrī (T. 'Jam dpal; C. Wenshu pusa) 2. Vajrapāṇi (T. Phy ag na rdo rje; C. Jingan shou pusa) 3. Avalokiteśvara (T. Spy an ras gzigs dbang phy ug; C. Guany in pusa) 4. Kṣitigarbha (T. Sa'i sny ing po; C. Dizang pusa) 5. Sarvanīvaraṇaviṣkambhin (T. Sgrib pa thams cad rnam par sel ba; C. Chu gaizhang pusa) 6. Ākāśagarbha (T. Nam mkha'i sny ing po; C. Xukongzang pusa) 7. Maitrey a (T. By ams pa; C. Mile pusa) 8. Samantabhadra (T. Kun tu bzang po; C. Puxian pusa)

eight great chariots of the practice lineage. (T. sgrub brgy ud shing rta chen po brgy ad) 1. ancient translation tradition (T. sna' 'gy ur rny ing ma) 2. tradition of precepts and instructions (T. bka' gdams) 3. tradition of the path and result (T. lam 'bras) 4. tradition of the transmitted precepts of Marpa (T. Mar pa bka' brgy ud) 5. tradition of the transmitted precepts of the Shang Valley (T. Shangs pa bka' brgy ud) 6. traditions of pacification and severence (T. zhi by ed gcod) 7. tradition of vajray oga (T. rdo rje'i rnal 'by or) 8. propitiation and attainment of the three adamantine states (T. rdo rje gsum

gy i bsny en sgrub)

eight great charnel grounds. (S. mahāśmaśāna, śmaśāna; T. dur khrod chen po; C. da shilin/ da hanlin /) 1. most fierce (S. caṇḍogrā; T. gtum drag; C. baonue hanlin) 2. dense thicket (S. gahvara; T. tshang tshing ’khrigs pa; C. micong hanlin) 3. blazing vajra (S. vajrajvala; T. rdo rje bar pa; C. jingangy an hanlin) 4. endowed with skeletons (S. karaṅkin; T. keng rus can; C. gusuo hanlin)

5. cool grove (S. śītavana; T. bsil bu tshal; C. hanlin)

6. black darkness (S. ghorāndhakāra; T. mun pa nag po; C. y ouan hanlin)

7. resonant with “kilikili” (S. kilikilārava; T. ki li ki lir sgra sgrog pa; C. jiujiu hanlin)

8. cries of “ha ha” (S. aṭṭahāsa; T. ha ha rgod pa; C. kuangxiao hanlin)

eight great fears. (S. mahābhay a; T. ’jigs pa chen po; C. nan) 1. lions (S. siṃha; T. seng ge; C. shi nan) 2. elephants (S. hastināga; T. glang po che; C. xiang nan) 3. fire (S. agni; T. me; C. huo nan) 4. snakes (S. sarpa; T. sbrul ; C. duchong nan) 5. thieves (S. taskara; T. rkun po; C. zei nan) 6. violent waters (S. jalārṇava; T. chu bo; C. shui nan) 7. imprisonment (S. nigaḍa; T. lcags sgrog; C. lao[y u] nan []) 8. demons (S. piśāca; T. sha za; C. feiren nan/mo nan /)

eight liberations. (S. vimokṣa; T. rnam thar ; C. jietuo/beishe /)

1. embodied, one sees forms [of the realm of subtle materiality] (S. rūpī rūpāṇi paśy ati; T. gzugs can gzugs rnams la lta ba’i rnam thar; C. neiy ou sexiang guan zhuse) 2. without perceiving inward form [viz., one’s own phy sical body], one sees outward forms [of the realm of subtle materiality] (S. adhy ātmarūpasamjñī bahirdhā rūpāṇi paśy ati; T. nang gzugs med par ’du shes las phy i rol gy i gzugs rnams la lta ba’i rnam thar; C. nei wusexiang guan waise) 3. one develops determination by contemplating the beautiful/one becomes resolved on what is lovely (S. śubham ity evādhimukto bhavati; T. sdug pa’i rnam thar; C. jing jietuo shenzuozheng juzu zhu) 4. the sphere of infinite space (S. ākāśānanty āy atana; T. nam mkha’ mtha’ y as sky e mched ky i rnam thar; C. ru wubiankong kong wubianchu juzu zhu/kong wubianchu juzu zhu /

) 5. the sphere of infinite consciousness (S. vijñānānty āy atana; T. rnam shes mtha’ y as sky e mched ky i rnam thar; C. ru wubian shi shiwubian chu juzu zhu/shi wubianchu juzu zhu /) 6. the sphere of nothingness (S. ākiñcany āy atana; T. ci y ang med pa’i sky e mched ky i rnam thar; C. ru wusuoy ou wu suoy ouchu juzu zhu/wusuoy ouchu juzu zhu /) 7. the sphere of neither perception nor nonperception (S. naivasaṃjñānāsaṃjñāy atana; T. ’du shes med ’du shes med min sky e mched ky i rnam thar; C. ru feixiang feifeixiangchu juzu zhu/feixiang feifeixiangchu juzu zhu /) 8. the cessation of

perception and sensation (S. samjñāveday itanirodha; T. ’du shes dang tshor ba ’gog pa’i rnam thar; C. ru shouxiangmie shenzuozheng juzu zhu/miexiangshouding juzu zhu /)

eight manifestations of the Guru [Rin po che]. (T. guru mtshan brgy ad)
1. Padmākara
2. Padmasambhava
3. Blo ldan mchog sred
4. Shāky a Seng ge
5. Seng ge sgra grogs
6. Padma rgy al po
7. Rdo rje gro lod
8. Ny i ma ’od zer

eight noble persons. (S. aṣṭāry apudgala; T. ’phags pa’i gang zag brgy ad; C. baxiansheng) 1. candidate for the fruit of stream-enterer (S. srotaāpannaphalapratipannaka; T. rgy un du zhugs pa’i ’bras bu la zhugs pa; C. y uliu xiang) 2. recipient of the fruit of stream-enterer (S. srotaāpannaphalastha; T. rgy un du zhugs pa’i ’bras bu la gnas pa; C. zheng y uliu guo) 3. candidate for the fruit of once-returner (S. sakṛdāgāmiphalapratipannaka; T. phy ir ’ong gi ’bras bu la zhugs pa; C.

y ilai xiang) 4. recipient of the fruit of once-returner (S. sakṛdāgāmiphalastha; T. phy ir ’ong gi ’bras bu la gnas pa; C. zheng y ilai guo) 5. candidate for the fruit of non-returner (S. anāgāmiphalapratipannaka; T. phy ir mi ’ong gi ’bras bu la zhugs pa; C. buhuan xiang) 6. recipient of the fruit of non-returner (S. anāgāmiphalastha; T. phy ir mi ’ong gi ’bras bu la gnas pa; C. zheng buhuan guo) 7. candidate for worthy one (S. arhatphalapratipannaka; T. dgra bcom pa’i ’bras bu la zhugs pa; C. aluohan xiang) 8. worthy one (S. arhat; T. dgra bcom pa; C. zheng aluohan guo)

eight opportune births. (S. kṣaṇa; T. dal ba; C. y uanli banan/y uanli ba wuxia /) Freedom from rebirth: 1. as a denizen of the hells (S. nāraka; T. dmy al ba; C. zai diy u nan) 2. as a ghost (S. preta; T. y i dwags; C. zai egui nan) 3. as an animal (S. tiry ak; T. dud ’gro; C. zai chusheng nan) 4. as a long-lived divinity (S. dīrghāy urdeva; T. lha tshe ring bo; C. zai changshou tian nan) 5. in a border region (S. praty antajanapada; mtha’ ’khob ky i mi; C. zai biandi zhi y udany ue nan) 6. with impaired sense faculties (S. indriy avaikaly a; T. dbang po ma tshang ba; C. manglong y iny a nan) 7. holding erroneous views (S. mithy ādarśana; T. log par lta ba; C. shizhi congbian nan) 8. in a land where a tathāgata has not appeared (S. tathāgatānutpāda; T. de bzhin gshegs pa ma by ung ba; C. shengzai foqian fohou nan)

eight precepts. [of the laity on upoṣadha day s] (S. aṣṭāṅgasamanvāgatam upavāsam/poṣadhaśīla; T. bsny en gnas y an lag brgy ad; C. baguan zhai jie/ba

zhaijie/ba guan zhai/ba jiezhai ///) 1. not to kill living beings (S. prāṇātipāta-virati; T. srog gcod pa spong ba; C. li shasheng)

2. not to steal (S. adattādāna-virati; T. ma by in par len pa spong ba; C. li buy u qu) 3. not to engage to sexual activity (S. abrahmacary a-virati; T. mi tshangs par spy od pa spong pa; C. li feifanxing) 4. not to lie [about spiritual attainments] (S. mṛṣāvāda-virati; T. rdzun du smra ba spong ba; C. li xukuangy u) 5. not to use intoxicants (S. mady apāna-virati; T. my os par 'gy ur ba'i btung ba spong pa; C. li y in zhujiu) 6. not to eat at improper times [viz. after twelve noon] (S. vikālabhojana-virati; T. dus ma y in pa'i kha zas spong pa; C. li feishi shi) 7. not to use perfumes, garlands, or cosmetics and not to sing, dance, play music, or attend entertainments (S. gandhamāly avilepanavarṇakadhāraṇa-virati [nṛty agīta-virati]; T. spos dang kha dog dang by ug pa dang phreng ba thogs pa spong pa [glu gar spong pa]; C. li tushi xingman[li gewu guanting] [ ]) 8. not to sleep on high and luxurious beds (S. uccaśay anamahāśay ana- virati; T. khri stan mthon po dang khri stan chen po spong pa; C. li y anzuo gaoguang y anli chuangzuo)

eight similes of illusion. (S. aṣṭamāy opamā; T. sgy u ma'i dpe brgy ad; C. ruhuan y u) Dharmas lack inherent nature (svabhāva), because they are like a: 1. dream (S. svapna; T. rmi lam; C. meng) 2. illusion (S. māy ā; T. sgy u ma; C. huanjing) 3. optical illusion (S. pratibhāsa; T. mig y or; C. guangy ing) 4. mirage (S. marīci; T. smig rgy u; C. y angy an) 5. reflection of the moon in water (S. udakacandra; T. chu zla; C. shui zhong y ue) 6. echo (S. pratiśabda; T. brag cha; C. y uxiang) 7. city of the gandharvas (S. gandharvanagara; T. dri za'i grong khy er; C. xunxiang cheng/gantapo cheng /) 8. phantom (S. nirmita; T. sprul pa; C. huashen)

eight stūpas. (S. stūpa; T. mchod rten; C. dalingta) 1. heap of lotuses stūpa (T. pad spungs mchod rten), commemorating the

Buddha's birth at Lumbinī 2. enlightenment stūpa (T. by ang chub mchod rten) at Bodhgay ā 3. many auspicious doors stūpa (bkra shis sgo mang mchod rten), commemorating the first turning of the wheel of the dharma at Ṛṣipatana/Sārnāth 4. display of miracles stūpa (T. cho 'phrul mchod rten), commemorating the Buddha's display of the paired miracles at Śrāvastī 5. divine descent stūpa (T. lha babs mchod rten), commemorating the Buddha's descent from the trāy astriṃśa heaven at Saṃkāśy a. 6. settling of disputes stūpa (T. dby en bsdums mchod rten), commemorating the Buddha's healing of the schism caused by Devadatta 7. victory stūpa (T. rnam rgy al mchod rten), commemorating the Buddha's extension of his life by three months at the Cāpālacaity a 8. nirvāṇa stūpa (T. my ang 'das mchod rten), commemorating the Buddha's passage into parinirvāṇa at Kuśinagarī.

eight sufferings. (S. aṣṭaduḥkha; T. sdug bsngal rgy ad; C. baku) 1. birth (S. jāti; T. sky e ba; C. shengku) 2. aging (S. jarā; T. rga ba; C. laoku) 3. sickness (S. vy ādhi; T. na ba; C. bingku) 4. death (S. maraṇa; T. 'chi ba; C. siku) 5. separation from what is dear (S. priy avipray oga; T. sdug pa dang bral ba; C. ai bieli ku) 6. encountering

what is not dear (S. apriy asaṃpray oga; T. mi sdug pa dang phrad pa; C. y uanzeng hui ku) 7. not finding what one seeks (S. y ad apīcchay ā pary eṣamāṇo na labhate; T. ’dod pa btshal gy ang ma rny ed pa; C. qiu bude ku) 8. the five aggregates that are objects of clinging (S. pañcopādānaskandha; T. ny e bar len pa’i phung po; C. wu quy un ku)

eight vidyādharas. (T. rig ’dzin brgy ad)
1. Vimalamitra
2. Hūṃkara
3. Mañjuśrīmitra
4. Nāgārjuna
5. Padmasambhava
6. Dhanasaṃskṛta
7. Rambuguhy a-Devacandra
8. Śāntigarbha

eight worldly concerns. (S. lokadharma; T. ’jig rten chos; C. [shi]feng []) 1. gain (S. lābha; T. rny ed pa; C. li) 2. loss (S. alābha; T. ma rny ed pa; C. shuai) 3. pleasure (S. sukha; T. bde ba; C. le) 4. pain (S. duḥkha; T. sdug bsny al; C. ku) 5. fame (S. y aśas; T. sny an grags; C. y u) 6. disgrace (S. ay aśas; T. ma grags pa; C. hui) 7. praise (S. praśaṃsā; T. bstod pa; C. cheng) 8. blame (S. nindā; T. smad pa; C. ji)

NINES nine attainments of successive stations of equipoise. (S. anupūrvavihārasamāpatti; T. mthar gy is gnas pa’i sny oms par ’jug pa; C. ru jiujing chan/cidi ding /) (1–4) the four absorptions of the realm of subtle materiality (S. dhy āna/rūpāvacaradhy āna; T. bsam gtan bzhi; C. sichan/ding /) (5–8) the four absorptions of the immaterial realm (S. ārūpy āvacaradhy āna; T. gzhugs med bzhi; C. si wuse ding) (9) attainment of the cessation of perception and sensation/equipoise of cessation (S. saṃjñāveday itanirodha/alt. nirodhasamāpatti; T. ’gog pa’i sny oms par ’jug pa; C. xiangshou mie[jin] ding/ shouxiang mie[jin] ding []/[])

nine categories of scripture. (BHS. navāṅga[pravacana]; T. gsung rab y an lag dgu; C. jiu bu jing) 1. discourses (S. sūtra; T. mdo; C. qijing/changhang /) 2. aphorisms in mixed prose and verse (S. gey a; T. dby angs bsny ad; C. y ingsong)

3. prophetic teachings (S. vy ākaraṇa; T. lung bstan; C. jibie/shouji /) 4. verses (S. gāthā; T. tshig bcad; C. fengsong/guqi /) 5. utterances/meaningful expressions (S. udāna; T. ched du brjod pa; C. zishuo) 6. framing stories (S. nidāna/itivṛttaka; T. gleng gzhi; C. y iny uan) 7. expanded teachings (S. vaipuly a; T. shin tu rgy as pa; C. fangguang) 8. tales of previous lives (S. jātaka; T. sky es rabs; C. bensheng) 9. marvelous events (S. adbhutadharma; T. rmad du by ung ba; C. xifa)

nine foulness contemplations/nine contemplations on the impure. (S. aśubhabhāvanā/aśubhasaṃjñā; T. mi sdug pa’i ’du shes; C. bujing guan/bujing xiang /) Contemplation of: 1. a swollen corpse [bloating and tumefaction] (S. vy

ādhmātakasaṃjñā; T. rnam par bam pa’i ’du shes; C. zhangxiang) 2. a worm-eaten, rotting corpse (S. vipadumakasaṃjñā; T. rnam par ’bus gzhig pa’i ’dus shes; C. huaixiang) 3. a festering corpse [discharging pus] (S. vipūy akasaṃjñā; T. rnam par rnags pa’i ’dus shes ; C. nonglan xiang) 4. a bloody corpse (S. vilohitakasaṃjñā; T. rnam par dmar ba’i ’du shes; C. xietu xiang) 5. a blueish corpse [mottled discoloration] (S. vinīlakasaṃjñā; T. rnam par bsngos pa’i ’du shes; C. qingy u xiang) 6. a corpse being devoured by worms and maggots (S. vikhāditakasaṃjñā; T. rnam par zos ba’i ’du shes; C. danxiang) 7. a scattered corpse [dissolution of flesh and exposure of bones and sinews] (S. vikṣiptakasaṃjñā; T. rnam par mthor ba’i ’du shes; C. sanxiang) 8. a burned corpse [cremated remains] (S. vidagdhakasaṃjñā; T. rnam par tshig pa’i ’du shes; C. shaoxiang) 9. a skeleton (S. asthisaṃjñā; T. rus gong gi ’du shes; C. guxiang)

nine similes [for the presence of the tathāgatagarbha]. (S. navodāharaṇāni; T.

dpe dgu; C. jiu y u) The tathāgatagarbha is present:

1. like a statue of the buddha in a soiled lotus (S. buddhaḥ kupadme; T. sangs rgy as pad ngan; C. weihua zhong zhufo) 2. like honey in beehives (S. madhu makṣikāsu; T. sbrang rtsi sbrang ma la; C. zhongfeng zhong meimi) 3. like kernels in husks (S. tuṣeṣu sārāṇi; T. sbun pa sny ing po; C. pi deng zhong shi) 4. like gold in filth (S. aśucau suvarṇam; T. mi gtsang nang na gser; C. fenhui zhong zhenjin) 5. like treasure under the ground (S. nidhiḥ kṣitau; T. sa la gter; C. di zhong zhenbao zang) 6. like the stages beginning with the sprout in a tiny seed (S. alpaphale ’ṅkurādi; T. my ug sogs ’bras chung; C. zhu guozi zhong y a) 7. like a conqueror’s body in sodden clothes (S. praklinnavastreṣu jinātmabhāvaḥ; T. gos hrul nang na rgy al ba’i sku; C. xiugu bihuai y i changuo zhenjin xiang) 8. like roy alty in the womb of a common woman (S. jaghany anārījaṭhare nṛpatvaṃ; T. bud med ngan ma’i lto na mi bdag; C. pinjian choulou nü huai zhuanlun shengwang) 9. like a precious image buried in the mud (S. mṛtsu ca ratnabimbam; T. sa la rin chen gzugs; C. jiaohei nimo zhong y oushang miaobao xiang)

nine vehicles. (S. y āna; T. theg pa dgu) 1. śrāvakay āna (T. ny an thos ky i theg pa) 2. praty ekabuddhay āna (T. rang rgy al gy i theg pa) 3. bodhisattvay āna (T. by ang sems ky i theg pa) 4. kriy ātantra (T. by a rgy ud ky i theg pa) 5. cary ātantra (T. spy od pa’i rgy ud ky i theg pa) 6. y ogatantra (T. rnal ’by or gy i rgy ud ky i theg pa) 7. mahāy ogatantra (T. rnal ’by or chen po’i rgy ud ky i theg pa) 8. anuy ogatantra (T. rjes su rnal ’by or gy i rgy ud ky i theg pa) 9. atiy ogatantra (T. shin tu rnal ’by or gy i rgy ud ky i theg pa)

TENS

ten dharma activities. (S. dharmacary a; T. chos spy od; C. faxing) 1. writing (S. lekhana; T. y i ge ’bri pa; C. shuxie) 2. worship (S. pūjā; T. mchod pa; C. gongy ang) 3. charity (S. dāna; T. sby in pa; C. shita) 4. listening/learning (S. śravaṇa; T. ny an ba; C. tingwen) 5. reading (S. vācana; T. klog pa; C. pidu) 6. comprehending (S.

udgrahaṇa; T. ’dzin pa; C. shouchi) 7. instructing (S. prakāśana; T. rab tu ston pa; C. kaiy an) 8. reciting (S. svādhy āy a; T. kha ’don by ed pa; C. fengsong) 9. contemplation (S. cintana; T. sems pa; C. siwei) 10. meditation (S. bhāvanā; T. sgom pa; C. xiuxi)

ten directions. (S. daśadiś; T. phy ogs bcu; C. shifang) 1. east (S. pūrvā; T. shar; C. dong) 2. southeast (S. pūrvadakṣiṇā; T. shar lho; C. dongnan) 3. south (S. dakṣiṇā; T. lho; C. nan) 4. southwest (S. dakṣiṇapaścimā; T. lho nub; C. xinan) 5. west (S. paścimaḥ; T. nub; C. xi) 6. northwest (S. paścimōttarā; T. nub by ang; C. xibei) 7. north (S. uttaraḥ; T. by ang; C. bei) 8. northeast (S. uttarapūrvā; T. by ang shar; C. dongbei) 9. zenith (S. ūrdhvam; T. bla ma; C. shang) 10. nadir (S. adhaḥ; T. ’og; C. xia)

ten endowments. (T. ’by or ba bcu)

One has taken rebirth:
1. as a human (T. mi)
2. in a central land (T. y ul dbus)
3. with complete sense faculties (T. dbang po tshang ba)
4. not engaging in mistaken actions (T. las ky i mtha’ ma log pa)
5. having faith (T. gnas la dad pa)and when:
1. a buddha has appeared in the world (T. sangs rgy as ’jig rten du by on pa)
2. he has taught the dharma (T. des dam pa’i chos ston pa)
3. his teaching remains (T. bstan pa gnas pa)
4. it has followers (T. de’i rjes su ’jug pa) 5. they kindly act on behalf of others (T. gzhan phy ir sny ing brtse ba)

ten fetters. (S. saṃy ojana; T. kun tu sby or ba; C. jie) 1. view of a perduring self (S. satkāy adṛṣṭi; T. ’jig lta; C. shenjian) 2. attachment to rules and rituals (S. śīlavrataparāmarśa; T. tshul khrims brtul zhugs mchog ’dzin; C. jiejin qu) 3. skeptical doubt (S. vicikitsā; T. the tshom; C. y i) 4. craving for sensual gratification (S. kāmacchanda; T. ’dod pa’i ’dun pa; C. tany u) 5. malice (S. vy āpāda; T. zhe sdang; C. chenhui) 6. craving for the realm of subtle materiality (S. rūparāga; T. gzugs ky i sred pa; C. seai) 7. craving for the immaterial realm (S. ārūpy arāga; T. gzugs med pa na spy od pa’i sred pa; C. wuseai) 8. conceit (S. māna; T. nga rgy al; C. man) 9. delusion (S. moha; gti mug; C. wuming) 10. restlessness (S. auddhaty a; T. rgod pa; C. diaoju)

ten fundamental afflictions. (S. mūlakleśa; T. rtsa ny on; C. shi/huo/genben fannao //) 1. sensuality /greed (S. rāga; T. ’dod chags; C. tan) 2. anger (S. pratigha; T. khong khro; C. chen) 3. conceit (S. māna; T. nga rgy al; C. man) 4. ignorance (S. avidy ā; T. ma rig pa; C. wuming) 5. skeptical doubt (S. vicikitsā; T. the tshom; C. y i) 6. view of a perduring self (S. satkāy adṛṣṭi; T. ’jig lta; C. shenjian) 7. extreme views (S. antagrāhadṛṣṭi; T. mthar lta; C. bianjian) 8. attachment to one’s own point of view (S. dṛṣṭiparāmarśa; T. lta ba mchog ’dzin; C. jianqu jian) 9. wrong views (S.

mithy ādṛṣṭi; T. log lta; C. xiejian)

ten masteries. (S. vaśitā; T. dbang; C. zizai) 1. lifespan (S. āy uḥ; T. tshe; C. ming zizai) 2. actions (S. karman; T. las; C. y e zizai) 3. necessities of life (S. pariṣkāra; T. y o by ad; C. cai zizai)

4. determination (S. adhimukti; T. mos pa; C. shengjie zizai) 5. aspiration (S. praṇidhāna; T. smon lam; C. y uan zizai) 6. psy chic powers (S. ṛddhi; T. rdzu ’phrul; C. shentong zizai) 7. birth (S. upapatti; T. sky e ba; C. sheng zizai) 8. phenomena/teachings (S. dharma; T. chos; C. fa zizai) 9. mind (S. citta; T. sems; C. xin zizai) 10. wisdom (S. jñāna; T. y e shes; C. zhi zizai)

ten meanings [of unimpeded interpenetration in the Huayan school]. (C. Huay an shiy i) 1. teachings and their meanings/significance (C. jiaoy i) 2. principle and phenomena (C. lishi) 3. understanding and implementation (C. jiexing) 4. causes and fruitions (C. y inguo) 5. the “persons” who expound the dharma and the “dharma” they expound (C. renfa) 6. the “distinction” and “unity ” between discrete things (C. fenqi jingwei) 7. the “teacher,” his “disciple,” the “dharma” that is imparted, and the “wisdom” that the disciple develops (C. shidi fazhi) 8. the “dominant” and “subordinate,” “primary ” and “secondary ” relations that pertain between things (C. zhuban y izheng) 9. the enlightened sages who “respond” to the spiritual maturity of their audiences and the audiences whose spiritual maturity “solicited” the appearance of the enlightened sages in the world (C. suishenggen y ushixian) 10. “autonomy ” with regard to spiritual “obstacles” and their “antidotes,” the “essence” of phenomena and their “functions” (C. nishun tiy ong zizai).

ten perfections. (S. pāramitā; T. pha rol tu phy in pa; C. du/ boluomi /) 1. perfection of generosity /giving (S. dānapāramitā; T. sby in pa’i pha rol tu phy in pa; C. [bu]shi []) 2. perfection of morality (S. śīlapāramitā; T. tshul khrims ky i pha rol tu phy in pa; C. [chi]jie []) 3. perfection of patience/forbearance (S. kṣāntipāramitā; T. bzod pa’i pha

rol tu phy in pa; C. ren[ru] []) 4. perfection of effort/vigor (S. vīry apāramitā; T. brtson ’grus ky i pha rol tu phy in pa; C. jinjing) 5. perfection of meditative absorption (S. dhy ānapāramitā; T. bsam gtan gy i pha rol tu phy in pa; C. chan[ding] []) 6. perfection of wisdom (S. prajñāpāramitā; T. shes rab ky i pha rol tu phy in pa; C. bore) 7. perfection of skillful means (S. upāy apāramitā; T. thabs ky i pha rol tu phy in pa; C. fangbian) 8. perfection of aspiration (S. praṇidhānapāramitā; T. smon lam gy i pha rol tu phy in pa; C. y uan) 9. perfection of powers (S. balapāramitā; T. stobs ky i pha rol tu phy in pa; C. li) 10. perfection of knowledge (S. jñānapāramitā; T. y e shes ky i pha rol tu phy in pa; C. zhi)

ten powers of a bodhisattva. (S. bala; T. by ang chub sems dpa’i stobs; C. pusa li) 1. power of reflection (S. āśay abala; T. bsam pa’i stobs; C. shenxin li/zhixin li /) 2. power of superior aspiration (S. adhy āśay abala; T. lhag bsam pa’i stobs; C. zengshang

shenxin li) 3. power of application (S. pray ogabala; T. sby or ba'i stobs; C. fangbian li) 4. power of wisdom (S. prajñābala/jñānabala; T. shes rab/y e shes stobs; C. zhi[hui] li []) 5. power of their vow (S. praṇidhānabala; T. smon lam gy i stobs; C. y uanli) 6. power of vehicle (S. y ānabala; T. theg pa'i stobs; C. shengli) 7. power of conduct (S. cary ābala; T. spy od pa'i stobs; C. xingli) 8. power of transformation (S. vikurvaṇabala; T. rnam par 'phrul pa'i stobs; C. shenbian li/y ouxi shentong li /) 9. power of enlightenment (S. bodhibala; T. by ang chub ky i stobs; C. puti li) 10. power of turning the wheel of the dharma (S. dharmacakrapravartanabala; T. chos ky i 'khor lo bskor ba'i stobs; C. zhuan falun li)

ten powers of a tathāgata. (S. tathāgatabala; T. de bzhin gshegs pa'i stobs; C. rulai li) 1. power of knowing the positive and negative contingencies of things (S. sthānāsthānajñānabala; T. gnas dang gnas ma y in pa mkhy en pa'i stobs; C. chu feichu zhili) 2. power of knowing the maturation of deeds (S. karmavipākajñānabala; T. las ky i rnam smin mkhy en pa'i stobs; C. y e y ishou zhili) 3. power of knowing diverse aspirations (S. nānādhimuktijñānabala; T. mos pa sna tshogs mkhy en pa'i stobs; C. zhongzhong shengjie zhili) 4. power of knowing diverse dispositions (S. nānādhātujñānabala; T. khams sna tshogs mkhy en pa'i stobs; C. zhongzhong jie zhili) 5. power of knowing those who are of superior acumen and those who are not (S. indriy aparāparajñānabala; T. dbang po mchog dang mchog ma y in pa mkhy en pa'i stobs; C. gen shangxia zhili) 6. power of knowing the paths going every where (S. sarvatragāmanīpratipajjñāna; T. thams cad du 'gro ba'i lam mkhy en pa'i stobs; C. bianquxing zhili) 7. power of knowing absorption, liberation, concentration, trance, affliction, purification, and acquisition (S. sarvadhy ānavimokṣasamādhisamāpattisaṃkleśavy avadānavy utthānajñānabala; T. bsam gtan dang rnam thar dang ting nge 'dzin dang sny oms par 'jug pa dang kun nas ny on mongs pa dang rnam par by ang ba dang ldan pa thams cad mkhy en pa'i stobs; C. jinglü jietuo dengchi dengzhi zhili) 8. power of recollecting past lives (S. pūrvanivāsānusmṛtijñānabala; T. sngon gy i gnas rjes su dran pa mkhy en pa'i stobs; C. suzhu suinian zhili/suming zhili /) 9. power of knowing death and rebirth (S. cy uty upattijñānabala; T. 'chi 'pho bo dang sky e ba mkhy en pa'i stobs; C. sisheng zhili) 10. power of knowing the cessation of the contaminants (S. āsravakṣay ajñānabala; T. zag pa zad pa mkhy en pa'i stobs; C. loujin zhili)

ten precepts. [of novices] (*daśaśīla/śrāmaṇerasaṃvara; T. dge tshul gy i sdom pa; C. [shami] shijie [])

1. not to kill living beings (S. prāṇātipāta-virati; T. srog gcod pa spong ba; C. bu shasheng jie) 2. not to steal (S. adattādāna-virati; T. ma by in par len pa spong ba; C. bu toudao jie) 3. not to engage in sexual activity (S. kāmamithy ācāra-virati/abrahmacary a-virati; T. 'dod pas log par g.y em pa spong ba/mi tshangs par spy od pa spong pa; C. bu xiey in jie/li fei fanxing jie /) 4. not to lie [about spiritual attainments] (S. mṛṣāvāda-virati; T. rdzun du smra ba spong ba; C. bu wangy

u jie) 5. not to use intoxicants (S. mady apāna-virati; T. my os par ’gy ur ba’i btung ba spong pa; C. bu y injiu jie) 6. not to eat at improper times [after twelve noon] (S. vikālabhojana-virati; T. dus ma y in pa’i kha zas spong pa; C. bu feishi shi jie) 7. not to use perfumes, garlands, or cosmetics (S. gandhamāly avilepanavarṇakadhāraṇa-virati; T. spos dang kha dog dang by ug pa dang phreng ba thogs pa spong pa; C. bu tushi xiangman jie) 8. not to sing, dance, play music, or attend entertainments (S. nṛty agīta- virati; T. glu gar spong pa; C. bu gewu guanting jie) 9. not to sleep on high and luxurious beds (S. uccaśay anamahāśay ana- virati; T. khri stan mthon po dang khri stan chen po spong pa; C. bu zuo gaoguang dachuang jie) 10. not to handle gold and silver/money (S. jātarūparajatapratigrahaṇa-virati; T. gser dang dngul la reg pa spong pa; C. bu xu jiny inbao jie)

ten realms of reality [dharmadhātu]. (C. shi fajie) 1. divinities (S. deva; T. lha; C. tian) 2. demigods (S. asura; T. lha ma y in; C. axiuluo) 3. humans (S. manuṣy a; T. mi; C. ren) 4. animals (S. tiry ak; T. dud ’gro; C. chusheng) 5. ghosts (S. preta; T. y i dwags; C. egui) 6. hell denizens (S. nāraka; T. dmy al ba; diy u) 7. disciples (S. śrāvaka; T. ny an thos; C. shengwen)

8. solitary buddhas (S. praty ekabuddha; T. rang rgy al; C. y uanjue) 9. bodhisattvas (T. by ang chub sems dpa’; C. pusa) 10. buddhas (T. sang rgy as; C. fo)

ten recollections. (S. anusmṛti; T. rjes su dran pa; C. nian/suinian /) 1. the Buddha (T. sangs rgy as rjes su dran pa; C. nianfo/fo suinian /) 2. the dharma (T. chos rjes su dran pa; C. nianfa/fa suinian /) 3. the saṃgha (T. dge ’dun rjes su dran pa; C. nianseng/seng suinian /) 4. morality (S. śīla; T. tshul khrims rjes su dran pa; C. nianjie/jie suinian /) 5. renunciation/generosity (S. ty āga; T. gtong ba rjes su dran pa; C. nianshi/shi suinian /) 6. the divinities (S. devatā; T. lha rjes su dran pa; C. niantian/tian suinian /) 7. breathing (S. ānāpāna; T. dbugs phy i nang du rgy u ba rjes su dran pa; C. nian anban/ruchuxi suinian /) 8. disgust (S. udvega; T. sky o ba rjes su dran pa; C. y an sui nian) 9. death (S. maraṇa; T. ’chi ba rjes su dran pa; C. niansi/si suinian /) 10. what concerns the body (S. kāy agatā; T. lus ky i rnam pa rjes su dran pa; C. nianshen/shen suinian /)

ten stages [of the bodhisattva path]. (S. daśabhūmi; T. sa bcu; C. shidi) 1. joy ful (S. pramuditā; T. rab tu dga’ ba; C. jixidi/huanxi di /) 2. immaculate/stainless (S. vimalā; T. dri ma med pa; C. ligou di/wugou di /) 3. luminous (S. prabhākarī; T. ’od by ed pa; C. faguang di) 4. radiant (S. arciṣmatī; T. ’od ’phro ba; C. y anhui di) 5. invincible (S. sudurjay ā; T. sby ang dka’ ba; C. [ji]nansheng di [ ]) 6. immediacy /coming face-to-face (S. abhimukhī; T. mngon du by ed pa; C. xianqian di) 7. far-reaching/transcendent (S. dūraṅgamā; T. ring du song ba; C.

y uanxing di)

8. immovable/steadfast (S. acalā; T. mi g.y o ba; C. budong di)

9. eminence/auspicious intellect (S. sādhumatī; T. legs pa’i blo gros; C. shanhui di)

10. cloud of dharma (S. dharmameghā; T. chos ky i sprin pa; C. fay un di
)

ten unwholesome courses of action. (S. akuśala-karmapatha; T. mi dge ba; C. e y edao) 1. killing (prāṇātipāta; T. srog bcod pa; C. sha[sheng] []) 2. stealing (S. adattādāna; T. ma by in par len pa; C. [tou]dao [ ]) 3. sexual misconduct (kāmamithy ācāra; T. 'dod pas log par g.y em pa; C. xiey in) 4. ly ing (S. mṛṣāvāda; T. rdzun du smra ba; C. wangy u) 5. malicious speech (paiśuny avāda; T. phra ma; C. liangshe) 6. verbal abuse (pārūṣy avāda; T. tshig rtsub; C. ekou) 7. frivolous prattle/idle gossip (saṃbhinnapralāpa; T. ngag 'khy al ba; C. qiy u) 8. covetousness (S. abhidhy ā; T. brnab sems; C. tan[y u]/qiantan []/) 9. malice/ill-will (S. vy āpāda; T. gnod sems; C. chen[hui]) 10. wrong views (S. mithy ādṛṣṭi; T. log lta; C. xiejian/y uchi /)

ten visualization devices. (S. *kṛtsnāy atana; P. kasiṇa; T. zad par gy i sky e mched; C. bianchu) 1. earth (S. pṛthivī; T. sa; C. di) 2. water (S. āpas; T. chu; C. shui) 3. fire (S. tejas; T. me; C. huo) 4. wind (S. vāy u; T. rlung; C. feng) 5. empty -space (S. ākāśa; T. nam mkha'; C. kong) 6. blue (S. nīla; T. sngon po; C. qing) 7. y ellow (S. pīta; T. ser po; C. huang) 8. red (S. lohita; T. dmar po; C. chi) 9. white (S. avadāta; T. dkar po; C. bai) 10. light (S. āloka/tejas; T. 'od/me; C. guangming/huo /)/[alt.]

consciousness (S. vijñāna; T. rnam shes; C. shi)

ten wholesome courses of action. (S. kuśala-karmapatha; T. dge ba bcu; C. shany edao) Abstention from the TEN UNWHOLESOME COURSES OF ACTION (s.v.).

ELEVENS eleven cognitions. (S. jñāna; T. shes pa; C. zhi) 1. of suffering (S. duḥkhajñāna; T. sdug bsngal shes pa; C. kuzhi) 2. of origination (S. samuday ajñāna; T. kun 'by ung ba shes pa; C. jizhi) 3. of cessation (S. nirodhajñāna; T. 'gog pa shes pa; C. miezhi) 4. of the path (S. mārgajñāna; T. lam shes pa; C. daozhi) 5. of extinction (S. kṣay ajñāna; T. zad pa shes pa; C. jinzhi) 6. of nonproduction (S. anutpādajñāna; T. mi sky e ba shes pa; C. wusheng zhi) 7. of factors (S. dharmajñāna; T. chos shes pa; C. fazhi) 8. of subsequent cognition (S. anvay ajñāna; T. rjes su rtogs par shes pa; C. leizhi) 9. of worldly conventions (S. saṃvṛtijñāna; T. kun rdzob shes pa; C. shisu zhi) 10. of others' minds (S. paracittajñāna; T. gzhan gy i sems shes pa; C. taxin zhi) 11. of things-as-they -are (S. y athābhūtajñāna; T. y ang dag pa ji lta ba bzhin du y ongs su shes pa; C. rushi zhi)

TWELVES twelve ascetic practices. (S. dhūtaguṇa; P. dhutaṅga; T. sby angs pa'i y on tan; C. shi'er toutuo xing) 1. wears rag clothing from dust-heaps (S. pāṃśukūlika; T. phy ag dar khrod

pa; C. zhuo fensao y i/zhuo bina y i /) 2. possesses only three robes (S. traicīvarika; T. chos gos gsum pa; C. dan sany i) 3. does not eat after midday (S. khalupaścādbhaktika; T. zas phy is mi len pa; C. zhonghou bude y injiang) 4. eats only alms (S. paiṇḍapātika; T. bsod sny oms pa; C. cidi qishi) 5. eats one meal in a single sitting (S. aikāsanika; T. stan gcig pa; C. shou y ishi fa) 6. restricts the

amount of food consumed (S. nāmantika; T. ’phy ings pa pa; C. jieliang shi) 7. dwells in isolation in the forest (S. āraṇy aka; T. dgon pa ba; C. alanruo chu zhu) 8. dwells at the foot of a tree (S. vṛkṣamūlika; T. shing drung pa; C. shuxia zhi) 9. dwells in open, unsheltered places (S. ābhy avakāśika; T. bla gab med pa; C. ludi zuo) 10. dwells in charnel grounds (S. śmāśānika; T. dur khrod pa; C. zhongjian zhu) 11. never lies down to sleep (S. naiṣy adika; T. cog bu pa; C. changzuo buwo) 12. does not omit any house on the almsround (S. y athāsaṃstarika; T. gzhi ji bzhin pa; C. changxing qishi)

twelve categories of scripture. (S. dvādaśāṅga[pravacana]; T. gsung rab y an lag bcu gny is; C. shi’erbu jing/shi’erfen jiao /) 1. discourses (S. sūtra; T. mdo; C. qijing/changhang /) 2. aphorisms in mixed prose and verse (S. gey a; T. dby angs bsny ad; C. y ingsong) 3. prophecies (S. vy ākaraṇa; T. lung bstan; C. jibie/shouji /) 4. verses (S. gāthā; T. tshig bcad; C. fengsong/guqi /) 5. utterances/meaningful expressions (S. udāna; T. ched du brjod pa; C. zishuo) 6. framing stories (S. nidāna; T. gleng gzhi; C. y iny uan) 7. expanded teachings (S. vaipuly a; T. shin tu rgy as pa; C. fangguang)

8. tales of previous lives (S. jātaka; T. sky es rabs; C. bensheng) 9. marvelous events (S. adbhutadharma; T. rmad du by ung; C. xifa) 10. narratives (S. avadāna; T. rtogs pa brjod pa; C. piy u) 11. fables (S. itivṛttaka; T. de lta bu by ung ba; C. benshi) 12. instructions (S. upadeśa; T. gtan phab; C. luny i)

twelve deeds of a buddha. (S. dvādaśabuddhakāry a; T. sangs rgy as ky i mdzad pa bcu gny is; C. shi’er xiang chengdao) 1. descent from tuṣita heaven (T. dga’ ldan gy i gnas nas ’pho ba; C. doushuai jiangshi) 2. entry into the womb (T. lhums su zhugs pa; C. rutai) 3. taking birth (T. sku bltams pa; C. chutai) 4. proficiency in the arts (T. bzo y i gnas la mkhas pa; C. shanxian jiy i) 5. enjoy ment of consorts (T. btsun mo’i ’khor dgy es rol ba; C. shouy ong feijuan) 6. renouncing the world (T. rab tu by ung ba; C. chujia) 7. practicing asceticism (T. dka’ ba spy ad pa; C. xiu kuxing) 8. going to the bodhimaṇḍa (T. by ang chub sny ing por gshegs pa; C. qu jingang zuo) 9. subjugating Māra (T. bdud btul ba; C. xiangmo) 10. attaining enlightenment (T. mngon par rdzogs par sangs rgy as pa; C. chengdao) 11. turning the wheel of the dharma (S. dharmacakrapravartana; T. chos ky i ’khor lo bskor ba; C. zhuan falun) 12. passing into parinirvāṇa (T. my a ngan las ’das pa; C. ru niepan)

twelvefold chain of dependent origination. (S. pratīty asamutpāda; T. rten cing ’brel bar ’by ung ba; C. y uanqi)

1. ignorance (S. avidy ā; T. ma rig pa; C. wuming) 2. predispositions/habituations (S. saṃskāra; T. ’du by ed; C. xing) 3. consciousness (S. vijñāna; T. rnam shes; C. shi) 4. name and form/mentality and materiality (S. nāmarūpa; T. ming gzugs; C. mingse) 5. six sense-bases (S. ṣaḍāy atana; T. sky e mched drug; C. liuru)

6. sensory contact (S. sparśa; T. reg pa; C. chu) 7. sensations (S. vedanā; T. tshor ba; C. shou) 8. craving/thirst (S. tṛṣṇā; T. sred pa; C. ai) 9. clinging (S upādāna; T. len pa; C.

qu) 10. existence/process of becoming (S. bhava; T. srid pa; C. y ou) 11. [re]birth (S. jāti; T. sky e ba; C. sheng) 12. old age and death (S. jarāmaraṇa; T. rga shi; C. laosi)

twelve sense-fields/bases of cognition. (S. āy atana; T. sky e mched; C. ru/chu/ruchu //) 1. the sense-field of the visual sense-base (S. cakṣurāy atana; T. mig gi sky e mched; C. y an) 2. the sense-field of visual objects (S. rūpāy atana; T. gzugs ky i sky e mched; C. se) 3. the sense-field of the auditory sense-base (S. śrotrāy atana; T. rna ba'i sky e mched; C. er) 4. the sense-field of auditory objects (S. śabdāy atana; T. sgra'i sky e mched; C. sheng) 5. the sense-field of the olfactory sense-base (S. ghrāṇāy atana; T. sna'i sky e mched; C. bi) 6. the sense-field of olfactory objects (S. gandhāy atana; T. dri'i sky e mched; C. xiang) 7. the sense-field of the gustatory sense-base (S. jihvāy atana; T. lce'i sky e mched; C. she) 8. the sense-field of gustatory objects (S. rasāy atana; T. ro'i sky e mched; C. wei) 9. the sense-field of the tactile sense-base (S. kāy āy atana; T. lus ky i sky e mched; C. shen) 10. the sense-field of tactile objects (S. spraṣṭavy āy atana; T. reg by a'i sky e mched; C. chu) 11. the sense-field of the mental sense-base (S. manāy atana; T. y id ky i sky e mched; C. y i) 12. the sense-field of mental objects (S. dharmāy atana; T. chos ky i sky e mched; C. fa)

FOURTEENS fourteen indeterminates/unanswerable questions. (S. avy ākṛta; T. lung du ma bstan pa'i chos; C. wuji)

1. Is the world eternal? (S. śāśvato lokaḥ; T. 'jig rten rtag pa; C. shi chang) 2. Is the world not eternal? (S. aśāśvato lokaḥ; T. 'jig rten mi rtag pa; C. shi wuchang) 3. Is the world both eternal and not eternal? (S. śāśvataś cāśāsvataś ca; T. 'jig rten rtag ky ang rtag la mi rtag ky ang mi rtag pa; C. shi y i chang y i wuchang) 4. Is the world neither eternal nor not eternal? (S. naiva śāśvato nāśāśvataś ca; T. 'jig rten rtag pa y ang ma y in mi tag pa y ang ma y in; C. shi feichang feiwuchang) 5. Is the world endless (viz. infinite)? (S. antavānlokaḥ; T. 'jig rten mtha' y od pa; C. shi y oubian) 6. Is the world not endless (viz. finite)? (S. anantavānlokaḥ; T. 'jig rten mtha' y od pa ma y in; C. shi wubian) 7. Is the world both endless and not endless? (S. antavāṃś cānantavānlokaś ca; T. 'jig rten mtha' y od ky ang y od la mtha' med ky ang med; C. shi y i y oubian y i wubian) 8. Is the world neither endless nor not endless? (S. naivāntavān nānantavāṃś ca; T. 'jig rten mtha' y od pa y ang ma y in med pa y ang ma y in; C. shi feiy oubian feiwubian) 9. Does the tathāgata exist after death? (S. bhavati tathāgataḥ paraṃ maranāt; T. de bzhin gshegs pa zhi nas y od; C. rulai sihou weiy ou) 10. Does the tathāgata not exist after death? (S. na bhavati tathāgataḥ paraṃ maraṇāt; T. de bzhin gshegs pa zhi nas med; C. rulai sihou feiy ou) 11. Does the tathāgata both exist and not-exist after death? (S. bhavati ca na bhavati ca tathāgataḥ paraṃ maraṇāt; T. de bzhin gshegs pa zhi nas y od ky ang y od la med ky ang med; C. rulai sihou y i y ou y i feiy ou)

12. Does the tathāgata neither exist nor not-exist after death? (S. naiva bhavati na na bhavati tathāgataḥ paraṃ maraṇāt; T. de bzhin gshegs pa zhi nas y od pa y ang ma y in med pa y ang ma y in; C. rulai sihou feiy ou fei feiy ou) 13. Are the life-force and the body identical? (S. sa jīvas tac charīram; T. srog de lus y in; C. mingzhe jishen

) 14. Are the life-force and the body different? (S. any o jīvo ’ny ac charīram; T. srog ky ang gzhan la lus ky ang gzhan; C. mingzhe y ishen)

fourteen root violations of the tantric commitments. 1. contradicting one’s guru 2. contradicting or denigrating the teachings of the Buddha or one’s guru 3. quarreling with others on the same path 4. violating the bodhisattva vows (in action, word, or thought) 5. violating the sacred drops in the heart cakra through illicit sexual activity 6. denigrating the teachings and paths of other sy stems 7. revealing secrets to non-initiates or those not ready to receive them 8. viewing the five aggregates that compose the psy cho-phy sical continuum as impure 9. doubting one’s entrance into the path 10. having the ability to perceive the mental continuum of others and recognizing that someone will commit great harm to others, but not taking action 11. holding either of the extreme views of eternalism or annihilationism 12. refusing to teach someone who asks for teachings and is qualified to receive those teachings 13. superficial or dualistic clinging to appearances of pure/impure; good/bad, etc. 14. verbally or mentally denigrating women

SIXTEENS sixteen arhats. (S. ṣoḍaśasthavira; T. gnas brtan bcu drug; C. shiliu luohan

)

According to the East Asian tradition:
1. Piṇḍola Bhāradvāja (T. Bha ra dhwa dza bsod sny oms len; C. Bintoulu Baluoduo)
2. Kanakavatsa (T. Gser gy i be’u; C. Jianuojiafacuo)
3. Kanaka Bhāradvāja (T. Bha ra dhwa dza gser can; C. Jianuojiabaliduoshe)
4. Subinda [alt. Suvinda]/Abheda (T. Mi phy ed pa; C. Supintuo)
5. Bakkula [alt. Nakula/Vakula] (T. Ba ku la; C. Bojuluo)
6. Bhadra (T. Bzang po; C. Batuoluo)
7. Kālika [alt. Karīka] (T. Dus ldan; C. Jialijia)
8. Vajraputra (T. Rdo rje mo’i bu; C. Fasheluofuduoluo)
9. Jīvaka (T. ’Tsho by ed; C. Qipo/Shubojia /)
10. Panthaka [alt. Mahāpanthaka] (T. Lam chen bstan; C. Bantuojia)
11. Rāhula (T. Sgra gcan ’dzin; C. Luohouluo)
12. Nāgasena (T. Klu sde; C. Naqiexina)
13. Aṅgaja (T. Yan lag ’by ung; C. Yinjietuo)
14. Vanavāsin (T. Nags na gnas; C. Fanaposi)
15. Ajita (T. Ma pham pa; C. Ay iduo)
16. Cūḍapanthaka [alt. Cūḷapantha] (T. Lam phran bstan; C. Zhutubantuojia)

sixteen aspects of the four noble truths. (S. ākāra; T. bden bzhi’i rnam pa; C. xingxiang) 1. impermanence (S. anity a; T. mi rtag pa; C. wuchang) 2. suffering (S. duḥkha; T. sdug bsngal ba; C. ku) 3. emptiness (S. śūny atā; T. stong pa ny id; C. kong) 4. selflessness (S. anātmaka; T. bdag med pa; C. wuwo/feiwo /) 5. origination (S. samuday a; T. kun ’by ung ba; C. ji) 6. production/process (S. prabhava; T. rab tu sky e ba; C. sheng) 7. cause (S. hetu; T. rgy u; C. y in) 8. conditions (S. praty ay a; T. rky en; C. y uan) 9. cessation (S. nirodha; T. ’gog pa; C. mie) 10. serenity (S. śānta; T. zhi ba; C. jing)

11. sublimity (S. praṇīta; T. gy a nom pa; C. miao) 12. deliverance (niḥsaraṇa; T. nges par ’by ung ba; C. li) 13. path (S. mārga; T. lam; C. dao) 14. correctness (S. ny āy a; T. rigs pa; C. ru) 15. achievement (S. pratipatti; T. sgrub pa; C. xing) 16. release (S. nairy āṇika; T. nges par ’by in pa; C. chu)

sixteen elders. (S. ṣoḍaśasthavira; T. gnas brtan bcu drug; C. shiliu zunzhe). See SIXTEEN ARHATS.

sixteen emptinesses. (S. śūny atā; T. stong pa ny id; C. kong) 1. emptiness of the internal (S. adhy ātmaśūny atā; T. nang stong pa ny id; C. nei kong) 2. emptiness of the external (S. bahirdhāśūny atā; T. phy i stong pa ny id; C. wai kong) 3. emptiness of both the internal and external (S. adhy ātmabahirdhāśūny atā; T. phy i nang stong pa ny id; C. neiwai kong) 4. emptiness of emptiness (S. śūny atāśūny atā; T. stong pa ny id stong pa ny id; C. kongkong) 5. emptiness of the great (S. mahāśūny atā; T. chen po stong pa ny id; C. dakong) 6. emptiness of the ultimate (S. paramārthaśūny atā; T. don dam pa stong pa ny id; C. shengy i kong) 7. emptiness of the compounded (S. saṃskṛtaśūny atā; T. ’dus by as stong pa ny id; C. y ouwei kong) 8. emptiness of the uncompounded (S. asaṃskṛtaśūny atā; T. ’dus ma by as stong pa ny id; C. wuwei kong) 9. emptiness of the infinite (S. aty antaśūny atā; T. mtha’ las ’das pa stong pa ny id; C. bijing kong) 10. emptiness of the beginningless and endless (S. anavarāgraśūny atā; T. thog ma dang mtha’ ma med pa stong pa ny id; C. wuji kong) 11. emptiness of what cannot be repudiated (S. anavakāraśūny atā; T. dor ba med pa stong pa ny id; C. wusan kong) 12. emptiness of essential nature (S. prakṛtiśūny atā; T. rang bzhin stong pa ny id; C. benxing kong)

13. emptiness of all dharmas (S. sarvadharmaśūny atā; T. chos thams cad stong pa ny id; C. y iqiefa kong) 14. emptiness of intrinsic marks (S. lakṣaṇaśūny atā; T. mtshan ny id stong pa ny id; C. zixiang kong) 15. emptiness of the unobservable (S. anupalambhaśūny atā; T. mi dmigs pa stong pa ny id; C. bu kede kong) 16. emptiness of the nature of nonexistence (S. abhāvasvabhāvaśūny atā; T. dngos po med pa’i ngo bo ny id stong pa ny id; C. wuzixing zixing kong)

sixteen moments of the path of vision. (S. darśanamārgakṣaṇa; T. mthong lam shes bzod skad cig ma; C. [jiandao wei] shiliu xin []) 1. acquiescence to the cognition of dharma with regard to suffering in the sensuous realm (S. duḥkhe dharmajñānakṣāntiḥ; T. sdug bsngal chos bzod; C. kufa ren) 2. cognition of

dharma with regard to suffering in the sensuous realm (S. duḥkhe dharmajñānam; T. sdug bsngal chos shes; C. kufa zhi) 3. acquiescence to the subsequent cognition with regard to suffering in the subtle-materiality and immaterial realms (S. duḥkhe ’nvay ajñānakṣāntiḥ; T. sdug bsngal rjes bzod; C. kulei ren) 4. subsequent cognition with regard to suffering in the subtle-materiality and immaterial realms (S. duḥkhe ’nvay ajñānam; T. sdug bsngal rjes shes; C. kuleizhi) 5. acquiescence to the cognition of dharma with regard to origination in the sensuous realm (S. samuday e dharmajñānakṣāntiḥ; T. kun ’by ung chos bzod; C. jifa ren) 6. cognition of dharma with regard to origination in the sensuous realm (S. samuday e dharmajñānam; T. kun ’by ung chos shes; C. jifa zhi) 7. acquiescence to the subsequent cognition of origination in the subtle- materiality and immaterial realms (S. samuday e ’nvay ajñānakṣāntiḥ; T. kun ’by ung rjes bzod; C. jilei ren) 8. subsequent cognition of origination in the subtle-materiality and immaterial realms (S. samuday e ’nvay ajñānam; T. kun ’by ung rjes shes; C. jilei zhi) 9. acquiescence to the cognition of dharma with regard to cessation in the sensuous realm (S. nirodhe dharmajñānakṣāntiḥ; T. ’gog pa chos bzod; C.

miefa ren) 10. cognition of dharma with regard to cessation in the sensuous realm (S. nirodhe dharmajñānam; T. ’gog pa chos shes; C. miefa zhi) 11. acquiescence to subsequent cognition with regard to cessation in the subtle-materiality and immaterial realms (S. nirodhe ’nvay ajñānakṣāntiḥ; T. ’gog pa rjes bzod; C. mielei ren) 12. subsequent cognition with regard to cessation in the subtle-materiality and immaterial realms (nirodhe ’nvay ajñānam; T. ’gog pa rjes shes; C. mielei zhi) 13. acquiescence to the cognition of dharma with regard to the path in the sensuous realm (S. mārge dharmajñānakṣāntiḥ; T. lam chos bzod; C. daofa ren) 14. cognition of dharma with regard to the path in the sensuous realm (S. mārge dharmajñānam; T. lam chos shes; C. daofa zhi) 15. acquiescence of subsequent cognition with regard to the path in the subtle-materiality and immaterial realms (S. mārge ’nvay ajñānakṣāntiḥ; T. lam rjes bzod; C. daolei ren) 16. subsequent cognition with regard to the path in the subtle-materiality and immaterial realms (S. mārge ’nvay ajñānam; T. lam rjes shes; C. daolei zhi)

SEVENTEENS seventeen heavens of the realm of subtle materiality. (S. rūpadhātunivāsa; T. gzugs khams gnas ris; C. sejie shiqi tian)

FIRST DHYĀNA:

1. Brahmā’s retainers (S. brahmakāy ika; T. tshangs ris; C. fanzhong tian)

2. Brahmā’s ministers (S. brahmapurohita; T. tshangs pa mdun na ’don; C. fanfu tian)

3. Great Brahmā (S. mahābrahmā; T. tshangs pa chen po; C. dafan tian)

SECOND DHYĀNA:

1. lesser radiance (S. parīttābha; T. ’od chung; C. shaoguang tian) 2. immeasurable radiance (S. apramāṇābha; T. tshad med ’od; C. wuliangguang tian) 3. ultimate radiance (S. ābhāsvara; T. ’od gsal; C. guangy in tian/jiguangjing tian /)

THIRD DHYĀNA:
1. lesser purity (S. parīttaśubha; T. dge chung; C. shaojing tian)
2. immeasurable purity (S. apramāṇaśubha; T. tshad med dge; C. wuliangjing tian)
3. pervasive purity (S. śubhakṛtsna; T. dge rgy as; C. bianjing tian)
4. cloudless (S. anabhraka; T. sprin med; C. wuy un tian)
5. meritorious birth (S. puṇy aprasava; T. bsod nams ’phel; C. fusheng tian)
6. extensive fruition (S. bṛhatphala; T. ’bras bu che; C. guangguo tian)
FOURTH DHYĀNA (THE FIVE PURE ABODES, ŚUDDHĀVĀSA): 1. free from afflictions (S. avṛha; T. mi che ba; C. wufan tian) 2. not burning/without torment (S. atapa; T. mi gdung pa; C. wure tian) 3. perfect form (S. sudṛśa; T. gy a nom snang ba; C. shanxian tian) 4. perfect vision (S. sudarśana; T. shin tu mthong ba; C. shanjian tian) 5. highest (S. akaniṣṭha; T. ’og min; C. sejiujing tian)

EIGHTEENS eighteen elements/bases of cognition. (S. dhātu; T. khams bco brgy ad; C. jie) 1. visual sense-base (S. cakṣurdhātu; T. mig gi khams; C. y an) 2. visual sense-object (S. rūpadhātu; T. gzugs ky i khams; C. se) 3. visual consciousness (S. cakṣurvijñānadhātu; T. mig gi rnam par shes pa’i khams; C. y anshi) 4. auditory sense-base (S. śrotradhātu; T. rna ba’i khams; C. er)

5. auditory sense-object (S. śabdadhātu; T. sgra’i khams; C. sheng) 6. auditory consciousness (S. śrotravijñānadhātu; T. rna ba’i rnam par shes pa’i khams; C. ershi) 7. olfactory sense-base (S. ghrāṇadhātu; T. sna’i khams; C. bi) 8. olfactory sense-object (S. gandhadhātu; T. dri’i khams; C. xiang) 9. olfactory consciousness (S. ghrāṇavijñānadhātu; sna’i rnam par shes pa’i khams; C. bishi) 10. gustatory sense-base (S. jihvādhātu; T. lce’i khams; C. she) 11. gustatory sense-object (S. rasadhātu; T. ro’i khams; C. wei) 12. gustatory consciousness (S. jihvāvijñānadhātu; T. lce’i rnam par shes pa’i khams; C. sheshi) 13. tactile sense-base (S. kāy adhātu; T. lus ky i khams; C. shen) 14. tactile sense-object (S. spraṣṭavy adhātu; T. reg by a’i khams; C. chu) 15. tactile consciousness (S. kāy avijñānadhātu; T. lus ky i rnam par shes pa’i khams; C. shenshi) 16. mental sense-base (S. manodhātu; T. y id ky i khams; C. y i) 17. mental sense-object (S. dharmadhātu; T. chos ky i khams; C. fa) 18. mental consciousness (S. manovijñānadhātu; T. y id ky i rnam par shes pa’i khams; C. y ishi)

eighteen emptinesses. (S. śūny atā; T. stong pa ny id bco brgy ad; C. kong) 1. emptiness of the internal (S. adhy ātmaśūny atā; T. nang stong pa ny id; C. nei kong) 2. emptiness of the external (S. bahirdhāśūny atā; T. phy i stong pa ny id; C. wai kong) 3. emptiness of both the internal and external emptiness (S. adhy

ātmabahirdhāśūny atā; T. phy i nang stong pa ny id; C. neiwai kong) 4. emptiness of emptiness (S. śūny atāśūny atā; T. stong pa ny id stong pa ny id; C. kongkong) 5. emptiness of the great (S. mahāśūny atā; T. chen po stong pa ny id; C. dakong) 6. emptiness of the ultimate (S. paramārthaśūny atā; T. don dam pa stong pa ny id; C. shengy i kong) 7. emptiness of the compounded (S. saṃskṛtaśūny atā; T. 'dus by as stong pa ny id; C. y ouwei kong)

8. emptiness of the uncompounded (S. asaṃskṛtaśūny atā; T. 'dus ma by as stong pa ny id; C. wuwei kong) 9. emptiness of the infinite (S. aty antaśūny atā; T. mtha' las 'das pa stong pa ny id; C. bijing kong) 10. emptiness of the beginningless and endless (S. anavarāgraśūny atā; T. thog ma dang mtha' ma med pa stong pa ny id; C. wuji kong) 11. emptiness of what cannot be repudiated (S. anavakāraśūny atā; T. dor ba med pa stong pa ny id; C. wusan kong) 12. emptiness of essential nature (S. prakṛtiśūny atā; T. rang bzhin stong pa ny id; C. benxing kong) 13. emptiness of all dharmas (S. sarvadharmaśūny atā; T. chos thams cad stong pa ny id; C. y iqiefa kong) 14. emptiness of intrinsic marks (S. lakṣaṇaśūny atā; T. mtshan ny id stong pa ny id; C. zixiang kong) 15. emptiness of the unobservable (S. anupalambhaśūny atā; T. mi dmigs pa stong pa ny id; C. bu kede kong) 16. emptiness of the nature of nonexistence (S. abhāvasvabhāvaśūny atā; T. dngos po med pa'i ngo bo ny id stong pa ny id; C. wuxing zixing kong) 17. emptiness of existence (S. bhāvaśūny atā; T. dngos bo'i stong pa ny id; C. y ouxing kong) 18. emptiness of nonexistence (S. abhāvaśūny atā; T. dngos po med pa'i stong pa ny id; C. wuxing kong)

eighteen mainstream Buddhist schools. (S. aṣṭadaśanikāy a; T. sde pa bco brgy ad; C. shiba bupai) 1. Sarvāstivāda (T. Thams cad y od par smra ba; C. Shuo y iqie y ou bu) 1. Mūlasarvāstivāda (T. Gzhi thams cad y od par smra ba'i sde; C. Genben shuo y iqie y ou bu) 2. Kāśy apīy a (T. 'Od srung pa'i sde; C. Yinguang bu) 3. Mahīśāsaka (T. Sa ston sde; C. Huadi bu) 4. Dharmaguptaka (T. Chos srung sde; C. Fazang bu) 5. Bahuśrutīy a (T. Mang du thos pa'i sde; C. Duowen bu) 6. Tāmraśāṭīy a (T. Gos dmar sde; C. Tongxie bu)

7. Vibhajy avādin (T. Rnam par phy e ste smra ba'i sde; C.
Fenbieshuo bu)
2. Saṃmitīy a (T. Kun gy is bkur ba; C. Zhengliang bu)
1. Kaurukullaka (T. Sar sgrog rigs ky i sde; C. Julujuluo bu/Xuandi bu
/)
2. Avantaka (T. Bsrung ba pa'i sde; C. Bukeqi bu)
3. Vātsīputrīy a (T. Gnas ma bu pa'i sde; C. Duzi bu)
3. Mahāsāṃghika (T. Dge 'dun phal chen; C. Dazhong bu)
1. Pūrvaśaila (T. Shar gy i ri bo'i sde; C. Dongshanzhu bu)
2. Aparaśaila (T. Nub ky i ri bo'i sde; C. Xishanzhu bu)
3. Haimavata (T. Gang ri bo'i sde; C. Xueshan bu)
4. Lokottaravāda (T. 'Jig rten 'das smra'i sde; C. Shuo chushi bu

)
5. Prajñaptivāda (T. Btags par smra ba’i sde; C. Shuojia bu)
4. *Sthaviranikāy a (T. Gnas brtan sde; C. Shangzuo bu)
1. Mahāvihāravāsa (T. Gtsug lag khang chen gnas sde; C. Dasizhu bu
)
2. Jetavanīy a (T. Rgy al by ed tshal gnas pa’i sde; C. Zhiduolin zhu bu
)
3. Abhay agirivāsa (T. ’Jigs med ri gnas sde; C. Wuweishan zhu bu
)
eighteen sciences. (S. vidy āsthāna; T. rig gnas)
1. music (S. gandharva; T. rol mo)
2. erotic arts (S. vaiśika; T. ’khrig thabs)
3. livelihood (S. vārttā; T. ’tsho chas)
4. accounting (S. saṃkhy a; T. grangs can)
5. grammar (S. śabda; T. sgra)
6. medicine (S. cikitsitā; T. gso dpy ad)
7. law (S. nīti; T. chos lugs)
8. the arts (S. śilpa; T. bzo)
9. archery (S. dhanurveda; T. ’phong dpy ad)
10. reasoning (S. hetu; T. gtan tshigs)
11. y oga (T. rnal ’by or)
12. learning (S. śruti; T. thos pa)
13. memorization (S. smṛti; T. dran pa)
14. astronomy (S. jy otiṣa; T. skar ma’i dpy ad)
15. astrology (S. gaṇita; T. rtsis)
16. magic (S. māy ā; T. mig ’phrul)
17. legend (S. purāṇa; T. sngon gy i rabs)
18. history (S. itihāsaka; T. sngon by ung)
eighteen unshared factors [distinct attributes] of the buddhas. (S. āveṇikabuddhadharma; T. sangs rgy as ky i chos ma ’dres pa bco brgy ad/ma ’dres pa’i chos; C. bugong[fo]fa []) 1. their actions are without error (S. nāsti [tathāgatasy a] skhalitam; T. ’khrul pa med pa; C. shen wushi) 2. their speech is not noisy (S. nāsti ravitam; T. ca co med pa; C. kou wushi) 3. they are never forgetful (S. nāsti muṣitasmṛtitā; T. bsny el ba med pa; C. nian wushi) 4. their mind is never not in equipoise (S. nāsty asamāhitacittam; T. sems mny am par ma gzhag pa med pa; C. wu y ixiang) 5. their perception is free from discursiveness (S. nāsti nānātvasaṃjñā; T. tha dad pa’i ’du shes med pa; C. wu buding) 6. their equanimity is not due to a lack of discernment (S. nāsty apratisaṃkhy āy opekṣā; T. so sor ma rtogs pa’i btang sny oms med pa; C. wu buzhi she) 7. they do not regress in their zeal (S. nāsti cchandasy a hāniḥ; T. ’dun pa ny ams pa med pa; C. y u wumie) 8. they do not regress in their

effort (S. nāsti vīry asy a hāniḥ; T. brtson ’grus ny ams pa med pa; C. jingjin wumie) 9. they do not regress in their recollection (S. nāsti smṛtihāniḥ; T. dran pa ny ams pa med pa; C. nian wumie) 10. they do not regress in their concentration (s. nāsti samādhihāniḥ; T. ting nge ’dzin ny ams pa med pa; C. ding wumie) 11. they do not regress in their wisdom (S. nāsti prajñāhāniḥ; T. shes rab ny ams pa med pa; C. hui wumie) 12. they do not regress in their liberation (S. nāsti vimuktihāniḥ; T. rnam par grol ba ny ams pa med pa; C. jietuo zhijian wumie)

13. all their phy sical actions are preceded by gnosis and remain in conformity with gnosis (S. sarvakāy akarmajñānapūrvagamaṃ jñānānuparivarti; T. lus ky i las thams cad y e shes ky i sngon du ’gro shing y e shes ky i rjes su ’brang ba; C. y iqie sheny e sui zhihui xing) 14. all their verbal actions are preceded by gnosis and remain in conformity with gnosis (S. sarvavākkarmajñānapūrvagamaṃ jñānānuparivarti; T. ngag gi las thams cad y e shes ky i sngon du ’gro shing y e shes ky i rjes su ’brang ba; C. y iqie kouy e sui zhihui xing) 15. all their mental actions are preceeded by gnosis and remain in conformity with gnosis (S. sarvamanaḥkarmajñānapūrvagamaṃ jñānānuparivarti; T. y id ky i las thams cad y e shes ky i sngon du ’gro shing y e shes ky i rjes su ’brang ba; C. y iqie y iy e sui zhihui xing) 16. they enter into the perception of gnosis that is unobstructed and unimpeded with respect to the past (S. atīte ’dhvany asaṅgam apratihataṃ jñānadarśanaṃ pravartate; T. ’das pa’i dus la ma chags ma thogs pa’i y e shes gzigs par ’jug pa; C. zhihui zhi guoqushi wu’ai) 17. they enter into the perception of gnosis that is unobstructed and unimpeded with respect to the future (S. anāgate ’dhvany asaṅgam apratihataṃ jñānadarśanaṃ pravartate; T. ma ’ongs pa’i dus la ma chags ma thogs pa’i y e shes gzigs par ’jug pa; C. zhihui zhi weilaishi wu’ai) 18. they enter into the perception of gnosis that is unobstructed and unimpeded with respect to the present (S. praty utpanne ’dhvany asaṅgam apratihataṃ jñānadarśanaṃ pravartate; T. da ltar gy i dus la ma chags ma thogs pa’i y e shes gzigs par ’jug pa; C. zhihui zhi xianzaishi wu’ai)

TWENTIES twenty-eight classes of divinities. (S. deva; T. lha; C. tian)

SENSUOUS REALM (KAMADHĀTU): 1. four great kings (S. cāturmahārājakāy ika; T. rgy as chen rigs bzhi; C. siwang tian) 2. divinities of the thirty -three (S. trāy astriṃśa; T. sum cu rtsa gsum; C. daoli tian/sanshisan tian /) 3. free from conflict (S. y āma; T. ’thab bral; C. y emo tian) 4. contented (S. tuṣita; T. dga’ ldan; C. doushuai[tuo] tian []) 5. enjoy ment of creation (S. nirmāṇarati; T. ’phrul dga’; C. huale tian) 6. divinities who have power over the creations of others/divinities who partake of the pleasures created in other heavens (S. paranirmitavaśavartin; T. gzhan ’phrul dbang by ed; C. tahua zizai tian)

REALM OF SUBTLE MATERIALITY (RŪPADHĀTU):

FIRST DHYĀNA:

1. Brahmā’s retainers (S. brahmakāy ika; T. tshangs ris; C. fanzhong tian)

2. Brahmā’s ministers (S. brahmapurohita; T. tshangs pa mdun na ’don; C. fanfu tian)

3. Great Brahmā (S. mahābrahmā; T. tshangs pa chen po; C. dafan tian)

SECOND DHYĀNA 1. lesser radiance (S. parīttābha; T. ’od chung; C. shaoguang tian) 2. immeasurable radiance (S. apramāṇābha; T. tshad med ’od; C. wuliang guang tian) 3. ultimate radiance (S. ābhāsvara; T. ’od gsal; C. guangy in tian/jiguangjing tian /)

THIRD DHYĀNA

1. lesser purity (S. parīttaśubha; T. dge chung; C. shaojing tian)

2. immeasurable purity (S. apramāṇaśubha; T. tshad med dge; C. wuliangjing tian)

3. pervasive purity (S. śubhakṛtsna; T. dge rgy as; C. bianjing tian)

4. cloudless (S. anabhraka; T. sprin med; C. wuy un tian) 5. meritorious birth (S. puṇy aprasava; T. bsod nams ’phel; C. fusheng tian) 6. extensive fruition (S. bṛhatphala; T. ’bras bu che; C. guangguo tian 7. nonperception (S. asaṃjñisattva; T. ’du shes med pa’i lha; C. wuxiang tia n) [Note: This heaven is sometimes added to the list of seventeen heavens of the realm of subtle materiality and is included on this list for comprehensiveness.]

FOURTH DHYĀNA (THE FIVE PURE ABODES,, ŚUDDHĀVĀSA) 1. free from afflictions (S. avṛha; T. mi che ba; C. wufan tian) 2. without torment (S. atapa; T. mi gdung pa; C. wure tian) 3. perfect form (S. sudṛśa; T. gy a nom snang ba; C. shanxian tian) 4. perfect vision (S. sudarśana; T. shin tu mthong ba; C. shanjian tian) 5. highest (S. akaniṣṭha; T. ’og min; C. sejiujing tian)

IMMATERIAL REALM (ĀRŪPYADHĀTU) 1. infinite space (S. ākāśānanty āy atana; T. nam mkha’ mtha’ y as sky e mched; C. kong wubian chu tian) 2. infinite consciousness (S. vijñānānanty āy atana; T. rnam shes mtha’ y as sky e mched; C. shi wubian chu tian) 3. nothingness (S. ākiñcany āy atana; T. ci y ang med pa’i sky e mched; C. wusuoy ou chu tian) 4. neither perception nor nonperception (S. naivasamjñānāsamjñāy atana; T. ’du shes med ’du shes med min sky e mched; C. feixiang feifeixiang tian)

twenty varieties of the saṃ gha. (S. viṃśatiprabhedasaṃgha; T. dge ’dun ny i shu; C. ershi sengqie/shengwen cidi, /) 1. srotaāpanna (T. rgy un du zhugs pa; C. y uliu [guo]/xutuohuan []/) 2. one who takes up to seven existences (S. saptakṛdbhavaparama; T. re ltar thogs na srid pa lan bdun pa; C. jiqi fany ou) 3. one who goes from family to family (S. kulaṃkula; T. rigs nas rigs su

sky e ba; C. wang tianshang/jiajia /) 4. once-returner (S. sakṛdāgāmin; T. lan gcig phy ir ’ong ba; C. y ilai/situohan /) 5. one who has a single obstacle (S. ekavīcika; T. bar chad gcig pa; C. y ijian,) 6. non-returner (S. anāgāmin; T. phy ir mi ’ong ba; C. bu huan/bu lai/anahan / /) 7. one who achieves nirvāṇa in the intermediate

state (S. antarāparinirvāy in; T. bar ma dor y ongs su my a ngan las ’das ba; C. zhong ban/zhong banniepan /) 8. one who achieves nirvāṇa at birth (S. upapady aparinirvāy in; T. sky es nas y ongs su my a ngan las ’das ba; C. sheng ban/sheng banniepan /) 9. one who achieves nirvāṇa through effort (S. sābhisaṃskāraparinirvāy in; T. mngon par ’du by ed dang bcas pas y ongs su my a ngan las ’das ba; C. y ouxing ban/y ouxing banniepan /) 10. one who achieves nirvāṇa without effort (S. anabhisaṃskāraparinirvāy in; T. mngon par ’du by ed pa med par y ongs su my a ngan las ’das ba; C. wuxing ban/wuxing banniepan /) 11. one who goes higher/upstreamer (S. ūrdhvasrotas; T. gong du ’pho ba; C. shangliu ban/shangliu banniepan /) 12. bodily witness (S. kāy asākṣin; T. lus ky i mngon sum du by ed pa; C. shenzheng) 13. follower through faith (S. śraddhānusārin; T. dad pa’i rjes su ’brang ba; C. suixin xing) 14. follower through doctrine (S. dharmānusārin; T. chos ky i rjes su ’brang ba; C. suifa xing) 15. one who aspires through faith (S. śraddhādhimukta; T. dad pas lhag par mos pa; C. xinjie) 16. one who attains through seeing (S. dṛṣṭiprāpta; T. mthong bas thob pa; C. jianzhi/jiande /) 17. one who is liberated dependent upon a specific occasion (S. samay avimukta; T. dus dang sby or bar rnam par grol ba; C. shi jietuo) 18. one who is liberated regardless of occasion (S. asamay avimukta; T. dus

dang mi sby or bar rnam par grol ba; C. bushi jietuo) 19. one who is liberated through wisdom (S. prajñāvimukta; T. shes rab ky is rnam par grol ba; C. hui jietuo) 20. one who is liberated both way s (S. ubhay atobhāgavimukta; T. gny is ga’i cha las rnam par grol ba; C. ju jietuo)

THIRTIES thirty-two marks of a great man. (S. mahāpuruṣalakṣaṇa; T. sky es bu chen po’i mtshan sum bcu rtsa gny is/mtshan bzang so gny is; C. daren xiang) 1. his feet stand firmly on the ground (S. supratiṣṭhitapāda; T. zhabs shin tu gnas pa; C. zu shan anzhu xiang) 2. he has thousand-spoked wheels on the palms of his hands and the soles of his feet (S. cakrāṅkitahastapādatala; T. phy ag dang zhabs ky i mthil ’khor lo’i mtshan dang ldan pa; C. shouzu lunxiang) 3. the heels of his feet are broad (S. āy atapādapārṣṇi; T. zhabs ky i mthil rting pa y angs pa; C. zugen fuchang xiang) 4. he has long fingers (S. dīrghāṅguli; T. sor mo ring ba; C. xianzhang zhi xiang) 5. his hands and feet are smooth (S. mṛdutaruṇahastapāda; T. phy ag dang zhabs ky i mthil ’jam shing gzhon sha chags pa; C. shouzu xiruan xiang) 6. his hands and feet are webbed (S. jālahastapāda; T. phy ag dang zhabs dra bas ’brel ba; C. shouzu wangman xiang) 7. his legs are long [alt. his ankles are not prominent] (S. utsaṅgapāda; T. zhabs ky i long bu mi mngon pa; C. zufu gaoman xiang) 8. he has thighs like an antelope (S. aiṇey ajaṅgha; T. by in pa ri dwags e na y a’i ’dra; C. y iniy e chuai xiang) 9. his arms extend below the knees (S. sthitānavanata-pralambabāhu; T. bzhengs bzhin du ma btud par phy ag pus mor slebs pa; C. lishou moxi xiang) 10. his penis is retracted (S. kośopagata-vastiguhy a; T. ’doms ky i sba ba sbubs su nub pa; C. shifeng zangmi xiang)

11. his brow is broad and even (S. samalalāta; T. dpral ba’i dby es mny ams pa; C. e guangping qi) 12. his skin is smooth and golden (S. sūkṣmasuvarṇacchavi; T. pags pa srab cing mdog gser ’dra ba; C. pifu xihua xiang) 13. he has one hair in each pore of his body (S. ekaikaroma; T. spu re re nas sky es shing g.y as su ’khy il ba; C. shenzhu maokong y iy i maosheng xiang) 14. the hairs of his body stand erect (S. ūrdhvāgraroma; T. sku’i spu gy en du phy ogs pa; C. shenmao shangmi xiang) 15. his thighs are well rounded (S. suvartitoru; T. brla legs par zlum pa; C. tui meiy uan xiang) 16. the seven parts of his body are well-proportioned (S. saptotsada; T. bdun mtho ba; C. qichu jieman xiang) 17. the upper part of his body is like a lion’s (S. siṃhapūrvārdhakāy a; T. ro stod seng ge’i ’dra ba; C. shen shang ban ru shiziwang xiang) 18. he has broad shoulders (S. citāntarāṃsa; T. thal gong rgy as pa; C. bojian chongshi xiang) 19. his body and limbs are perfectly proportionate and thus shaped like a fig tree (S. ny agrodhaparimaṇḍala; T. shing ny a gro dha ltar chu zheng gab pa; C. shenxiang y uanman runuojutuo) 20. he has full, round shoulders (S. susaṃvṛttaskandha; T. dpung mgo shin tu zlum pa; C. jianshan y uanman xiang) 21. he has an excellent sense of taste (S. rasarasāgra; T. ro bro ba’i mchog dang ldan pa; C. y u zhuwei zhong de zui shangwei) 22. he has a jaw like a lion’s (S. siṃhahanu; T. ’gram pa seng ge’i ’dra ba; C. han ru shizi xiang) 23. he has forty teeth (S. catvāriṃśaddanta; T. tshems bzhi bcu mnga’ ba; C. jusishichi) 24. his teeth are even (S. samadanta; T. thems mny am pa; C. chi qiping) 25. his teeth are evenly spaced (S. aviraladanta; T. tshems thags bzang ba; C. chi wuxi) 26. his teeth are white (S. suśukladanta; T. tshems shin tu dkar ba; C. chi xianbai) 27. his tongue is long and broad (S. prabhūtatanujihva; T. ljags shin tu ring zhing srab pa; C. she guangbo)

28. his voice is like Brahmā’s (S. brahmasvara; T. tshangs pa’i dby angs; C. da fany in) 29. his ey es are deep blue with ey elashes like a bull (S. abhinīlanetragopakṣma; T. spy an mthon mthing la ba’i rdzi ma lta bu; C. mu ganqing jie ru niuwang) 30. he has a white tuft of hair between his ey ebrows (S. ūrṇākeśa; T. mdzod spu; C. meijian baihao xiang) 31. the hair on his head turns to the right (S. pradakṣiṇāvarttakeśa; T. dbu skra g.y as su ’khy il ba; C. toufa y ouxuan) 32. he has a protrusion on the crown of the head (S. uṣṇīṣaśīrṣa; T. dbu gtsug tor dang ldan pa; C. dingshang xian wusenisha)

thirty-seven wings of enlightenment/factors pertaining to awakening. (S. bodhipākṣikadharma; T. by ang chub ky i phy ogs ky i chos; C. daopin/puti fen /) 1. four applications of mindfulness (S. smṛty upasthāna; T. dran pa ny e bar bzhag pa bzhi; C. si nianchu) 2. four right efforts (S. samy akpradhāna/samy akprahāṇa; T. y ang dag par spong ba bzhi; C. si zhengqin) 3. four bases of psy chic power (S. ṛddhipāda; T. rdzu ’phrul gy i rkang pa bzhi; C. si shenzu/si ruy i zu /) 4. five [spiritual] faculties/dominants (S. indriy a; T. dbang po lnga; C. wugen) 5. five powers (S. bala; T. stobs lnga; C. wuli) 6. seven factors of enlightenment (S. bodhy aṅga; T. by ang chub y an lag bdun; C. qi puti fen/qi juezhi /) 7. eightfold [noble] path (S. āry āṣṭāṅgamārga; T. ’phags lam y an lag brgy ad; C. ba zhengdao)

FIFTIES fifty-one/fifty-two mental concomitants. (S. caitta; P. cetasika; T. sem by ung lnga bcu rtsa gcig; C. xin suoy ou fa). See EIGHTY-TWO DHAMMAS OF THE STHAVIRANIKĀYA/THERAVĀDA SCHOOL; ONE-HUNDRED DHARMAS OF THE YOGĀCĀRA SCHOOL.

SEVENTIES seventy-five dharmas of the Sarvāstivāda school. (S. pañcasaptatidharma; T.
chos don lnga; C. qishiwu fa)
1. eleven material factors (S. rūpa; T. gzugs; C. sefa)
1. visual faculty (S. cakṣurindriy a; T. mig gi dbang po; C. y angen
)
2. auditory faculty (S. śrotrendriy a; T. rna ba'i dbang po; C. ergen
)
3. olfactory faculty (S. ghrāṇendriy a; T. sna'i dbang po; C. bigen
)
4. gustatory faculty (S. jihvendriy a; T. lce'i dbang po; C. shegen
)
5. tactile faculty (S. kāy endriy a; T. lus ky i dbang po; C. shengen
)
6. visual objects (S. rūpa; T. gzugs; C. se)
7. sound (S. śabda; T. sgra; C. sheng)
8. scent (S. gandha; T. dri; C. xiang)
9. flavor (S. rasa; T. ro; C. mei)
10. contact (S. spraṣṭavy a; T. reg by a; C. chu)
11. unmanifest materiality (S. avijñaptirūpa; T. rnam par rig by ed ma y in pa'i gzugs; C. wubiao se)
2. mind (S. citta; T. sems; C. xinwang)
3. forty -six mental concomitants (S. caitta; T. sems by ung; C. xin suoy ou fa
)
1. ten omnipresent mental factors (S. mahābhūmika; T. sems ky i sa mang; C. dadi fa
)
1. sensation (S. vedanā; T. tshor ba; C. shou)
2. perception (S. saṃjñā; T. 'du shes; C. xiang)
3. volition/intention (S. cetanā; T. sems pa; C. si)
4. sensory contact (S. sparśa; T. reg pa; C. chu)
5. zeal/desire-to-act (S. chanda; T. 'dun pa; C. y u)
6. discernment (S. mati; T. shes rab; C. hui)
7. mindfulness/memory (S. smṛti; T. dran pa; C. nian) 8. attention (S. manaskāra; T. y id la by ed pa; C. zuoy i) 9. determination (S. adhimokṣa; T. mos pa; C. shengjie)
10. concentration (S. samādhi; T. ting nge 'dzin; C. ding) 2. ten omnipresent wholesome factors (S. kuśalamahābhūmika; T. dge ba'i sa mang; C. da shan di fa)

1. faith (S. śraddhā; T. dad pa; C. xin) 2. heedfulness/vigilance (S. apramāda; T. bag y od pa; C. bu fangy i) 3. tranquillity /serenity (S. praśrabdhi; T. shin tu sby angs pa; C. [qing] an []) 4. equanimity (S. upekṣā; T. btang sny oms; C. xingshe) 5. shame/decency /propriety (S. hrī; T. ngo tsha shes pa; C. can) 6. fear of blame/modesty (S. apatrāpy a; T. khrel y od pa; C. kui) 7. absence of craving (S. alobha; T. ma chags pa; C. wu tan) 8. absence of ill-will (S. adveṣa; T. zhe sdang med pa; C. wu chen) 9. absence of harmful intentions (S. avihiṃsā; T. rnam par mi ’tshe ba; C. bu hai) 10. effort/vigor (S. vīry a; T. brtson ’grus; C. qin/jingjin /) 3. six omnipresent afflicted factors (S. kleśamahābhūmika; T. ny on mongs chen po’i sa mang; C. da fannao di fa) 1. delusion (S. moha; T. ma rig pa; C. chi) 2. heedlessness (S. pramāda; T. bag med pa; C. fangy i) 3. lassitude (S. kausīdy a; T. le lo; C. xiedai) 4. lack of faith (S. āśraddhy a; T. ma dad pa; C. bu xin) 5. sloth (S. sty āna; T. rmugs pa; C. [hun]shen []) 6. restlessness (S. auddhaty a; T. rgod pa; C. diaoju) 4. two major omnipresent unwholesome factors (S. akuśalamahābhūmika; T. mi dge ba’i sa mang; C. da bushan di fa) 1. lack of shame/decency /propriety (S. āhrīky a; T. ngo tsha med pa; C. wucan)

2. lack of fear of blame/lack of modesty (S. anapatrāpy a; T. khrel med pa; C. wukui) 5. ten minor afflicted factors of wide extent (S. parīttakleśabhūmika; T. ny on mongs chung ngu’i sa mang; C. xiao fannao di fa) 1. anger (S. krodha; T. khro ba; C. fen) 2. disparagement/hy pocrisy /concealing (S. mrakṣa; T. ’chab pa; C. fu) 3. selfishness/stinginess (S. mātsary a; T. ser sna; C. qian) 4. envy (S. īrṣy ā; T. phrag dog; C. ji) 5. vexation (S. pradāśa; T. ’tshig pa; C. nao) 6. hostility (S. vihiṃsā; T. rnam par ’tshe ba; C. hai) 7. enmity /resentment (S. upanāha; T. ’khon ’dzin; C. hen) 8. deception (S. śāṭhy a; T. g.y o; C. chan) 9. deceit (S. māy ā; T. sgy u; C. kuang) 10. arrogance (S. mada; T. rgy ags pa; C. jiao) 6. eight indeterminate mental factors (S. aniy ata; T. gzhan ’gy ur; C. buding) 1. applied thought (S. vitarka; T. rtog pa; C. xun) 2. sustained thought (S. vicāra; T. dpy od pa; C. si) 3. worry (S. kaukṛty a; T. ’gy od pa; C. ezuo) 4. torpor (S. middha; T. gny id; C. shuimian) 5. sensuality (S. rāga; T. ’dod chags; C. tan) 6. hatred (S. pratigha; T. khong khro; C. chen) 7. pride (S. māna; T. nga rgy al; C. man) 8. skeptical doubt (S. vicikitsā; T. the tshom; C. y i) 4. fourteen conditioned forces dissociated from thought (S. cittavipray uktasaṃskāra; T. ldan min ’du by ed; C. xin bu xiangy ing xing fa) 1. possession (S. prāpti; T. ’thob pa; C. de) 2. nonpossession (S. aprāpti; T.’thob pa med pa; C. feide) 3. homogeneity (S. sabhāgatā/nikāy asabhāga; T. rigs ’thun pa; C. zhong tongfen) 4. state of nonperception (S. āsaṃjñika; T. ’du shes med pa; C. wuxiang guo/wuxiang bao/wuxiang shi //) 5. equipoise of nonperception (S. asaṃjñāsamāpatti; T. ’du shes med pa’i

sny oms ’jug; C. wuxiang ding) 6. equipoise of cessation (S. nirodhasamāpatti; T. ’gog pa’i sny oms ’jug; C. mie jin ding) 7. vitality (S. jīvitendriy a; T. srog gi dbang po; C. ming gen) 8. origination/birth (S. jāti; T. sky e ba; C. sheng) 9. continuance/maturation (S. sthiti; T. gnas pa; C. zhu) 10. senescence/decay (S. jarā; T. rga ba; C. y i/lao /) 11. desinence/extinction (S. anity atā; T. mi rtag pa; C.

mie/wuchang /) 12. name set (S. nāmakāy a; T. ming gi tshogs; C. ming shen) 13. phrase set (S. padakāy a; T. tshig gi tshogs; C. ju shen) 14. sy llable set (S. vy añjanakāy a; T. y i ge'i tshogs; C. wen shen) 5. three uncompounded factors (S. asaṃskṛta; T. 'dus ma by as ky i chos; C. wuwei [fa] []) 1. space (S. ākāśa; T. nam mkha'; C. xukong) 2. analy tical cessation (S. pratisaṃkhy ānirodha; T. so sor brtags 'gog pa; C. zemie) 3. nonanaly tical suppression (S. apratisaṃkhy ānirodha; T. so sor brtags min gy i 'gog pa; C. feizemie)

EIGHTIES eighty secondary marks [of a mahāpuruṣ a]. (S. anuvy añjana; T. dpe by ad bzang po; C. bashi zhong hao) 1. copper-colored nails (S. ātāmranakhaḥ; T. sen mo zangs ky i mdog lta bu; C. zhizhao hongtong xiang/zhizhao chitong se /) 2. glossy nails (S. snigdhanakhaḥ; T. sen mo mdog snum pa; C. zhise huaze) 3. raised nails (S. tuṅganakhaḥ; T. sen mo mtho ba; C. zhizhao gao) 4. rounded fingers and toes (S. vṛttāṅguliḥ; T. sor mo rnams zlum pa; C. zhuzhi y uanxiang/zhichang xiany uan /) 5. tapered fingers and toes (S. anupūrvāṅguliḥ; T. sor mo by in gy is phra ba; C. zhuzhi xirou (xiang)/zhuzhi jianxi ()/) 6. full fingers and toes (S. citāṅguliḥ; T. sor mo rnams rgy as pa; C. zhuzhi

fang/y a pingzheng /) 57. tapered canine teeth (S. anupūrvadaṃṣṭraḥ; T. mche ba by in gy is phra ba; C. y a jianxi) 58. high nose (S. tuṅganāsaḥ; T. shangs mtho ba; C. bi gao/bikong buxian /) 59. clean nose (S. śucināsaḥ; T. shangs gtsang pa; C. bi qingjing) 60. clear ey es (S. viśuddhanetraḥ; T. spy an rnam par dag pa; C. mu qingjing) 61. wide ey es (S. viśālanetraḥ; T. spy an y angs pa; C. mu guang) 62. thick ey elashes (S. citrapakṣmāḥ; T. rdzi ma stug pa; C. y anmao meihao) 63. the iris and sclera of his ey es contrast like the petals and stamen of a blue lotus (S. sitāsitakamaladalaśakalanay anaḥ; T. spy an dkar nag ’by es shing pad ma’i ’dab ma’i mdangs pa lta bu; C. mu heibai fenqingmei ru lianhua xingxiang/mu heibai mei ru lianhua xingxiang /) 64. long ey ebrows [like a y oung crescent moon] (S. āy atabhrūḥ; T. smin tshugs ring ba; C. meimao xiuchang/mei ru chuy ue /) 65. soft ey ebrows (S. ślakṣṇabhrūḥ; T. smin ma ’jam pa; C. shuangmei nenruan) 66. ey ebrows with even hairs (S. samaromabhrūḥ; T. smin ma spu mny am pa; C. meimao pingqi) 67. lustrous ey ebrows (S. snigdhabhrūḥ; T. smin ma snum pa; C. meimao run) 68. full and long ears (pīnāy atakarṇaḥ; T. sny an shal stug cing ring ba; C. er hou xiuchang) 69. even ears (S. samakarṇaḥ; T. sny an mny am pa; C. er qiping) 70. unimpaired sense of hearing (S. anupahatakarṇendriy aḥ; T. sny an gy i dbang po ma ny ams pa; C. ergen pingjun) 71. well-developed forehead (S. supariṇatalalāṭaḥ; T. dpral ba legs par dby es pa; C. e guang y uanman) 72. broad forehead (S. pṛthulalāṭaḥ; T. dpral ba dby es che ba; C. e kuan pingzheng) 73. large head (S. suparipūrṇa-uttamāṅgaḥ; T. dbu shin tu rgy as pa; C. tou ru motuona guo) 74. hair on the head is black as a bee (S. bhramarasadṛśakeśaḥ; T. dbu skra bung ba ltar gnag pa; C. fa se ganqing ru fengwang)

75. thick hair on the head (S. citakeśaḥ; T. dbu skra stug pa; C. fa mei) 76. soft hair on the head (S. ślakṣṇakeśaḥ; T. dbu skra ’jam pa; C. fa nenruan) 77. hair on the head is not disheveled (S. asaṃlulitakeśaḥ; T. dbu skra ma ’dzings pa; C. fa buluan) 78. hair on the head is not rough (S. aparuṣakeśaḥ; T. dbu skra mi gshor ba; C. shoufa zhengqi) 79. fragrant hair on the head (S. surabhikeśaḥ; T. dbu skra dri zhim pa; C. shoufa xiangfu) 80. hands and feet are adorned with such auspicious sy mbols as the śrīvatsa [endless knot]; svastika [swastika]; and nandy āvarta [elaborated swastika form] (S. śrīvatsasvastikanandy āvartalalitapāṇipādaḥ; T. phy ags dang zhabs dpal gy i be’u dang bkra shis g.y ung drung ’khy il bas brgy an pa; C. shouzu y ouru xiangdu jiangu/shouzu jixiang dexiang miaohao juzu /)

eighty-two dhammas of the *Sthaviranikāya/Theravāda school.

1. twenty -eight material factors (P. rūpa)

1. four primary elements (P. mahābhūta)

1. earth/solidity (P. paṭhavī[dhātu])

2. water/cohesion (P. āpo[dhātu])
3. fire/heat (P. tejo[dhātu])
4. air/mobility (P. vāy o[dhātu])
2. twenty -four ty pes of derived materiality (P. upādārūpa)
1. ey e/visual faculty (P. cakkhu)
2. ear/auditory faculty (P. sota)
3. nose/olfactory faculty (P. ghāna)
4. tongue/gustatory faculty (P. jivhā)
5. body /tactile faculty (P. kāy a)
6. visual objects (P. rūpa)
7. sound (P. sadda)
8. scent (P. gandha)
9. flavor (P. rasa)
10. femininity (P. itthindry a)
11. masculinity (P. purisindriy a)
12. [phy sical] vitality /life-force (P. jīvita, [rūpa]jīvitindriy a)
13. heart [as the phy sical basis of mentality] (P.
haday a[vatthu])
14. bodily intimation (P. kāy aviññatti)
15. verbal intimation (P. vacīviññatti)
16. limitation/space element (P. pariccheda, ākāsadhātu)
17. lightness/buoy ancy (P. lahutā)
18. malleability (P. mudutā)
19. wieldiness (P. kammaññatā)
20. birth/development (P. upacay a)
21. continuity (P. santati)
22. senescence/decay (P. jaratā)
23. desinence/extinction/impermanence (P. aniccatā)
24. nutriment (P. āhāra)
2. mind (citta)
1. mind/consciousness/mentality (P. citta, viññāṇa, manas)
3. fifty -two mental concomitants (P. cetasika)
1. thirteen morally indeterminate (P. avy ākata)
1. seven general/universal (P. sabbacittasādhāraṇa)
1. contact (P. phassa)
2. sensation (P. vedanā)
3. perception (P. saññā)
4. intention (P. cetanā)
5. one-pointedness (P. ekaggatā)

6. [mental] vitality /life-force (P. jīvita, [nama]jīvitindriy a)
7. attention (P. manasikāra)
2. six secondary (P. pakiṇṇaka)
1. applied thought (P. vittaka)
2. sustained thought (P. vicāra)
3. determination/resolution (P. adhimokkha)
4. energy (P. viriy a)
5. rapture (P. pīti)
6. zeal (P. chanda)
2. twenty -five wholesome (P. kusala)
1. nineteen sobhanasādhāraṇa (universal splendid mental factors)
1. faith/confidence (P. saddhā)
2. mindfulness (P. sati)
3. shame/propriety /decency (P. hiri)
4. fear of blame/modesty (P. ottappa)
5. nongreed (P. alobha)
6. nonhatred (P. adosa)
7. equanimity (P. tatramajjhattatā)
8. tranquillity of mental body (P. kāy apassaddhi)
9. tranquillity of consciousness (P. cittapassaddhi)
10. lightness of mental body (P. kāy alahutā)
11. lightness of consciousness (P. cittalahutā)
12. malleability of mental body (P. kāy amudutā)
13. malleability of consciousness (P. cittamudutā)
14. wieldiness of mental body (P. kāy akammaññatā)
15. wieldiness of consciousness (P. cittakammaññatā)
16. proficiency of mental body (P. kāy apāguññatā)
17. proficiency of consciousness (P. cittapāguññatā)
18. rectitude of mental body (P. kāy ujjukatā)
19. rectitude of consciousness (P. cittujjukatā)
2. three abstinences (virati)
1. abstinence from phy sical misconduct (P. kāy aduccaritavirati); alt.
right action (P. sammākammanta)
2. abstinence from verbal misconduct (P. vacīduccaritavirati); alt.
right speech (P. sammāvācā)
3. abstinence from mental misconduct (P. manoduccaritavirati); alt.
abstinence from wrong livelihood (P. ājīvaduccaritavirati), viz.
right livelihood (P. sammājīva)
3. two illimitables (appamaññā)

1. compassion (P. karuṇā)
2. empathetic joy (P. muditā)
4. one wisdom faculty (P. paññindriy a)
1. wisdom (P. paññā)
3. fourteen unwholesome (P. akusala)
1. delusion (P. moha)
2. lack of shame or lack of decency (P. ahirika)
3. lack of fear of blame or lack of modesty (P. anottappa)
4. restlessness (P. uddhacca)
5. greed (P. lobha)
6. wrong view (P. diṭṭhi)
7. pride/conceit (P. māna)
8. hatred (P. dosa)
9. envy (P. issā)
10. selfishness/stinginess (P. macchariy a)
11. worry /remorse (P. kukkucca)
12. sloth (P. thīna)
13. torpor (P. middha)
14. skeptical doubt (P. vicikicchā)
4. uncompounded (P. asaṅkhata)
1. nirvāṇa (P. nibbāna)
eighty-four mahāsiddhas. (T. grub thob brgy ad bcu rtsa bzhi)

When the Tibetan is not provided, the Tibetan typically transliterates the Indic name.
